Miles shifts stress for vitamin surge

By JENNIFER ALTER

Squeezed by strong activity from advertised brands of vitamins on one side and tremendous growth in natural vitamins on the other, Miles Laboratories is preparing to strike back.

In one fell swoop this winter, the Elkhart, Ind.-based marketer will rise to protect its 40-year-old vitamin franchise by repackaging and repositioning its One A Day line under the umbrella theme, "Putting nutrition to work for your body."

At the same time it will launch Stressgard, its first entry in the fast-growing stress area, strengthen its mineral product to make it viable in the high-potency segment and change the name of its 1-year-old Core C 500 to clarify its vitamin C properties. It also plans to rename its mainstay item, One A Day Multiple Vitamins, as One A Day Essential; that change will be gradual as inventory depletes.

A spokeswoman for Miles said the revamp is an attempt "to strengthen the brand and demonstrate we are at the forefront of nutritional science." She said the packaging is designed "to better differentiate our products" as a group.

With the adoption of the new advertising theme, scheduled to break next March 15 with a budget of $10,000,000 in network tv and con-

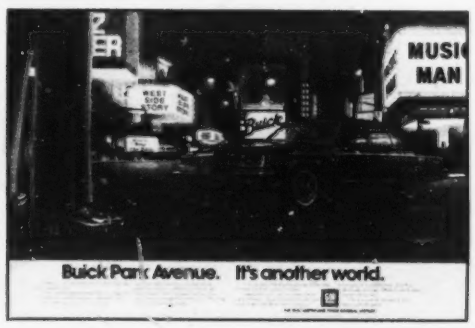
GM's beautiful Americans

"There's a certain feeling you can experience only in an American car," states the theme ad (l.) from General Motors, set to run throughout Europe, Japan, the Middle East and Latin America. Magazines are the major medium in the export push, with ads from McCann-Erickson depicting the "American mystique."



GM selling U.S. in major export push

By RALPH GRAY

DETROIT—Tiny General Motors will toddle into battle against the international auto giants with an export car campaign.

In a reversal of roles, GM will step up efforts to become an import car company to Europe, the Middle East, the Far East, Latin America and Japan, where it is just another import brand. GM ranks eighth in worldwide sales behind Toyota, Nissan, Ford, Fiat, Renault and others. The export move is in addition to GM's indigenous overseas operations.

"We are starting there where they started here—in a fringe market," said Gary Spedoske, associate creative director of McCann-Erickson, Troy. McCann is the agency for GM's recently formed North American Vehicles Overseas division (NAVO).

It's the old idea of foreign mystique turned around, said Dorien Sutherland, account director. Both Mr. Spedoske and Mr. Sutherland are veteran McCann overseas hands. Gerald Atkin, former McCann exec on Opel in Germany and GM in Latin America, is exec vp and general manager on the account.

"A foreign product generates a certain appeal. We're doing the same thing the imports did here. It's a minority appeal at both ends of the Atlantic," Mr. Sutherland said.

"Worldwide, GM has a share of the market similar to what Peugeot has in America. GM is a small company outside North America," Mr. Spedoske noted with some exaggeration. Peugeot has 0.08% of the U.S. market against GM's goal of 1% of Europe for NAVO.

▪ The export of American-built cars is consistent with GM's idea of world cars, said Ronald G. Royer, assistant general sales manager of NAVO.

"We're a world car going the other way, but it's still part of the same world car concept," he added. That idea is to source cars and components at their best geographical sites. GM's bigger cars are made in America.

The fact of U.S. manufacture is at the heart of GM's strategy. "We must convey the idea that the purchase of an American car is the buying of a facet of the American way of life," Mr. Sutherland said.

PLAN THREATENS SUPERSTATIONS

Turner, CATA fight bill

By MAURINE CHRISTOPHER

Community Antenna TV Assn., Turner Broadcasting System, independent catv operators and satellite resale carriers are putting together a coalition, hoping to sidetrack proposed legislative copyright revisions advanced by the giants of tv, cable and movies.

TBS chairman Ted Turner and Stephen Effros, executive director of CATA, warned that the move to reestablish syndication exclusivity protection—on a much broader basis than the old top 50 market rule—could dim, if not doom, the future for superstationing.

Gill Cable's Allen Gilliland, chairman of the National Cable TV Assn., disagreed and said the "compromise" plan would allow local systems to import an unlimited number of distant (over-the-air) signals if they wished.

He said the revisions hammered out with the National Assn. of Broadcasters and the Motion Picture Assn. of America staved off "much worse" changes from chairman Robert Kastenmeier (D., Wis.) of the House judiciary subcommittee.

As sketched out in their recommendations, the new bill would give the MPAA its syndie curbs, NAB its cable must-carry rules written into the law and NCTA its current complicated procedure for paying producers for shows picked up from tv stations. Large systems pay less than 1% of their gross revenues into the copyright pot; altogether that figure now runs about $20,000,000 a year.

Both Mr. Effros and Mr. Turner emphasized the public service aspects of this red hot controversy. Some critics of the recommended revisions think they could have the effect of blacking out a good deal of the U.S. from Satcom I-fed movies and syndication series from superstations WTBS, At-

last minute news

Armour slates review after split with Y&R

PHOENIX—Armour has split with Y&R on processed meats and will conduct a review. Dailey, Chiat/Day and Bozell have been contacted and other agencies will be asked to compete. Ad spending estimated at $5,000,000-plus by Armour, $3,200,000 by Y&R, which had the account for 20 years and declined to compete when parent Greyhound Corp. chief John W. Teets called for the review.

Dodgers also win in ratings

By JAMES P. FORKAN

NEW YORK—CBS-TV and ABC-TV execs could share the Los Angeles Dodgers' thrill of victory as their own Nielsen World Series went midway through the fourth week of the new tv season.

NBC top brass, on the other hand, could easily empathize with the New York Yankees' agony of defeat.

Week 4 of the fall season saw CBS and ABC split the first two nights last week. Oct. 26 numbers, in fact, showed all three nets in "a real dogfight," as an ABC official put it, with his network tying NBC for second with a 21 homes rating and CBS winning narrowly with a 21.4. CBS owed its Monday edge to the return of "M*A*S*H" and slight gains by "Private Benjamin" and "The Two of Us."

NBC's "Little House on the Prairie" won the opening Monday hour, as ABC's "That's Incredible" lost, but the night evened out as

She's been left with a mint . . . soft mint

A first-ever television campaign for Luden's Mellomint, a chocolate covered peppermint patty with a soft center, is airing on prime time and in early and late fringe in selected markets. The 30-second commercials by Geers Gross feature a series of vignettes involving puns about the "mint."

Libby sees break in Tang hold

By JANET NEIMAN

CHICAGO—Libby, McNeill & Libby is projecting that it will expand the $117,000,000 orange breakfast drink market with its new Daybreak drink mix, but industry observers believe the product is more likely to threaten what one called "the vulnerable position" of General Foods' Tang.

Daybreak, unlike the other major products in the category, contains 10% real orange juice—a claim that is certain to be prominent in print and tv advertising that is expected to start later this year. The product, packed in 18 and 27-oz. glass jars, is rolling national, beginning in the Midwest.

Tang for years has been the undisputed category leader, with 85% of the market. Borden's Orange Burst—testing in Cleveland and Kansas City—and Borden Instant Breakfast Drink hold a combined 2.2% share, while private label products, including generics, pull about 11.8%.

A Libby spokeswoman said the company expects Daybreak to enlarge the orange breakfast drink mix category "by attracting consumers who are looking for a more natural alternative."

But, priced competitively against Tang, Daybreak and its 10% real juice content would be more apt to divert market shares from the General Foods product than from real orange juice.

With the exception of Borden's minimal headway into the category, most other companies have been unsuccessful in their challenges to Tang. In the early '70s, for example, Kellogg tested Rise 'n

Sudler & Hennessey expands

Arthur Rosen (l.), formerly at Grey Advertising, and Hanno Fuchs (r.) from Young & Rubicam, will be the key execs in Sudler & Hennessey's new consumer group. Welcoming them is Matthew Hennessey, chairman of S&H, the No. 1 healthcare agency.

Ethical leader adds otc unit

By CHRISTY MARSHALL

NEW YORK—When a pharmaceutical company client decides to take its prescription drug over-the-counter, Sudler & Hennessey, the world's largest healthcare agency, no longer will automatically lose the business to a consumer shop. Sudler & Hennessey has opened a consumer group to handle the booming otc category.

Arthur Rosen, a former vp-group management supervisor at Grey Advertising, has been named exec vp-managing director of the new S&H Consumer Group, and Hanno Fuchs has been lured away from parent company Young & Rubicam to be the group's senior vp-group creative director. Although most recently employed at Grey, Mr. Rosen also worked at Y&R with Mr. Fuchs.

The consumer group opens with four assignments from Parke-Davis and a project assignment from Ciba Proprietary, a division of Ciba-Geigy. Mr. Rosen estimated capitalized billings at the outset are in the $15,000,000 range. The new S&H Consumer Group also has landed a new account—a piece of business the execs declined to disclose.

■ With the addition of S&H Consumer Group, Matthew J. Hennessey, chairman-ceo of Sudler & Hennessey, predicts the S&H family will bill $100,000,000 by the end of 1982. The agency consists of three U.S. offices (two in New York, one in Chicago) and six offices overseas.

The decision to add consumer to its capabilities is a direct result of

Unit sale denied by ABC

By STUART EMMRICH

NEW YORK—Official denials aside, the magazine industry is being peppered with rumors that the departure of Seth Baker from ABC Publishing is the first concrete sign that the parent company might be looking to get out of the print business.

Although speculation among analysts is that any number of suitors could approach ABC about a possible $175,000,000 to $200,000,000 sale, one potential buyer often mentioned is International Thomson Business Press, where former Chilton exec Richard Groves is now in charge. Chilton Publishing is a division of ABC.

■ But any talk of discussions between Thomson and ABC is being soundly denied by both sides.

"It is completely untrue," ABC said about the acquisition rumor. "We have just sent a memo to our presidents telling them that whatever they are reading is a lot of bunk. The division is not for sale."

A Thomson official agreed that there had been no contact between the two companies.

Fifty top retailers spend $3.8 billion in advertising

BY LOUIS J. HAUGH

The nation's 50 leading retailers invested $3.8 billion in advertising and promotion in 1980, an increase of 7.2% over 1979. At the same time, their sales climbed to $185.6 billion, a 9.1% jump over the previous year.

The figures underscore a degree of caution displayed by these 50 companies—25 general merchandisers and 25 supermarket operations. Compared with 1979, when advertising increases outpaced sales increases, the advertising-to-sales ratio dipped for general merchandisers during the year, while the ratio for supermarkets remained constant for the third consecutive year.

Some experts believe that these giant retailers were caught in a profit squeeze because of inflation and chose to increase their ad outlays judiciously.

■ The figures cited here were obtained in a survey of the 50 companies, as well as from various trade and industry sources. Last year's survey, conducted in a similar manner, showed that the top retailers spent $3.5 billion in advertising in 1979, as sales reached the $169 billion level.

In 1980, 11 of the top 50 invested more than $100,000,000 in advertising. In terms of sales, 41 of them recorded more than $1 billion. These companies are giant advertisers. Eleven of the top 50 retailers invest more than $100,000,000 in advertising annually.

Because the bulk of these retailers' advertising is in local media, most of them were not profiled in the 100 Leading National Advertisers issue of Advertising Age (Sept. 10). Sears, Roebuck & Co., K mart Corp. and J.C. Penney Co. are No. 2, No. 5 and No. 45, respectively, among the leading national spenders. Yet 24 of the other retailers invested more in total advertising than Mazda Motors of America, the 100th largest national advertiser.

Among the top 25 general merchandisers, sales last year were up $8.4 billion or 9.5%, over 1979 and advertising outlays were up 6.7% to $178,917,000. Sales totaled $97.2 billion, and the advertising-to-sales ratio was 2.9%, down from 3.02% in 1979. It was still higher than the 2.8% recorded in 1978, but that year's figure was generally regarded as the exception. In 1978, Sears drastically reduced its ad expenditures.

■ The leader among the general merchandise spenders was Sears, which reduced its national and local spending by 1.5% to $707,900,000 last year. Also cutting back last year was troubled Montgomery Ward & Co., a unit of Mobil Corp. Ward's reduced its ad outlays by an estimated 10% to $180,000,000.

K mart, meanwhile, increased its ad spending by 8.2% to $319,300,000. J.C. Penney recorded a 15.2% increase to $320,200,000, and Federated Department Stores came in with an 8.5% increase to $188,800,000.

Among the leading supermarkets during 1980, sales increased by 8.4%, or $7.3 billion, to a total of $87.4 billion, as advertising increased by 8.9%, or $73,287,000, to $892,700,000.

The advertising-to-sales ratio for these supermarkets continued at 1.92%, although their profits were under sustained economic pressure.

■ Each of the top five supermarket chains reported increased advertising outlays. The No. 1 supermarket spender, Safeway Stores, increased its spending to $151,026,000, up 10.6% over the year earlier.

Other leading spenders were Kroger Co., up 11.9% to $120,873,000; Great Atlantic & Pacific Tea Co., $88,000,000, up 14.3%; American Stores Co., $70,000,000, up 4.5%; and Lucky Stores, $47,827,000, up 11.2%.

The top five supermarket operations outpaced the rest of their category by increasing ad spending an average of 10.5% on sales increases that averaged 9.1%. The leading five general merchandisers, however, lagged behind the rest of their category, as their ad outlays increased an average of 4.2% on sales increases averaging 6.1%.#

Pacesetters are up, down and all around

BY LOUIS J. HAUGH

Spotting trends among the top retailers in the U.S. is a difficult, if not dicey, exercise. These giant companies, faced by increased costs and consumer resistance to higher prices, have reacted in widely divergent ways.

What is clear, at least among general merchandisers, is that continued consumer spending and confidence has buoyed sales. Among supermarket operations, the consumer has, in some instances, traded down, reflecting these companies' decisions to offer "no frills" or generic items. But even these general observations are subject to debate.

In the supermarket category, a slow-growth business at best, a new breed of high price stores have reported impressive sales gains in the face of an over-all industry trend in recent years to no-frills.

■ In Chicago, for example, the Dominick's chain has promoted higher price food brands and personal service. The division of Fisher Foods was sold back to its former owner earlier this year after it generally outpaced its parent in sales growth and profit.

Chains in places such as St. Louis, Cedar Rapids, Ia., and New York have also successfully promoted the higher price end of the market.

Their stores carry more items and have fancy and imported gourmet selections.

Other food store operations are reacting with more special departments and more services. For example, Shopwell Inc., New York, and Stop & Shop Cos., Boston, have both added special shops such as bakery, flower, butcher, deli or fancy produce.

■ One key to measuring food store performance is the number of turns the inventory takes during the year.

For a typical store, the inventory is turned over an average of 25 times per year, with average sales of $7 per sq. ft. per week and $12 in sales per customer.

Supermarket operations also have to make certain that they detect all the various shifts in consumer attitudes quickly. Kroger Co., for example, interviewed 250,000 shoppers over the last two years as part of its continuing

(Continued on Page S-6)

4A's joins quest for demographic audits

By JENNIFER ALTER

CHICAGO—An organized group of agency representatives has added its muscle to the quest by a handful of publishers to convince the Audit Bureau of Circulations to require audits of demographic editions of magazines.

The consumer magazine committee of the American Assn. of Advertising Agencies, comprised of media execs from 15 agencies, has set the audit of demographic editions as its highest priority for the coming year.

Chaired by Campbell-Mithun vp-media director Arthur Edelstein, the committee is asking major publishers of demo editions, such as Time Inc. and Newsweek, to meet with them and explain why they are not conducting audits.

"They charge us a healthy premium to deliver the audience and then they won't spend the money or time to verify the claim," says Mr. Edelstein. He added that his committee, which is unanimous in its feelings on the issue, represents eight of the top 10 agencies and consequently a large portion of magazine billings.

▪ Mr. Edelstein said that if the outcome of the meetings with the publishers is unsatisfactory the committee will go to the Assn. of National Advertisers and possibly the Magazine Publishers Assn. to ask for their support in sending a formal proposal to ABC.

A spokesman for Time Inc. said the company would meet with the committee. However, he said, "We think that the question of auditing demographic issues of magazines is a non-issue. We have indeed audited certain demo issues of *Time*, and we are fully satisfied that the circulation characteristics of the demographics do not differ from the magazine's over-all circulation." In particular, he pointed to number of subscriptions carried in arrears, number of subscriptions bought at the full rate and duration of subscriptions as areas where the results were consistent with *Time's* over-all figures.

The 5-year-old controversy is centered around a number of magazines with demographic editions that use their circulation numbers in selling advertising although those numbers are not audited. ABC currently audits total circula-

Kick for Cap

Newspaper ads for Beatrice Foods Co.'s new Cap 10 soft drink line position it as "the perfect adult thirst capper" containing "pure artesian mineral water," natural flavor and "all the kick of club soda without any of its added salts." Fortis Fortis Westerfield, Chicago, handles; tv also is being used. The five-item line is in test in Ohio markets (AA, Sept. 28).

Cable coalition fights on despite NCTA

By MAURINE CHRISTOPHER and RICHARD L. GORDON

"It's going to be one hell of a fight"—Steve Effros, executive director, Community Antenna TV Assn.

"We hope the Congress will conduct a thorough inquiry into the terms of this purported agreement as well as the method by which it was negotiated. We request public hearings so that its impact on the viewing public and competitors such as the superstation can be fully documented"—Ted Turner, chairman, Turner Broadcasting System.

"We want the [House judiciary subcommittee] to slow up and have hearings. Why should they rush so rapidly to change something that we worked on for 10 years at the Federal Communications Commission, which decided that syndication exclusivity is not in the public interest?"—Jeff Krumme, president of Mid-America Cable TV Assn.

▪ Statements like these make it clear that opponents of a legislated return to an expanded syndication exclusivity curb to protect programs aired over conventional tv intend to continue to battle the major cable, movie and tv associations in hopes of staving off their proposed "compromise" rewrite of cable copyright rules.

The coalition strategy calls for an initial appeal to the House judiciary subcommittee headed by Rep. Robert Kastenmeier (D., Wis.), who has been pushing for fast action on this issue.

Despite a personal appeal by the father of superstations, Ted Turner, who has charged that the communications establishment is trying to change the rules to put him out of business, the National Cable TV Assn. board last week voted 15 to 11 to accept syndication restrictions in exchange for retention of the current copyright payment formula.

Later, CATA charged that NCTA will be representing only its predominant members, the big corporations in the big cities, many of whom are also in cable programming. CATA said their views should be heard, but it should be made clear that NCTA does not speak for the thousands of traditional cable tv operators across the country. Mr. Effros, in a statement to subcommittee chairman Kastenmeier, said elimination of the distant independent tv signals could not be in the interest of the cable industry. And he noted that the compromise would require catv duplication of some over-the-air tv signals.

▪ Tom Wheeler, president of NCTA, did not return phone calls to answer critics who accuse him of rushing this compromise through in a panic to placate the giant multiple systems operators. The board vote on the language approved by the NCTA executive committee was secret, and NCTA would not identify the four absent members of the board.

Finally, late Nov. 4, Mr. Wheeler released a three-page, single-spaced defense of the board's plan, likening it to a trip to the dentist to avoid something worse, in this case a Kastenmeier bill to limit the number of distant regular tv stations cable operators may carry. He said 80% of the country's systems will be exempt from syndication exclusivity and that mechanisms for relief will be provided for operators in unusual cases.

NCTA's board did promise Mr. Turner and the other opponents to this still-to-be legislated policy change to work to include an interim period sufficient to allow WTBS, Atlanta, the only aggressive superstation in the country, to reprogram periods hit by the syn-

SMRB acquires 3 Sigma

NEW YORK—Simmons Market Research Bureau has a Simmons again. SMRB has acquired Three Sigma Research and its chairman, Willard (Bill) Simmons.

Mr. Simmons, who founded what is now SMRB, set up Three Sigma in 1974. He will continue as chairman and a new chief operating officer will be named, according to SMRB chairman Frank Stanton. The deal was for an undisclosed amount of cash.

Three Sigma does surveys on 180 newspapers and its reports are subscribed to by all major dailies. Simmons has done some newspaper research, but not on the scale of Three Sigma, Mr. Stanton said.

The last daily newspaper research study from Three Sigma was issued in September, 1980. Mr. Stanton said he will propose the next study be undertaken in early 1982 and completed the following December.

Five months ago, Three Sigma was on the verge of merging with Telmar Communications but that plan fell through because "Telmar decided it was not appropriate," Mr. Stanton said. "So they recommended Three Sigma to us." Three Sigma currently has 41 agencies subscribing to its data. #

OUT, OUT DAMNED INFLATION

As buyers learn to not want to live with inflationary-based cost increases, resistance will mount.

BY ROBERT J. COEN

In recent years consumers and industry have grudgingly accepted inflation as a fact of life. By the end of the 1970s annual price increases of 8% to 10% a year had become the norm rather than the exception. Now, after 10 years of learning to live with inflation, the pressures to get it out of the system are growing and there is hope that the pendulum will begin to move in the opposite direction.

Significant annual price increases will occur in advertising as well as in all other sectors of the economy but resistance to rises in the cost of media time and space is growing and rate increases in the future should begin to moderate.

A review of the past trends in annual price increases for typical economic and media indicators may shed some light on what we may expect for the future.

Prior to the 1970s inflation in the U.S. was a rare phenomenon. We had inflation when we had wars and in times of depression we experienced deflation, but for most of our history, prices remained the same from one year to the next.

In the first half of the '60s the annual inflation rate was just slightly over 1%. In the middle of the '60s the inflationary pace picked up to a rate of approximately 3.5% per year, driven partly by the Vietnam War and partly by growing worldwide demands for agricultural products and mineral resources which were beginning to affect our domestic prices.

■ These upward pressures persisted and inflation gradually reached an annual rate of about 5% until fall, 1973, when the Arab oil embargo was imposed followed by the doubling and tripling of energy costs. Double-digit inflation hit us for the first time in 1974 and 1975. Since then annual inflation rates have ranged between 5½% in 1976 and 13½% in 1980.

Inflation in consumer prices, the Gross National Product mix (GNP deflator—considered by some to be a more accurate indicator of inflation)—and advertising exposures (media cpms) have varied from year to year but in general they have all shown some correlation.

Broadcast media commercial time is perishable and highly responsive to short-term shifts in supply and demand. In the early part of the '70s, when inflation in the economy was beginning to rise fairly sharply, network and spot television cpms declined 5% to 6% then cigaret advertising was withdrawn from the broadcast media.

In 1976 when the economy turned upward and the election, Olympics and bicentennial year promotions added to demand, television prices soared. In 1977 following the bicentennial year boom there was an immediate slowdown in the relative demand for spot television and a corresponding falloff in prices. In 1977 the realized price increase for spot tv was only 3.4% during a year when consumer prices on average were up 6.5% and the GNP deflator 5.8%

During the last six years the rates of other media have also risen quite rapidly in response to various inflationary pressures. Magazine rate increases in 1976 and 1977 lagged behind general inflation rates but by 1978 magazine prices were rising faster than most prices in our economy. The decline in advertising page volume for many publications in 1981 help explain moderating magazine rates that have appeared in the last 12 months.

Historically, newspaper ad rates have moved at practically the same pace as the general inflation rate. There may be exceptions in specific markets due to strikes or the arrival or departure of a competitive paper in the market, but in most markets the newspaper advertising rates rise almost automatically in relation to increases in operating expenses such as labor, distribution or newsprint costs.

■ In the years before the Vietnam War there was very little change in media rates from one year to the next unless something exceptional occurred. However, in recent years most media have announced annual price increases somewhere between 5% to 10% a year.

For some media these price increases have gradually grown to be a kind of automatic "cost of living" adjustment. Ad rates have been raised either because operating expenses have risen or because it has become a standard practice.

In the future we can expect growing resistance to rate increases. Many media will find it necessary to search for other sources of revenue or for ways to cut costs as buyer resistance hardens. Rates will continue to go up but not as fast as they have in the past.

The cumulative change that has occurred in the price of media units from the base year through each year from 1977 through 1982 are shown in the media unit cost trends table. These prices are continuously tracked and expressed in index form to allow easy comparison with government price indexes which currently are reported on a 1967 base year.

As an example of how to interpret the unit cost indexes, consider network tv with an index which has risen from 100 in 1967 to 330 in 1981. If a 30 second commercial had cost $25,000 in 1967 it would cost $82,500 in 1981—3.3 times the 1967 cost. In 1982 the index is estimated at 366 so we can expect the illustrative cost to rise again to a new level of $91,500.

We also maintain these indexes in terms of the cost of 1,000 exposures delivered by a unit of advertising. Since most mass media audiences have risen since 1967 their cost per thousand indexes are all lower for 1981 and 1982 than their unit cost indexes.

Newspapers and network tv have registered the largest cumulative cost increases and although there are a number of factors that can explain this, the single most important is the supply and demand relationship.

In most markets only one dominant newspaper is available to supply the newspaper display space—traditionally the primary advertising medium of local retailers. There are only three national television networks and a limited number of prime time commercial positions—the primary advertising medium of many large nationwide marketers.

In the case of most of the other media, the vehicle choices are larger and alternatives are wider than they are for the primary media. In the long run, supply and demand determine price trends for

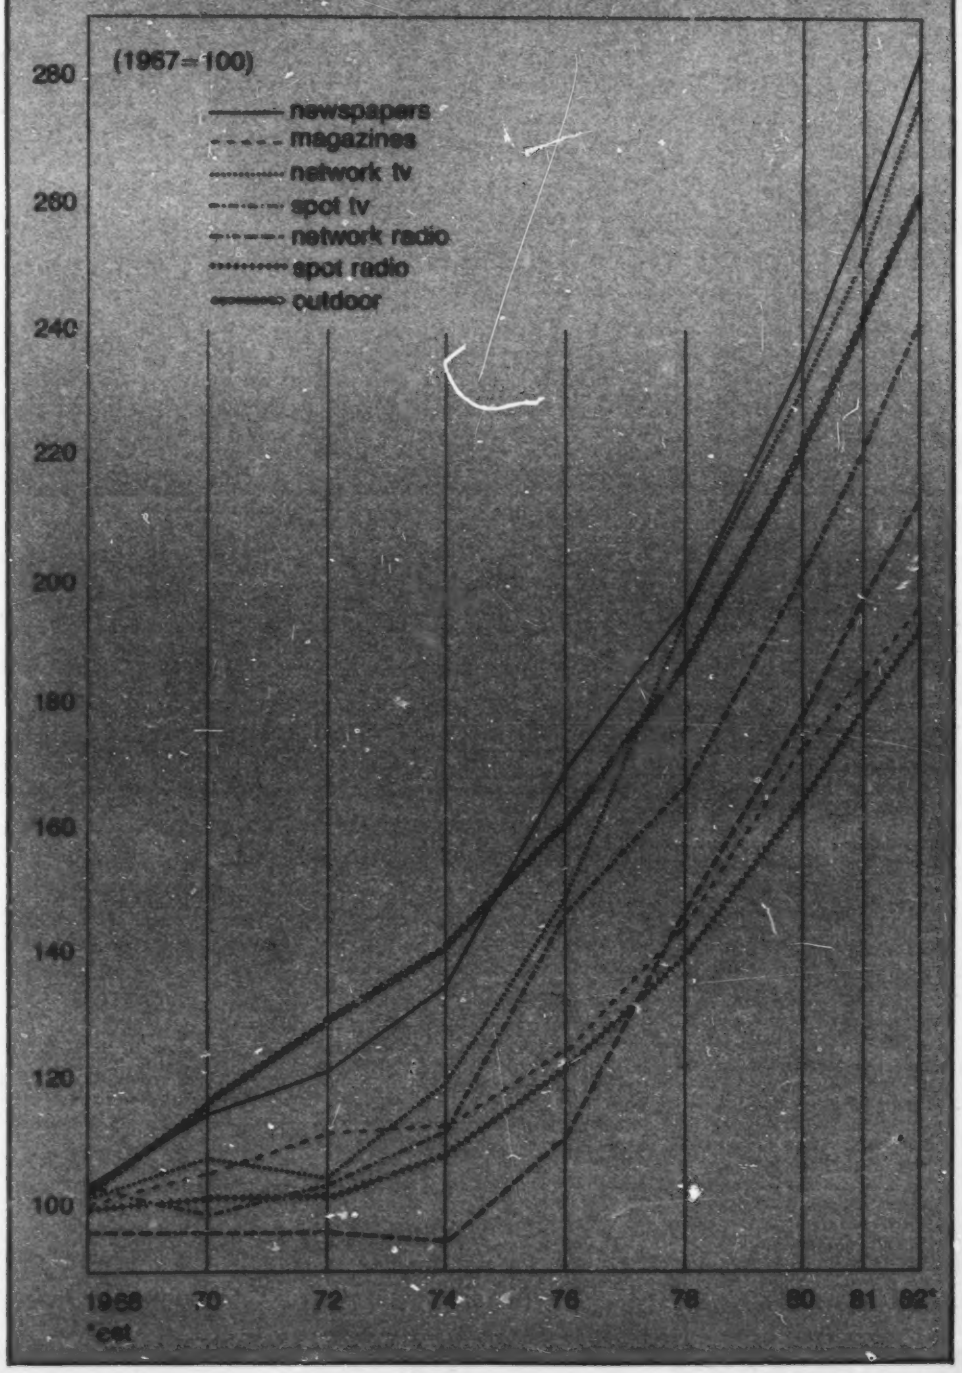
Media cost per thousand indexes



Experts are optimistic but cautious

(Continued from Page S-1)
happen in the durable-goods sector of the economy when you consider that Detroit is now announcing 9% and 10% increases for 1982. Coupling that with the cost of fuel and cost of money—it may be premature to indicate what's going to happen, but our indications say, '10% to 11%.'"

■ "We are cautiously bullish about 1982," says George Karalekas. "We are talking in the area of between 12% and 15% growth. I think, really, during what's going to determine 1982 is going to be the first quarter, during which we will begin to feel the impact of some of what Congress has recently passed; the interest rates should begin to settle."

"But, even in spite of that, I think the whole country, right now, is really on a more optimistic note than it was. I think 1982 will be a good year."

Turning to the more specific matter of the outlook for billings at their own agencies in the coming year, the media execs are a bit more upbeat.

Against a background of early planning activity for 1982, the six of them see budget growth for their clients in the 13% to 16% range, with some indicating that even this ambitious a level may, in fact, be a minimum.

What are the reasons for this expected upsurge in advertising activity?

Among them are heightened activity on the new products front, increased momentum for rollouts, new line extension plans and—expectedly—the always optimistic presumption that the new business aspirations of an alert, aggressive agency will never fail to bear fruit.

"Stemming from our optimistic view of the economy generally at this juncture, we think that a lot of our categories in the other areas of durables and service businesses should be up as well."

■ But here, too, the media experts caution that the picture for their own agencies is complicated by intense swings in different product categories and by ambiguities that are coloring the general business outlook.

Regarding media volume at his shop, Michael Drexler said, "We have about 35% of our billings in package goods, which always seems to be more stable in the face of economic changes because of the basic, inelastic nature of areas in the category itself."

Says Michael Drexler. "Stemming from our optimistic view of the economy generally at this juncture, we think that a lot of our categories in the other areas of durables and service businesses should be up as well."

"We are projecting a 15% increase in media billings," says Arthur Wilen. "Part of that 15% increase, obviously, comes from cost increases, the inflationary area of 8% to 10%. With two-thirds of our revenue coming from package goods accounts, we have some stability built in."

"We also service a significant amount of regional advertisers, and most of their plans call for roll-outs. We see that action as a way of increasing our media volume in 1982."

■ "Our operation in the last two-and-a-half years has seen consistent and solid growth," added Alec Gerster. "Obviously, a lot of things go into that, much more than just the price of media, itself. Some of our largest accounts are package goods, which offer a solid base as far as increases and as far as billings steadiness go.

"We also have a lot of retail—a lot of very locally-oriented businesses—and you have to look at this category of business as one of the bright spots in the economy so far.

"We're dealing with a very unusual economy. If you look at real GNP projections, which are modest for almost the full first half of next year; if you look at interest rate levels; growth in the money supply; if you look at all the wonderful things outside the media world, they all suggest some pessimism.

But, at the local level, there is a lot of strength, it seems, and this helps condition our view of budgets next year," Mr. Gerster said.

"Our goals for 1982 are optimistically ahead of what we perceived as general growth for the business," says Kenneth Caffrey. "I would pick '15%' as pretty much a minimum, for us. There are two things we have to keep in mind. One is, if we continue to do what our charge is—which is to place advertising that is more effective—we don't always, necessarily, ask for more money as a solution to increasing effectiveness. Second, I don't believe there'll be a major early explosion of new products activity as a result of new tax legislation.

"I think the Reagan Administration's faster depreciation," Mr. Caffrey continued, "may help clients to think in terms of capital expenditures sometime soon, but I think the impact of those new products may be felt beyond 1982, more in 1983 and 1984."

■ "We've had over the last five years a successful track record in terms of growth," says George Karalekas. "We see that continuing into 1982—but, again, being cautiously optimistic we are really looking in the area of around 15% as being quite possibly, a very realistic number. In our view, that gain will come from a combination of things. We anticipate a lot of growth, internally, from our present clients, new business and part of it just normal increases attributable to inflation in media. Also, we see increases in the total budget as a result of competition getting

Coen on costs

(Continued from Page S-2)
all media, but in the short run some media prices react more quickly and to a greater degree than others when demand conditions suddenly change.

■ Comparing advertising exposure costs with cost trends of other goods and services helps explain why advertising budgets have been rising at a faster pace than the economy. Advertising is a relatively efficient marketing tool and in recent years, with many other selling costs rising so rapidly, it has been more logical to raise advertising budget than to increase the sales staff or maintain price reductions for a fixed proportion of the goods being produced year after year.

The trend in media prices turned sharply upward in 1976 and since there has been a gradual acceptance of sizable rate increases for most media each year. But the resistance to automatically higher prices in all sectors of our economy is now building and the media will not be exempt.

In 1981 we have seen the consumer price increase come down from 13.5% to a level which could be below 10% for the full year. The GNP deflator gain should be about 9% and by 1982 both these inflation rates should be close to 8%. Media that raise their prices by more than 8% in 1982 will risk an immediate loss in unit volume or at least an adjustment in the share of advertisers' budgets they receive.

The programs for cutting the U.S. inflation rate may not be totally successful and they may not produce dramatic results immediately, but in the next few years the pace of inflation will definitely ease.

■ Advertising media rates in 1982 will probably rise by a little more than the general inflation rate partly because some key media rates have risen at a relatively modest pace in the last couple of years. Therefore, the upward price pressures that have accumulated are very likely to show up with the economic upturn expected in 1982.

For the years immediately following 1982 the trend in media prices will be up, but the rate of increase should begin to slow as the resistance to automatic annual rate hikes intensify.

It will be a long time, if ever, before we return to the days when media rates went up only when audiences or circulation rose. But, the days of automatic and unchallenged rate hikes will soon become part of history in the advertising business.#

New chairman of the Assn. of National Advertisers, Tom Ryan of Gillette (r.), chats with Don Goldstrom of Armstrong, a past chairman, and speaker Suzanne Keller of Princeton University.

ANA gathers in San Francisco

Don Johnston of J. Walter Thompson Co. (r.) brought the ANA a warning about the future of national brands. Discussing his speech are Bob Blake of General Mills (l.) and Tom Myers of American Express. ANA's annual meeting was at the Fairmont Hotel in San Francisco. (*Stories on Pages 1, 3, 10, 106 and 107.*)

ANA PARTLY MOLLIFIED

FTC's Miller: Ad proof still concerns me

By LARRY EDWARDS and TODD FANDELL

SAN FRANCISCO—The debate sparked by new Federal Trade Commission chairman James Miller III over the FTC's ad substantiation policy is clearly shaping up as the litmus test of just where the agency will be headed under his leadership.

Chairman Miller came before a wary and concerned Assn. of National Advertisers here last week with the avowed purpose of clearing up the "considerable confusion" over his "preliminary views" of the FTC's role in advertising. He earlier had created the confusion himself (AA, Nov. 2) when, during a press conference, he questioned the agency's ad substantiation policy, considered by many the teeth of the industry's own self-regulation procedures.

His effort did succeed in assuaging somewhat the ANA membership, whose leaders felt he had clarified where his thought process now stands and expressed a willingness to listen before making up his mind. But his remarks left little doubt that he intends to push for a rethinking of the government's role in ad substantiation, aimed at reducing it, and that his push easily will be strong enough to guarantee the issues will be swirling in advertising circles for a long time to come.

▪ In particular, Mr. Miller noted he continues to believe there should be a reevaluation of the need for any requirement for strong substantiation prior to the making of claims.

Mr. Miller and the ANA are philosophically agreed that the FTC's role in ad substantiation has been burdensome for advertisers, and room for lessened requirements exists. But in the aftermath of his Tuesday speech, it was ironically apparent that the industry's major concern is that his push would go too far in that direction.

In his address, Mr. Miller quickly stated: "Let me be very

Lorillard sets flight plan

By JOHN J. O'CONNOR

NEW YORK—Battling to achieve greater impact with its ad dollars in the face of continued massive spending by competitors, Lorillard next year will compress its magazine schedule and resort to flighting for periods ranging from one to three months in all media.

J. Robert Ave, Lorillard exec vp, said the move will result in "our being heavily involved in some magazines, lightly involved in others and not involved" in the rest. Mr. Ave said it would be fair to say that the company's ad budget in 1982 "will be on a par with this year." The Loews Corp. subsidiary's spending in '81 is estimated to be more than $140,000,000.

Responding to a question, Mr. Ave admitted that the company's first share decline in the last five years also had a bearing on the strategy shift. The company's '81 market share dropped 0.05% to 9.2%, according to analyst John C. Maxwell Jr. of Lehman Brothers Kuhn Loeb Research. (A 1% share of market translates to more than $130,000,000 at the factory level.)

The Lorillard exec pegged the company's decline to massive ad

Goes after specialty coffees

Kraft tests coffee flavoring

By JANET NEIMAN

CHICAGO—Inspired by General Foods' and Hills Bros.' success in the flavored coffee business, Kraft Inc. is testing a flavored coffee additive, aimed at a broader consumer segment, under the Coffee Velvet name.

Now entering tests in Tucson, Washington state and other undisclosed markets, Coffee Velvet, unlike its competitors, contains no instant coffee. Using the same ingredients as powdered nondairy creamers, along with mocha, mocha cinnamon or mocha mint flavoring, the product is added to a cup of coffee.

Kraft sees the line as an addition to the $56,000,000 flavored coffee category, now led by General Foods International Coffees and Hills Bros.' Flavored Instant coffees.

But Coffee Velvet also may eat up some of the shares of entries in the nondairy creamer category, such as Carnation's Coffee-mate and Borden's Cremora.

In fact, some years ago, Borden experimented with a three-item line of flavored nondairy creamers (believed to have been named Gourmet Cremora) but pulled it out of test after about six months. Competitors said weak creative and poor packaging contributed to the line's problems.

General Foods' International coffees, marketed nationally, hold

Nabisco eyes Life Savers

By NANCY GIGES

NEW YORK—Nabisco Brands' agreement to buy Life Savers confectionery products from Squibb Corp. is viewed as a positive move for both companies.

In fact, observers say the companies that may be adversely affected by the proposed sale are Warner-Lambert's American Chicle division and Wm. Wrigley Jr., the two primary competitors of Life Savers.

Nabisco has agreed in principle to pay about $250,000,000 in cash and notes to Squibb for the marketer of hard-roll candies and gums sold under the Life Savers, Breath Savers, Care-Free, Bubble Yum and Replay names. Life Savers had sales last year of $342,000,000 and operating income of $42,000,000.

Squibb has hopes of attaining a 16% to 19% growth rate in the next several years with the successful launch of promising new drugs. Its chances of achieving those objectives are increased with the sale of its confectionery business, which would have reduced that growth.

For Nabisco, the business expands its confectionery operation, which is led by Baby Ruth and Butterfinger candy bars. Hard-roll candies are less sensitive to commodity swings because they do not contain chocolate. Since Nabisco is already in the corn syrup business through its earlier merger with Standard Brands, that ingredient is readily available as a sugar alternative should sugar prices soar.

Life Savers is the country's largest producer of bubble gum, with a 33% market share. It trails Wrigley and Chicle in chewing gum with an 11% share. #

Gallery scene of transponder lease auction

John Marion, president of Sotheby Parke Bernet, auctions off seven RCA Americom transponder leases. Final bids from various cable tv operators ran from $10,700,000 to $14,400,000, for the seven leases, for a total of $90,100,000. *(Story on Page 101.)*

Why CBS revamped its team

By COLBY COATES

NEW YORK—The sweeping reorganization of the CBS Broadcast Group, of which the news presidency was only one key element, was a plan that had been mapped out weeks ago but was shared by only a few key executives.

Moreover, CBS sources insist that it wasn't pressure from the top or panic over news ratings that forced the decision, nor was it a premature one. Instead, it occurred as it was supposed to, before CBS execs flew off to Hawaii for a series of meetings with the network's affiliates board. And it was designed to reduce the back-breaking load on Gene Jankowski, president, CBS Broadcast Group.

▪ Given the value CBS or any network places on its relationship with affiliates, it would have made little sense for CBS to discuss some very serious issues with the affiliates board and then return to New York and completely change the face of the Broadcast Group. Besides being impolitic, it would have denied one of the big winners in the reorganization, former CBS-TV Network president James Rosenfield, from sharing his moment in the sun with the body that helped him get where he is today.

And that is on a level with Thomas Leahy, until last week senior broadcast vp of the CBS Broadcast Group. Now both have the title of exec vp, CBS Broadcast Group, reporting directly to Gene Jankowski, architect of the reorganization. Reporting to Mr. Leahy are the CBS TV Stations division; CBS Radio; CBS Cable, and CBS International plus new ventures.

▪ Mr. Rosenfield, meanwhile, is now cast in the role of what some say is reminiscent of what a tv network president used to be. Now, in addition to being responsible for the tv network, Mr. Rosenfield also has CBS Entertainment head Bud Grant and CBS Sports chief Neal Pilson reporting to him.

When the day comes that CBS

WOR-TV may lose Satcom I

By MAURINE CHRISTOPHER

NEW YORK—By mid-year there apparently will be one less superstation on the main cable bird. Eastern Microwave, which sells WOR-TV here, is losing its transponder on Satcom I to Cable Health Network, a new 24-hour advertiser-supported service to be announced today by Viacom International.

Ralph Baruch, chairman of Viacom International, for some time has shown an interest in basic national cable programing. This gives him his entree.

Viacom, as the primary lease holder, is due to exercise its right to reclaim the transponder for its own use. CHN will be headed by Jeffrey Reiss, former president of Showtime, of which Viacom is 50% owner. He has been working on a catv health channel for several months.

Eastern Microwave sells the WOR-TV signal to more than 950 systems reaching 4,000,000 homes. They are fed microwave and the RCA bird for a cable operator fee of 10 cents per home per month. The resale carrier was among those on hand at the RCA auction

CABLE TV: IT'S STILL IN A SWIRL

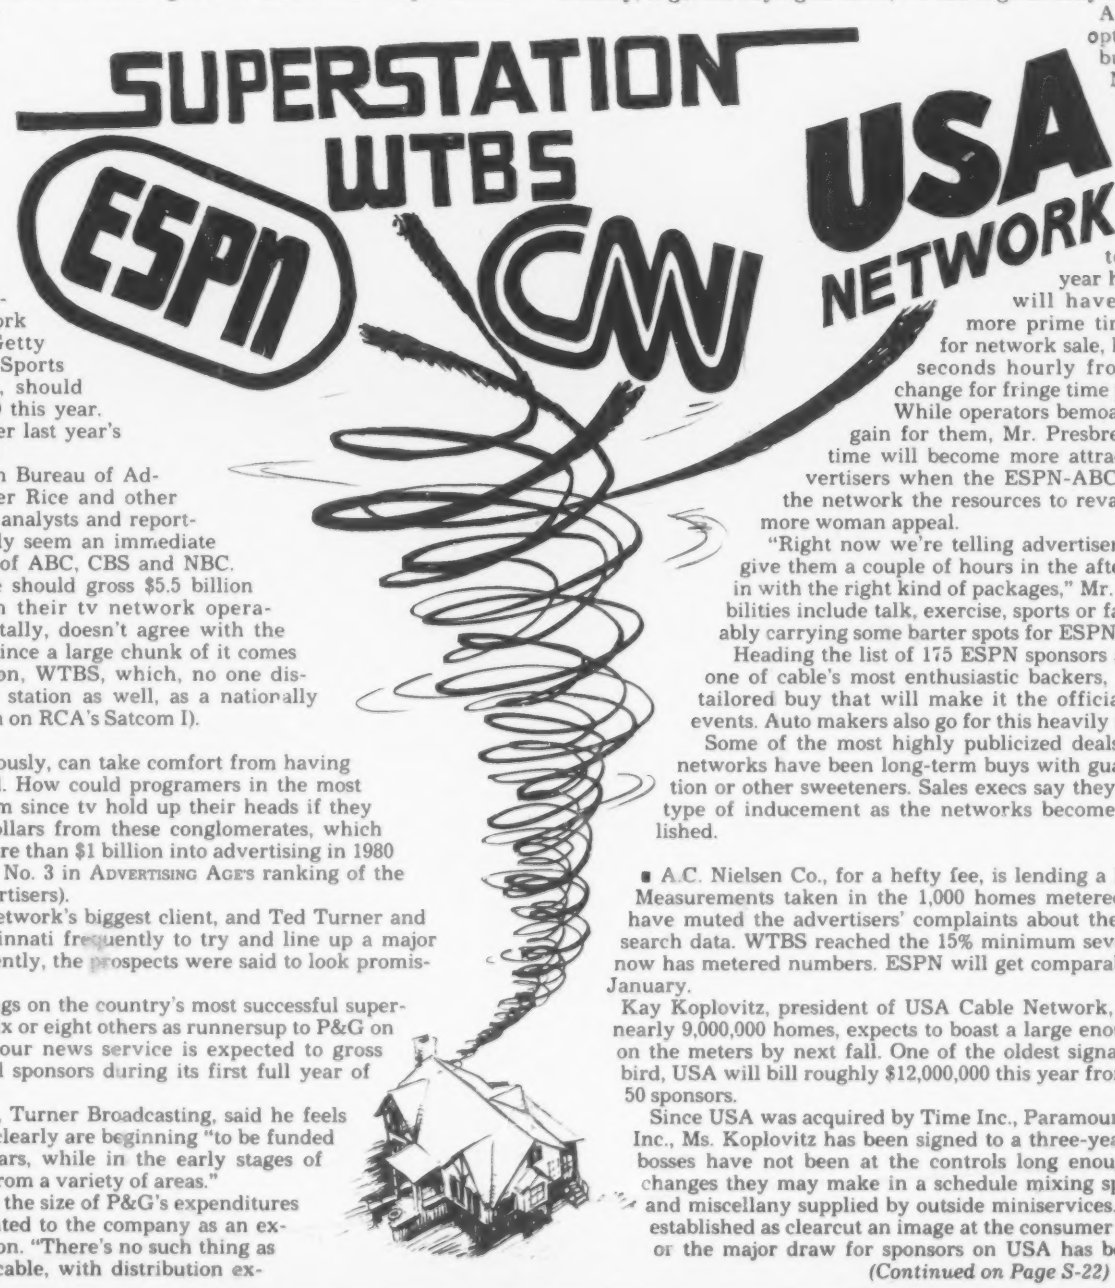
Despite an upsurge in billings, advertisers continue to experiment with the medium.

BY MAURINE CHRISTOPHER

As Procter & Gamble and General Foods go, so goes the world of advertising.

If these two influential marketers, perennially the most liberal spenders on the Big Three television networks, are the cable tv role models for other sponsors, the upstart cable networks should feel anything but sanguine, despite this year's surge in national billings.

The figures tell the story: Although P&G and GF will spend about $655,000,000 between them in regular network tv this year, they have diverted only an estimated $8,000,000 to $10,000,000 to the cable networks. (GF is among the Ted Bates & Co. clients who have agreed to follow that shop's formula of devoting 5% of the conventional network tv budget to Turner Broadcasting's WTBS, as a means of compensating for the Big Three's prime time audience losses in pay cable homes.)



■ Over-all national network cable billings, paced by Turner Broadcasting's two vehicles—Cable News Network is the other—and by Getty Oil's Entertainment & Sports Programming Network, should total at least $100,000,000 this year. That's a healthy gain over last year's $35,000,000 to $45,000,000.

However, as Television Bureau of Advertising president Roger Rice and other skeptics keep reminding analysts and reporters, cable's inroads hardly seem an immediate threat to the well being of ABC, CBS and NBC. Those giants of the tube should gross $5.5 billion altogether in 1981 from their tv network operations. (Mr. Rice, incidentally, doesn't agree with the $100,000,000-plus figure since a large chunk of it comes from Atlanta superstation, WTBS, which, no one disputes, is an over-the-air station as well, as a nationally distributed catv attraction on RCA's Satcom I).

■ Cable salespeople, obviously, can take comfort from having P&G and GF in the fold. How could programers in the most talked about new medium since tv hold up their heads if they weren't getting a few dollars from these conglomerates, which between them poured more than $1 billion into advertising in 1980 (making them No. 1 and No. 3 in ADVERTISING AGE's ranking of the 100 leading national advertisers).

P&G is Cable News Network's biggest client, and Ted Turner and his sales aides visit Cincinnati frequently to try and line up a major schedule for WTBS. Recently, the prospects were said to look promising.

GF ranks first in billings on the country's most successful superstation and falls in with six or eight others as runnersup to P&G on CNN. The original 24-hour news service is expected to gross $15,000,000 from national sponsors during its first full year of business.

Gerry Hogan, vp-sales, Turner Broadcasting, said he feels that cable's billings now clearly are beginning "to be funded out of network tv's dollars, while in the early stages of cable selling, they came from a variety of areas."

And far from belittling the size of P&G's expenditures on CNN, Mr. Hogan pointed to the company as an example worthy of emulation. "There's no such thing as traditional day parts in cable, with distribution extending all the way to Hawaii," said the TBS exec. So the P&G schedule for all products runs throughout the 24 hours and with "enough frequency to maximize the reach." Mr. Hogan, who lists 155 advertisers on CNN and close to 200 on WTBS, said that nearly all of the top 25 tv advertisers are using some cable. For WTBS, the list adds up to billings of $55,000,000 this year. Subtracting $10,000,000 for local billings, that still leaves enough to comprise national cable's largest single portion of $45,000,000.

■ The atmosphere throughout the cable advertising industry is upbeat. Mr. Hogan said a changing attitude on the part of many agencies is one sign of further growth. "We are now working more closely with agencies," he said. "Initially, to get the buying decision, we had to go directly to clients."

Also brimming with optimism about future business prospects is Mike Presbrey, vp-advertising sales with ESPN. This year the 24-hour sports network tripled its billings to a total of $22,000,000 to $24,000,000. Next year he and his sales force will have the advantage of more prime time national minutes for network sale, having recaptured 90 seconds hourly from operators in exchange for fringe time periods.

While operators bemoan this as a poor bargain for them, Mr. Presbrey predicts that daytime will become more attractive to national advertisers when the ESPN-ABC joint venture gives the network the resources to revamp the schedule for more woman appeal.

"Right now we're telling advertisers and agencies we'll give them a couple of hours in the afternoons if they come in with the right kind of packages," Mr. Presbrey said. Possibilities include talk, exercise, sports or fashion formats, probably carrying some barter spots for ESPN to sell.

Heading the list of 175 ESPN sponsors are Anheuser-Busch, one of cable's most enthusiastic backers, and Timex, in for a tailored buy that will make it the official clock at cablecast events. Auto makers also go for this heavily male reach.

Some of the most highly publicized deals in cable on all the networks have been long-term buys with guaranteed rate protection or other sweeteners. Sales execs say they are phasing out this type of inducement as the networks become more firmly established.

■ A.C. Nielsen Co., for a hefty fee, is lending a hand in this respect. Measurements taken in the 1,000 homes metered for tv's Big Three have muted the advertisers' complaints about the lack of reliable research data. WTBS reached the 15% minimum several months ago and now has metered numbers. ESPN will get comparable measurements in January.

Kay Koplovitz, president of USA Cable Network, which is now up to nearly 9,000,000 homes, expects to boast a large enough circulation to go on the meters by next fall. One of the oldest signals of the main cable bird, USA will bill roughly $12,000,000 this year from schedules for 40 to 50 sponsors.

Since USA was acquired by Time Inc., Paramount Pictures and MCA Inc., Ms. Koplovitz has been signed to a three-year contract. Her new bosses have not been at the controls long enough to indicate what changes they may make in a schedule mixing sports, children's fare and miscellany supplied by outside miniservices. So far USA has not established as clearcut an image at the consumer level as ESPN, CNN or the major draw for sponsors on USA has been Madison Square

Cable television is still in a swirl

(Continued from Page S-1)

Garden and other sports events. Its ranking clients are Ford Motor Co., Toyota Motor Sales and Miller Brewing Co.

A significant step forward came last fall when Bristol-Myers joined the lineup with "Alive & Well," its own 60-minute daily magazine show, which is targeted at women. It was earlier, Bristol-Myers scored a publicity coup by signing a 10-year agreement as one of Cable News Network's charter advertisers. USA, WTBS, CNN and ESPN are singled out by the Broadcast Advertisers Reports as the leading networks in wired television. They will join the measured media elite circle in January, 1982 when Broadcast Advertisers Reports starts estimating who is spending how much for which brands on each of the four.

■ Coincidentally, the incumbents on all the cable satellites will be facing an augmented array of scrappy challengers. The most formidable could be Satellite NewsChannels, a joint venture combining the muscle, pocketbook and know-how of Westinghouse and ABC.

In Atlanta, the Turner forces will be fighting themselves as well as SNC. CNN I will be pitted against an inhouse rival, CNN II, a headline service rushed in to the market to counter Group W and ABC.

Also pushing aggressively for their share of advertising dollars are CBS Cable, offering a well promoted cultural lineup, and Christian Broadcasting Network Cable, positioned as an all-family alternative to the current sex and violence on regular television, and Warner Amex's MTV: Music Television, which is the first channel to program music full time for rock lovers.

■ Sophisticated industry observers do not expect all the choices on the bird to survive.

Ahead could be a year of fallout as the less well financed companies are vanquished.

There certainly aren't enough ad dollars to support all the programmers. With the exception of the superstations, none of the advertiser-supported services, wafting through space into the cable lines, are making much money yet. (WGN-TV, Chicago, and WOR-TV, New York, do not sell themselves nationally as cable networks.)

The cable networks' financial problems may worsen, temporarily at least, as operators of local systems refuse to pay for software when there is so much of it available without cost.

Furthermore, ESPN and SIN National Spanish Television Network have opened the door to affiliate compensation and everyone would, of course rather be paid than pay.

The future could bring more experimentation in the use of cable—in terms of commercial lengths, patterns and approaches and in tests combining entertainment with sellin .

■ And cable television, at this early stage at least, offers advertisers an affordable opportunity to take a more active role in programing.

Sponsors such as Kraft Inc., Bristol-Myers and Mobil Corp. already have seized this opportunity. This trend could produce a return to the good old days of early television, when sponsors enriched American culture with original drama.

Or it might be thrown back to the bad old days of early tv, when some of those same sponsors were accused of trying to control the content on the home video screen.#

Maxine Christopher, deputy executive editor of Advertising Age, writes a weekly column on Videotech and has followed the development of the new video technology since its inception. Art Page S-1 by Milt Priggee

*Electronic (microwave) interconnect
**Simulated (bicycled) interconnect
Note: Cost is segmented by satellite network, where or when applicable. Subscriber figures are current for October, 1981.

BY R.C. MORSE

While franchise battles rage fiercely in and around the unwired major metropolitan areas, who would believe that, after the wire has passed, a conciliatory and even cooperative mood could develop between former rivals?

In those areas where the dust has settled, tentative friendly overtures between system operators have spawned a whole new entity in the cable industry—the interconnect.

The only generalization one can make about interconnects is that no two evolve the same way or for the same reasons. Technically, interconnects are either electronic or simulated: The former a microwave (or hardwire or AML) connection; the latter, systems in which videotapes are bicycled between participants.

Electronic interconnects currently include the Hartford/New Haven, Western New York, San Diego and San Francisco Bay Area systems. Simulated interconnects include the New York Metro, Boston, Syracuse and Seattle/Tacoma systems.

While these eight represent the major functioning interconnects, there are hybrids—single systems that are being sold like interconnects because of the unique opportunities they offer. These include Palmer Cablevision in Naples, Fla., and Palm Springs, Cal., serving 60,000 households in two of the country's most affluent communities; Tulsa Cable, the 10th largest system in the country, serving 95,000 subscribers with 11 ad-supported channels, and the Portland, Ore., system.

■ And more are in the works. Harron Cable plans to launch one Philadelphia interconnect by February that would serve 350,000 households through 26 systems in southeastern Pennsylvania, southern New Jersey and Delaware, while Suburban cable system may launch a second Philadelphia system. Other interconnects are now being negotiated or started in Pittsburgh, Atlanta, Cleveland, Iowa and Wichita/Hutchinson, Kan. Many of these should be operational next year, and you can be sure it won't be long before other major market operators will catch on and cash in on the benefits of interconnection.

Profits to system operators—by way of local and regional advertising—are the binding force in tying anywhere from a few to more than two dozen individual systems together.

In many cases these interconnects represent, by replication, what in advertising jargon is an Area of Dominant Influence (or Designated Market Area or Standard Metropolitan Statistical Area).

Agencies are buying spot cable time on the basis of the area the interconnects cover. "But what interconnects are actually creating," says Eastman CableRep president Carl Weinstein, "is a CMO—a cable market of opportunity, which in several instances is going beyond the ADI or DMA concept."

For example, in Santa Clara County, Gillcable serves 85,000 households in its own franchise area, with an additional 350,000 households from other systems in the San Francisco area. The Gill cable interconnect stretches from Napa in the north to Salinas in the south, with plans for major additions in the future in the San Fran

R.C. Morse is a New York-based free lance writer.

cisco area. Gillcable formed the San Francisco area interconnect to aid in selling advertising, but that is not always the case.

■ In San Diego, for instance, Cox's Mission Cable initially fed the signals of Los Angeles network owned & operated stations via microwave to the Southwestern Cable system because geography prevented Southwestern from picking up the Los Angeles signals directly.

By itself, Cox's system reached only 37% of the ADI. But since its link with Southwestern and the inclusion of the Times Mirror system, the interconnect now reaches 50% of the ADI, increasing all three systems' opportunities for pulling in advertising dollars.

■ Other interconnects are formed for other purposes. The Western New York interconnect was initially formed to telecast Buffalo Sabres hockey games to fans in the upstate region, but there are now plans to expand into other programing areas.

The Iowa interconnect, already in formation, reaches seven ADIs in Iowa and Nebraska with Iowa football.

When interconnects are formed, one system is generally acknowledged as the head-end. In some cases, the head-end makes the investment necessary to form the actual interconnection (as Cox and Gillcable have).

■ In other cases, the head-end offers some form of unique, locally originated programing.

In San Diego, Cox Mission Cable markets the equivalent of a local station, KCOX, by using one channel for a mix of entertainment, news and sports.

In the San Francisco area, Gillcable originates its Classic Movie Channel, news (Cable News Network) and Sportschannel, which feeds the Entertainment & Sports Programming Network with locally originating sporting events.

■ But local programing isn't the sole source of advertising revenue for interconnect operators. Along with it, the head-ends generally feed satellite-distributed, basic service networks to their sister systems. Chief among these are CNN and ESPN, with USA Cable Network and MTV: Music Television catching up. Currently, these four are available only on the Syracuse interconnect.

Varying combinations of three networks are available on the Boston, New York, San Francisco area and Seattle/Tacoma interconnects. Cox offers only CNN and ESPN, and the Western New York interconnect has tied into CNN.

■ One prime reason for this limited-access capability is that 70% of all systems in the country are 12-channel systems. Bound by law to carry broadcast and public access channels, they often have limited room for providing ad-supported networks (with a choice to pick from) and increasing pay—tier services, such as Home Box Office and Showtime. For some, plans for increased channel capability are in the works.

Not all interconnects are individually operated, even though the head-end is physically situated at one system so that commercials can be physically inserted for play via the microwave connection (if there is one).

■ While a system like Gillcable absorbs all costs for the interconnections, some interconnects are operated on a co-op basis. Hartford/New Haven is a prime example.

It is expected to hook into every cable system in the state within two years and is operated as a co-op. All participating operators collect a share of ad revenues based on the amount of money they have put up.

New York Metro is another example. This bicycle system plans to build a microwave link among the Manhattan, Long Island, Westchester and New Jersey systems (and other systems as they come on-line) through a nonprofit, mutually owned co-op.

The plan is that of Cable Networks Inc., a year-old subsidiary of 3M Co. that grew out of the company's Media Networks Inc. concept. Media Networks bills $49,000,000 per year in spot magazine ad sales, delivering presold, preprinted local advertising pages from 100-plus markets to a wide variety of national magazines such as *Time*, *Sports Illustrated* and *Playboy*.

"It took a year of figuring out how to translate this concept to cable," says Thomas P. Sassos, Cable Networks vp-general manager. To help facilitate the Metro interconnect, Mr. Sassos says, CNI has signed five-year contracts for CNN to be accessed into systems, with CNI paying half the subscriber fee as incentive to get the participation of the various systems.

"The problem we're trying to solve is simple. Individual systems in the metro area offer advertisers highly fractured segments of the market. By providing a super head-end, we'll be able to offer the entire market, or portions thereof, to advertisers."

In some cases, CNI will even pay for the hardware, too. The master plan calls for pumping ad revenues into the establishment of a super head-end, to be known as the Metropolitan Transmission Center, costing between $7,000,000 and $10,000,000 and scheduled to begin operations in 1983.

■ Says John P. Kramer, vp-director of sales, "The problem we're trying to solve is simple. Individual systems in the metro area offer advertisers highly fractured segments of the market.

"By providing a super head-end, we'll be able to offer the entire market, or portions thereof, to the advertisers."

Horizontally (by interconnect system), MTC would be able to drop in commercials for designated geographic areas. Vertically (by channel and network availability),

(Continued on Page S-16)

It's 8 pm. Do you know where your audience is?

Once upon a time the television advertiser could tell his story to 70% of America at almost the same instant. You controlled the Who, When and Where of advertising exposure with remarkable precision.

Fragmentation. It has changed this neat little situation forever. 22 million households are on cable, choosing up to 120 channels. Almost 3 million households with VCRs celebrate viewer lib by watching what they want to watch, and when they darn well please. (They'll have a chuckle seeing your new fall models in the middle of next July.) Another half million can watch video disc playbacks. About 6 million households are using your precious TV time to blast space invaders and other assorted aliens out of the sky. And over a million with personal computers can preempt the family television to balance their checkbook or keep track of small business inventories.

Every day you lose a little more control. It's like spilling a bucket of marbles on the kitchen floor. There's no telling which way they'll go. Only that they're likely to stay somewhere in the room.

How can you regain control? By taking action before the marbles spill. By letting Twentieth Century-Fox Television show you how advertising and syndication can work together from day one—before your media plans are drawn. Then you'll no longer be at the mercy of "avails." Because you'll create your own.

As our "partner," consider the possibilities:

1. Television programs whose demos match the demos of your target audience.
2. A huge choice from existing Fox properties. Or, a new show that we'll create and produce especially for you.
3. An ad hoc network that will be measured by Nielsen.
4. A full range of ADI's. (Current Fox advertiser-supported programs reach at least 85% of all U.S. TV households.)
5. A full variety of station outlets, including network O&O's and affiliates, independents and the pinpoint audiences of the cable systems.
6. Distribution both in the U.S. and internationally.
7. A guarantee that your spots will run—because they'll be part of the show when we ship it.
8. A pricing that's reasonable enough to make "sponsorship" once again practical.

If you've got the product, we've got the show. We've produced over 100 television properties, from *MASH* to *Dance Fever* to *Batman*. From *Trapper John, M.D.*, to the new *Jessica Novak* and *The Fall Guy*. And over 2,000 movie titles from *Shirley Temple* to *Patton*, from *9 to 5* to *Alien*.

Or we'll develop something new, made to order for your audience.

Join forces with Fox and you'll be in good company. Blue chippers like Chesebrough-Pond's, General Electric, Pepsi, Gillette, Bristol-Myers and S.C. Johnson.

When you work with Fox, you're working with the leading full-service telecommunications software company. Together, we can control the target audience and deliver efficiencies unheard of since Tuesday night belonged to Milton Berle.

To get things rolling: phone Steve Orr, V.P. Domestic Syndication, (213) 203-1898.

20th Century Fox Television

Hardware for cable ahead of demand

BY MARK TROST

In the not too distant past, little more than a franchise agreement and a few miles of cable were all that were needed to start a cable system.

Today, three satellites carry cable programing regularly. But with operators planning to expand their revenue base through multiple pay tiers, city councils demanding two-way interactive capability and advertisers finally getting interested in buying cable time, hardware manufacturers are preparing multiple satellite earth station receivers, interactive-addressable 54-channel converters and commercial insertion equipment to meet the anticipated demand. Unfortunately, most systems have yet to place the new products on their shopping lists.

■ While the need to expand is there, much of the money isn't. Most systems were built before two-way technology was devised or the need to access 50 or more channels was a franchise prerequisite.

Consequently, it often takes more than a new converter or satellite dish to expand an existing system properly or turn an operator's dream of selling local ad breaks on the cable networks into a reality.

As a result, most hardware buying is dominated by stopgap purchases. Operators add what they say they can afford until they have a subscriber base large enough to warrant a substantial equipment outlay.

Those interested in buying state of the art equipment are the operators of systems that were orignally built with 50-plus channel (and/or two-way) capability in mind or new builds.

To appeal to this market, hardware manufacturers usually use one or all of the major cable trade books, such as *Cablevision*, *Multichannel News*, *TVC* and the newest entry, *Cable Age*, to get their equipment messages across.

Trade shows are even more important to moving the product, with most equipment makers citing the annual National Cable Television Assn. convention and major regional conferences that are held in Atlanta and Anaheim as must-attends.

■ For those operators contemplating major expansion or engaging in a new build, a second satellite dish is quickly becoming a necessity. To date, about 3,500 systems maintain one dish to capture programing off the major cable bird, Satcom I. But Westar III and Comstar D-2 are offering additional programing services and up to 12 new birds are preparing to go on line by 1984.

Therefore, the need for additional dishes and new multiple satellite receivers are quickly becoming clear, although only 500 systems currently have more than one earth station.

Scientific Atlanta, one of the leading dish manufacturers, sold almost 1,000 dishes to cable operators in 1980 and expects to top that number this year.

■ According to the company, dish orders are coming in at 350 a month, with cable customers accounting for a hearty chunk of the total. Prices vary from $10,000 to $15,000 (depending on the size), with 4.6 and 5-meter dishes the choice of most operators.

The company believes two-or-more-dish systems will become the industry standard in three years, with feedback from monthly ads in *Cablevision* and *TVC* and regular trade show attendance stimulating interest.

"New systems are buying two and three earth stations right off the bat," says Doug Rasmussen, marketing manager with Hughes Microwave. In 1977, the company began marketing its cable earth stations, with the 5-meter ($10,000) model the favorite.

"Many systems are currently expanding their channel capacity," adds Mr. Rasmussen, "and that immediately requires an extra dish."

The company also offers users an expansion ring that enlarges the five meter unit to six meters as insurance against transponder degradation or satellite changes.

Marketing plans for Hughes products are similar to Scientific Atlanta's, with major ads in cable trades and attendance at expositions important factors. Other dish manufacturers serving the cable field include Comtech, Gardiner, M/A-Com, National Microtech, Prodelin, Harris and Microdync.

Mark Trost is a free lance writer in New York.

Remember the name: **Simulsat.**® The one antenna that pulls in up to 14 different satellites simultaneously.

So you can tune in to virtually any programming that anyone beams down, with only a minimal investment when you want to see something on a different satellite. You won't have to worry about additional space for your next antenna, either. Simulsat on one foundation does it all.

Simulsat has the performance characteristics of a conventional 4.6 meter antenna; but it was designed to tune in any satellite within a 52-degree field of view. That means you can set it up anywhere in the United States and see up to 14 satellites at once, based on four-degree orbital satellite spacing.

Take a look at the future–today. Call (201) 658-3838 for more information on Simulsat® or the other uplink and downlink services of Satellite Communications Network.

Satellite Communications Network

Ads for a dish usually makes a claim about how many satellites it can receive simultaneously.

The cable television (inter) connection

(Continued from Page S-15)

the MTC would be able to drop in spots across a spectrum of locally originated programing or the satellite-distributed networks (CNN, ESPN, USA, MTV). Advertisers will thus have their choice of horizontal demographic groups and vertical psychographic program types. This segmenting could be so precise that advertisers will have in cable the equivalent of magazine Zip code insertion.

Advertisers are catching on, albeit slowly. CNI says its revenues are expected to exceed $1,000,000 for calendar 1981. Eastman says its figures will reach about $2,000,000. Both companies are under two years old.

William Gruber, chief of Cox Cable in San Diego, also says his company will reach the $1,000,000 sales mark by the end of this year. Cox's local ad sales have increased at a rate of 35% to 40% per year since 1978. But Mr. Gruber cautions that it's not as easy as it looks: "It took us 11 years to become profitable and only after a great deal of missionary investment." He says at least $2,000,000 has gone into capital investment since he came on board in 1978.

Major agencies, often at the prodding of clients, are finding the resources for spot cable placements in spot tv dollars, which they are using to replace or augment existing weights. However, Robert Hance III, vp-director of sales with Eastman, notes: "Some new, experimental or discretionary dollars are being added to existing media budgets."

Mr. Gruber said 30-second spots aren't the sole order either. "We get a lot of 60s and 90s," he says.

Many of the buys for spot cable are coming from the West Coast offices of ad agencies, where personnel have cable in their homes and are familiar with it. In other regions of the country, like New York and Chicago, where personnel don't always have cable at home, they're stepping a little more into narrowcast waters, many industry observers believe.

While it's still uncertain exactly what media spot cable will be competing against for budget dollars, many seem to believe that spot tv will feel the crunch for now. Eastman's Mr. Weinstein believes that in the long-range, magazine budgets may be threatened most.

As far as the industry's trade associations are concerned, spot cable is the wave of the future. Says Robert H. Alter, president of the Cable Television Advertising Bureau, "Spot cable will be an attractive, competitive package for advertisers to look at. It will evolve and have significant impact on media mixes in the future." He says the CTAB is planning a series of reports on the subject to help acquaint advertisers and agencies with the concepts and procedures already established. He points out that a technical understanding of interconnects is a first step in realization of how to use them.

As far as the future of interconnects is concerned, the day of the mega-interconnect may not be far off. In California there is talk of linking the entire coast; but it depends on advertisers' needs to reach such a huge area.

Cognars Char Beales, National Cable TV Assn. vp-media services and research, "Interconnects are an important and natural trend. With increasing cable penetration, these systems will offer advertisers greater coverage of an area than they could get in broadcast alone."

While Mr. Hance says that MSOs (multiple system operators) seem to be allowing their systems autonomy in forming interconnects, Mr. Gruber suggests that systems that don't want to participate are their own worst enemies.

As to the future of interconnects, the day of the mega-interconnect may not be far off. In California, there is talk of linking the entire coast. But it will depend largely on advertisers' needs in reaching huge geographical areas, although the need for regional sales is certainly one topic that has received much attention of late from national advertisers.#

McCANN VS. McCAFFREY

Exxon shops in runoff

By CHRISTY MARSHALL and TOM BAYER

After a 70-year relationship, Exxon Corp. has put McCann-Erickson into a runoff with its corporate advertising agency, McCaffrey & McCall, for its consumer products account, Exxon U.S.A.

"We thought it would be beneficial to obtain another agency's point of view on our business," an Exxon spokesman said.

"We presented a new [consumer] product campaign," said Robert James, vice-chairman, McCann-Erickson Worldwide.

"McCaffrey did, too. But it is not an agency search in the sense that Backer & Spielvogel and the rest of the world is in on it." Mr. James mentioned the Backer agency only because he was asked about a report that had that agency connected to the Exxon runoff. Exxon subsequently confirmed Mr. James' view of the procedure. McCann presented on Nov. 11; McCaffrey presented Nov. 12. A decision is imminent.

Industry sources said that although there had been some minor and even major differences between Exxon and McCann, the view is more of a return to earlier times when archrivals McCann and McCaffrey were requested periodically to make presentations to retain the accounts.

In another segment of Exxon's business, Exxon Office Products, McCaffrey & McCall won the account in October, 1980, only to lose it to Marsteller in July (after the Exxon corporate group was reorganized).

Both McCaffrey and McCann were in the runoff for that $20,000,000 chunk of business.

As noted, this is not the first time the corporation has pitted the two agencies against each other. In 1975, Exxon asked both McCann and McCaffrey to "consider [and present] alternative strategies" on the institutional advertising then being handled by McCaffrey. McCaffrey kept the account then, as it did later that year after Exxon as-

Listing to Clairol

To stimulate critical fourth-quarter Christmas sales, Clairol is making a big push for several of its new products introduced earlier this year. The company also is running print ads for its entire appliance line. Agency is Foote, Cone & Belding/New York. *(Story on Page 84.)*

world news roundup

LONDON—The 30,000 members of Britain's National Viewers and Listeners Assn., the equivalent of the Moral Majority in the U.S., are asking major advertisers like Cadbury Schweppes, Vauxhall/Opel, Barclays Bank, Shell Oil and Imperial Chemical Industries to pressure authorities into censoring programs like Paramount's "The Gambler" and "The Benny Hill Show," now syndicated in the U.S.

NUREMBERG—Quelle, Europe's largest mail order house and No. 2 worldwide, with annual sales topping $4 billion, will acquire 51% of Aldens, Chicago, the fifth-largest U.S. catalog house ($300,000,000 in sales) in January. The move closely follows the buy last month by Otto Versand, Hamburg, of 100% of Spiegel, Chicago.

PORTO ALEGRE, BRAZIL—PepsiCo will launch Mountain Dew in southern Brazil next month to try to hold its lead over Coca-Cola.

LONDON—Miller Brewing Co. is having "exploratory discussions" with several breweries here concerning distribution of Miller brands in the U.K.

OSLO—Young & Rubicam merged with Norway's Scaneco agency, putting the new Scaneco-Y&R in the country's top five, with projected billings for 1982 of more than $8,000,000.

LONDON—After Wasey Campbell-Ewald resigned the $8,000,000 N.V. Philips account last September (AA, Sept. 28), local Leagas Delaney last week won Philips' videocassette recorder and tv business, boosting the shop's billings 50% to $24,000,000.

New bar goes after Hershey

Cadbury into Thick of it

By GAY JERVEY

Next year will see a new contender in the chocolate wars. On Jan. 4, Peter Paul Cadbury will introduce Thick, a new milk chocolate candy bar that will weigh in at 1.85 ozs., cost 50 cents and is designed to eat into the market pioneered by Hershey's Big Block.

The introduction of Cadbury's Thick will be accompanied by a $5,000,000 campaign by Young & Rubicam, the single most ambitious launch in Cadbury's history. To insure Thick's availability to more than 90% of the U.S. population by the end of February, 1982, Naugatuck, Conn.-based Cadbury has added to its Hazleton, Pa., plant a $5,000,000 production line devoted exclusively to the new product.

"We decided to move the new product directly into national distribution, based on the very favorable results of intensive research conducted earlier this year," said Walter E. Cohan, vp-marketing, sales and distribution. "We are going all out on this one, with prime time network and spot tv, print advertising, strong distributor and retailer incentives, point-of-purchase displays and merchandising support and, most important, a product that's positioned to move off the shelves."

To make certain of that, the company will push a special prepack for retailers that will include a counter display, an extra distributor allowance and a $50,000 instant winner sweepstakes during the six-week introductory period.

Although positioned head-to-head with Hershey's Big Block, which rolled national in July, 1980, Thick's creative emphasizes not only the bar's chunkier size—Hershey's main tack—but also its creamy, smooth texture, Cadbury's traditional selling message.

Over the past year, the chocolate wars have been punctuated by products of all sizes, shapes and prices. Last September, Mars raised its prices from 25 cents to 30 cents, but without the advertising hoopla that had attended the company's increase of bar weight without a price hike in November, 1980. At that time, Mars gave consumers 10% more candy bar for their money, a move that increased its market share to 46% from 37%. #

Union to boycott P&G line

By ROBERT RAISSMAN

NEW YORK—The AFL-CIO's endorsement last week of the United Steelworkers of America boycott of Procter & Gamble Co.'s soap products will give the union a vehicle with which to carry its campaign across the country. The action came at the federation's centennial convention here.

"This boycott will be a frontal assault on a particular set of products," said Earl McDavid, secretary-treasurer of the AFL-CIO union label and service trades department, the division of the organization responsible for boycott activity.

Due to a labor dispute affecting P&G's Kansas City, Kan., plant, the union is calling for a boycott of Ivory, Joy and Dawn liquid detergents; Zest, Camay and Ivory bars, and Tide, Cheer, Oxydol and Bold laundry detergents.

Marjorie Bradford, a P&G spokeswoman, said the company would not comment on the AFL-CIO endorsement. "We have been dealing with the Steelworkers," she said. "We don't think a boycott will settle the matter."

Although strategy to implement

Shops' 3rd quarter unusually good

By CHRISTY MARSHALL

NEW YORK—Herb Eames, exec vp-finance and chief financial officer of JWT Group, recently commented that advertising is changing from a second and fourth-quarter business to a third and fourth.

Certainly, all publicly held agencies are hoping that the fourth quarter will bring forth the motherlode, but in keeping with Mr. Eames' observation, the third quarter turned out better than the second for a majority of the publicly held shops.

In terms of net income for the third quarter, JWT Group made the most impressive gain—a jump of 50% to $3,032,000 from $2,018,000 rung up in the same period in 1980. Ogilvy & Mather's net income gain of 37.1% was the second best performance, climbing from $2,071,000 in the third quarter last year to $2,840,000 in 1981. Grey Advertising's net income was up 25% to $1,382,000 and Doyle Dane Bernbach's net income was up 16% to $764,000, while Foote, Cone & Belding and the Interpublic Group of Cos. reported virtually flat quarters, with an increase of 1.7% and a decrease of 1.6%, respectively. The greatest drop in third-quarter net income was sustained by BBDO (down 30% to $1,924,000).

The greatest gain in revenues for the third quarter was enjoyed by Grey, up 20% to $28,000,000 from $23,166,000 in the same period a year ago. Other revenue gains in descending order were JWT, up 9.9%; Ogilvy, up 8.7%; DDB, up 7%, and Interpublic, up 2.8%. FCB was virtually flat, with its revenues off 0.1%.

In analyzing its third-quarter performance, BBDO cited weak client spending in both the U.S. and Europe. FCB (and several other agencies) listed the problems of inflation, recession and foreign currency translation losses.

On the other hand, DDB reported a gain of $126,000 from foreign currency exchange. The third quarter was a record quarter for DDB, but unlike many of the other shops, it is in keeping with the second/fourth-quarter business tradition of advertising. In the second quarter, DDB reported a net income of $4,428,000 and revenues of $43,231,000, significantly more than the net income of $764,000 and revenues of $33,654,000 tallied in the third quarter of 1981.

For the nine months of 1981, the figures are far more sobering. In terms of net income, only Grey and Ogilvy reported gains—Grey, up

FCC judge rules against WJIM

LANSING, MICH.—Gross Telecasting could lose its main money machine if a Federal Communications Commission decision is upheld.

An FCC administrative law judge revoked the licenses of WJIM (tv, am, fm), citing "misrepresentation and fraud."

Gross denied wrongdoing and said it will appeal.

The company earned 24 cents on each sales dollar in the first nine months of this year or $2,233,498 on revenues of $9,131,213.

The WJIM properties account for about 75% of Gross' business. Gross also owns WKBT-TV, La-Crosse, Wis.

FCC judge Byron E. Harrison denied license renewals after finding that Gross:

- "Repeatedly and intentionally cut out network programing [it is a CBS affiliate] to present local news or advertising [clipping] and misrepresented the fact to both CBS and the FCC.
- "Repeatedly and intentionally used deceptive maps to support its effort to obtain advertising clients." The am radio station was involved in those charges.
- "Broadcast tape weather reports without notice to the public as required by the FCC.
- "Ceased coverage of a local tennis club . . . to aid in the collection of overdue advertising bills."

Judge Harrison said Gross had a "clear intent to engage in misrepresentation and outright fraud." He said Gross' violations were "of an absolutely disqualifying nature" and the company "is beyond rehabilitation."

The Lansing branch of the American Civil Liberties Union, represented by the Media Access Project, a Washington public interest law firm, filed the original complaint in 1973. Gross has 30 days to file an appeal with the FCC. #

BPAA to award 4 student scholarships

NEW YORK—Four $1,000 student scholarships will be awarded in 1982 by the Business/Professional Advertising Assn. in its effort to upgrade the educational strengths of college juniors studying business communications.

Steve Dawe, BPAA functional vp-education/student development and marketing communications manager, Eastman Kodak, said the BPAA hopes to grant one of the scholarships to a qualified applicant from the immediate family of an association member. Information on the program is available from the BPAA.

Agencies have good quarter

(Continued from Page 10)

14% to $4,460,000, while O&M was up a slight 2.8% to $9,170,000. All the other publicly held agencies had declines, with JWT Group—down 46% to $4,864,000—topping the list.

In terms of revenues for the three quarters, all the agencies, with the exception of BBDO, posted gains. (BBDO was down 1%.) The greatest gain in revenue was reported by JWT, up 18%, while Grey was up 16%, O&M, up 12.1%, DDB, up 7%.

JWT's revenue gain and net income loss can be attributed in part to high interest costs—$7,442,000 for the nine months of 1981, compared with $3,092,000 in the respective 1980 period. The agency's foreign exchange losses for the three quarters were $4,421,000. For the same period a year ago, the losses sustained totaled $850,000. #

Sassoon to debut line

NEW YORK—Vidal Sassoon Inc. will introduce in January a line of activewear called EVERYWEAR. It will retail from $6 to $40. Advertising will be handled by Peter Rogers Associates, agency for Sassoon hair and skincare products.

This diamond was really in the rough

By GAY JERVEY

NEW YORK—It seemed too good to be true—and it was.

Bargain hunters perusing the *New York Daily News* on Sunday, Nov. 15, were in for a tease. A full-page Macy's ad listed as part of a jewelry sale "a large diamond knot. 15 pt. t.w. reg. $300. Sale $25."

Unfortunately for the many sharp-eyed readers who showed up at Macy's door on Sunday—not to mention those who called the store to request more information—the ad promised a lot more than it could deliver. The actual sale price was $225, not $25.

Macy's accepted full blame for the mistake, chalking it up to human—in this case, production—error. While the ad arrived at the *Daily News* with the typo, a similar version in the Sunday *New York Times* had the correct price. The department store quickly ran an apology in Monday's *Daily News*. "We are very, very sorry for the error and any inconvenience we may have caused our customers," a company spokesperson stated.

In such cases as these, "sorry" is all the store has to be, as there are no legal ties to bind the advertiser to the erroneous offer. "An advertisement is not a binding contract under the law, but merely an invitation to an offer," explained one Manhattan lawyer. This instance, he agreed, represents just a simple mistake—and one that was remedied quickly—and because the ad creates no expectations as to product performance, it cannot be regarded as misleading or deceptive.

As for the *Daily News*, it claimed that, much as it would like to, proofing every ad is impossible. #

the advertising market place

ADVERTISING REPRESENTATIVE

ULTRA Magazine, an upscale lifestyle publication, has an immediate opening in Dallas and Houston for an experienced, aggressive advertising sales representative to call on advertisers. Guaranteed base salary plus commission. Full company benefits. Call collect:

Karl Sternbaum, 713/961-4132

Equal Opportunity Employer M/F

ADVERTISING EXECUTIVE

A large midwest consumer fashion soft goods manufacturer has an excellent opening for a CO-OP DIRECTOR.
Experience developing programs for fashion products sold in department stores is a must for this corporate level position. Working with branded, well-known, high-quality products, you will administer a multi-million dollar budget. Good communication skills, 10-15 years experience in active co-op program development, and solid department store experience is essential.
Superb career growth potential and excellent salary and benefits is offered. For immediate consideration, please send your confidential resume including current salary to:
Box 3348, ADVERTISING AGE
740 Rush St., Chicago, Ill. 60611
An Equal Opporunity Employer M/F/H

SALES PROMOTION DIRECTOR

Leading midwest consumer goods manufacturer is searching for a SALES PROMOTION DIRECTOR. Your taste level for high quality fashion products is essential. With corporate responsibilities covering many divisions of well-known branded products you will administer a multi-million dollar budget for catalogues, ad books, promotions, brochures, points of sale, and sales meeting presentations Ten years plus fashion goods sales promotion experience is a must.
Outstanding salary and benefits. Please send your confidential resume including salary requirements to:
Box 3349, ADVERTISING AGE
740 Rush St., Chicago, Ill. 60611
An Equal Opportunity Employer M/F/H

JOIN US AS A
MARKETING RESEARCH TABULATION AND DATA PROCESSING SUPERVISOR

We need you as a Tab Supervisor to manage projects for our Fortune 500 caliber clients. We offer you a fun, challenging environment with young, enthusiastic people. CRI is an innovative, rapidly growing full service marketing research firm. And we will challenge your initiative with total decision making responsibility, growth potential, an attractive salary and benefits.

You will have control of all tabulation steps on projects including estimating, client communications, formatting data and time tables. You must have 1-2 years of data processing experience in marketing research. Knowledge of Mentor Language would be a plus. Send your resume and salary history, in confidence, to Eileen Taylor.

CUSTOM RESEARCH, INC.

SUN SHINES ON SUNDAYS

That big, fat edition gives the newspaper's week a strong start.

BY LORI KESLER

The ritual is repeated millions of times every Sunday morning in homes and apartments from Boston to Baja. Legions of sleepy people clad in bathrobes stumble to their front doors and gingerly step outside honing to encounter just one thing: Their Sunday newspaper.

In small towns, families stop at the grocery store to pick up the Sunday paper after they've gone to church.

And in cities where jobs are scarce, newsstand dealers stock lots of out-of-town papers for folks seeking employment in more prosperous locales.

At a time when fewer and fewer people regard the daily newspaper as a necessity of life, the Sunday paper is healthier than ever.

▪ Statistics from the *1981 Editor & Publisher Yearbook* show that in 1980 there were 736 Sunday papers, and their total circulation was 54,676,173. Those figures represented an increase from the 720 papers and 54,379,923 circulation in 1979.

On the other hand, the number of dailies dropped from 1,763 in 1979 to 1,745 in 1980, and their circulation decreased—largely because of the problems evening papers are having—from 62,223,040 to 62,201,840.

Ten years ago, there were only about 530 Sunday papers, while the number of dailies has remained about the same.

"On the whole," said J. Kendrick Noble, newspaper analyst at Paine Webber Mitchell Hutchins, New York, "the trend in the industry is to build more Sunday papers."

▪ What makes the Sunday paper attractive is that it serves up a smorgasbord of advertising and editorial offerings along with generous helpings of life style and entertainment features usually not found in the diet of the dailies. The result is a quasi-magazine product that seems to appeal especially to young adults.

Research suggests that this generation, which is content to get much of its news in capsule form from television and radio, may look to the Sunday paper as much for information about movies, tv and other entertainment as they do for the more traditional kinds of news.

Studies by the Newspaper Advertising Bureau and the Simmons Market Research Bureau show that adults under 45 are more apt to read the Sunday paper than the weekday editions, though for older folks the pattern is just the opposite.

According to the Newspaper Ad Bureau, the Sunday audience in the top 100 markets surpasses the weekday audience in all but two demographic categories—adults over 65 and those with less than a high school education.

Sunday circulation is heavily concentrated in the larger metropolitan newspapers. Newspapers with circulations of more than 100,000 represent 71% of all Sunday editions but only 48% of all weekday circulation.

▪ In those cities where both weekday and Sunday papers are readily available, more people seem to read the Sunday edition. In fact, the Sunday circulation of many major metropolitan papers runs one-third ahead of their daily figures.

It's understandable, then, that with such good demographics and numbers, the Sunday paper can become a compelling advertising vehicle.

In a typical large newspaper operation, the Sunday paper carries as much linage as three weekday editions, and it is likely to account for 40% of total ad revenues, according to Mr. Noble, the Paine Webber analyst.

The Sunday paper tends to be "overweighted" in classified advertising, he said, which can make it more profitable than the daily. But that also can make it more volatile because the three main components of classified advertising—employment, autos and real estate—are highly sensitive to shifts in the economy.

In general terms, however, classified advertising has been surprisingly strong, and it was up sharply in August, the most recent month for which figures are available, Mr. Noble said.

Auto classifieds have held up well because used cars are still selling briskly. Help wanted ads have remained reasonably strong because it's closely associated with employment, and the work force has been growing, despite the high unemployment rate.

Real estate advertising, Mr. Noble said, has shown some weakness but could turn quickly with increased availability of funds.

"On the whole, Sunday papers are economically attractive and the trend in the industry is to build more of them," said Mr. Noble

▪ Although a few metro dailies such as the *Cleveland Press* have started Sunday editions to run head-to-head against a competitor, most of the new entries are springing up in small and medium-sized markets that don't already have Sunday papers of their own.

"Smaller papers that start Sunday editions can often give the dominant metro in their area a run for its money because they can get the local ads, and that's one thing people buy a paper for," said Charles Lehman, manager of survey research with the Newspaper Ad Bureau.

Newsday, the Times Mirror newspaper in Long Island, N.Y., which considers itself a local paper (though not a small one), did just that when it started its Sunday edition in April, 1972.

"Before we put out our Sunday paper, the stores here had to advertise in the New York papers just to reach the Long Island market," said David Targe, senior marketing vp with Newsday.

But no more. *Newsday* has aggressively solicited local advertisers and catered to small retailers by offering zoning options that allow them to target areas of 50,000 to 70,000 people.

▪ In the nine years since the paper started its Sunday edition, total linage has increased 36%. In 1980, a total of 35.8% of the entire paper's advertising was in its Sunday edition.

Newsday's weekday circulation is 514,000, and Sunday circulation now stands at more than 570,000, having increased 17,000 in the last year alone.

A *Newsday* official says the New York metro hurt most by all this was the Daily News. "The bulk of our circulation came from them," said Mr. Targe. "Their figures show the erosion that's taken place."

In response to declining circulation in the mid-1970s, daily newspapers across the country began adding more sections, more "soft" news and more features—more of the stuff Sunday papers traditionally are made of. That pattern continues, but it is still the Sunday paper

Sun shines bright on Sunday papers

(Continued from Page S-2)
that delivers the grab bag of goodies for the whole family.

Theoretically, people have more time to read on Sundays. And researchers say that while people read the dailies for the news, they read the Sunday paper for relaxation and enjoyment.

Sunday papers with circulations of more than 100,000 usually have at least 10 sections, and a Newspaper Ad Bureau report listed 50 different kinds of features and columns that various newspapers offer—from comics and consumer action reports to book reviews and astrology charts.

■ Some Sunday papers have grown immense. The *New York Times* and the *Los Angeles Times* editions can weigh more than several pounds, and several others are nearly as big. Sometimes, their size alone can create problems.

Just producing, printing and distributing such a package can be a formidable task, though publishers seldom complain since that package is likely to carry about 75% advertising and 25% editorial—a far higher ratio than most dailies.

As for the reader, how can anyone—especially an advertiser—expect him to wade through all the information in the Sunday paper? The truth is, nobody does.

Readership studies indicate that while nearly everyone glances at the first section, other parts of the paper attract limited audiences. One Newspaper Ad Bureau readership study indicated that nearly everyone glances at the first section, 87% of all adults read the Sunday magazine and 80% read the local and regional news section.

Entertainment sections and tv logs are read by about 75% of the adults, and the life style section is close with 73% readership.

Classified sections are most likely to be thrown aside. Other sections that attracted less than 60% readership were the business, home/garden, travel and sports sections. About 77% of the men but only 38% of the women read the sports section.

The survey indicated that readers with less than a high school education tended to be less selective in their reading patterns. On the other hand, the college educated reader—often a prime target of marketers—was more likely to select only certain sections to read.

"But that's not bad," said Mr. Noble. "It's just part of the trend we're seeing in all the media. Everything is becoming more specialized so that people can focus on information that serves their particular interests."

The growth of cable tv and special interest magazines are part of the same trend, he said, adding that the Sunday paper is in reality a family of diverse publications delivered in one package.

"We can no longer produce a general audience publication and expect to reach people," said Mike Fancher, managing editor of the *Seattle Times*. "We have to speak to readers on their own specific interests." Once they're inside the paper, he said, "we can expose them to the broader range of news that has been our traditional mainstay."

In keeping with that theory, the *Seattle Times* is experimenting with a new Sunday section, Taste, for gourmet cooks.

■ Publishers and editors are also well aware that they face tremendous competition on several fronts. "It's not just radio and tv and other print media," said the promotion manager of a Midwestern metro. "It's anything that uses up time that people might otherwise spend with the paper."

The special interest sections are designed to meet that challenge. In addition, newspapers are making better use of what marketing people would call package design.

"The Sunday paper today is much more graphically appealing than it was 10 years ago," said Heath Meriwether, managing editor of Knight-Ridder's Miami Herald. "In the old days, Sunday papers were big, but they weren't very exciting.

"Now we're putting lots more effort into establishing a visual identity for each of the Sunday sections. We want them to really pop out at the reader."

■ Starting a few years ago, the whole newspaper industry began to take the matter of graphics very seriously. Graphics designers became the whiz kids of the newsrooms and since then, nearly every paper in the country has been affected, either directly or indirectly, by the changes they've wrought.

Some editors obviously think the pendulum has swung too far. "The industry has been in an agony of self-reappraisal for a long time," said Ralph Looney, editor of the *Rocky Mountain News*. "The first thing they always seem to look at is graphics. Myself, I think the most important thing is what you put into the newspaper."

But others, who seem to represent the prevailing opinion, insist that good graphics enhance good content and is absolutely necessary to attract the modern reader.

■ One editor, self-conscious about applying the language of merchandising to the presentation of news, asserted, "We must—if I may use this term—'sell' the product."

"The Sunday paper has to be packaged and organized and presented in such a way that the reader can come to grips with it," said Mr. Fancher of the *Seattle Times*. "If it's a massive jumble, he just won't bother."

Mr. Meriwether noted that research has shown Miami readers spend an average of 38 minutes with the Sunday paper. "We want to get them the most information possible," he said. "We'd like to get them into the newspaper and into every section."

In discussing other trends, Mr. Meriwether added that Sunday papers are discovering the importance of covering the "little news" of local communities.

"Of course the *Miami Herald* would never abandon its effort to report national and international news. This is a big-league, sophisticated paper," he said. "But we try to remember that no other medium serves the needs of the local community as the newspaper does. That's our challenge—to make sure we do those things for which we are uniquely suited."

■ It was with that goal in mind that the *Miami Herald* four years ago created zoned local tabloids for its Thursday and Sunday editions.

Called Neighbors, each local tabloid covers a piece of Dade County, and it specializes in the type of news many major metros have simply written off, said Mr. Meriwether.

■ In Dallas, where the Times Mirror's Times Herald and the *Morning News* are waging competitive war, the *Morning News* is making changes in classic Texas style. Big.

"We've tried to take every piece of the Sunday paper, pick it up, shake it out and see how we could make it better," said executive editor Burl Osborne.

The Sunday magazine, for example, has been revamped to feature more and better graphics, more attractive covers and shorter people-oriented articles.

The sports section has been expanded by 40% to accommodate a commentary page, a radio-tv sports columnist, a fan page, more complete coverage of high school and college sports, more news of participatory sports and a locally drawn sports cartoon.

A special business section that premiered as a Tuesday attraction also was added as a Sunday supplement. "We figure its readership among the movers and shakers of this town is well above 95%," said Mr. Osborne.

Regional news, which had been getting scant attention, now has its own Sunday section, with a color front.

■ And in January the *Morning News*, which just contracted with Cunningham & Walsh in Dallas to handle promotions, will pick up *Parade*, which the *Times Herald* had dropped to start its own magazine, *Westward*. (see story on Page S-48) "Our research tells us there's still a strong demand for *Parade* in this market," said Mr. Osborne.

"We don't assume that because we're healthy we can quit," he added. "Our guiding premise is that there's no free lunch. There's a cost attached to quality—in a market as vibrant as this, we think it's justifiable."#

Policy stretches Sunday to 3 days

If one weekend paper is good, three weekend papers are just that much better. Or so the *Miami Herald* tells its readers.

Under a plan started Jan. 4, Herald subscribers now must purchase a weekend package of Saturday, Sunday and Monday papers instead of the standard Sunday-only subscription.

Ben Cole, administrative assistant to the circulation manager, said the reason for the change was to improve service.

"Sunday service at most newspapers is poor because the carrier tends to forget from Sunday to Sunday precisely where the customers are," he said. "As a result, service can be dismal and customers often stop the paper out of exasperation."

■ Mr. Cole said the new system has helped the *Herald* provide consistent service, "and we found we can convert weekend customers to daily customers much more easily than we could before."

Then, too, he added, the *Fort Lauderdale News & Sun-Sentinel*, which competes with the *Herald* in some areas, had switched to a Saturday-Sunday package "and it was doing a good job for them."

■ To anyone who reads circulation figures, another advantage also seems clearly evident. Saturday and Monday are traditionally newspaper's weakest days, and now at the *Herald*, their numbers are tied to the Sunday paper, always the bestseller.

"Yes, it's done wonders for Saturday and Monday," said Mr. Cole. But he admitted that the plan initially hurt circulation of the Sunday paper and that it's still running 4½% below where projections say it would be if it were standing alone.

"However, sales have picked up substantially and our conversion rate of customers from the weekend package to daily and Sunday has picked up brilliantly," he said.

The city of Miami is in a state of flux, and the weekend package was just one of several moves designed to improve distribution throughout South Florida, Mr. Cole said.

All carriers, formerly independent distributors, have been made employes of the *Miami Herald*, and a warehousing distribution system has replaced street drops.

Audit Bureau of Circulations figures show that the average Sunday circulation for the six months ended Sept. 30 stood at 478,108. The comparable figure for the same period last year was 509,097.#

Free-standers prove their redeeming value

BY JANE GOLTERMANN

Jim Hayden came across an old study recently that would probably bemuse most people in the advertising industry. Mr. Hayden, national advertising manager at the *Philadelphia Inquirer*, says the study showed that 10 years ago free-standing advertising inserts in his paper accounted for the same linage in one year as is recorded in one week now.

There's money tucked between the pages of newspapers—especially the Sunday papers—and consumers evidently believe that the quarters they plunk down to buy an edition can save them valuable dollars at the store.

In fact, advertising inserts rank among the highest read sections in the newspaper. And advertisers claim they are one of the most cost effective advertising vehicles available.

■ The Newspaper Advertising Bureau estimates that 27,840,000,000 preprints were inserted in daily and Sunday newspapers in 1980, up 2.3% from 1979.

The use of inserts in the Sunday paper, in particular, has boomed over the past few years. It has boomed so much that marketers are seeking other outlets to get out of what many see as Sunday "clutter."

Jane Goltermann is a business writer in Chicago.

Nevertheless, the Sunday papers have many advantages that appeal to the consumer products company.

High circulation figures is one. This year, the three major coupon preprinters—John Blair Marketing; George F. Valassis & Co., Livonia, Mich., and Marketing Showcase, New York—each boasted a circulation of 34,000,000 in Sunday newspapers. Next year, all three expect circulation figures to jump to between 36,000,000 and 38,000,000.

■ Circulation is not the only part of the business on an upward spiral. The number of markets each of the companies reach, the average number of pages per issue and the yearly number of issues is on the rise. Valassis & Co., for instance, began a business shift in 1972 from commercial coupon printing for a direct mail program to coupon printing for free-standing inserts in Sunday newspapers.

■ At that time, a two-page insert reached 15,000,000 people and annual sales were $3,000,000. According to Dave Brandon, Valassis' national sales manager, the average insert this year was 22 pages, and 1981 sales are expected to be between $80,000,000 and $90,000,000.

"We find free-standing inserts a very valuable and efficient vehicle for coupon delivery," says Peter Consolazio, group manager-promotions, Quaker Oats Co., Chicago. "We've dramatically increased our use of them, and from all indications, that increase will continue. We get good advertising awareness, and they're very flexible from a geographic point of view and the number of issues you want published."

Most of the coupon promotions aim to sell grocery products, and health and beauty aids. But the preprint companies report an increase of new types of business, including wine, toy and magazine subscription accounts.

"The original concept of couponing was for the trial of a new product," says Mr. Hemm of John Blair Marketing.

"Or for a mature product, coupons were used as a defensive measure against new products.

■ "But today, the high cost of money makes couponing attractive. Manufacturers and retailers want to move products through the store rapidly. Promotions, especially couponing, tend to have the turns shortened."

High readership scores make free-standing inserts attractive as an advertising vehicle even without the respectable coupon redemption rates. Mr. Brandon reports readership on Valassis' "Impacts" insert covers are in the 85 to 90 percentile.

"It's one of the most highly visible parts of the Sunday paper," says Larry Johnson, Valassis' president.

■ An eight-page John Blair Marketing insert ranked second in a Starch survey of women readers of the April 26, 1981 *New York Daily News* Sunday edition. Only the general news section scored more —98% noted—although the *News'* Sunday magazine tied with the insert at 90% noted.

Another advantage to advertisers is that every insert is category exclusive.

"In a display ad on Best Food Day, you have heavy competition," notes Diane Love, vp-media director of Marketing Showcase, publisher of "Product Movers" inserts. "A 30-cent-off coupon for Sanka could be right next to a 50-cent-off coupon for Brim. That never happens in free-standing inserts."

The inserts are sold on a cost per thousand basis and, unlike run-of-press advertising, preprints can provide glossy color possibilities.

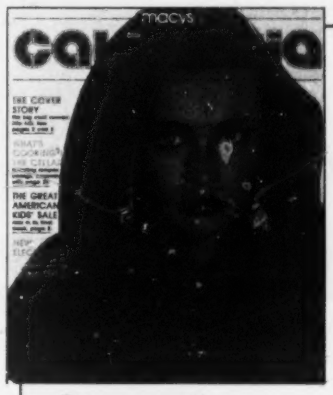
Meanwhile, an additional source of Sunday newspaper coupons—and a competitor of the free-standing inserts— are the Sunday comics coupons.

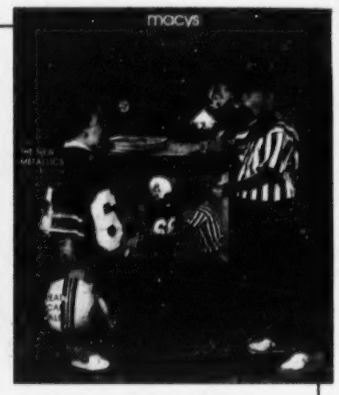
The four-year-old Sunday Comics Couponing Corp., Westport, Conn., offers a larger circulation— 40,000,000 people—than does any of the preprint companies.

In 1981, the company ran 17 programs, and in 1982, it plans to run from 18 to 24, according to exec vp Joseph Strickland.

"We buy the page, and divide it into 16 units," Mr. Strickland says. "People looking for a big promotional event buy us. We wouldn't expect somebody like a Pillsbury, with a cake that needs beautiful photography for appetite appeal, to go with us. But we give products a good identification."

The company, like the preprinters, has shown a tremendous increase in business. Mr. Strickland asserts that this year's sales figure of more than $10,000,000 is





Supplement to sales

R.H. Macy & Co. has taken a different approach to advertising in Sunday newspaper free-standing inserts.

"Macy's California," an advertising supplement with a magazine format, runs weekly in newspapers in the store's northern California and Nevada market.

"Inserts per se were very successful for us," says Michael Adams, advertising manager with Macy's California, San Francisco. "Our desire was to be able to present the total spectrum of the store in a vehicle that would allow us to promote all of our stores equally. You can't do that with run-of-press advertising. The cost is restrictive. So we opted to go to a consistent insert program."

Before the new magazine was launched in August, Macy's inserts featured specific departments. But it wanted a more programed approach.

"Our basic objective is to package the store and have the ability to present the entire spectrum of what we have to offer the customer in one package at one time on one day, and reach as many Macy's customers as we can," says Mr. Adams.

"Macy's California" runs between 24 and 48 pages, depending on the time of year. It reaches 5,000,000 people in 2,300,000 households.#

expected to double in 1982.

"What we like about the comics is that it's the largest single print medium in the world," Mr. Strickland says. "It reaches moms and kids at the same time."

■ When the success of free-standing inserts and couponing in the Sunday newspaper became evident, newspaper advertising execs began prodding the Newspaper Advertisng Bureau to get somebody to publish a midweek insert. The bureau last year approached McGill/Jensen & Co., a St. Paul, Minn., printing company, with the idea of printing a free-standing insert for newspapers' Best Food Days. McGill/Jensen Marketing, Greenwich, Conn., was formed in February by a handful of former John Blair Marketing execs.

"The Sunday papers are getting cluttered with inserts," says Scott Murray, a sales manager with McGill/Jensen who has been in the insert business since 1968. He helped get Product Movers off the ground in 1968, and left in 1975 to help start John Blair Marketing.

The company's first eight-page insert was delivered last week, and the second one is due out the week of Jan. 20. Twelve issues of "Adserts" are planned to be delivered to 32,000,000 readers on Best Food Day in 186 newspapers during 1982.

"This is a particular thing whose time has come," says Carl Turnblom, president of McGill/Jensen. "The newspapers only recently got the production capability of handling a lot of inserts. The huge influx of Sears, J.C. Penney, Ward's, etc. forced them to do it."

■ In fact, the idea of a midweek free-standing insert for couponers is not new. According to Mr. Brandon of Valassis, a company with its eye on the midweek market, there are "some real problems with a midweek insert.

"A lot of newspapers can't offer a Best Food Day insert," he says. "And there are problems with the method of delivery in terms of mechanically inserting the preprint at the newspaper in controlled distribution under a highly security oriented environment."

But already 50% of all inserts appear in the daily newspaper, according to Newspaper Ad Bureau statistics. And Mr. Turnblom claims that the 186 newspapers running McGill/Jensen Adserts have submitted a verified affidavit outlining how the inserts will be handled.

"We're dropping the coupon just as supermarkets are gearing up to do most of their business," Mr. Murray says.

■ But Mr. Consolazio of Quaker Oats is cautious about the prospect of a midweek insert.

"McGill/Jensen is stepping in the right direction," he says. "Their viability as a long-term company is a question. They must have lower margins. But it's a good idea, and we would probably participate down the road."

Mr. Murray says he expects the competition to wait and see if McGill/Jensen Marketing has any problems before they gear up to sell midweek inserts.

■ The three established free-standing insert coupon publishers are also looking into other possibilities even beyond daily and Sunday newspapers. Direct mail couponing offers the highest media-delivered coupon redemption rate, which makes it an attractive possibility for coupon publishers.

Marketing Showcase launched its first direct mail program—Showcase Direct—Oct. 5, reaching 25,000,000 homes with incomes of more than $16,000 and a high incidence of children. The company is planning two mailings in 1982—the weeks of April 13 and Oct. 7.

John Blair Marketing's new direct mail program—Prime Families Direct—is scheduled to be mailed April 12. A late September mailing is planned, as well, and Mr. Hemm says four drops are scheduled for 1983.

"We did this with Young-Rubicam as a joint venture in 1972," Mr. Hemm says. "It was called the Golden Envelope, and it went to 6,000,000 to 8,000,000 people. The ability to do it then was limited because the computer couldn't handle the enormous number of lists needed to be unduplicated and to reach a large national audience.

■ "However, with the advanced technology of the computer, you can now deliver to 18,000,000 to 20,000,000 people unduplicated. A lot has happened since 1972."

Valassis is taking a wait-and-see attitude about direct mail couponing possibilities.

"There are a lot of new formats and new delivery systems, but we feel they haven't been tested or proven," says Mr. Johnson.

Ms. Love of Marketing Showcase says she believes the newspapers are "getting kind of nervous, since we have alternate delivery vehicles."

But Mr. Hemm says he doesn't believe direct mail couponing would take business away from newspapers.

"It's a growing business," he says. "There are many different objectives advertisers have at different times of the year. I look at these [direct mail] as incremental opportunities, not in place of [Sunday inserts]. There will probably be some minor shifting. We're just trying to meet the needs the advertisers have, and this is one way of doing it."#

No direct threat, yet

While the number of free-standing inserts in newspapers is on the rise, retailers are keeping their eyes open for alternative methods of delivery.

Earlier this year, Sears, Roebuck & Co., Chicago, began testing the possibilities of hand-delivered promotions in an effort to get a precise reach at a lower cost per thousand. Company officials refused to comment on the success or failure of the three-city test.

Ed Kreitz, director of advertising and marketing with K mart Corp., Troy, Mich., says, "The situation is pretty volatile now because of the postal rate changes. Preprints have been a good vehicle for us, and we've increased our business every year. I don't think hand-delivered promotions are viable unless it's a densely populated area, and even in that case, its success is questionable."

J.C. Penney Co., New York, is experimenting with hand-delivered inserts, but company representatives would not comment on the success or failure of the program. Penney's has increased the number of its free-standing inserts in newspapers nationally from 23 in 1981 to 26 in 1982. And for the first time, the company is supporting the ad vehicles with tv spots that tell viewers to refer to the inserts for more information.#

Gold in California

and a bonanza in Sacramento

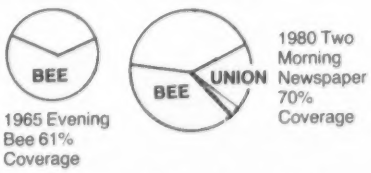
High Newspaper Readership
The two-newspaper town is alive and well in Sacramento. As the affluent capital of the nation's largest state, Sacramento has a high percentage of well-educated, informed adults.

Those adults read newspapers. Combined market penetration of The Sacramento Union and Sacramento Bee is 69%. (Compare that with 27% in San Francisco or 55% in Seattle.)

Only The Union Kept Pace
Sacramento is a high growth market. Since 1965, households have increased 166,024, a 76% increase. The entrenched Sacramento Bee could not keep pace, showing only a 27% increase. The revitalized Sacramento Union outpaced the market, with a 77% increase.

A Gold Mine For Advertisers
As the nation's 10th most affluent large metropolitan area ($27,229 average income), Sacramento delivers a high percentage of big-spending adults to advertisers. Low duplication (3.9%) creates a very efficient 2-newspaper buy.

Sacramento's Basic Buy
This efficiency is well recognized by retail advertisers who have for the last two years placed 40% of their advertising in The Union.



1965 Evening Bee 61% Coverage

1980 Two Morning Newspaper 70% Coverage

Today The Union is a Basic Buy to reach a majority of your potential customers.

Sacramento's Basic Buy

4A's eyes tape case; Senate hearings set

By RICHARD L. GORDON

WASHINGTON—With 16 major ad agencies dragged into the Betamax copyright case, there are signs that the issue could become part of the Washington agenda for the American Assn. of Advertising Agencies.

The agencies have been invited to send representatives to a meeting at Four A's headquarters in New York this week, and the Four A's Washington office has been alerted to begin tracking developments in Congress where hearings on the home video recording dispute open Nov. 30.

Four A's has already sent "observers" to meetings of an ad hoc "Right to Tape" coalition being organized by the Electronic Industries Assn. and Sony Corp. of America, but is playing no active role as yet. Separately, Sony ran page ads in 23 major newspapers last week defending "the consumer's right" to use home video recorders and telling readers "it's time to voice your opinion."

It's unclear how far the agency association will go in fighting the motion picture industry's claim that home recording of tv programs is illegal without special compensation for copyright holders.

There are concerns within Four A's that the Right To Tape coalition will advocate that any new copyright royalties to cover home

Too soon, some agency execs say

Nets let new series axes fall

By JAMES P. FORKAN

NEW YORK—Seven weeks into the new prime time season, CBS-TV has made several schedule changes, moving "Nurse" and "Shannon" to new times barely four weeks after their premieres, while bouncing "Jessica Novak" and adding an interim movie night—all to mixed reviews in agency circles.

All three tv nets now have begun survival-of-the-fittest moves, zeroing in on their weakest links; earlier changes included ABC's shelving of "Maggie" and NBC's axing of "Nashville Palace."

ABC and CBS continued in a neck-and-neck Nielsen race through Nov. 22; CBS held a slight edge in the ratings for the first seven weeks a year ago.

"Nurse," which went from a General Foods-sponsored movie to a short-run series last year, has averaged a mere 20 share through Nov. 22 and so will get another chance on Thursdays at 10 p.m. (ET) as of Dec. 17, against NBC's "Hill Street Blues" and ABC's "20/-20."

"Shannon," trounced to a dismal 17 share through Nov. 22 by ABC's "Dynasty" and NBC's "Quincy," will go on hiatus after Dec. 2, with rescheduling to be decided "early next year," according to CBS Entertainment vp-programs Harvey Shephard. Also to be decided is a slot for "Cagney & Lacey," a limited-run series about lady cops, which has only one of its two stars signed.

"Jessica Novak" has been axed as of Dec. 3, having managed only a 24 share in its brief run. Some admen expressed disappointment over the "quick kill" of this show, while one agency vp blasted the

NEW TACTIC FOR ADULT DIAPERS

P&G, K-C going direct

By JENNIFER ALTER

The two marketers of briefs for incontinent adults are exploring direct marketing as a way to sell their respective products at the consumer level.

Apparently giving up on mass retail distribution, Procter & Gamble Co. last week began advertising an 800 number through which consumers can order Attends disposable briefs for home delivery anywhere in the country. The ad, which ran in central region editions of *TV Guide*, also listed a post office box number under a Home Service Group heading and offered a booklet, "Living Normally with Incontinence," to explain how to order Attends.

A P&G spokeswoman said the Home Service Group has been established specifically to market Attends and a special Pampers for premature (less than six pounds) babies. She would not comment on plans for a similar approach to marketing other products. Never before has the company attempted direct marketing of any kind.

The move comes on the heels of a similar effort by Kimberly-Clark Corp., which in October issues of several maturity magazines began to advertise the availability of its Depend absorbent shields.

Both companies have been experimenting with various marketing approaches which are designed to deal with the sensitive nature of the incontinence problem.

K-C, which had been testing Depend in drug and surgical supply stores in Kansas City and Green Bay, recently added the rest of the state of Wisconsin and launched its first tv campaign. It also markets the product under the Comform name in Lima, O. Depend is available through medical institutions in Wisconsin.

P&G, after first testing Attends in hospitals and nursing homes in southern Idaho, gradually rolled out nationally at the institutional level in early 1980. It conducted a controlled store consumer test of Attends in the Boise area until early this fall, when the product was pulled. Since November of 1980, Attends has been available nationally in the Sears, Roebuck & Co. catalog and through some 50 surgical supply stores and convalescent pharmacies.

P&G apparently has turned to direct marketing upon finding that retail demand simply was not great enough to justify the distribution. Sources close to the Boise test note that at retail the product "fell flat on its face."

In commenting on its direct marketing test, the P&G spokeswoman said, "Broad retail distribution probably is not justified given the relatively small percentage of the population needing this kind of product."

One explanation of why P&G would pull back at retail at the same time K-C is expanding lies in the differences in the pricing and product construction. According to Francis Bouda, a self-described consultant/engineer/lawyer, who has been following both products closely, Depend is close to one-half the price of Attends. Furthermore, he says, it is much less bulky, which makes little difference for bed-ridden individuals but is a factor for ambulatory persons.

The move to direct marketing is an indication of the intense interest both companies have in their

Using Strawberryland characters

Gen. Mills sets promo foods

By JANET NEIMAN

General Mills will market a series of Betty Crocker baking mixes using licensed Strawberry Shortcake characters on the packages, as a promotion.

A source said the General Mills division holds a license with American Greetings' Those Characters from Cleveland unit to use the popular Strawberryland characters on its products, and that the unit "will shortly be coming out with cake mixes using the Strawberry Shortcake characters" on existing Betty Crocker products.

The first in the expected series is showing up on retail shelves now in the form of Betty Crocker Blueberry Muffin wild blueberry muffin mix. The package features a cut-out figure of the Strawberryland character Blueberry Muffin.

The new packages are being sold on a single sell-in basis in most markets nationally, as an addition to, not as a substitute for, the regular Betty Crocker wild blueberry muffin mix.

Last July, General Mills' Big G division introduced a new cereal, Strawberry Shortcake, on the same one-order-only basis and without advertising, and offered it to retailers in most markets (AA, July 13). The cereal package fea-

For skeptics Firestone Tire & Rubber is telling Phoenix motorists they "have a right to expect more" in car care, and can get it from MasterCare (AA, Nov. 23). BBDO handles.

Colgate loses suit on snacks marketing

By NANCY GIGES and BOB COOK

Although Colgate-Palmolive carried its four-year battle all the way to the U.S. Supreme Court, it must pay United Roasters $950,000 for breach of contract in a dispute related to the marketing of Bambeanos, a soybean snack it purchased from that North Carolina-based company.

Colgate's final appeal failed when the highest court refused in mid-November to hear the case. That left standing an earlier federal district court judge's order that New York-based Colgate pay the fine. That order had been upheld in 1979 by the court of appeals in Richmond.

In the mid-1970s, Colgate bought the assets of United Roasters, marketer of Bambeanos, Jimmy Crack Corn and Happy Nuts snacks, and agreed to pay royalties based on Bambeanos and other snack sales for 25 years. According to George W. House, attorney for United Roasters, at the time of the purchase Bambeanos was available in 17 states and had strong sales in Southern California, New York and North Carolina.

Next week: Top media

In Section 2—An exclusive ADVERTISING AGE report on the country's 100 top media companies, ranked by revenues from U.S. media operations. A detailed look at who they are, what they do, their strategies for the explosive 1980s and the varied personalities who forge them.

In 1974, Colgate assigned the snack to North Castle Partners, Greenwich, Conn., and began testing advertising in New England. That support made the snack even more successful. According to Mr. House, the brand's share rose as high as 9% in the areas where it was marketed and leveled off at about 3%. This compares to less than a 0.1% market share for all other soy snacks combined. At the time, the snack nut market totaled about $500,000,000 nationally, he said.

Mr. House said Bambeanos was successful because it was the only large soy nut snack—about the size of a peanut—and because United Roasters had come up with a method of coating the nut with flavors to mask the unpleasant soy taste. The item was available in onion, cheese, salted and bacon flavors. Two years later, just when the company had said it was planning to roll national, it stopped advertising and promotion and invoked its right to cancel the contract.

However, according to Mr. House, Colgate refused to return the business to United Roasters free and clear as the contract stipulated. Colgate wanted United Roasters to purchase the business because it had invested in expanding distribution and advertising the products, Mr. House said.

Mr. House contended that Colgate's interest waned for several reasons. He said the product was much more successful than Colgate originally thought, and the royalty payments turned out to be higher than expected. Secondly, Colgate had finally achieved a long-time goal of getting in the food business in a big way by purchasing Riviana Foods. Bambeanos and other snacks then appeared to be peanuts, he suggested.

When the two companies failed to reach an agreement, United Roasters, a company that had been founded specifically to market those snacks by a dozen North Carolina businessmen and politicians, filed suit.

The suit charged breach of contract and asked for $3,000,000. Mr. House said midway through the jury trial Colgate offered to settle for about $200,000, but United Roasters refused. The jury awarded United Roasters about $600,000 for wrongful termination,

BP goes to Geers agency

LONDON—British Petroleum's selection of Geers Gross Advertising to handle its $5,000,000 account gives the agency its first worldwide client.

"It's a prestigious company with a great many tentacles," said Robert Gross, agency chairman. "It is significant for us because it will open the automotive world and other allied areas to our agency."

Mr. Gross said his agency was among three finalists, the others being Abbott, Mead, Vickers and N W Ayer Barker.

The account includes three areas for BP: British Petroleum Oil International Ltd., British Petroleum Oil Ltd. retail division and British Petroleum Industrial Products.

The previous agencies for the division were Interlink, J. Walter Thompson Co. and Brunnings.

British Petroleum is the seventh largest global oil company, with operations worldwide including the U.S.

Meanwhile, Geers Gross in New York also was selected to handle the $1,500,000 Lucille Roberts health spa and diet centers account. Roberts' previous agency was Calet, Hirsch, Kurnit & Spector. #

MEDIA COMMENTARY

Tv's localization

BY HOWARD KAMIN

While most pundits concentrated on the effect new electronic media will have on network television, there is an emerging trend that will have more immediate consequence.

This trend is the growing awareness by advertisers to localize their use of television. Spot tv as a medium is an increasingly major element in the tv mix.

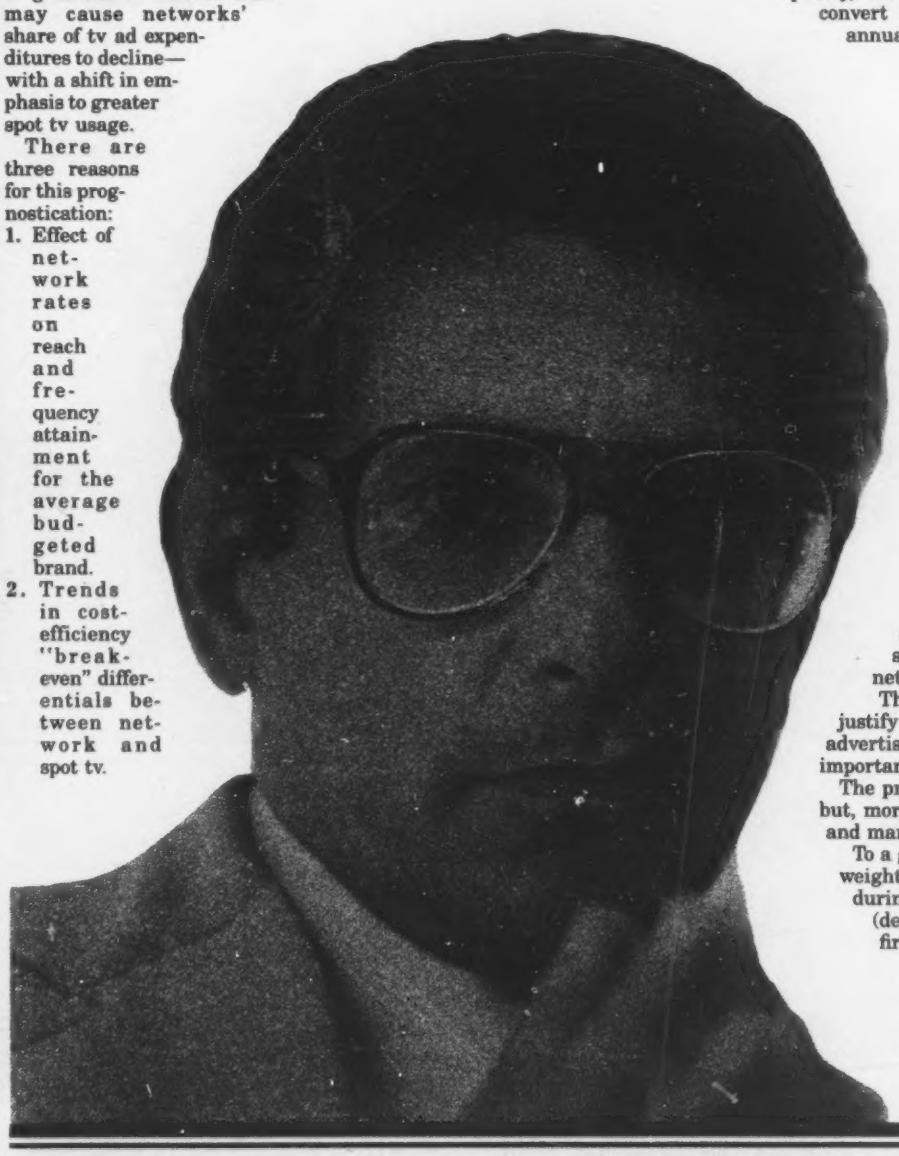
There is no question that network tv is the preferred medium. In 1979 the FCC reported 63% of all national advertisers' television dollar usage was allocated to network tv. National spot tv received only 37%. This was the highest vote of confidence advertisers placed in network tv in the last 13 years.

Advertisers' preference for network over spot tv is primarily based on its mass national coverage, the generally greater cost-efficiency of network vs. spot tv, and the qualitative advantages of commercial in-program placement and environment.

Yet, there are subtle trends occurring in the tv market that may cause networks' share of tv ad expenditures to decline—with a shift in emphasis to greater spot tv usage.

There are three reasons for this prognostication:

1. Effect of network rates on reach and frequency attainment for the average budgeted brand.
2. Trends in cost-efficiency "break-even" differentials between network and spot tv.
3. Advertising productivity measurements and marketing considerations.



High out-of-pocket network tv unit costs make it difficult for the average national advertiser to achieve meaningful levels of reach and frequency or continuity.

For example, the top three television spending categories—food and food products, automotive and automotive accessories and toiletries—account for 36% of all tv expenditures.

These categories include such major advertisers as P&G, GF and GM, which in total invested more than a billion dollars in tv in 1979.

Yet, the average brand in these categories (based on 29,500 brands analyzed by LNA/BAR) budgets less than $1,000,000 dollars for all media.

Even if the average brand in 1981 invested all dollars in network tv it would only be able to purchase a modest annual schedule of less than 500 target rating points in daytime network tv, or less than 200 in prime network tv.

In terms of reach and frequency, these rating points convert to the following annual delivery:

What $1,000,000 buys in reach and frequency for the average advertiser, 1981 yearly average

Medium	Women 25-54 R (%)	F	GRP
Daytime network tv	61	8.1	493
Prime network tv	70	2.5	175

Source: Media Market Guide; Agency estimates

Confronted with moderate levels of reach and what most media practitioners now regard as insufficient frequency, the majority of advertisers are forced to consider other tv alternatives. The most prevalent route is for advertisers to concentrate activity within a segmentation philosophy.

Some of the strategies are to telescope network fourth quarter of 1976, the cost-efficiency differential expensive network dayparts, *i.e.*, early morning, late fringe; consider selective national programing in network syndication or cable tv; concentrate on regional or local market developments.

All these approaches are utilized, and some advertisers even abandon tv in favor of opportunities in radio, newspapers or magazines.

But the most prevalent tendency for advertisers, particularly in the package goods field, is to retain the use of tv by concentration on regional and local market development via spot tv.

As a result, national spot television reported a 23% larger increase in ad volume than network tv for 1980.

Our prediction of spot tv becoming an increasingly important medium is also predicated on an analysis of the break-even differential between spot tv and network tv.

Break-even is defined as the required per cent of U.S. tv homes covered by a spot advertiser before it becomes more efficient to schedule network.

For most dayparts, network tv is generally more efficient than spot tv, but over the past five years the cost of network has escalated at a faster rate. In the fourth quarter of 1976, the cost-efficiency differential between spot and network was dramatically in favor of network.

For example, a daytime spot tv advertiser, utilizing a list of 40 markets covering 64% of the U.S., might be converted to network tv and secure national coverage at no increase in budget.

A prime time spot user in 30 markets and 54% of the U.S. could be converted to network and secure national coverage for the same budget as spot television.

In 1981, it is estimated that a daytime spot tv advertiser would have to advertise in markets covering almost 84% of the U.S. tv homes and a prime spot user, in 70% of the U.S., before it became economical to convert to network usage.

The result is that it is exceedingly more difficult (compared to five years ago) to justify network tv to replace spot tv on a break-even efficiency basis. For most tv advertisers with regional or major market skew, the use of spot tv becomes a more important media consideration as the efficiency advantage of network is being eroded.

The predicted localization of the tv mix is not only derived from media analyses, but, more importantly, the effect of these media trends on advertising productivity and marketing considerations.

To a great extent advertising productivity is related to the level of frequency and weight affordable. Foote, Cone & Belding analyzed 14 new product introductions during the '70s. FCB estimated likelihood of achieving high brand awareness (defined as above 60%) based on the cumulative weight of advertising during the first three to six months a brand is in the market.

FCB's analysis indicates that placing 2,500 target rating points provides a 70% chance of achieving high brand awareness. Between 1,000 and 2,499 grps, the probability is 33%. Below 1,000 it is extremely unlikely that an advertiser will achieve high awareness based on tv tonnage.

The modestly budgeted advertiser cannot hope to purchase the required 2,500 grps in network tv to achieve high brand awareness.

(Continued on Page 50)

"There is no question that network tv is the preferred medium, yet, there are subtle trends that indicate a shift in emphasis to greater spot tv usage."

Tv's localization

(Continued from Page 48)

And even if an advertiser is willing to settle for 2 to 1 odds against achieving high levels of awareness by running 1,000 grps, the advertiser has to spend in 1981 between $5,700,000 for prime network or $2,000,000 for daytime network tv.

As illustrated earlier, these budget levels are beyond the resources of most brands.

There is one way for the limited budget advertiser to increase advertising productivity. They can concentrate their efforts geographically. Sales of even the most universally sold product will usually indicate grouping of markets where current volume outperforms national per-capita performance. Concentrating on major markets via a local spot tv effort could achieve minimum reach and frequency and grp levels to increase ad productivity.

For example, assuming a 1,000 target grp goal (with a 33% chance to achieve high awareness) an advertiser with a modest budget could achieve meaningful weight levels in a concentrated geographic universe.

This illustrates that it is better to communicate effectively to 33% or 50% of the universe than to marginally expose a message to 100%.

The 1981 cost and reach and frequency delivery of selected spot tv

	% U.S. TV COV.	EST'D BUDGET ($M)	W 25-54 R (%)	W 25-54 F
Daytime Spot				
Top 10 Markets	33	793		
Top 25 Markets	50	1,287	62	16.1
Early, Late Fringe				
Top 10 Markets	33	1,151		
Top 25 Markets	50	2,028	80	12.5

This philosophy may be gaining support. As ADVERTISING AGE reported in its coverage of the 1980 ANA meeting, more and more advertisers are reacting to competitive media and marketing pressures. Advertisers reporting on the major trends developing stated, "that both localization of marketing programs and the new video media are playing a big role in future plans."

The perceived advantages of spot tv vs. network are growing as the dynamics of the broadcast market change. Advertisers are placing a greater emphasis on local market-by-market planning to achieve meaningful levels of competitive weight in key markets—even at the expense of national advertising.

We don't believe the dire prediction by John Naisbett of Yankelovich, Skelly and White that network tv "is in danger of becoming the *Life, Look* and *Saturday Evening Post* of the 1980s."

The position of most agencies is that while networks' share of viewing will decrease as new electronic media increase penetration and usage, the networks will remain dominant in rating strength throughout the 1980s. Networks will retain their position as the primary mass medium to deliver national coverage. But with inflation, there may be fewer brands capable of maintaining the budget to utilize network in a productive, sustaining manner.

For this reason, spot television will become an increasingly major element in the tv mix as advertisers place a growing emphasis on local concentration of marketing efforts to achieve more advertising productivity. #

NOTES FROM THE CLIENT SIDE

The country marketer

BY RICK DOUGLAS

Like most ad people, I work deep in the canyons of a large city. In my case it's New York; for others it's the same place or another fairly large metropolitan area with certain big-city problems like commuting, congestion and competition to go with such nice features as all-night restaurants, all-night type shops and all-night offices, should we care to use them.

But all of us who work in a large city or even a small city think, at least once in a while, about those who are client or agency types who don't work in or near any kind of city at all.

Are there clients who wear jeans to the office like the agency creatives—only out of practicality and not as a badge of rank? Are there clients out there? Or agencies?

If so, you may wonder what life might be like in rural Montana, New Mexico or Vermont. Into the office (do they have offices?) at 8:30 a.m. maybe, lunch at the local saloon (do they have saloons?), a bit of fly fishing after lunch (they must have fishing), then a few more hours of contemplative work, a five-minute drive home to a wood stove and quiet dinner.

Slow, thoughtful, relaxed, noncompetitive—that's what advertising and marketing life in rural America must be like if it exists at all.

Certainly these marketers can't be as sharp or as good as us. Of course they can't work as hard as we do. I wanted to see for myself. Maybe you have, too.

The opportunity presented itself during the past summer when I was invited by Garden Way in Charlotte, Vt., to come and visit for a few days on my vacation. Its publishing division bought a manuscript I wrote (on gardening, naturally), and since there were quite a few gardening questions still unanswered for the book, why not go to Vermont and talk to the gardeners.

Garden Way is the manufacturer and marketer of a number of gardening products. It produces and sells the Troy-bilt Rototiller—a garden cart with big bicycle-tire wheels—and a solar greenhouse, among other things. It has a few client marketing types, an in-house ad agency and some manufacturing capability. Charlotte, Vt., 20 miles south of Burlington, has a population of about 500. There, I thought, I could talk to these country marketers, get some sleep, swim, sail and see the operation and try not to act too big-cityish.

It was not easy, but I eventually found Charlotte (it was actually a sign) and the house where I was to stay, which was perched on a cliff above Lake Champlain. I unpacked and admired the view of the lake. What a life. I don't have a meeting until 8:30 a.m. I could get up at 7 a.m.

Rick Douglas is U.S. ad manager, British Airways, New York.

There's little time to really relax. Even in seemingly quiet moments like this, business continues.

I was up early the next day, admiring the lake and checking my schedule for the three days of my visit. Every lunch and dinner was planned as well as the time between. That was a bit alarming, but I relaxed when I was taken to Garden Way's conference center—a cabin-like building known as "Meeting House."

It was tucked away in the woods with a gigantic vegetable garden in front. As I made my way to the meeting, I met the casually dressed Garden Way people munching on homemade doughnut holes and drinking fresh brewed coffee.

The meeting started at 8:30 a.m. At 11:30 a.m., we took a break. The meeting was pretty much like what you hear in any long monthly meeting, but why were we taking a break at 11:30? I learned that lunch would be at 1 p.m. Where would they all go for lunch, I wondered? There wasn't a restaurant within 20 miles. How would they do it? Truck in escargot and duck a l'orange from Montreal? Throw us a side of beef? Did people have white wine and Perrier with lunch up here? There wasn't too much time for hungry musings of this nature because the people were expecting me to make some kind of contribution to the meeting. The group I was with was mostly from Gardens for All, a national nonprofit association to promote gardening to, well, when they say "all" they're not kidding. The marketing people were from the in-house agency, one was sitting next to me and I asked him if he worked on one part of the national program to get more people involved in gardening. He said, "No time for that, I'm working 14 hours a day as it is." Well, he had to be kidding.

Finally it was lunch. Instead of going out to lunch, it came to us—fresh vegetables of every imaginable variety in every imaginable form, crab meat on home-baked rye, steak tartare, Scotch broth and a variety of desserts. Beverages were apple juice, grape juice and some other healthy sounding juices. When I asked for a beer I got a slight frown but a fine Canadian ale made me forget it. The only problem with lunch was there was scarcely time to taste it—business talk continued.

I was soon shuttled to my next meeting, which ended at 5:30 p.m. After that, I had a whole half hour before the dinner meeting at 6 p.m. After a couple of days of this, I began to believe in the 14-hour day.

The people I met were every bit as professional and competent as anybody in the cities, and they sure worked hard. I couldn't tell the creatives from account services because casual dress is all anybody wore. I wondered what they did in their spare time. Also, in a company of gardeners, did anybody have time to garden?

One evening I asked, "Well, it is possible to garden while working here, but it's not easy." That was interesting, it was "possible." Then I asked an editor when he gardened. Instead of telling me, he showed me. "We have employe gardens here," he said pointing out his own carefully tended plot practically in front of his office. "I come out here with a cup of coffee and take a gardening break." I noticed an unsightly weed patch next to his garden and pointed it out to the editor. "Oh, that's poor Charlie's," he said. "He's been busy." He didn't need to say anything more about poor Charlie who was, I knew, locked into 14-hour workdays or constantly traveling or consumed by some other project.

Perhaps Charlie was consumed by the weeds in his garden. No one could tell.

Time passes quickly when you are constantly shown something new, be it direct response ad copy or a dozen easy ways to garden.

Near the end of my visit, I snapped a few pictures of Lake Champlain, which I didn't get much chance to see, and scurried to my last dinner meeting. Slouching in a chair and holding up my head with one hand, I tried to summon up enough energy to finalize discussion on the book projects and other things I had learned.

Everyone was dressed in jeans and casual clothes, but that wasn't fooling me. Then I heard a woman say, "I froze three and a half quarts of beans today." I lept up, in a fashion. Ah, a gardener, a leisure time enthusiast, a kindred spirit, perhaps (after all this was supposed to be my vacation).

I found her dressed casually (but I knew that trick now), and relaxed (well, maybe) and said, "I heard that; you have time for gardening, you put up your food, what else, what else?"

She gave me an amused look. "Of course I freeze food, I'm the food preservation expert here."

The next day I left Charlotte, Vt. (or actually the sign that had the name on it), and headed back to the big city. It was time to think that on Monday I would wear a white shirt and gray pin-striped suit and get out of these "work" clothes. #

New tv series faltering

By JAMES P. FORKAN

NEW YORK—Execs in agency circles again had their erasers at the ready amid talk that some additional prime time tv schedule changes were under discussion at ABC, CBS and NBC.

Given the number of yuletide specials ahead this month, it was likely that virtually all those proposed fixes would begin in January. The bulk of those possible changes would not upset most agency buyers in a fall season that after 8½ weeks has yielded few new hit series and has seen several slumps among veteran shows.

ABC programers were said to be itchy to scrap the "Open All Night" and "Making a Living" comedy combo on Saturdays, perhaps in favor of the currently shelved "King's Crossing" hour drama. Among those doubting that "Crossing" would enter that slot was William Lynn, senior vp-director of media and network programing, KM&G International. If that serial does wind up as the Saturday lead, it will amount to a "purely interim" maneuver, he said, since ABC execs "have no real belief in that show" as a potential winner.

CBS was said to be mulling "Baker's Dozen" for early Monday evening, with some agencies figuring it may bump "The Two of Us" and others hoping "Dozen" and another backup sitcom would knock out both "Two" and "Private Benjamin." Paul Schulman, who heads the Paul Schulman Co. network buying division of Gardner Advertising and who is among the admen hoping to see improvements in such weak links as CBS' opening Monday hour and ABC's leadoff Saturday hour, is high on "Baker's Dozen," calling it "a super show."

Phil Burrell, vp-network programing, Dancer Fitzgerald Sample, on the other hand, wondered if "Dozen" might now be seen as too similar to NBC's newly popular "Hill Street Blues."

The latest word among admen on CBS' Wednesday night tv movie package (AA, Nov. 30) was that it would be succeeded come March 3 by two one-hour series, probably "Cagney & Lacey" at 9 p.m. (ET) and a revamped "Shannon" at 10 p.m. One CBS pilot, the Disney-produced "Cherokee Trail," seemed unlikely to go to series after having posted a borderline 27 share the week ended Nov. 29.

As for NBC, Angie Dickinson's new action series "Cassie & Co." has been announced for Saturday duty at 10 p.m. as of early January, but last week some agency execs were getting inklings that NBC programers might put her back into her old "Police Woman" slot, 10 p.m. Fridays, in mid-January, replacing the delayed Rock Hudson entry.

Mr. Lynn, who counts himself among those who feel that NBC's moves "are not going to help; NBC's just not fixable for this season," doubted that "Cassie & Co." or any potentially popular series entry would be slotted on Friday nights. Such series are "unlikely to get sampling" opposite blockbuster "Dallas" and "Falcon Crest," he reasoned, so slating any series there would be "writing it off." Far more likely, in his opinion, would be a package of "highly exploitable" Friday tv movies. NBC pro-

Real rich

Ads for the new product from the Mrs. Smith's Frozen Foods Co. say, "Mrs. Smith's Whipped Topping is so rich and creamy, it'll remind you of real whipped cream." The topping is being tested in Texas and possibly other markets with newspaper coupon ads from Leo Burnett Co., Chicago.

French soft drink leader hitting East Coast

Cola wars, economy worrying bottlers

By JOHN REVETT

LOS ANGELES—The economy and what one competitor called "the holy war" between Coca-Cola and Pepsi-Cola weren't easily brushed aside by speeches, wining and dining and back-slapping confabs at the National Soft Drink Assn.'s annual convention here last week.

"It's simple. It can't go on much longer because it's costing too much money," said one competitor of the promotional discounting and price battles going on between rival colas. He added that bottlers are spending more and more time on Coke and Pepsi, "and paying less attention to other brands. At the same time, you've got bottlers taking their profits from other brands because they're not making it on those two."

Neither PepsiCo chairman Donald Kendall nor other Pepsi or Coke execs said so, but some bottlers reported they were given indicators that price wars would subside. Others said the competition would increase.

The feeling among some execs at Dr Pepper was that the Coke-Pepsi battle is diverting both companies from competition in noncola areas; "So there is some good in this for some of us," one stated.

Canada Dry, being acquired by Dr Pepper, was reported to have a new cola developed but holding back on entry because of the heated cola competition.

Neither Seven-Up Co. nor Crush International execs would comment on possible cola entries from them, though there was much talk about Crush as the sleeping giant of the industry, now that it's part of Procter & Gamble and receiving a transfusion of P&G personnel.

Would P&G settle for the small flavor categories or make a Folger-like move after the two leading cola brands?

"That's a question a lot of people are asking without getting any answers," said a soft drink company officer. "We can assume they'll stir things up."

The exhibit areas here were virtually devoid of new products, which several in attendance took as another sign of hard economic times holding back soft drink business expansion. The one significant new item was Orelia, the U.S. version of French market leader Orangina. It drew a steady stream of supplier salespeople, competitors and the curious. The orange/citrus pulp drink, with just a trace of carbonation, reportedly is headed for eastern markets via a new import arrangement following introduction on the West Coast (AA, Nov.16).#

MEDIA LEADERS

Conglomeration, a word frequently heard in the world of big business, also is becoming a byword of the media business. It's increasingly a world of who owns what, or 'I didn't know they published that magazine!" To help sort out the puzzle of who owns what, ADVERTISING AGE has compiled its first-ever, first annual "100 Leading Media Companies" issue profiling top companies, their media holdings and personnel changes, with features about some of the people behind the companies, in this week's Section 2, beginning opposite Page 44.

FTC in Crest ad checkup

WASHINGTON—Procter & Gamble's big introductory campaign for new Crest toothpaste this year stirred up ad investigators at the Federal Trade Commission. But a probe of "therapeutic benefit" claims was closed after P&G switched to new ad copy in October.

The Crest investigation was revealed in a terse two-page letter telling P&G the inquiry was being discontinued. The letter surfaced recently in the commission's public files.

A P&G spokesman confirmed that FTC had made inquiries in September about Crest ad copy.

Media movers: Powers that are

JOSEPH M. WINSKI

Its daily newspaper, the *Christian Science Monitor*, being a prominent publication, one might suspect that the Christian Science Publishing Co. would show up on a list of the country's top media companies. It does, ranking No. 89 on Advertising Age's first listing of the 100 largest media companies in the U.S.

On the other hand, the Mormon Church—the Church of Jesus Christ of Latter-day Saints—might seem a far less likely candidate. But the rather extensive broadcast and cable tv holdings of its Bonneville International Corp. (controlled by, and therefore listed as, the church's Deseret Management Corp.) actually places the Mormons three notches above the Christian Scientists as a media enterprise.

Westinghouse Broadcasting is well enough known to expect that its parent company, Westinghouse Electric Corp. would be there somewhere, and it is (No. 27). But General Electric Co., too? Yes. GE owns three tv stations, eight radio stations and a cable tv company with 220,000 subscribers. Though the estimated $150,000,000 in revenues produced by GE's media properties are all but lost in the company's $24.96 billion in revenues last year, they were enough to rank GE 47th among the nation's media companies.

The familiar and the surprising make up AA's top media company list, which we believe to be the first effort to rank companies solely by their revenues from media operations. It ranges from the predictable tv networks and major newspaper and magazine publishers to unlikely entities like the Mormon Church, General Tire & Rubber Co. (which owns the broadcasting company RKO General and ranks No. 51) and Pittway Corp. (No. 65), which may be better known to the general public for smoke alarms than its many trade publications.

■ There are also unfamiliar names with familiar holdings, such as No. 46, A.H. Belo Corp. (the *Dallas Morning News*); No. 60, A.S. Abell Co. (*Baltimore Sun*), and No. 34, Affiliated Publications (*Boston Globe*).

The cast of characters who have built or are running the media companies is equally broad and striking. There is Roy Park, a former food manufacturer who didn't get into the business until he was 52 but became the first broadcaster to own the maximum number of stations (seven each of tv, fm and am stations) allowed by the Federal Communications Commission and is still going strong at 72. His Park Broadcasting ranks No. 81.

The controversial Rupert Murdoch, publisher of the *New York Post*, is here (News American Publishing, No. 32), but so is another aggressive foreigner, Kenneth Thomson; Lord Thomson of Fleet has been rapidly accumulating smaller U.S. newspapers, pushing his company up to No. 33.

American Broadcasting Cos., according to our figures, is the country's largest media company, thus seeming to earn the bragging rights it already has claimed as "the largest single advertising medium in the world." CBS and NBC (listed as RCA Corp., its parent) are Nos. 2 and 3, followed by Time Inc.

Time may be considered the largest magazine publisher on the list, although it now appears to be deriving more revenues from its video holdings than magazines. The top 10 is rounded out by the big newspaper enterprises (all with substantial non-newspaper holdings): Newhouse Newspapers, Gannett Co., Hearst Corp., Knight-Ridder Newspapers, Times Mirror Co. and Tribune Co.

In the individual company profiles that are the heart of this special section, one detects, again and again, the same refrain—a common sense of explosive change that Ad Age believes makes a listing of this kind especially timely.

For it is clear that many media company leaders believe the 1980s are ushering in an era of unparalleled growth for their industry, marked by accelerated movement from one type of media business to another. They cite two principal reasons: The rapid advance in communications technology and the election of Ronald Reagan to the White House.

Technology, for example, is making it possible for newspapers to deliver on tv screens the information and advertising they traditionally delivered as newsprint. At the same time, technology is affording television the opportunity to provide the in-depth news coverage (witness Cable News Network) traditionally the province of the print media. The technical boundaries that separate the media are being erased.

At the same time, the "free enterprise" philosophy of the Reagan administration is reducing the old political and legal barriers to growth through cross ownership of media. In August, CBS received a waiver from the years-long prohibition of network owership of cable tv systems and is bidding for a cable franchise in Alameda, Cal. Early last month, the FCC authorized issuing for public comment a staff report recommending that rules barring network ownership of cable systems be abolished generally; this was widely seen as the important first step toward giving the networks the green light.

■ In one of his numerous pronouncements on the subject, Mark Fowler, new FCC chairman, said recently, "Deregulation will be an important theme of my chairmanship. The technology bids us to pursue it, and the cost of continued regulation impels us as well."

The essence of what is happening was described succinctly at October's annual convention of the Magazine Publishers Assn. by Ira Tumpowsky, a vp of Young & Rubicam.

"The era of the single-medium company seems to be gone forever," Mr. Tumpowsky told the gathering of print execs. He said large media companies increasingly will "seek different points of entry and cross media ownership in the new communications industry."

That behavior will hardly be limited to the largest companies, however. Says Bahnson Stanley, new ventures analyst with Landmark Communications, a Norfolk, Va., newspaper, broadcasting and cable tv company that ranks 39th on the media company list: "We don't care how we deliver the information; we just want to deliver it."

Rare indeed is the newspaper company that is not prospecting for cable or other forms of electronic communications. "The thrust of our efforts is to get into any type of electronic media we can," says Gary Brubacker of the Toledo Blade Co. (No. 62). "That is where the future is. Cable is the spearhead of that effort."

It was only three years ago, in late 1978, that the Federal Trade Commission broke from its traditional reluctance to tackle the sensitive issue of media ownerhsip and staged a two-day seminar on media concentration. Said an FTC staffer at the time: "We're somewhat more concerned about concentration in the media because these are not just economic concerns, but First Amendment concerns as well."

Those concerns are likely to intensify again in some quarters (though not in the Reagan FTC or other administration body) as media companies continue to grow.

Just how big are the media companies? Based on media revenues alone, the largest media company, ABC, would rank no. 172 on the Fortune 500 list. And only the top 17 companies on our list would be large enough, by virtue of their media revenues, to make the Fortune 500 list. More pertinent to the concentration issue, however, may be the largest companies' share of the media pot. According to our figures, the 100 top media companies had total revenues from media operations of $29.53 billion last year; of this total, $13.9 billion, or 47%, came from just the top 10 companies.

Furthermore, a look at individual com-

Joseph M. Winski is editor-at-large of Advertising Age.

ers

Video

able

panies on the list discloses some local situations that may be more disturbing to opponents of media concentration than the alleged influence of, say, ABC or CBS on the ideas of the national community. For example, in South Bend, Ind., Schurz Communications (No. 96) owns the only daily newspaper, a vhf tv station and am and fm radio stations. "If you want to talk about local monopolies, they've got one," says a former Schurz advertising salesman.

A large number of the other companies on our list have substantial holdings in print, broadcasting and cable tv, though not usually in the same community, because of FCC restrictions on new media buyers. (Some media watchers believe the Fowler commission will relax these.)

Some observers, such as media critic Ben H. Bagdikian, express concern over "conglomerates" in media, or companies that have large positions in other industries. The highest ranking "conglomerate" on our media list, if we define that as a company deriving more than half its revenues from nonmedia properties, is RCA (No. 3), which gets only 19% of its total revenues from media operations, including NBC. Oil company Charter Co. (No. 23) derives only 6.5% of its total revenues from media, Westinghouse Electric only 3% (excluding recently acquired Teleprompter Corp.), GE only 0.6% and American Express Co. (No. 80) only 1.3%.

Both GE and American Express have indicated an intention to get much bigger in media, GE through its unsuccessful bid for Cox Broadcasting Corp. (No. 24) and American Express through its thwarted takeover bid for McGraw-Hill (No. 13).

It should also be noted that there are some substantial privately owned companies on the list. In fact, more than half—54—of the 100 companies are privately owned, including three of the top 10—Newhouse, Hearst and Tribune Co. Most of the private media companies indicate no less optimism and ambition for their role in the "new communications industry" than the most aggressive publicly owned ones.

The media game is indeed heating up. As in any fast-moving game, it's difficult to tell the players without a scorecard. Here's ours.#

100 TOP MEDIA COMPANIES

*In successive columns: Thomson's U.S. media revenues only; Thomson's U.S./Canadian media combined which is total revenues; and U.S. media percentage of total.

A look at the top 100 U.S. media companies

ADVERTISING AGE'S first annual media roundup, including holdings, revenues, personnel shifts and feature profiles.

A.S. Abell Co.

A.S. Abell Co., Baltimore, is the country's 60th largest media company, with total revenues of about $120,400,000 solely from media operations in 1980. Newspapers accounted for about $102,000,000 and radio and tv stations together about $17,000,000.

The privately owned company's principal property is the *Baltimore Sun*.

A key management change occured last summer when Reg Murphy, former publisher of the *San Francisco Examiner*, became publisher and chief executive. He succeeded publisher Donald S. Patterson, who remains as president of the company.

Importing top management from outside its own ranks is an unusual move for Abell, but Mr. Murphy was brought in to effect the major changes the company has planned.

The demise of the *Washington Star* in August has resulted in growth for the Sunpapers, as the morning, evening and Sunday papers are known collectively.

The *Sun* "picked up a lot of *Star* features, including some of the best reporters," says Mr. Murphy. Circulation is up 3,000 at the *Evening Sun* and 2,500 on Sundays. Total circulation is up 9,000 over 1980, and Mr. Murphy projects a circulation increase of 12,000 before the end of the year.

The papers have a combined daily circulation of about 350,000; Sunday circulation is about 375,000.

■ "We're in the process of revamping the entire Sunday paper, instituting new sections such as People and Maryland Kitchen. We plan to use lots more color," Mr. Murphy says.

The company has invested in 36 Goss-Metroliner offset press units, all scheduled to be operating this month.

It also plans to strengthen circulation within the five-county region around Baltimore, particularly among minority readers. It hopes to boost circulation at an annual rate exceeding the growth of new households in the Baltimore metropolitan area. In addition, it hopes to increase advertising linage at a pace greater than the annual cost-of-living increase, expand the *Sun* network of foreign bureaus and focus more attention on working women, two-income families and homebound commuters.

Reorganization of the Sunday *Sun* began this fall with a "We make SUNdays brighter with the Sunday SUN" promotional campaign highlighting the addition of former *Star* features.

■ Abell also is exploring regional magazine and weekly or daily newspaper acquisitions.

Abell's broadcasting subsidiary, Abell Communications, owns WMAR-TV and WMAR (fm), Baltimore, and WBOC-TV and WBOC (am, fm), Salisbury, Md.

Abell Communications is awaiting FCC approval of its third radic acquisition within recent months, a Daytona, Fla., fm station. It expects to have seven new fm stations on noard by the end of 1983.

The communications division, responsible for all Abell ventures in electronics and entertainment, is also developing two software packages, one in sports and another in news-information programing, for over-the-air and cable tv.

MEDIA PROPERTIES:
Newspapers: *Baltimore Sun; Evening Sun.*
Broadcasting: Abell Communications—WMAR-TV, WMAR (fm), Baltimore; WBOC-TV, WBOC (am, fm), Salisbury, Md. Abell Communications Productions—cable tv.

Affiliated Publications

Affiliated Publications, Boston, owner of the *Boston Globe*, is the 34th largest media company in the U.S., with $206,464,000 in revenues in 1980, all from media operations. Of that total, $194,379,000, or 94%, was derived from the *Globe* and $11,985,000, or 6%, from radio broadcasting.

According to Standard & Poor's Corp., newspapers accounted for 90% of the company's profits of $12,852,000 last year and broadcasting 10%.Affiliated Publications was formed in 1973 in a reorganization that made Globe Newspaper Co., publisher of the *Globe* since 1876, a wholly owned Affiliated subsidiary.

Last month, Affiliated elected chief executive officer William O. Taylor, 49, to the additional post of chairman, effective Jan. 1. He succeeds his father, William Davis Taylor, who is retiring. John P. Giuggio, 51, an Affiliated executive vp, will succeed the younger Mr. Taylor as president and chief operating officer.

William O. Taylor represents the fourth generation of Taylors to head the company.

Since February, 1979, the *Globe* has been published as an all-day paper, with seven editions each weekday, one on Saturday and one on Sunday. The paper's daily circulation of 504,492 puts it 13th among the nation's dailies.

It has a Sunday circulation of 740,717, ranking it ninth among Sunday papers.

The *Globe* is distributed throughout New England, with concentration in a five-county area in Massachussetts (Middlesex, Essex, Norfolk, Plymouth and Suffolk), as well as in a four-county area in southern New Hampshire and in Barnstable County on Cape Cod.

In 1975, Affiliated began diversification efforts that have resulted in the purchase of 12 radio stations and, more recently, an active interest in cable communications. A subsidiary, Affiliated Broadcasting, controls the radio stations, and the parent company controls all cable operations.

The company earlier this year acquired 45% of McCaw Communications, Bellevue, Wash., for $12,000,000, giving Affiliated a substantial interest in eight cable tv companies in Alaska and Washington. It and McCaw have entered into a joint venture to buy Southern Oregon Broadcasting Co. and Pacific Teletronics, which operate cable tv systems in southern Oregon and northern California. This marks Affiliated's first investment in cable tv.

The company reportedly is investigating further purchases in the medium.

In March, the company acquired WAIV-AM and WAIV-FM in Jacksonville, Fla., for $3,000,000, giving it a total of 12 radio stations.

■ The company has announced a joint venture with Knight-Ridder Newspapers that would give Affiliated access to data from Knight-Ridder/American Telephone & Telegraph Co.'s market test of Viewtron Home Information Service in southern Florida.

Viewtron service includes news, information, advertising, games, quizzes, educational programs and at-home shopping and banking. Affiliated reportedly will use the information in a future program designed for the Boston area.

In the planning stages is an off-site, 170,000-sq.-ft. printing plant to be built in Billerica, Mass. Construction is expected to begin in the spring and the facility is scheduled to open in 1984.

Affiliated is projecting a 12% to 19% increase in revenues this year and expects the newspaper to contribute 94% of total revenues once again.

MEDIA PROPERTIES:
Newspapers: *Boston Globe.*
Broadcasting: WFAS (am), WWYD (fm), White Plains, N.Y.; WSAI-AM, WSAI-FM, Cincinnati; KRAK (am), KEWT (fm), Sacramento, Cal.; KMPS-AM, KMPS-FM, Seattle; WHYN-AM, WHYN-FM, Springfield, Mass.; WAIV-AM, WAIV-FM, Jacksonville, Fla.
Cable/video: 45% ownership in McGaw Communication with cable locations as follows: ALASKA—Frontier Colorcable, Fairbanks; Ketchikan Alaska Television, Ketchikan; Sitka Alaska Television. erations alone accounted for nearly $1.97 billion out of ABC Inc.'s $2.28 billion revenue total in 1980. In 1979, broadcasting revenues represented almost $1.8 billion of about $2.05 billion. During each of the three years through 1980, broadcasting accounted for at least 85% of all revenues, ABC said.

Publishing, meanwhile, represented nearly $231,600,000 in revenues, up from $192,400,000 in '79.

ABC-TV Network contributed the bulk of the broadcast dollars once more, thanks to its strong ratings performance in all dayparts. However, programing costs grew at a much faster clip, thereby reducing its profit margins for 1980 (when broadcast earnings fell 6%) and 1979 (when earnings rose only 4%, compared with a 12% jump during '78).

News coverage of the presidential campaign and also the Iranian hostage situation contributed a good deal to those rising costs.

In reporting the 1981 third quarter results, ABC chairman Leonard Goldenson and president Elton Rule said ABC Inc. attributed its "excellent" showing to the "improving advertiser demand for tv time, as well as the delayed premiere of the new fall season."

The quarter saw ABC Inc. climb by $62,400,000 over the same period in 1979 to approach $553,600,000 revenues as net earnings rose by $4,400,000 to $34,100,000. For the nine-month span, ABC revenues hit $1.7 billion, up from $1.6 billion, as earnings fell to $102,500,000 from $107,800,000.

■ The tv network improved in both sales and earnings during the third quarter, as did the owned tv stations division and ABC Radio. Publishing posted a sales gain, but an operating loss.

Over-all ABC Inc. earnings were "moderated," the execs said, by the development costs of ABC Video Enterprises and ABC Motion Pictures.

Although ABC lost the prime time Nielsen race to CBS last season (after a virtual dead heat the season before), ABC boasted that "from sign-on to sign-off, more people watched the ABC-TV Network in 1980 than any other network" and that it remained "the largest single advertising medium in the world," an honor held for decades by CBS. The bulk of ABC's audience was young adults and young women, the segments that put ABC out front for several seasons, drawn by Olympics coverage and comedies like "Three's Company," "Happy Days" and "Laverne & Shirley"—comedy being "the cornerstone" of prime time success.

ABC, which went into the current fall season with 206 affiliates (five signed during 1980), was in a virtual tie with CBS after the Nielsens were tallied for the first four autumn weeks.

The fifth week ended Nov. 8 was won by ABC by a considerable margin, enough to put the network out front in the early season averages, its 20.1 rating and 32 share a hair ahead of CBS' 20.0 and 32.

In daytime, ABC-TV held the top rank, a position it first wrest from CBS in January '78. "General Hospital," "One Life to Live" and "All My Children" contributed heavily to that clout in a daypart where ABC accounted for $463,000,000 of the total $1.17 billion advertisers poured into network daytime fare in 1980.

In the evening news wars, ABC has been benefiting from the audience sampling that followed Walter Cronkite's retirement as CBS anchorman.

The company also claimed that its owned tv stations in 1980 were "again the most watched and most successful group of stations" in the U.S., especially among viewers aged 18 to 49. Division revenues rose in each of the last three years, through 1980, but earnings slipped in 1980, owing to rising costs for expanding early fringe time newscasts and higher costs for such shows as "Teletone News." The "sluggish" economy kept revenues from climbing at comparable rates.

■ ABC Radio division also saw earnings fall since 1979, due to greater competition from new networks, new stations, tougher am-fm rivalries and higher programing costs. The unit, which shook things up in the 1960s by forming four demographically tailored networks—contemporary, entertainment, fm and information—has several more networks in the works for 1982 and beyond. The Direction and Rock nets are slated for Jan. 1 starts, followed in early 1982 by Talkradio and in mid-1982 by Superradio. The two latter services are to go via satellite, which ABC radio Enterprises execs see as the distribution method for all the ABC nets, probably by 1984.

Chilton is the largest single entity within ABC Publishing, with 21 speciality magazines. It also owns Chilton Research Services. ABC Video Enterprises has been mulling ways of using the various ABC-owned magazines in home video programing ventures. Amid rumors that ABC Publishing is up for sale and that the division has "minimal" impact on ABC's bottom line, the parent company maintains the publications are not on the block.

Falling into the "other" category at ABC is ABC Video Enterprises, marketing videocassettes for retail sale and also involved in the ARTS and Daytime cable tv programing co-ventures. ARTS, which includes such as AT&T and Mobil, ran for months after its April premiere without any ad support. Daytime is due in mid-March. Both services have rates well under commercial tv levels, as befits a narrow casting operation. That, combined with the high start-up expenses, explain why ABC Inc. does not expect profits for some time from this division.

This fall, ABC Video added two co-ventures—cable news services with Westinghouse Broadcasting and a pay cable sports network with Getty Oil's Entertainment & Sport Programing Network.

How AA compiled its data

Companies were ranked by net operating revenues from media properties. Included were print media supported by advertising or circulation revenues or both. Examples of media operations not supported by advertising but included in the calculations are newsletters and electronic information services paid for by subcribers. Book publishing was excluded.

Similarly, revenues generated from the operation of radio or tv stations, including over-the-air and cable stations, were included. Revenues generated by the production of tv films or other programing for use by broadcast or cable stations were excluded.

Many of the top 100 companies are privately owned and thus not required to disclose financial figures. In addition, many of the publicly owned companies do not report their figures in the detail required for our analysis. In both cases, officials of the companies involved were contacted for estimates. Generally, we found companies to be helpful in guiding editors to a close approximation of media-property revenues. As the individual company profiles demonstrate, we were also able to interview many company executives expressly for this special report. In those cases where companies were not helpful, editors used secondary sources believed reliable, as well as equations developed by leading media analysts to estimate revenues of individual newspapers or radio and or tv stations.

As far as Advertising Age can determine, no one has ever attempted a ranking of this sort. Like other such rankings, particularly first-time efforts, it is likely to be flawed by omission and commission. We welcome your comments and suggestions for improving the accuracy of the listing, which we plan to publish annually.#

American Express Co.

American Express Co., New York, is the 80th largest U.S. media company, with total estimated media revenues of $72,400,000 in 1980. It projects 1981 media revenues of 95,000,000, from cable subscribers, fees, cable programing services and publishing. Media revenues accounted for only 1.3% of the giant financial services company's total revenues of $5.5 billion last year. Total net income was $376,000,000.

The company's media operations are growing rapidly, largely because of its 50-50 partnership with Warner Communications in Warner Amex Cable communications. Warner Amex is expected to have revenues of close to $175,000,000 this year and well over $200,000,000 if subscriber connection fees are included. An estimated $120,000,000 will come from monthly subscriber fees and nearly $37,000,000 from fees for The Movie Channel and Nickelodeon, offered for Warner Amex cable systems and others. The count is moving up steadily as Warner Amex adds subscribers via franchises awarded in Pittsburgh, Dallas, Cincinnati, Boston and Houston.

The company's American Express Publishing unit accounted for about $20,000,000 of revenues in 1980. Nearly all was from *Travel & Leisure* which had a 14% increase in advertising volume. This year the monthly projects 1,060 ad pages, up 8% to 9%.

Late in 1980, 945,000-circulation *Travel & Leisure* was joined by *Food & Wine*, a gourmet monthly acquired from founders Ariane and Michael Batterberry. *Food & Wine* is projecting 330 ad pages this year and has increased its circulation rate base to 300,000 from 200,000.

Also added was Mitchell Beazly Ltd., London, a publisher of family reference books which is moving into video programing and is expected to produce video travel guides and other fare with material from the magazines.

Warner Amex hasn't moved rapidly with its Qube interactive cable tv service, which reportedly lost money in Columbus, O., during a long test. Warner Amex execs say they have corrected some of the problems and are expanding Qube to Cincinnati, Pittsburgh, Houston, St. Louis and Dallas.

Warner Amex credits the Qube capabilities with helping it win franchises in these major markets despite intense competition. The joint venture says it is preparing the way for future two-way services such as shopping and banking at home. During 1980, Warner Amex introduced the BT-1300 Qube III home computer console, half the size of its predecessor but able to accommodate more than 100 channels of programing.

Nickelodeon, Warner Amex's young people's channel, and The Movie Channel, offering round-the-clock feature films, are being joined this year by Alpha Repertory Television Service, devoted to the performing and visual arts, and The Music Channel, presenting continuous popular music.

MEDIA PROPERTIES:
Cable/video: Cable tv systems with more than 825,000 subscribers in 27 states (via Warner Amex Cable Communications, a partnership with Warner Communications—see Warner Communications profile), Warner Amex Satellite Entertainment Co.
Magazines: *Travel & Leisure*; *Food & Wine.*

Army Times Publishing Co.

Army Times Publishing Co., Washington, ranks as the 93rd largest media company, with media holding revenues of an estimated $55,000,000 in 1980, or two-thirds of total revenues of about $82,500,000.

The privately held company publishes three weekly military newspapers, *Army Times, Navy Times* and *Air Force Times* (with a combined circulation of 330,000), as well as a weekly for civilian government employes, *Federal Times* (circulation 44,000), all distributed within and outside the country.

The company also publishes two military-related magazines, *Times* magazine, a monthly supplement to the three military papers, and *Military Market*, a trade publication for military commissary and exchange personnel.

Journal Newspapers, a separate division headquartered in Springfield, Va., publishes five daily suburban newspapers in the Washington area.

■ Besides printing all of its own papers, the company operates a commercial printing division under the name of Journal Newspapers Printing. It is also involved in the telephone sales business through its Army Times Telephone Marketing Unit, which solicits subscriptions for other periodical publishers.

Last September, *Army Times'* five suburban semiweeklies became daily publications following the demise last August of the *Washington Star.*

The papers' 135,000 subscribers are, and will remain, suburban residents, because the company has no plans to distribute within the city of Washington. Forty new staff members were added to the payroll, doubling the size of the Journal's reporting and advertising departments.

Henry Belber, exec vp of Army Times Publishing, said 1981 is "the best year we've ever had." The company's plans include possible acquisitions or startups of new print properties. *Army Times* also says it is willing to look seriously at opportunities in broadcasting.

■ The company instituted various belt-tightening measures in the past year, including a program designed to better management of printing and production facilities to reduce waste.

This year the company purchased a $1,500,000 video display terminal system, enlarging the system it already had.

MEDIA PROPERTIES:
Newspapers (dailies): MARYLAND—*Prince George's Journal, Montgomery Journal.* VIRGINIA—*Alexandria Journal, Arlington Journal, Fairfax Journal.*
Newspapers (others): *Air Force Times, Army Times, Federal Times, Navy Times.*
Magazines: *Times* (supplement to the military papers), *Military Market* (trade magazine).

OTHER OPERATIONS:
Army Times Telephone Marketing; Journal Newspapers printing division.

A.H. Belo Corp.

A.H. Belo Corp., Dallas, publisher of the *Dallas Morning News*, is the nation's 46th largest media company, with media property revenues of $150,592,000 in 1980, or 96% of total revenues of $157,619,000. Of the total revenues, $102,654,000, or 65%, came from newspaper publishing, and $47,938,000, or more than 30%, from tv and radio broadcasting.

Newspapers counted for 38% of operating earnings of $34,394,000 and broadcasting 59%. The remainder of revenues and operating

earnings came from specialty printing and the biannual "Texas Almanac," published since 1857. The company's net profits last year were $19,228,000.

In the first three quarters this year, Belo's newspaper revenues rose 19% to $87,475,000 and tv and radio broadcasting revenues rose 25% to $41,392,000. Net earnings rose 15% to $14,700,000 from $12,800,000.

The company is currently going public with an initial offering of 2,000,000 shares of common stock at an estimated $21 to $23 per share.

About $19,000,000 of the proceeds will be used to construct and equip a six-story addition to the *Dallas Morning News* building. Belo plans to use the balance for working capital, expansion of plant and facilities and the possible acquisition of addional cable tv, broadcast and publishing properties. No acquisition negotiations are in progress, the company says.

Much of the stock will remain in firm control of the Dealey family. Family shareholders are selling 1,000,000 of their shares and the company 1,000,000 newly created shares.

Belo will have a total number of 9,212,000 shares after the stock issue, about 42% of which will be owned by the Dealey family.

In 1980, the company purchased WTVC-TV in Chattanooga, Tenn., for $19,389,000 cash, and in 1981, it acquired a cable tv system in Clarksville, Tenn., for $5,750,000 in cash and notes. This year, the company sold Atlas Match Corp., a wholly owned subsidiary, for $3,250,000.

Belo Information Systems division, formed in 1980, has begun development of an interactive system of electronic distribution of information to home computers through cable tv and telephone lines. The division participated with another company in an experimental offering of news and other information, and then introduced Belo Information Systems On-Line Network to offer a commercial application of the home service.

The *Dallas Morning News* is also exploring opportunities in electronic information systems, using the newspaper's existing computerized systems in conjunction with new technologies that can bring news and information into the home.

Competition between the *Dallas Morning News* and archrival *Dallas Times Herald* (owned by Times Mirror Co.) reached a feverish pitch in 1980 and 1981, with the *News* adding a new executive editor and a new managing editor, who promptly set out to improve and expand general news, business, sports, entertainment and social coverage.

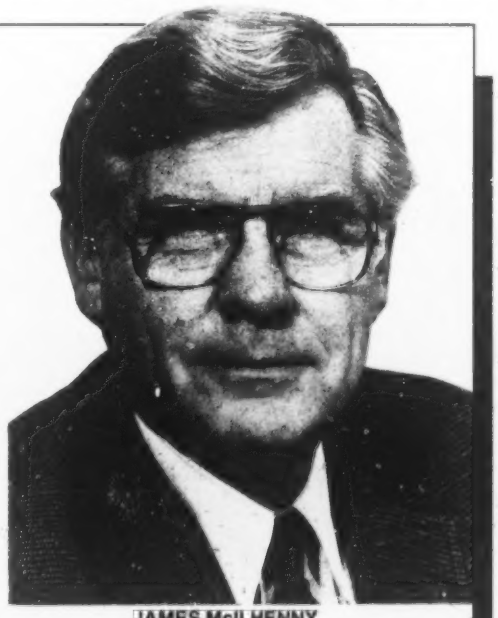
In 1981, the *News* launched a Saturday bulldog edition of its Sunday newspaper and added popular columnist Ann Landers to its columns, ending her 23-year stint with the *Dallas Times Herald*. *Late in 1981, the News* announced it will add nationally distributed Parade in January, following the Times Herald's cancellation of the supplement more than a year ago (the *Times Herald* subsequently introduced its own Sunday supplement).

Total advertising lineage of the *News* in 1980 reached 91,709,337 lines which produced advertising revenues of $86,556,627. Through the third quarter of 1981, linage and revenues were reported well ahead of the comparable figures in 1980.

Circulation figures for the paper averaged 284,673 daily and 357,861 Sundays over the six-month period ended Sept. 30 (both numbers represented slight gains over the same period in 1980). That compares with *Times Herald* figures of 242,821 and 335,089, respectively.

MEDIA PROPERTIES:
Newspapers: *Dallas Morning News* and six community dailies in the suburban Dallas/Fort Worth area: *Arlington Daily News, Grand Prairie Daily News, Garland Daily News, Irving Daily News, Mid-Cities Daily News, Richardson Daily News.*
Broadcasting: TELEVISION—WFAA—TV, Dallas; KFDM-TV, Beaumont, Tex.; WTVC-TV, Chattanooga, Tenn. RADIO—WFAA (am), KZEW (fm), Dallas.

U.S. News: Maintaining balance on a 3-leg stool



JAMES McILHENNY

The man selected to guide *U.S.News & World Report* through the 1980s is James H. McIlhenny, a new face in magazine publishing, recruited from Macmillan Inc.in mid-1980.

The scenario casts him as successor to John Sweet, who as president and chairman, has been the guiding force at *USNWR* for more than 35 years. In May, 1981 the transition began, with Mr. McIlhenny assuming the presidency and Mr. Sweet retaining the chairmanship.

"This is an incredibly wealthy company, with a large stream of usable assets, and a board of directors that is progressive and expansion minded," he says of *USNWR*, a nonpublic organization entirely owned by employes individually and through the profit sharing trust. But he sees the need for a lot of management homework before anything very spectacular takes place.

While the basic structure for future development in related journalistic and publishing enterprises is already falling into place, his top short-range goal is to build management strength. "We are going to spend a lot of time training people," he says. "Many will be from inside our organization, but where we don't have the right people in our organization, we will bring them in."

▪ He finds strength in *USNWR* circulation gains and readership scores, but sees no need to challenge front-running *Time* and *Newsweek* for leadership in the newsweekly field. "Its emphasis on what the news means makes *USNWR* a distinctive product, important to people who depend on it for that service," he says. "It is important in Washington out of proportion to its total circulation."

"It bodes well", he continues, that the magazine's greatest strength is in the Sunbelt states, which are experiencing greatest growth in both population and industry. "We are disproportionately more effective in Texas, for example, than in the country generally," he points out.

The USNWR report strategy for the 1980s rests on a "three legged stool"—the magazine, the related revenue-producing real estate ventures now getting underway, and a new business development program "which seeks out opportunities related to the magazine publishing skills, but not competitive."

Last summer, the real estate operations got under way with announcement of a joint venture with Boston Properties for a $200,000,000 development on three acres in the west end of Washington, near Georgetown, for a USNWR headquarters building, plus a 450-room luxury hotel, investment office building and townhouse-high rise condominum sector.

As a start in the new ventures area, the company recently made its first move into electronic journalism with the acquisition of Parkway Communications Corp, a major producer and distributor of fine arts radio programing.

Early in November, a new subsidiary, Publishers Services International, was created as a holding company to provide capital for the company's major "manufacturing" project—the creation of facilities establishing it as a provider of worldwide electronic publishing services.

▪ With sales commitments of more than $10,000,000 annually, PSI already has contracts for computer typesetting and transmission services with more than 50 publishers, including McGraw-Hill, Hearst, Conde-Nast and CBS Publications.

Beyond the continent, there is still the world."Nobody has ever provided international linkage between publishers and printers except on a private basis," he points out.

His connection with publishing exists only in the fact that at Macmillan, Mr. McIlhenny had a stint in charge of Alco Gravure, the company's printing arm. In all, he was with Macmillan 12 years, the most recent five as exec vp.

Earlier he had been with Genesco for 15, in shoe manufacturing. Later he was in retail management, as president of I. Miller & Sons, the women' fashion footware manufacturer and retailer.

Bergen Evening Record Corp.

The Bergen Evening Record Corp., a family-owned company headquartered in Hackensack, N.J., and the 79th largest media company recorded $73,100,000 in media revenues and $74,244,000 in 1980 total revenues primarily from the company's newspaper operation.

Circulation and advertising revenues mainly in the *Record*, the company's flagship paper and the largest evening daily in the state, and in the Toms River, N.J.-based *Ocean County Reporter*, accounted for $56,589,000 of the total.

The company's broadcasting arm, TV Gateway Communications, Cherry Hill, which operates stations in three other states, recorded $16,546,000 in revenues, while revenues from "other interests" totaled $1,109,000.

Corporate officials project that 1981 revenues will hit the $80,000,000 mark.

Circulation for the *Record*—145,022 daily and 207,357 Sundays—was down just slightly from the previous year in what chairman Malcolm A. Borg termed a "typical phenomenon in this market."

Nevertheless, the *Record* logged higher circulation in Bergen County—which attracts many high-earning metropolitan area professionals—than all the New York City and suburban papers combined.

Situated in an area with an exceedingly heavy concentration of retail shops, the *Record* was able in 1980 to increase its over-all ad linage to a record 44,780,429 lines despite a drop in classified advertising.

To place advertising from the paper and its other subsidiaries in varied media, the company set up its own in-house agency, Magna Media Inc., resulting in a saving of $23,000 during the year.

In addition, the paper endorsed the Standardized Advertising Unit (SAU), thus backing the efforts of its marketing vp Frank J. Savino, who pushed for the voluntary move by publishers during his 1980 term as president of International News & Marketing Executives (INAME).

The corporation earlier this year sold off Freehold, N.J., semi-weekly, the *Monmouth News*, to the Greater Monmouth Publishing Co. of East Brunswick, N.J.

The Record is pumping $65,000,000 into modernizing its operations. Completion is set for 1983 and includes the purchase of two $23,000,000 high-speed offset presses from Tokyo Kikai Seisa Kusho Ltd.

The presses, to be housed in a new four-story structure, are scheduled for use by next June. The presses will facilitate the use of extensive color, says *Record* president Michael H. Heath.

In 1980, the company completed a mailroom addition, converted to electronic editing and installed prepress systems. Still to come will be redesigned corporate offices and efforts to stimulate circulation.

The company, nonunion in a highly unionized area, maintains that status because of its "enlightened paternalistic attitude toward employes," according to Mr. Borg, pointing to retraining programs established for those whose jobs have been lost to automation, and to an active profit sharing plan.

Circulation at this point is primarily in Bergen County, although the paper is distributed in some Passaic County communities. "We will have the capability of going beyond Bergen County (with the new circulation moves)," says Mr. Borg.

Gateway Communications is "doing nicely and improving its profit picture," says George A. Koehler, president, noting no major changes. He salutes the subsidiary's ability to retain its managerial staff at its CBS and ABC affiliates, and maintains the stations "have the best corner on syndication" in the market.

Bergen Evening Record has been owned by the Borg family since 1895.

MEDIA PROPERTIES
Newspapers: *Bergen County* (N.J.) *Record, Ocean County* (N.J.) *Reporter.*
Broadcasting: WOWK-TV, Huntington/Charleston, W.Va.; WLYH-TV, Lancaster/Lebanon, Pa.; WTAJ-TV, Altoona, Pa.; WBNG-TV, Binghamtom, N.Y.

Blue Chip Stamps

Blue Chip Stamps, Los Angeles, is the nation's 100th largest media company. Its sole media property, the *Buffalo Evening News*, was the company's second largest operation, with $49,867,000 in revenues, or 23% of total revenues of $219,300,000.

Candy accounts for the bulk (nearly 50%) of revenues of the publicy owned Blue Chip's business. Despite its name, trading stamps represented only 9% of the company's consolidated revenues in 1980, down from 12% over the previous year.

The *Evening News* lost $1,500,000 last year, making it the only Blue Chip holding to record a loss. Company officials are quick to add that the loss was $1,800,000 less than the year before.

For the company as a whole, net income in 1980 totaled $20,389,000.

The *Evening News* claims to be the most widely read daily newspaper in upstate New York, with a

daily circulation of 270,000. It was acquired in 1977 for $34,000,000.

Last year's losses occurred despite an increase in circulation and advertising revenues. Some of it was attributable to litigation expenses incurred fighting an antitrust suit filed by its chief competitor, the *Buffalo Courier Express*. The *New's* inauguration of a Sunday edition in 1977 triggered the suit.

Blue Chip hopes that the *Courier's* recent shift in ownership to the Minneapolis Star and Tribune Co. will slow pursuit of the case. *News* owners believe that the new rivals favor good business and journalistic practices over court clashes.

But increased dedication to professionalism by a competitor could prove to be a double-edged sword, as the *Courier-Express* may step up its competition against the already vulnerable *News*.

The adverse publicity stemming from the proceedings has hurt advertising and circulation sales, the *News* says. This, coupled with a two-day strike last December during the lucrative holiday season, augmented the paper's losses. In addition, company officials say, Buffalo is a city suffering more than its share of the country's recession.

■ Despite such adversity, the *News* did increase its share of total advertising linage to 59.6%. Both companies have held their own in circulation, but that's not likely to continue in the face of a floundering economy in that city. The *News'* circulation stands at 263,235 daily and 808,044 Sunday, while the *Courier Express* has 120,750 daily and 267,975 Sunday.

Blue Chip officials remain committed to keeping the *News* despite the prospect of continued hard times. They say the *News* will ultimately earn its keep. But company execs are quick to reassure shareholders that the *News* "remains a salable property."

The company is also not averse to exploring other media property acquisitions. "We would buy more media properties if they came along at prices we thought were attractive," says Charles T. Munger, Blue Chip's chief executive officer.

Blue Chip operates a chain of 191 retail candy shops throughout the western and midwestern states and Hawaii. The chain's earnings were up nearly 20% last year.

The trading stamp part of the business has declined dramatically since 1970, from revenues of more than $124,000,000 to $17,000,000 in 1980.

MEDIA PROPERTIES:
Newspapers: *Buffalo* (N.Y.) *Evening News*.

OTHER OPERATIONS:
See's Candy Shops; Mutual Savings & Loan Assn. (80% owned); Precision Steel Warehouse (80% owned); Blue Chip Trading Stamps; Pinkerton's Inc. (35% owned).

CBS Inc.

CBS Inc., New York, is the country's second largest media company with revenues of $2.001 billion from media operations in 1980, out of a total of $4.062 billion. Broadcasting, the foundation of this multifaceted conglomerate, contributed $1.701 billion or over a third of total revenues, while the rest of the media billings came from publishing magazines and a Sunday newspaper supplement.

Profits last year totaled $193,000,000 with the largest chunk coming from the CBS/Broadcast Group, composed of CBS Radio Network, the CBS Television Network and company-owned radio and tv stations.

A cloud of uncertainty has hung over this highly profitable company, put there by chairman William S. Paley's fickleness over whom he would like to succeed him as boss at Black Rock. His latest choice for chief executive officer, former Pillsbury vice-chairman Thomas Wyman, has been CBS president for over a year.

Mr. Wyman's first full year of bottom-line responsibility has not produced particularly happy results despite anticipated record revenues and profits for the broadcast group this year. Mr. Wyman has warned stockholders to expect a modest drop in earnings because of a "massive number, a helpless number, almost a totally unreal number" of foreign currency exchange losses, stemming from the renewed strength of the American dollar abroad.

But Messrs. Paley and Wyman and Gene Jankowski, president of the CBS/Broadcast Group still have cause for feeling upbeat. If current trends continue this will be the third year of prime time leadership in the Nielsens for CBS-TV.

However, CBS has not yet regained the lost title of "world's largest advertising medium," ABC-TV continues to set the pace in sponsor billings at the convention of tv networks.

"Broadcast Advertisers Reports" estimate ABC's take at $1.367 billion for the first nine months of 1981, against $1.286 for CBS and $1.166 for NBC.

The more tantalizing challenge to CBS and the other two members of tv's Big 3 comes from the newer forms of video. Circling around and threatening to nip away at their viewers and advertisers are advertiser-supported basic cable, premium cable, superstations, two-way wired services, teletext and videotex.

CBS Inc. seems likely to stake a claim in almost any one of these fields, from satellite to home programing. So far, CBS has moved into basic catv with a pop arts network on Westar III. On the drawing board for cable are news and sports entries. ABC has an edge with joint ventures set with Westinghouse-Teleprompter for news and with ESPN's parent Getty Oil for sports.

The $30,000,000 CBS Cable operation falls under the umbrella of the broadcast group. Mr. Jankowski is keeping a close eye on it as well as experiments with teletext and videotex, two techniques for providing reading matter on the home screen.

In the case of teletext, CBS is pioneering with a product that could mean extra revenue for most of its conventional tv affiliates if the public will buy. Videotex uses wires to bring computer-based information into the home; here CBS is experimenting with AT&T. Harry Smith, vp-technology, heads this test. These two potential newcomers will have to fight it out for serious backing from CBS brass.

The CBS/Publishing Group has a familiar face as its new president. Peter Derow returned to CBS after a stint as chairman-president, Newsweek Inc., the Washington Post Co. unit. He replaced John Suhler, who went into the magazine consultancy business.

■ CBS owns 10 publications, including two acquired in 1980—*Family Weekly* and *American Photographer*. *American Photographer* is having its best year ever in advertising sales. Also up are *Field & Stream*, *Road & Track* and *Family Weekly*. The group's largest ad revenue producer, *Woman's Day*, is currently about even with 1980 ad returns. Nine of the ten are ahead when advertiser and subscriber billings are combined. The exception: *Pickup Van & 4WD*.The publishing group also sold *Sea* to Petersen Publishing earlier this year.

CBS also has nonmedia book publishers within its publishing unit, including Holt, Rhinehart & Winston and Fawcett Books, which comprised an estimated 45% of the company's publishing division revenues of $541,900,000 in 1980. Book publishing totals are not in AA's media estimates for CBS.

MEDIA PROPERTIES:
Networks: CBS Television, CBS Radio
Magazines: *World Tennis, Pickup Van & 4WD, Cycle World, Audio, American Photographer, Mechanix Illustrated, Road & Track, Field & Stream, Family Weekly, Woman's Day.*

Radio's still around, don't forget to listen

"The fact that radio has been around so long means people [advertisers] tend to forget about it, but you can't forget radio," says NBC Radio president Richard Verne. NBC Radio has hardly been forgotten, however; its 1981 revenues have "approximately doubled" last year's figures, Mr. Verne notes.

He says radio people have had to be "better marketers, programers and businessmen" to grow despite the continuous fight with other media for audience attention.

Radio stations have doubled since the 1950s to total approximately 8,000 stations today. And growing over-all network revenues could gross $200,000,000 in '81, the NBC radio chief asserts, up about a third from last year.

Mr. Verne, 42, became NBC Radio's president in February, 1981, after two years as exec vp. He has powered his company to marked gains.

The Source, his 1979 programing brainchild for the young adult market and "the first brand-new network in a long, long time" is "the No. 1 deliverer of the audience aged 18 to 34." NBC-owned WNBC (am) in New York this year became the most-heard station in the U.S. NBC Radio expects to own the maximum allowable number of fm and am stations —14— in the next five years. It now owns four am and four fm outlets, including WNBC-AM and WYNY-FM, New York and WMAQ-AM and WKQX-FM, Chicago. NBC Radio is also among the leaders in adapting satellite communications to radio.

DICK VERNE

Mr. Verne came to broadcasting the roundabout way. He started as a certified public accountant with Haskins & Sells, and spent some time as a vp with Diamond International Corp., a maker of farming machinery, before joining NBC in 1973.

Cahners Publishing Co.

Cahners Publishing Co., Boston, is the country's 68th largest media company, with revenues of about $100,000,000 from media operations for fiscal 1981 ending March 31.

Media revenues represent 67% of the company's total revenues of about $150,000,000. Revenues for 1981 were up 22% from the previous year. Cahners is the U.S. operation of Reed Holdings Inc., a United Kingdom-based company. Media revenues of Cahners come from 29 trade magazines. Most have controlled circulation, so its media revenues are primarily from advertising.

■ The trade magazines from Cahners cover several major industries, including electronics, building and construction, transportation and food service.

According to Saul Goldweitz, company president, the electronics magazines have "had a big leap" in revenues. Last year, Cahners acquired the electronics magazines published by Milton S. Kiver Publications, Chicago, including *Electronic Packaging and Production*,

Electro-Optical Systems Design and *Semiconductor International*.

Mr. Goldweitz said that publications covering the building industry suffered in the past year, reflecting problems in the industry. "We have the leader," Mr. Goldweitz said, but the category in general was down.

The company continues to look at business publications as possible acquisitions, although Mr. Goldweitz said no acquisitions are imminent.

An adjunct to the company's trade magazines is the Cahners Exposition Group, which produces newsletters for various industry trade shows. In addition, Cahners creates audiovisual presentations for trade groups.

Capital Cities Communications

Capital Cities Communications, New York, is the country's 17th largest media company with 1980 revenues of $472,108,000, all from media operations. Net income was $73,213,000 through the first nine months of 1981. Capital Cities had net income of $58,119,000 on $410,632,000 in revenues.

About 60% of the company's revenues were generated by magazine and newspaper publishing, and the remainder by broadcasting, including the company's fledgling cable tv businesses.

By all accounts 1980 was a landmark year for Capital Cities, marked by the company's decision to enter the cable tv market. Until 1968, Capital Cities operated exclusively as a broadcast company, but that year it moved into publishing. Finding it increasingly difficult to invest prudently in broadcasting or publishing acquisitions ,the company moved into cable because it believed it to be not labor intensive and that cable increasingly affects traditional broadcasting and publishing.

The company's plunge into cable came in early 1980 when it acquired 80% in Omnicom of Michigan, then followed by the purchase of Clear Cablevision (Michigan), Satellite Cablevision (Indiana), Marks Cablevision (Ohio), Omnicom Cablevision of Illinois, Sandoval County Cable Television (New Mexico), and Coastal Bend Cablevision (Texas).

The company's biggest step into cable came midway through 1980, when it announced an agreement to purchase Cablecom-General, the 14th largest cable operator with more than 250,000 subscribers on 43 systems in 12 states. About $90,000,000 of the $139,000,000 purchase price was obtained via bank loans.

The deal was completed in mid 1981. Capital Cities, though long a darling of security analysts, has always functioned quietly and may be the only company of its size that does not employ a sizable public relations staff.

Chairman-chief exec Thomas Murphy characterized its low profile as "a matter of style," and said the company prefers to let its "performance" speak for it.

Acquisitions during the year included Shore Line Newspapers, a group of nine weekly and semi-weekly publications along the Conneticut coastline. In 1980, the company also entered another new area—free circulation publications — with the purchase of Pennypower Shopping News, Wichita, and later launched Texas Pennypower.

One of Cahners Publishing Co.'s trade publications.

The chief exec suggested that despite its pell-mell rush into cable, "We're still the new guys on the block." Though he indicated that Capital Cities will not be in the "forefront" of supplying software to cable systems, Mr. Murphy nevertheless allowed that "we're fooling around with it a bit," especially drawing on the products of its Fairchild Publications unit, in particular *Women's Wear Daily* and *W*.

Elsewhere, Capital Cities is exploring the mutual advantages of putting some of the product generated by its newspapers on cable, particularly the *Fort Worth Star-Telegram* and the *Oakland* (Pontiac, Mich.,) *Press*, two areas where Capital Cities owns cable systems.

Meanwhile, Mr. Murphy said the company is "always looking to fill its complement" of over-the-air tv station properties," and said commercial broadcasting is "very healthy" and will stay that way at least until the end of this decade. According to the chief exec it will take at least another five to ten years before the cable tv business reaches the point where it will heavily affect broadcast tv.

Among company-owned tv stations, the ABC affiliate in Philadelphia and Buffalo continue to lead in the marketplace while its CBS affiliated stations in Raleigh and Fresno top the ratings in those cities.

But the company's Houston station is currently running third among the three network affiliates.

With the exception of the *Oakland Press* and *Wilkes-Barre Times Leader*, most Capital Cities newspapers chalked up solid performances in 1980.

Central Newspapers

Central Newspapers, Indianapolis, Ind., is the country's 30th largest media company, with estimated 1980 revenues of $211,000,000, all from newspapers, including papers in Indianapolis and Phoenix. The privately owned company publishes nine daily newspapers with a combined circulation of 750,000.

During the past year there have been no changes in either holdings, acquisitions or personnel, and none is planned for the immediate future. The primary concern of this company's newspaper business, says exec vp Eugene S. Pulliam, is to "improve our newspaper product and to strive to be good citizens in the process."

In recent years, Central Newspapers has expanded buildings and facilities in its three major markets —Indianapolis, Muncie, Ind. and Phoenix. Other capital improvements have included computerization of its newspaper operations.

Although the company voiced no planned acquisitions or expansions, it is looking into cable involvement on a minor scale. Specifically, Central is considering leasing cable channels for news and advertising. Production of programs is also under consideration, according to a company exec.

Charter Co.

Charter Co., based in Jacksonville, Fla., is the country's 23rd largest media company, with estimated revenues from media operations of $296,000,000 in 1980, or 6.5% of total revenues of $4.56 billion.

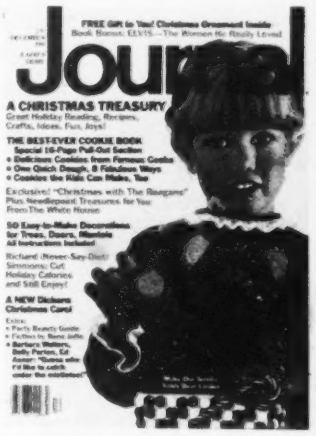
Charter's principal business is oil, but its media properties include *Ladies Home Journal, Redbook* and the *Philadelphia Bulletin*. Including *Sport* magazine, sold earlier this year, magazines accounted for 50% of media revenues last year.

Charter's communications group has been a disappointment to the company, which has actively acquired and divested media properties in recent years attempting to make the group profitable. At the end of October, Charter president John P. Donnell announced that the communications group broke even for the third quarter of 1981, excluding operations of the *Bulletin*, which continued to be a substantial money loser.

The group's problems were complicated by a brief 50-50 joint venture with media entrepreneur Karl Eller, known as Charter Media Co. In late April, 1980, Charter's communications businesses became part of Charter Media, which also purchased the ailing *Bulletin*, for $31,000,000; radio station K101-FM, San Francisco, and New York Subways Advertising.

■ The liaison ended early last January after only nine months, and Charter Co. bought back Mr. Eller's 50% share in the company, including the *Bulletin* and K101. Mr. Eller retained New York Subways Advertising.

Hoping to stem the decline of the *Bulletin*, which lost an estimated $1,000,000 a month in 1980, Charter in May, 1980, installed former Gannett Co. publisher N. S. (Buddy) Hayden as the *Bulletin's* publisher. Numerous management and policy changes followed, as Craig Ammerman, former managing editor at the *New York Post*, was named editor; John J. McCabe,



Regional editorial is planned for Charter's *Ladies Home Journal*.

previously a senior vp at the *New York Times*, was made general manager; William Powell, once circulation director at the *Dallas Times Herald*, took over the same post at the *Bulletin*, and new faces appeared in the advertising department under Robert Keim, who remained ad director. By the end of 1980, more than 150 staffers were eliminated from the payroll.

But with a turnaround still not imminent, Charter last summer announced it would fold the *Bulletin* in August if it couldn't reach new labor agreements with the paper's eight unions. In last minute negotiations, Charter obtained $5,000,000 in wage concessions, giving the *Bulletin* a reprieve for

A sharp reflection of the 'Journal'

WARREN PHILLIPS

At a time when many newspaper executives are hired for their management and financial expertise and feel more at home in the boardroom than in the newsroom, Warren Phillips is a bit of an anomaly.

The 55-year-old chairman and chief executive of Dow Jones & Co. started as a copy reader on the company's *Wall Street Journal* and worked his way through a variety of editorial jobs, ranging from the Journal's "What's News" column to covering the lifting of the Berlin Blockade, to the top of the $530,000,000 company.

Even after he became president of Dow Jones and its No. 2 exec in 1971, he continued to write. While on a trip to China in 1972 he filed several stories for the *Journal*, his byline identifying him only as a "Staff Reporter of the *Wall Street Journal*."

The well spoken, self-assured Mr. Phillips—an editor of another publication calls him "slick but not gushy"—in some ways epitomizes the *Journal* itself: He has become a respected and influential figure in journalism, but has eschewed a flashy high profile of fiery speeches and controversial statements. He leaves the impression that he prefers to let the daily work of the paper do most of the speaking for himself and the company.

What it speaks of is great success: A daily circulation of 1,900,000, the largest of any daily paper, and such heavy demand for ad space that the paper last month had to put advertisers on a waiting list.

Under the Queens College graduate's leadership, Dow Jones has continued to expand and innovate. The *Journal's* rapid circulation growth stems in no small part from the company's pioneering use of regional printing plants linked by satellite. It has launched an Asian edition of the *Journal* and reportedly plans a European edition as well. Earlier this year, the company bought a 25% share of Continental Cablevision.

But Mr. Phillips hasn't hesitated to drop plans for which the company originally held high hopes. After returning from a long return visit to China recently, he scrapped the proposed *Wall Street Journal Magazine*, which had been under serious study for a year.

There is little doubt within Dow Jones that Mr. Phillips calls the shots on such matters, although some staffers suggest that he occasionally ignores the market research and acts with the gut instincts of a reporter. "Whether we go with the magazine or not will depend on how Warren feels when he wakes up the day we make the decision," one *Journal* editor said shortly before the magazine idea was killed.#

the time being.

Charter Co. did manage to sell *Sport* magazine, a perennial money-loser, to Southwest Media Corp., Dallas, last April. In addition, after an unsuccessful attempt to sell its Ohio-based Dayton Press unit, which prints Charter and other publications to employes, Charter decided to phase out the operation over the next year.

Dayton Press which has operated at a loss since 1978, printed Charter's magazines and had contacts with *Reader's Digest, McCall's* and *Scholastic* magazines, that weren't renewed.

Charter has pledged to sink funds from the sale of *Sport* into the *Ladies Home Journal* and *Redbook*. The company is "going full tilt to really spruce up" the two women's magazines, said Tom Kenney, president of subsidiary Charter Publications.

Ladies' Home Journal with 1980 revenues of $108,299,000, according to *Folio*, experienced a 1.2% decrease in circulation last year, giving it a 12.4% market share among women's mass market magazines. *Redbook*, with 9.7% of that market, took in total revenues of $96,860, on a 1.9% decrease in circulation. The magazines both suffered a decline in ad pages.

Part of the primping in women's books was apparent in July, when Charter announced that *LHJ* would become the first national magazine to offer regionalized editorial coverage, through a special southern edition set to debut next spring and appear five or six times a year. In another move, the publishing group last February formed Charter Publishing Development Co. to package *LHJ* and *Redbook* into tv, cable and videodisc programing and software. James P. Smith, president of Charter's communications group, referred to the project as "taking our print and offering a new vehicle for it."

Lenore Hershey, who had been editor-in-chief of *LHJ*, was named president-editorial director of the new unit, and Myrna Blyth, formerly executive editor-vp at *Family Circle*, was hired to take over at *LHJ* as editor-in-chief and vp.

In broadcasting, Charter has embarked on a program to develop am and fm combinations "in markets offering a significant profit potential," and has made marketing and format changes in its existing properties. Charter also intends to purchase KITT (fm) in San Diego if it receives FCC approval.

OTHER PROPERTIES: Charter Oil Group; Charter Insurance Group; Subscription services for publishing, direct mail and fundraising industries; direct marketing of gift items#

Christian Science Publishing Society

The Christian Science Publishing Society is the country's 89th largest media company, with revenues totaling $58,400,000 from media operations in 1980. It is a private nonprofit operation, with publication of the four national editions and one international edition of the daily *Christian Science Monitor* accounting for most of the revenues.

The Publishing Society isn't interested in acquisitions, but it has gradually expanded the *Monitor's* news service.

A few years ago it began producing weekly radio stories and this year has increased the number of radio stations using the service to more than 100. The *Monitor*, which has a news syndication arm, switched its distribution outlet from the *Des Moines Register* to the *Los Angeles Times*.

There were no changes in the *Monitor's* production system, although in recent years the paper began remote printing in three locations—Chicago, Los Angeles and in New Jersey.

■ The paper originates in the Publishing Society's headquarters city, Boston. It has also made the complete switch to electronic editorial operation and cold type printing.

On the editorial side, the *Monitor* instituted its special take-out sections on countries during 1981. The business coverage was also expanded during the past year.

Circulation, which stands at about 165,000, has dropped slightly from 1980 levels. The decline has happened, said Mr. Periton, despite an intense direct mail effort and promotion during the past few years.

The paper is making an effort to motivate and "energize" the circulation representatives, said Mr. Periton, and the additional international focus is counted on to attract more readers. But an independent report in early 1981 indicated that the *Monitor* has a high pass-along rate, with the circulation of 165,000 yielding a readership of about 1,000,000.

Like other newspapers, the *Monitor's* ad revenues have suffered because of the soft economy. But Mr. Periton said retail advertising was surprisingly strong in 1981. The *Monitor* takes no liquor, cigaret, medicine or coffee advertising.

The *Monitor* has been working to get more corporate advertising, keying it to the business and special international sections in particular. The paper is also revising its commission structure for its ad representatives, many of whom are from local churches around the country.

The commission rates will be increased to create more motivation to boost newspaper ad sales.

Although there are no definite plans at the moment, *Monitor* officials are examining the possibilities of some kind of connection with cable tv as a supplier of news and features.

There was little change in the other activities of the company,which produces a variety of Christian Science church publications. The only major personnel change in 1981 was that DeWitt John, formerly editor of the *Monitor*, was named editor of the *Christian Science Journal, Herald* and *Sentinel*—the three major church-related publications.

MEDIA PROPERTIES
Newspapers: *Christian Science Monitor. Christian Science Journal, Christian Science Sentinel.*

Chronicle Publishing Co.

Chronicle Publishing Co., San Francisco, is the country's 31st largest media company, with estimated 1980 revenues of $210,500,000, all from media operations.

The company is owned by the family trust of the M.H. de Young estate. Michael de Young began publishing the *San Francisco Chronicle*, the city's major morning newspaper, in 1865.

Chronicle Publishing faces two major challenges: The *Chronicle's* dominance of the morning newspaper market is being threatened by *East Bay Today*, a 2-year-old Gannett Co. paper, and ratings of KRON-TV, San Francisco, NBC affiliate owned by the company, continue to sag.

East Bay Today, published across the bay in Oakland, had a circulation of 81,772 for the six months ended Sept. 30, according to Audit Bureau of Circulations, up 37% from 59,518 during the same period in 1980. The *Chronicle's* daily circulation for the six months ended Sept. 30 was 510,955, up a bit from the 509,354 recorded in the year-earlier period.Circulation has been inching upward unspectacularly for years at an average rate of 5,000 copies a year.

■ Gannett has positioned *East Bay Today* as a 10-cent paper, while the *Chronicle* sells for 20 cents. Phil Geyer, *Chronicle* ad director, said his paper had countered with "aggressive marketing tied to sales promotion, and a close monitoring of the marketplace." A circulation drive, using heavy tv and radio advertising, was completed in October; it offered two months of the *Chronicle* for the price of one.

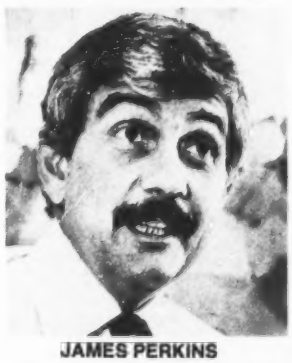
Advertising for the *Chronicle* is handled by the San Francisco Newspaper Agency, owned jointly by Hearst Corp., publisher of the afternoon Examiner, and Chronicle Publishing. Under a 1965 joint operating agreement, the agency performs all noneditorial functions for both papers. Editorial staffs are separate, collaborating only to put out a Sunday paper, the *Examiner & Chronicle*, which has a circulation of 656,087.

This operating arrangement was challenged in court earlier this year by the publisher of the *Pacific Sun*, a Marin County weekly. The *Sun* contended that the agreement to pool noneditorial labor violated antitrust laws. In June, a jury found in favor of Chronicle Publishing and Hearst. In an important personnel move, the agency last month named Joseph F. Barletta, former exec vp and general manager of the *New York Daily News*, agency president.

KRON-TV is currently third in the San Francisco market, behind top-ranked KPIX, a CBS affiliate, and No. 2 KGO-TV, an ABC affiliate. KRON ad director Dennis Fitch said the station is relying on "a whole lot of polling and research" in its attempt to boost ratings. "Our strategy is being developed by the readers," he said. "Positioning is being worked on as the product takes shape." Radio spots for the station tout its sports coverage with the tag line, "We've been listening to you; you've been watching us."

The station's problems were aggravated earlier this year by a 12-week strike beginning Feb. 1. Three unions, representing reporters, anchors and directors; electrical workers, and office personnel walked out over grievance procedures, hiring practices and wages. The dispute accelerated staff turn

Providing encouragement in the daytime



JAMES PERKINS

First came women's suffrage, then Virginia Slims cigarets. Now comes "Daytime."

"Women have new options, new choices—but where are their role models?" cries James N. Perkins, president of Hearst/ABC Video Services. To hear Mr. Perkins tell it, "Daytime," the joint venture's planned cable program, is the best thing to happen to women in years. Set to bow next March on the Modern Satellite Network, "Daytime" will show women "how to do what they want" and much, much more, Mr. Perkins says.

It will be shown from 1 p.m. to 5 p.m. ("Is there life after lunch?" a "Daytime" brochure asks.) Monday through Friday, with each four-hour show forming a "complete magazine," with segments on "self," "home," "career," and so on.

Mr. Perkins, 48, is building a career out of creating new programing for the video revolution. As president of Washburn Associates, a Chicago marketing and advertising company, he developed the "Home Shopping Show," a 30-minute talk show for advertisers. That program is now owned by Modern Satellite Network and carried to nearly 4,000,000 homes, says Mr. Perkins, who joined Hearst/ABC Video in June.

But the "Home Shopping Show" is as nothing compared with "Daytime," at least as Hearst/ABC and Mr. Perkins see it. "Daytime," they say, "is expected to become part of the daily household...a friend to turn to, an authority to rely upon...that continually provides her [modern woman] with encouragement, with hope, with a better feeling about herself...and her ability to cope with the world."#

over while interrupting KRON's push for news supremacy.

That push began in earnest in April, when KRON introduced its "Live on (Channel 4) at 4" news format, aimed at capturing the early news viewer.

The company named Francis A. Martin, former KRON vp and station manager, to the post of president and ceo of Chronicle Broadcasting last January. He was succeeded at KRON by James H. Smith, former president and general manager of the company's Omaha tv station, WOWT.

Chronicle Publishing's cable tv arm, Western Communications, Walnut Creek, Cal., operates five cable tv systems serving 150,000 subscribers. The cable subsidiary ranks 27th in the country in number of subscribers. Its largest market is Monterey, Cal, with 55,000 subscribers.

Wescom, Western Communications' pay tv unit, is involved in preproduction financing of feature films and distribution of films to the pay tv market.

Wescom (preproduction film financing and distribution of films to pay tv stations); Chronicle Productions (tv production).

Copley Newspapers

Copley Newspapers, La Jolla, Cal., is the country's 37th largest media company, with estimated media property revenues of $191,500,000 in 1980, almost all from the company's newspaper holdings.

The family-owned Copley operates nine daily, one twice-weekly and 20 weekly newspapers. The papers are located mostly in California and Illinois, the birthplace of Copley Newspapers. The 170-year-old *Aurora* (Ill.) *Beacon-News* was the first Copley paper.

Ever since company founder Col. Ira Copley, a prominent legislator, sold his Aurora gas company and moved the newspaper operation to near San Diego, the headquarters have remained there.

■ Copley Newspapers moves cautiously in its business dealings. Its most recent acquisition dates back almost a decade, when it bought the *Wheaton* (Ill.) *Daily Journal*. And the company was in broadcasting at one time, but has divested itself of the broadcasting properties.

However, says a company spokesman, the company is not averse to looking at other media fields. Copley is one of seven bidders on a cable franchise in Torrance, Cal., for example. The bid, submitted jointly with Colony Communications, is expected to have its fate determined after the first of the year.

The company may also join Time Inc. and Cox Cable in separate but simultaneous videotex experiments in San Diego. The city, which is one of the largest cable markets in the country, is a fertile field for computerized cable experiments. Copley's role, though not yet clearly defined, will most likely be to provide the bulk of local news information that would be broadcast to cable audiences. Cox will launch its trial run on or around Jan. 1.

Copley has implemented computer systems in all its newspaper production facilities. The most recent improvement was installing a computerized system at the *Torrance Daily Breeze* that ties editorial and classified advertising into a single system.

The *Springfield* (Ill.) *State Journal-Register* completed production facilities last year. A new business building housing all nonproduction departments is slated for completion in mid-1982, bringing the Springfield facelift to an end.

Some significant changes took place at the *San Diego Tribune* in the past year. First, Neil Morgan, a columnist for 30 years with the paper, became its editor in March. Next, at a time when the death knell is being sounded for a number of afternoon newspapers, the *Tribune* increased its circulation by 2,000 from March to September (it now stands at about 126,000, while the morning *Union* has a circulation of about 206,000).

Under Mr. Morgan, the paper dropped the "Evening" tag and was redesigned.

In addition, the financial section was expanded, a new section was added and top talent was recruited from such publications as the *Los Angeles Times*, the *International Herald Tribune* and the Associated Press. The paper also opened a Mexico bureau in Tijuana, which is just across the border from the San Diego area.

Fulfilling a dream of her late husband's, publisher Helen K. Copley broke ground in La Jolla for the James S. Copley Library to house his extensive collection of American Revolutionary War material and other American items of historical significance.

Courier-Journal & Louisville Times Co.

Courier-Journal & Louisville Times Co. is the country's 53rd largest media company, with estimated revenues of $136,200,000 from media operations in 1980. The Bingham family-owned company publishes the Louisville Courier-Journal and the *Louisville Times*. It also owns WHAS (am) and WHAS-TV in Louisville.

Media figures do not include revenues from Standard Gravure Corp, a subsidiary of the Bingham family enterprise.

The Bingham operations underwent several personnel and format changes this past year. George Gill, president, announced a major realignment of duties for various key officers of the companies last March.

Mr. Gill heads a new corporate executive committee consisting of Barry Bingham Jr., editor and publisher of the papers and vice-chairman of WHAS Inc; Bernard F. Block, senior vp-operating financial analyst; Earl Bullard, senior vp in charge of personnel, labor and safety; Cyrus L. MacKinnon, exec vp, formerly chief exec, who has announced his retirement at the end of 1981, and John L. Richards and Leon Tallichet, senior vps.

The executive committee will oversee the operations of all the companies and will aid operating company heads by providing staff services.

In setting forth major goals for the Bingham operations, Mr. Gill said this corporate structure would allow the companies to maintain operations and seek new areas to develop.

At the end of March, the afternoon *Times* completed its second major editorial redesign in six years. The *Times* adopted a three-section paper, plus a food section on Wednesdays and a Weekend section on Friday. Section A consists of news (wire, local and business) plus editorial and oped pages. Section B (called Times 2) contains features on spending, health, entertainment, personal growth and development, the arts, and relations between the sexes and the generations. Section C is sports and classified.

The paper also changed its appearance, adopting a new headline face and a new Page 1 nameplate. "We wanted to look bolder and cleaner and to be more legible," said *Times* managing editor Leonard Pardue.

The pages have entered into a joint effort with Antiope Videotex Systems to develop a prototype cable and broadcast teletex system for and distribution of news information and advertising.

News, sports and weather, along with classified advertising will be offered once the project is in place, which is scheduled for next February.

"It is our hope," said Morris Goldstein, vp of information products for the papers, "that, using Antiope technology, we can develop a model system which can be offered to small and medium-size newspapers throughout the country. We intend to develop a commercially viable product, which at the same time will offer an important public service to our subscribers."

■ *TV Week*, a 24-page tabloid section was introduced in the Sunday *Courier-Journal* in September. The locally-produced section contains tv listings, cable listings and highlights for stations throughout Kentucky and southern Indiana.

"This is one of the most important developments for the *Courier-Journal* in many years," said David Hawpe, managing editor. "This will help us bolster the important Sunday product here and in the region. And it will bring us into the cable era with a fundamental service."

MEDIA PROPERTIES:
Newspapers: *Louisville Courier-Journal, Louisville Times*.
Broadcasting: TELEVISION—WHAS-TV, Louisville. RADIO—WHAS (fm), Louisville.

Cox Broadcasting Corp.

Cox Broadcasting Corp., Atlanta, is the country's 24th largest media company, with media revenues of $281,020,000 in 1980. Revenues from broadcasting totaled $155,140,000, or 91% of the company's total revenues of $309,232,000. Cable operations provided $125,888,000 in revenues, or 41% of total revenues. Operating profit in 1980 was $89,379,000.

The publicly held company has 17 broadcasting properties, including five vhf television stations, five am and seven fm radio stations. They are located in nine markets throughout the country.

The television markets consist of Atlanta, Dayton, Charlotte, Pittsburgh and San Francisco-Oakland. Acquisition of a vhf station in St. Louis is pending. Cox radio is heard in these areas and in Baltimore, Miami, Philadelphia and Los Angeles.

Over the next five years Cox expects to add 150,000,000 homes to its broadcast audience.

Cox this year has begun what it calls, "an extensive marketing effort" in its cable division, which is the fourth largest U.S. cable operation. It owns or is developing channels in 222 franchised communities and consists of 61 systems in 23 states.

Its San Diego system is the largest in the U.S. Cox Cable passed the 1,000,000 subscriber mark in August.

Cox Cable has developed INDAX service, a two-way interactive communications operation. INDAX, used in the San Diego area by 206,000 subscribers, allows its users to shop and bank from their homes. Similar systems are being developed in Omaha and New Orleans.

The company made two significant personnel changes recently when it named former president Clifford Kirtland Jr. as chairman and former exec vp William Schwartz as president.

Cox entered 1980 expecting to merge with the General Electric Co., but halfway through the year that deal fell through. The company reassessed its business prospects and decided to gear itself toward the growth of its broadcast and cable operations. Cox officials emphasize that they are not considering any other merger possibilities and have told stockholders they plan to keep the company independent.

An automobile auction services contributed $25,800,000 to revenues in 1980. The company sponsors 12 auctions a year.

Cox Enterprises

Cox Enterprises is the country's 18th largest media company with media revenues of $367,600,000 for 1980, all coming from its newspaper division. The privately held company has 15 daily newspapers and three nondailies. The chain's circulation has dipped in recent months. Combined circulation for the six months ended Sept. 30 averaged 1,103,366, down 2.3% from 1,129,470 in the year-earlier period.

Cox Enterprises has holdings in Georgia, Texas, Ohio, Arizonia and Florida.

The *Atlanta Constitution* and *Journal* act as flagship for the Atlanta-based chain but these papers have also lost circulation, posting a combined average of 386,716 for the six months ended Sept. 30 vs. 413,317 for the same period last year. The second largest members of the chain are the *Dayton* (O.) *Daily News* and *Dayton Journal Herald*, which have also had a slight circulation dip with totals of 235,759 for 1981 and 239,553 for 1980.

During the late 1970s Cox Enterprises acquired some of its current smaller dailies and weeklies but has maintained a lower profile during the 1980s. The company is still interested in adding newspapers to its stable but considers today's strained economic environment an obstacle to that effort. "We are always looking for good acquisitions but have not seen anything that would make it worth taking the chance" said one company official.

■ Chairman of the family-owned Cox organization is Garner Anthony, 52, who is married to Barbara Cox, a major shareholder. Mr. Anthony, a lawyer, is also the chairman of Cox Broadcasting Co., a publicly held television and radio concern that is treated as a separate entity in Advertising Age's media company listing.

For the past year the corporate organization has remained stable with the only new top-level addition being David Easterly as vp-operations for the newspaper group.

MEDIA PROPERTIES

Des Moines Register & Tribune Co.

The Des Moines Register & Tribune Co. is the nation's 72nd largest media company with 1980 operating revenues of $86,100,000, and net earnings of $6,800,000. The privately held company is expected early next year to merge with its sister company, the Minneapolis Star and Tribune Co. The two companies already share board seats and own stock in one another.

Although the Des Moines company's revenues last year were only 40% of those of the Minneapolis concern, its net earnings were almost equal to those of the Minneapolis company.

The Des Moines company has proceeded more slowly in exploring alternate communication systems than its sister company. For example, it wasn't until this fall that Register and Tribune Co. ventured into cable programing. In conjunction with Heritage Communications, it is producing local and state news programing for the Des Moines area cable tv system.

A formal merger with the Star and Tribune Co. would allow the Des Moines company to share the expertise the former concern has gained through its operation of a cable system in Buffalo, N.Y., and its participation in Compuserve Inc., of Columbus, O.

■ The Des Moines company's mainstay continues to be its newspaper operations. The flagship daily newspapers, the morning *Register* and afternoon Tribune, have had a lot of advertising and editorial overlap in recent years. To differentiate the two newspapers, the *Tribune* this fall was repositioned as a metropolitan evening newspaper, circulating in Des Moines, its suburbs and parts of eight surrounding counties.

Repositioning of the Tribune required a cutback in circulation in 22 counties with 8,000 subscribers, reducing total circulation to about 75,000. Circulation of the daily *Register* is about 210,000 and the Sunday *Register* about 400,000.

MEDIA PROPERTIES:
Newspapers: *Jackson* (Tenn.) *Sun; Des Moines Register; Des Moines Tribune; Waukesha* (Wis.) *Freeman.* Also, two weekly newspapers in Independence, Ia.—the *Conservative* and the *Independent.*

OTHER OPERATIONS:
Thirteen per cent of the stock of the Minneapolis Star & Tribune Co.

Deserert Management Corp.

Deseret Management Corp., Salt Lake City, through its Bonneville International Corp., is the country's 86th largest media company, with media revenues of $61,260,000 in 1980.

Bonneville, also based in Salt Lake City, is the broadcasting arm of the Church of Jesus Christ of the Latter-Day Saints, with four am and seven fm stations and two tv stations, along with a 50% ownership of an 8,100 subscriber cable system in Logan, Utah.

Bonneville won't disclose a total revenue figure, but president Arch L. Madsen said it was "well above the $100,000,000 mark" last year. Bonneville "strives for a 15% increase in growth yearly," he said.

The company's main thrust next year will be advancing the teletext system pioneered by Bonneville in cooperation with Zenith Radio Corp. Teletext is based on the British Ceefax system, which permits transmission of up to 50,000 words per minute.

Bonneville, granted the first experimental license for the system in the U.S. in June, 1978, recently petitioned the FCC for approval to grant licenses to stations nationwide. Mr. Madsen said that Bonneville "is anxious to see this system go national" and indicates that the company's heavy promotion of teletext is part of Bonneville's "continuing efforts to stay on top of this technological explosion.

"Broadcasting has been the No. 1 source of news and information for the American public, and we're doubling our efforts to earn this very responsible opportunity [providing teletext nationally]," Mr. Madsen added.

Mr. Madsen was tapped by the National Assn. of Broadcasters as the recipient of its 1981 Distinguished Service Award. Bonneville has just signed a contract leasing four more satellites for the company starting in 1984. Bonneville currently operates the Bonneville Satellite Corp. out of Salt Lake City and owns a channel on West Star One.

Donrey Media Group

Donrey Media Group, Fort Smith, Ark.,is the nation's 61st largest media company with estimated total revenues of $120,000,000 for 1980.

A privately held company, Donrey owns 41 dailies and 39 nondaily newspapers, one television station, seven radio stations, 11 outdoor advertising plants, a microwave transmitter network and three cable television companies.

■ Donrey serves nearly 8,000,000 people every day with news, entertainment and information. The group operates companies in the District of Columbia and 17 states: Arkansas, California, Hawaii, Idaho, Indiana, Iowa, Kansas, Kentucky, Mississippi, Missouri, Nevada, New Mexico, Ohio, Oklahoma, Oregon, Texas and Washington.

The company's most recent acquisition was the *Durant Daily Democrat*, a daily newspaper in Durant, Okla., purchased in November, 1981.

Also added in 1981 are the *Redlands Daily Facts*, a California newspaper; KOCM-(fm), Newport Beach, Cal.; and KEXO, Grand Junction, Colo.

Founder and president of the company, Donald W. Reynolds, said, "The opportunities of the Donrey Media Group are limited only by our imagination."

Mr. Reynolds worked for newspapers from Texas to Massachusetts before buying his own newspaper, the *Quincy Evening News*, Quincy, Mass. He later sold the *News* and in 1940 bought the *Okmulgee Daily Times* in Oklahoma and the *Fort Smith Southwest American* and the Times Record in Fort Smith, Ark. and began the Donrey Media Group.

Donrey is committed to continued growth, and to pioneering technology, according to its founder. The Donrey Group has contributed to research on a revolutionary laser platemaker. That platemaker was the first of its kind to be used successfully and is in operation at Donrey's largest newspaper, the *Las Vegas Review Journal*, in Las Vegas, Nev.

Dow Jones & Co.

Dow Jones & Co., New York, is the country's 16th largest media company, with media operation revenues of $493,300,000 in 1980, or 93% of total revenues of $530,700,000.

National publications and news services accounted for nearly three-quarters of total revenues, while community newspapers and book publishing, not included in AA's media revenues figures, accounted for one-quarter of the revenue. Net income last year was $58,883,000.

The company's net income for the first nine months of 1981 was $48,000,000, up from $39,500,000 for the same period last year.

Two attempts at expansion undertaken by Dow Jones in 1981 never got off the ground. In March, the company entered into a joint venture with Knight-Ridder Newspapers to acquire UA-Columbia Cablevision Inc. The two newspaper companies wanted to use the cable system to send information into homes. In June, Dow Jones and Knight-Ridder were outbid by the duo of Rogers Cablesystems of Toronto and United Artists Theatre Circuit.

In May, *The Wall Street Journal* issued a prototype of *The Wall Street Journal Magazine*, a proposed monthly offshoot of the nation's largest weekday newspaper. The magazine addressed the nonbusiness concerns of the *Journal's* readers. In late October, the company abandoned plans for the magazine.

"Although they were generally pleased with the quality of the prototype, the readers wanted more coverage of such areas as personal finance," said associate publisher Peter Kann. "*The Wall Street Journal* has been moving in that direction for some time. We are doing more of it than we were a few years ago and we felt we could continue meeting the needs for those stories with both the *Journal* and *Barron's*."

Dow Jones made another bid for a cable tv stake in October by agreeing in principle to purchase nearly 25% of Continental Cablevision, Boston, for up to $80,000,000. Warren H. Phillips, chairman of

What was once *Dun's Review* has been transformed into *Dun's Business Month.*

Dow Jones, said the stock was purchased "for investment purposes and, although Dow Jones will be represented on Continental's board, Continental will maintain its independent course." Continental is the 13th largest cable television system with 410,000 subscribers in 10 states, according to the company's prospectus.

Aided by Dow Jones' pioneering use of satellite technology and regional printing plants, *The Wall Street Journal* has continued to grow. The paper added a second "front" page and was divided into two sections last year, partly to meet advertisers' demands for space. In 1980, circulation grew 9.2% to 1,930,400. This continued a trend that has given the *Journal* a 32% increase in subscribers and newsstand buyers over the past five years. The *Journal* had a 10.7% earnings gain in 1980.

Advertising linage was up 9.1% in 1980 from 1979. The *Journal* attributed its stronger advertising performance in 1980 to its ability to diversify its ad base so the paper depends on no single advertising category, industry or region of the country for its billings. In 1980, almost 8,400 display advertisers appeared in the *Journal*, up 5.6% from 1979 and nearly 20% above five years ago. The *Journal* estimates that its readers have an average household income of $68,600.

Barron's, Dow Jones' business and financial weekly, continued to gain in circulation and advertising in 1980. Advertising linage increased 14.3% over 1979 and circulation climbed 9.1% to 264,100.

Effective next Jan. 4, Dow Jones will raise its advertising and subscription rates for both *The Wall Street Journal* and *Barron's*. The *Journal's* national advertising rates will be increased 15% to $56,124 for a black and white page (national).

Barron's will increase its advertising rates 12% to $8,593 a page.

The *Journal's* subscription rates will rise 15.6% from $77 to $89 per year. *Barron's* subscription rate will rise 12% to $55 from $49.

Dow Jones is now considering a European edition of the *Wall Street Journal*, aimed at a "limited but influential audience," according to sources at the paper. A decision on the edition will probably be made by the end of the year. A startup date in the third quarter of 1982 is possible."We have been studying a European edition for the last decade, off and on," Mr. Kann said. "Sometimes it looks less likely that we will go ahead with it. This time it looks more likely."

Dun & Bradstreet

Dun & Bradstreet, New York, is the country's 19th largest media company with 1980 media revenues of $365,000,000.

Publishing accounted for $281,000,000 for the largest share of the media total. However, out of total company revenues of $1.17 billion the publishing segment totaled $408,378,000, which included the nonmedia operations of Funk & Wagnall's and Moody's Investors Service. Broadcast tallied $83,921,000. D&B's total profits last

She's 'just an editor,' with touch of color

PAIGE RENSE

She has been described as the "high priestess of home decor." She has been interviewed and profiled by talk show hosts and newspaper writers, most of whom are dying to know how she liked the decor of Yves Saint Laurent's Paris abode, or Barbra Streisand's living room.

She has been portrayed as leading the most glamorous of lives, jetting from one fabulous home to another, passing judgment on, and being courted by, the rich and the famous.

But if you ask Paige Rense, she's just an editor. Ms. Rense is senior vp and editor-in-chief of Knapp Communications Corp.and guiding force behind the company's *Architectural Digest*, the thick and glossy magazine for which she is best known, *Bon Appetit* and the newly acquired *Geo* The number of magazines under her responsibility will increase to five next year, when Knapp launches *Collecting* and a magazine tentatively titled *Travel.*

For all the glamor and power that supposedly have accrued to her, "what you're really doing is working very hard," the 47-year-old Ms. Rense says. "I'm not sure what people think I'll be like," she adds, "but I think what they expect is Rosalind Russell."

▪ What they find is a soft-spoken editor barely 5 ft. tall, with wavy blond hair and dark tinted glasses. She's likely to be wearing a black flounced dress with a huge silk scarf draped over a shoulder for a touch of color, and a long necklace made of gold paperclips.

Ms. Rense does decide which homes are featured in *Architectural Digest*, and thus is indeed wooed by designers and the wealthy. But she also plans coverage of art and antiques, books, gardens and architecture; reviews photograhs for publication; consults with the magazine's extensive graphics staff, and approves editorial copy—and that's just for *Architectural Digest*.

It is this high energy level and attention to detail, coupled with an uncanny sense of what readers want, that have enabled her to turn mediocre magazines into top-of-the- line best-sellers and have made Paige Rense the pride of Knapp Communications. "She has the most highly attuned sensitivity to the reader of any editor I've ever seen," says John L. Decker, Knapp's group publisher. "It's instinctive and intuitive."

"I don't know if it's trite or if it's arrogant," Ms. Rense says, "but I do the kind of magazine I would like. I'm not unique—if I think it's interesting, other people will, too."

▪ The editor-in-chief likes to tell the story of her initial job interview with Cleon (Bud) Knapp, president of Knapp Communications, in 1970. Ms. Rense, who was a free lance writer at the time, told him that *Architectural Digest* was "boring and poorly edited." Despite, or perhaps because of that, she landed a job as an associate editor of the magazine, which had a circulation of 50,000 at the time. Two years later, she was named editor-in-chief of a revamped magazine. Today's circulation is over 550,000, and 1981 ad revenues are expected to rise about 30% to about $32,000,000.

Ms. Rense says she sees herself as a "word person" first. "Of course, I've always been interested in art, but design—that just happened. I've never had any credentials."

Her success with *Architectural Digest* has won her total editorial freedom at Knapp, and the company does little if any market research on new projects. When Mr. Knapp bought *Bon Appetit* in 1975, "it was an impulse buy—he left it on my doorstep," Ms. Rense says. *Bon Appetit* has grown since then from a circulation of 250,000 to more than 1,300,000; the magazine this year will carry 1,000 pages of advertising for the first time.

Her revamp of *Bon Appetit* illustrates the Rense approach. "With our Architectural Digest background, it would have been easier for us to do a 'classical' magazine," she recalls. "But *Gourmet* already does this. Any editor with integrity would have an objective to create a magazine with her own viewpoint."

▪ On a flight from Los Angeles to New York one day, she outlined the magazine she wanted *Bon Appetit* to be. "I just thought, 'What do I want in a food magazine?' I'm a good cook, but not a great cook, and I'm very busy. I'm not that different" from the type of reader she is trying to reach, Ms. Rense says.

"I wanted to bring people into the magazine, real people, because good cooks like a network—they like to know who's doing what. Cooks are nice people—they care about love, because what you're doing is nurturing people.

"'Too busy to cook' is one of the most popular features in the magazine because it has real people, real recipes."

Now comes perhaps Ms. Rense's biggest challenge, *Geo*, which under the German publisher Gruner & Jahr lost between $35,000,000 and $50,000,000 in two years. Ms. Rense says she already has made top-level changes in the editorial staff, and that she expects a "Neo-Geo" with her trademark to appear by summer.

▪ Ms. Rense wants to "bring people into the magazine more, to show the reader the 'who and why' of the story. There will be a lot about animal behavior, and lots of exploration and discovery," she says, curled up on her pillow-laden office couch under the watchful eye of a large bronze buddha. There will be "more emphasis on the U.S.," she adds. "There's so much to discover here. How can she take on *Geo*, plan two new magazines, and still stay involved with *Bon Appetit* and *Architectural Digest*? "I'm muddling through now," she says. "I don't really divide my time. My door is always open and people just run in.

"At the beginning [of a new magazine] you're involved intensely," she continues. "Then you build your staff and they take care of the day-to-day.

But I will not step back from *Architectural Digest*. I'm involved in the orchestration of the total concept. Right or wrong it is my viewpoint. And you can't delegate viewpoint."#

year were $102,742,000. The company predicts it will hit a net income of $200,000,000 and an operating revenue by the end of 1984.

The publicly held New York-based company has been changing from a "product driven company to a market driven company," according to chairman Harrington Drake. In an attempt to zero in more effectively on the business reading market, D&B's Technical Publishing arm changed the name of *Dun's Review* to *Dun's Business Month* last year.

The company also attempted to find a niche with a publication dubbed *Output*, but the venture proved unsuccessful.

High tech oriented, D&B has introduced 30 new products that capitalize on computer innovations.

Dun & Bradstreet lost one key executive last year, vice-chairman Richard Simmons. Mr. Simmons decided to assume the presidency of the Washington Post Co., taking over from Mark Meagher. Mr. Simmons was succeeded by Charles W. Moritz, who was elected president-chief operating officer last June. Mr. Moritz had been chairman of the company. Harrington Drake, 61, continues as chairman-chief exec.

Dun & Bradstreet's publishing operations posted operating revenues of $408,378,000 in 1980, up 17.6% over 1979 and an operating income of $117,379,000, up 20.8% over the prior year.Those operations include: Reuben H. Donnelley (Yellow Pages), Moody's Investors Service, Official Airline Guides, Technical Publishing and Funk & Wagnalls. D&B boasts of a record year in 1980 in its publishing division, in spite of losses sustained in the start-up costs of the proposed computer magazine, *Output*. The magazine was designed to combat "computerphobia," to simplify computers for chief execs. According to sources, however, the magazine just never found its niche and ceos never found the time nor the inclination to learn computer basics.

Technical Publishing consists of 22 business magazines. It also produces specialized consumer books and educational training systems. Looking ahead, the company is expecting another record year for the publishing division.

In November, 1981, Dun's publishing division, Technical Publishing, acquired *Solid State Technology* from Cowan Publishing in Port Washington, N.Y. The sale also included *Solid State Buyers Guide & Directory*.

Last year, Technical changed the name of *Dun's Review*, to *Dun's Business Month*. At first, the magazine was just going to have a recap of the month's events but then decided to expand that idea to the entire magazine. So, while it continues to write trend stories, *Dun's Business Month* will provide a monthly review for business execs. The goal is one-stop reading for the busy chief exec. At the same time the magazine was renamed, it was redesigned.

Within the coming months, the Technical Publishing corps will move from Fifth Avenue to Third Avenue in a new building still under construction.

Reuben H. Donnelley joined forces last year with one of its clients, Bell of Pennsylvania and came out with the *New Neighbor Guide* for new residents of the five-county Philadelphia metropolitan area. Internationally, the company founded a new United Kingdom publishing venture, teaming up with the International Thomson Organization to publish the Thomson Directories.

Moody's Investors Service is coming out with two new investor guides: "Moody's Handbook of OTC Stocks" and an "International Manual."

The broadcast division of Dun & Bradstreet consists of Corinthian Broadcasting Television Stations division with CBS affiliates in Houston (KHOU-TV), in Tulsa (KOTV), Sacramento (KXTV), Ft. Wayne (WANE-TV) and Indianapolis (WISH-TV). Last year the company bought its first ABC affiliate, WVEC-TV in Hampton-Norfolk. With that purchase, Corinthian landed Pembroke Cable Corp., a cable network serving North Carolina and Virginia communities, and an ownership interest in three multi-point distribution system licenses.

The broadcast group also includes TVS Television Network (an independent network producing telecasts of sports and entertainment events) and PGW (Peters Griffin Woodward) (representing 45 television stations in spot sales to national and local advertisers). Now in the works is a syndicated show for young people from TVS, produced by Corinthian and called "Historyland."

Corinthian Broadcasting posted records in revenues and income in 1980. Operating revenues and income rose sharply at the television stations. Houston's station led in sales. National sales also were strong, according to the company's annual report, with significant increases from the aforementioned Houston and also from Indianapolis. Revenues and income also increased in the other two divisions. The broadcasting segment of Dun & Bradstreet's media holding posted operating revenues of $83,921,000 in 1980, a 27.5% increase over 1979, and an operating income of $36,598,000, up 25.3% over the year before.

MEDIA PROPERTIES

Magazines: *American Journal of Cardiology, American Journal of Medicine, American Journal of Surgery, Consulting Engineer, Cutis, Datamation, Dun's Business Monthly, Electric Light & Power, Fire Engineering, Graphic Arts Monthly, Highway and Heavy Construction, Industrial Research and Development, Mining Equipment International, Output, Plant Engineering, Pollution Engineering, Power Engineering, Purchasing World, Solid State Technology, Software News, World Construction.*

currently riding out a recession. The company's flagship paper, the *Detroit News*, suffered a slight decrease in ad linage from 1980, though Sunday linage is up slightly.

"Detroit is a depressed area. Business isn't what we would like it to be but it's not at the point where we're all ready to jump out the window," a company spokesman said. The *News* had estimated revenues of $170,000,000 in 1980.

Despite the bad economy in Detroit, the circulation wars between the *News* and Knight-Ridder Newspapers' *Free Press* continue unabated. The *News* has a slight over-all lead but the *Free Press* dominates outside Detroit. To combat that situation, the *News* opened a satellite printing station in Lansing in December, 1980 and has recently been promoting home delivery aggressively throughout the mid-Michigan area.

The rivalry between papers was temporarily tabled when a Teamsters local struck the *Free Press* and halted distribution of that paper just before the Republican convention in July, 1980. The papers produced a combined paper with a separate 24 page *Free Press* section tucked inside. The Sunday edition of the joint paper sold over 1,000,000 copies.

The company's broadcast flagship, WDVM-TV, Washington, has retained the new leadership position it had when it came to evening news from the Washington Post Co. in a station swap in 1978. Evening news has made few changes at the Washington station.

WDVM is one company property outside the Sunbelt that has not been hurt by recession, the spokesman said. "The rest of the stations and Desert Sun Publishing Co. are all Sunbelters and are going like gangbusters," he added.

Evening News owns five tv stations, four VHF and one UHF, and wishes to acquire two more to bring it up to its total allowance of seven tv stations. However, the depressed economy has put those plans on the back burner for now. Broadcast properties account for an estimated 21% of total revenues.

Evening News is keeping an eye on cable and electronic information retrieval systems but it has no plans to jump into either of those fields at the moment. The exec cited the high cost of cable systems as one reason the company has stayed out of the field.

Field Enterprises

Field Enterprises, Chicago, the 22nd largest media company with primary interests in communications but strong activity in real estate, had estimated revenues of $329,900,000 in media in 1980 out of total estimated revenues of $380,000,000.

Once a more diversified company owning Worldbook-Childcraft International (sold to Scott & Fetzer in 1978) and an energy subsidiary which included two coal mines (also sold in 1978), the closely held Chicago-based Field now is "interested in opportunities for potential growth in almost any area of communications," says exec vp-general counsel Lee Mitchell. "We also see growth in real estate."

More specifically in communications, Field is aggressively pursuing acquisition of additional cable properties. San Francisco-based Field Communications Corp., owner of five independent tv stations, made its first move into cable with the acquisition of three Televents of California systems in 1980. Under the Field Cablevision umbrella, the company now has systems with a total of 12,000 subscribers and potential of 38,000.

Mr. Mitchell said that in addition to further cable growth, the company has explored possibilities in programing and production areas.

In the past year Field has begun experimenting with a number of alternative delivery options.

■ In the winter of 1981, Field formed an electronic publishing subsidiary to explore the potential for the new media of teletext. The Federal Communications Commission granted Field permission to test the first commercial teletext system in the country, and the company unveiled its KeyFax service. The technology, based on the British Ceefax System, enables Field to conduct two kinds of tests.

The first serves decoder-equipped televisions in public places, business and homes in the Chicago area with news, sports, financial and other information. The second makes KeyFax available to cable viewers with the addition of classified and display advertising.

The experiment is being conducted on the vertical blanking interval of Field's WFLD-TV.

Also on WFLD, in September, 1981, Field launched its Nite-Owl service. The teletext news and information magazine airs from midnight to 6 a.m.

In November, 1981, the company decided to try its hand at pay tv as well. In a joint venture with Subscription Television of America, it launched Super Tv in the greater Washington, D.C area.

Once the publisher of two metropolitan dailies (the *Chicago Daily News* folded in 1978), Field in mid-1980 formed Field Suburban Publishing to publish shoppers in the west and northwest suburbs of Chicago; *Smart Shopper* now is published in 18 zones, with a combined circulation of 300,000.

In 1980, the company broke with tradition and named the first non-Field family member publisher of the *Sun-Times*. James Hoge, then editor-in-chief, took the reins from chairman Marshall Field V, who said he wanted to pursue other Field ventures.

In the past year Mr. Hoge has implemented a number of changes in the *Sun-Times*. Among other things, the Sunday edition has been given additional editorial space in a number of sections, and the paper has added a standard-size offset fashion section, an expanded business section and a zoned neighbors section (one in Spanish) on various days of the week. Mr. Hoge gives the changes credit for a recent jump in circulation in its hotly contested battle with the *Chicago Tribune*.

Among those other ventures Mr. Field is now exploring are, the company's real estate properties. In 1977, the company acquired Cabot, Cabot & Forbes, a Boston-based national real estate development, investment and management company. Field also has several real estate properties in Chicago.

Also in 1981, Field Enterprises sold its paper mills, FSC Paper Corp., Alsip, Ill., and Manistique Pulp & Paper Co., Manistique, Mich., to company co-owners Marshall and Frederick Field. (Garden State Paper Co. continues to own 20% of FSC.)

In one major personnel move, Charles Fegert, exec vp-advertising, will be leaving the *Chicago Sun-Times* early next year. His responsibilities will be taken over by vp-advertising Robert Reese.

MEDIA PROPERTIES:
Newspapers: *Chicago Sun-Times, Suburban Sun-Times, Smart Shopper, Smart Suburbanite,* shoppers published in 18 Chicago-area zones.
Broadcasting: WBHK-TV, San Francisco; WFLD-TV, Chicago; WKBD-TV, Detroit; WLVI-TV, Boston; WKBS-TV, Philadelphia.
Cable/video: Field Cablevision, California—Redlands-Yucaipa, Riverside County. Field Electronic Publishing.

OTHER OPERATIONS:
Cabot, Cabot & Forbes, Field Realty division, Field Newspaper Syndicate.

Field Enterprises features award-winning columnist Mike Royko on Page 2 of the *Chicago Sun-Times*.

Freedom Newspapers

Freedom Newspapers, Santa Ana, Cal., is the country's 45th largest media company with estimated revenues of $153,500,000, all from media operations in 1980.

Privately owned Freedom Newspapers publishes the Orange County Metro Group Newspapers: *Anaheim Bulletin, LaHabra-Brea Star Progress,* and the *Santa Ana Register*. The company also publishes 29 other daily papers.

It acquired three dailies last year: *Greenville* (Miss.) *Delta Democrat-Times, Dothan* (Ala.) Progress, and *Huron* (S.D.) *Daily Plainsman*, Huron, S.D. Freedom Newspapers recently acquired a partnership interest in Community Press Newspapers, a chain of free distribution papers in Englewood, Colo.

Freedom Communications, a subsidiary, acquired tv station KTVL in Medford, Ore., last March.

The company "is actively engaged in a search for cable and newspaper properties and hopes to diversify in the near future in print and electronic information investments," said D. R. Segal, Freedom Newspapers' president.

He said the company also is upgrading its current newspapers to make them "more valuable to our readers and advertisers."

Gannett Co.

Gannett Co., Rochester, N.Y., is the country's sixth largest media company, with 1980 revenues from media operations of just under $1.2 billion, or more than 98% of total revenues of $1.215 billion. Newspapers provided 77% of total revenues, outdoor advertising 11% and broadcasting 10%. Profits totaled $151,985,000 in 1980, the 13th straight year of profit increases for Gannett. Allen Neuharth, president and chairman, says 1981 will be the 14th straight year of higher profits.

Through aggressive acquisitions, mostly of newspapers in smaller, noncompetitive markets, Gannett has become the publisher of 85 daily newspapers, the most of any company. Its daily circulation of 3,737,000 papers is second only to the 3,783,000 circulation of Knight-Ridder Newspapers.

Gannett may be at an important juncture in its history. Some company followers believe that, as the remaining number of independent newspapers in monopoly markets declines, Gannett may be forced to ease up its traditional kinds of acquisitions and fashion a new growth strategy.

Restless to move

Magazine launchers and revitalizers, take note: Peter Diamandis is restless again.

"To sit in a corporate job shuffling papers is not what I'm into," Mr. Diamandis says. Yet that's what he finds himself doing for Gruner & Jahr since the German publisher sold the U.S. version of *Geo* to Knapp Communications in September. Mr. Diamandis had been publisher of the U.S. *Geo* since October, 1980.

"I'm a hands-on operator," Mr. Diamandis says. "If the U.S. is a big part of their [Gruner & Jahr's] future, I'd like to participate as an executive in building this company here. If not, then I guess I'm looking for a job."

Mr. Diamandis, 50, doesn't lack for references. In January, 1979, he launched *Self* magazine for the Conde Nast operations of the Newhouse family. Before that, he published *New York* magazine for Rupert Murdoch. He also has been publisher of *Mademoiselle*, president of *New West* and for a time president of an ad agency.

Mr. Diamandis, who has been described by Advertising Age columnist James Brady as a publisher without a deep publishing philosophy and "a businessman rather than an editor [and possessing] a sense of what makes a good publication and what doesn't," says he would like to see Gruner & Jahr U.S. become more aggressive in acquiring new publications. He also favors "people and projects that are rolling" in any aspect of the media, whether magazines, books, tv, movies or the "new technology"—possibly cable. "The next two months will tell" what's coming for Mr. Diamandis.

Peter Diamandis

Recent moves by the company suggest that it will attempt to sustain its momentum by moving into new types of newspaper properties and by exploiting opportunities afforded by the new communications technologies.

Last summer, for example, Gannett acquired its first paper aimed at a special market, *El Diario-La Prensa*, the country's largest Spanish language daily. *El Diario-La Prensa*, based in New York, has a daily circulation of 61,000.

Also last summer, Gannett distributed prototypes of the most ambitious project it has under consideration, a national general-interest daily newspaper. Mr. Neuharth says reader response to the proposed paper, called *USA Today*, has been favorable. The company is still testing advertiser reaction; some advertising and marketing execs have been lukewarm about *USA Today's* potential as an advertising medium.

Gannett is to decide whether to go ahead with *USA Today* by the end of this year. If it does proceed, publication could begin as early as next fall.

Gannett directors reviewed research results on the prototypes at a recent board meeting. Some company followers believe Gannett will give *USA Today* the green light. One indication, they say, is Gannett's agreement with Canada, announced last month, to buy most newsprint for the new paper from Canadian suppliers; that commitment was one of several Gannett made in return for Canadian approval to acquire three outdoor advertising companies formerly owned by Combined Communications Corp., acquired by Gannett in 1979.

Gannett also is known to be lining up additional editorial employes and syndicated material for the proposed paper. Most important of all, perhaps, is that Mr. Neuharth, some company insiders say, is strongly behind the idea of a national newspaper under the Gannett banner. At the same time, however, Mr. Neuharth is proud of Gannett's financial record and wouldn't support the project if projections don't show a strong likelihood of financial success.

■ Satellite technology is integral to the idea of a national daily. As Dow Jones & Co. does with the *Wall Street Journal*, Gannett would transmit *USA Today* pages via satellite to company printing plants around the country.

Late last year, Gannett formed a new subsidiary, Washington-based Gannett Satellite Information Technology, to explore using satellites for *USA Today*, as well as for broadening distribution of information and advertising generated by existing Gannett units. For example, Gannett may relay material from *El Diario-La Prensa* by satellite to its other papers with sizable Hispanic readerships.

The new satellite subsidiary is part of the company's "continuing efforts to position Gannett to take maximum advantage of the fast-growing information businesses of the future," Mr. Neuharth says.

Gannett apparently has ruled out operating cable tv systems, because it feels it takes too long to reap returns from the substantial investment required. However, Gannett is interested in providing programing for cable tv and other forms of electronic communications. For example, it has joined with Robert MacNeil and Jim Lehrer, host of public television's "The MacNeil-Lehrer Report," to form a television production partnership.

■ Contrary to the views of the naysayers, Mr. Neuharth also believes Gannett can continue to derive substantial growth through acquisition of general-interest newspapers. This year it acquired the *Gainesville* (Ga.) *Times* (and its two poultry magazines) and 95% of the *Knoxville* (Tenn.) *Journal*. It also has agreed in principle to acquire the *Norwich* (Conn.) *Bulletin*.

Mr. Neuharth calls Gannett's local newspapers recession-proof, citing the company's unbroken string of 56 quarters of profit increases since Gannett went public in 1967.

As was the case last year, however, Gannett's increased revenues and profits from its newspapers stem largely from increases in ad and circulation rates. Linage and circulation of the papers as a whole were about flat last year and have remained so this year.

General Electric Co.

General Electric Co., the 47th media company, had an estimated $150,000,000 in revenues in 1980, according to industry analysts.

GE, which had total revenues of $24.96 billion, owns two consolidated media affiliates within its Consumer Products and Services group, General Electric Broadcast Co. Inc., with three tv stations and eight radio stations, and General Electric Cablevision Corp., with 220,000 subscribers.

Revenues for General Electric Cablevision are estimated at $35,800,000, with operating profits estimated at $8,600,000. In the midst of management changes, GE is chasing on the heels of the now-popular broadcasting trend of more news and current events.

Winthrop Baker, new chief exec and president of the affiliates, found "...when I came in...management personnel and structure needed to be upgraded." In his three months with GE Mr. Baker has hired five new key managers out of eight total, and consolidated managers in markets where the company owns more than one property.

"I assessed broadcasting for the future," said Mr. Baker, "and I found prevalent the trend toward 'total service' programing, *i.e.* more news, talk, features, etc..."

The Cablevision affiliate introduced a complex marketing program last year concentrating on tiering services. Emphasis on expanded pay-tv services beyond HBO is in the works, as well as experimental areas including home security, in-home shopping, in-home banking and automobile traffic control.

General Tire & Rubber Co.

General Tire & Rubber Co., Akron, O., through its wholly owned subsidiary, RKO General, is the country's 51st largest media company.

Media revenues from New

York-based RKO totaled $142,100,000, all in broadcasting. Total RKO revenues were $255,900,000 out of General Tire's total revenues of $2.2 billion.

RKO's roots in broadcasting spring from its acquisition of a radio network in 1942. Today, RKO operates four television stations, 12 radio stations and three radio networks.

It also is involved in producing movies and tv programing, and it owns 60% of Frontier Airlines and eight soft-drink bottling plants. RKO's total profits in 1980 were, excluding its equity in Frontier, $22,500,000.

Recent RKO moves include the startup of two radio networks and the sale of the cable tv outlet, Cablecom. Most important to its future, however, is its appeal, in the U.S. Circuit Court of Appeals, of an FCC ruling that could strip the company of some or all of its radio and television licenses. The FCC ruling, initially made in June, 1980, was upheld by the new commission earlier this year.

"We believe that we have a strong argument in court, and that we will prevail," said a senior RKO exec who asked not to be named. He said the appeal could be decided by the middle of next year, although a finding against RKO could trigger further appeals.

■ The FCC found RKO unqualified to hold the operating license for its Boston station, WNAC-TV, on grounds of alleged misconduct by RKO and General Tire. Based on that ruling, the commission also found RKO unqualified to operate its tv stations in New York and Los Angeles.

The FCC found that RKO made airtime deals with advertisers in the 1960s that now are considered anticompetitive. It also found that RKO had knowingly filed false financial reports and otherwise had showed lack of candor in its FCC dealings.

It also found that General Tire had made improper domestic political contributions and overseas payments.

having knowingly misled the FCC. It also contends that its allegedly illegal advertising deals were common practices in the 1960s. And RKO says its managment has always been independent of General Tire, and therefore the parent company's problems with improper payments should not reflect on RKO's character as a licensee.

RKO continues to operate the three tv stations involved in the case.

When the appeal concludes, the FCC might challenge RKO's qualifications to hold licenses for its 13 other broadcast stations.

■ Loss of all licenses could force the sale of the stations, General Tire said in its 1980 annual report. The New York, Boston, and Los Angeles stations were valued at $48,200,000 and brought in $80,600,000 in revenues, the report said.

RKO's two new radio networks have had good advertiser response, the senior RKO official said. RKO II, aimed at 25-to-54-year-olds, started in September with 56 affiliates. RKO III supplies programing for specific time slots, including a midnight-to-6 a.m. talk show.

RKO declined to supply figures pertaining to its three networks. However, recent demand for network radio programing has spurred plans for such expansion by several media companies.

RKO's cable television arm, Cablecom-General, was sold to Capital Cities Communications in July for $139,200,000. Cablecom owns and operates cable tv systems in 122 states and approximately 100 movie theaters in Oklahoma, Texas and New Mexico.

Although the outlook for RKO's parent company has been darkened by the woes of the auto industry, the senior RKO exec said his company does not rely on General Tire for money.

"We have a good cash position and excellent borrowing capacity. RKO General is a strong contributor to the profits of the parent company," he said.

Robert Williamson was named president of RKO Radio last year, succeeding Dwight Case, who took a partnership post in Sunbelt Communications.

RKO vice-chairman Jack Poor retired and has not yet been replaced.

MEDIA PROPERTIES:
Broadcasting: TELEVISION—WOR-TV, New York; WNAC-TV, Boston; KHJ-TV, Los Angeles; WHBQ-TV, Memphis. RADIO—WOR (am), WRKS (fm), New York; WROK (am), WROR (fm), Boston; WGMS-AM-FM, Bethesda, Md.-Washington; WAXY (fm), Fort Lauderdale, Fla.; WHBQ (am), Memphis; WFYR (fm), Chicago; KFRC (am), San Francisco; KHJ (am), KRTH (fm), Los Angeles.

Harcourt Brace Jovanovich

Harcourt Brace Jovanovich, New York, is the country's 67th largest media company, with estimated media operations revenues of $100,000,000 coming from operations of HBJ Communications & Services, the company's communications division. Total revenues were $504,000,000 in 1980.

Although publicly owned, the company is family-run to the extent that William Jovanovich is chairman and chief exec officer, and acts as the principal corporate spokesman.

One of the world's largest publishers of educational and general and professional books, HBJ is organized into three operating units: Harcourt Brace Jovanovich Publishers (books, academic journals and instruction courses), Sea World Enterprises Inc. (marine parks, food processing and services, land development); and HBJ Communications & Services (magazines, insurance, book clubs and management consulting).

In 1980, the three groups making up HBJ each increased revenues, while most parts of the corporation gained in operating profit. Consolidated sales and revenue figures were: HBJ Publishers, $294,700,000, or 58.4% of the total; Sea World Enterprises, $103,800,000, or 20.6%; and HBJ Communications & Services, $106,000,000, or 21%.

HBJ Communications & Services is a diverse group, with interests ranging from vertical trade publications to book clubs to insurance holdings, the latter which contributes commission (and not sales) to consolidated statements.

Although last year's recession took its toll on HBJ Communications & Services, in the 1980 annual report, William Jovanovich described the division as re-emerging from an advertising slump, and, as such, "alert and active."

HBJ Publishers' strategy has traditionally been to inbed itself in sturdy educational markets: First, elementary and secondary school textbooks, tests and supplies; second, Academic Press's scientific books and journals, law, business and accounting; and, last, college learning materials. As of last March, the company was predicting that collective 1981 revenues from these markets should increase by at least 15%.

Consolidated sales and revenues for HBJ Publishers are separated into textbooks, tests and general books, accounting for $194,000,000; and academic press and professional publishers with some $101,000,000.

HBJ's third and smaller area of business is Sea World, which derives most of its revenues from the leisure time market; the bulk of its activities lie in providing instructive entertainment and recreation. This business is not only inherently seasonal but also vulnerable to fluctations in consumer spending due to external forces such as rising fuel costs.

In early 1979, HBJ divested itself of two efforts to make headway in the strictly consumer market. In February, it sold Jove Publications Inc., which publishes mass-market paperbacks, and, one month later, the subscription list and accounts receivable for unpaid subscriptions to *Human Nature*, a popular magazine into which HBJ plowed a substantial sum.

HBJ Communications this November added another magazine, *Food Plant Ideas*, to its stable of 88 business and professional magazines and newsletters in the division. The magazine, bought from Lakewood Publications, Minneapolis, claims a market of 60,000 top decision makers in the food processing field.

All of the markets in which the corporation competes are highly competitive. HBJ Communications & Services, given its high concentration of vertical trade journals, is particularly susceptible to advertiser drawback during economic downturns. Nonetheless, Harcourt Brace Jovanich shows no signs of seriously altering its over-all strategy—that of firm entrenchment in educational, general and professional publications.

Quotations from Chairman Mark*
(or why media moguls are drooling)

- **"Each time you [broadcasting companies] are successful commercially, you are serving the needs of the public."**
- **"I do not believe that past players, players with impressive records and innovative plans, should be arbitrarily excluded from new markets."**
- **"The historic role of the commission [FCC] as a grand Poo-Bah of the Potomac, determining what kinds of programs a broadcaster must air, must change."**
- **"Deregulation will be an important theme of my chairmanship. The technology bids us to pursue it, and the cost of continued regulation, impels us as well."**
- **"The FCC remains the last of the New Deal dinosaurs."**

*Mark Fowler, new chairman of the Federal Communications Commission.

Harte-Hanks Communications

Harte-Hanks Communications, San Antonio, is the nation's 26th largest media company, with total media property revenues of $269,700,000 in 1980, or 89% of total revenues of $304,000,000.

Company revenues, which increased 24% in 1980 over 1979, have continued to climb, although at a slower rate than last year. For the first nine months of 1981, Harte-Hanks reported revenues of $254,000,000, up 16.5% from the previous year. Net income rose to $17,600,000 from $15,200,000 in the same period a year ago.

The publicly owned holding company splits its business into three segments: Newspapers and related publications, which accounted for 53% of total revenues; broadcasting, 21% of revenues, and consumer distribution of advertising materials and consumer products, 26% of revenues. The first two segments are 100% media, while 56.6%, or about $44,740,000, of the third segment is media activity.

Harte-Hanks, which operates in 87 markets in 27 states, is implementing a "back to basics" plan developed by the company in 1979 to hold down costs while increasing revenues in four growth areas: Cable tv, consumer marketing, entertainment software and electronic information services. Expansion in these areas is backed by its strong revenue base in newspapers, advertising publications, radio and tv.

Emphasis is being placed on full attention "to operation during these times of continuing economic uncertainty," says Robert G. Marbut, president and ceo. "We intend to make a balanced approach into our new areas of obvious opportunity. With a national economy that's so unpredictable and sluggish, we cannot put all our eggs in one basket." he says.

Since 1971, Harte-Hanks has made more than 50 acquisitions, which Mr. Marbut says is all part of the strategy to diversify geographically into attractive new lines of business, both through acquisition and starting new publications.

In the anchor areas of business—newspapers, advertising publications, radio and tv—changes in the last year include realignment of the newspaper group and formation of a new area of business within the newspaper operations group. Dick Schlosberg, a group president, was named president of the new group and a senior vp of the company.

Harte-Hanks owns and operates 29 daily newspapers, and 68 non-daily publications, including weekly newspapers, advertising publications produced by newspapers and a trade publication for the radio industry. The company also publishes Pennysavers and shoppers that are zoned into more than 200 separate editions reaching 2,400,000 households each week.

In July 1981, the company decided to "pull entertainment and broadcasting under one roof to meet the long-term goal in the entertainment software area," Mr. Marbut says of the division that has four vhf network affiliated tv stations, five am and six fm radio stations and cable tv systems serving 41,000 subscribers.

A succession of personnel changes within the company were made when broadcast and entertainment were grouped, moves that Mr. Marbut describes as "natural evolution." Wayne Kearl, former president, became chairman of the group. William G. Moll succeeded him as president in addition to moving up from president of the tv group to chairman of that group

The expansion into new areas of development at Harte-Hanks will "gravitate into the different areas at different rates—for example cable more quickly and entertainment software more slowly," Mr. Marbut says.

Growth in entertainment software stems from Harte-Hanks' 1979 acquisition of *Radio & Records*, Los Angeles. On the other hand, at the end of 1980 Harte-Hanks owned eight cable tv franchises and managed 19 additional franchises. "The company currently is concerned with developing communities around major high-growth metropolitan areas," Mr. Marbut says.

Harte-Hanks also is testing electronic information with CompuServe and with the Associated Press through Harte-Hanks' *Middlesex News*, Framingham, Mass.

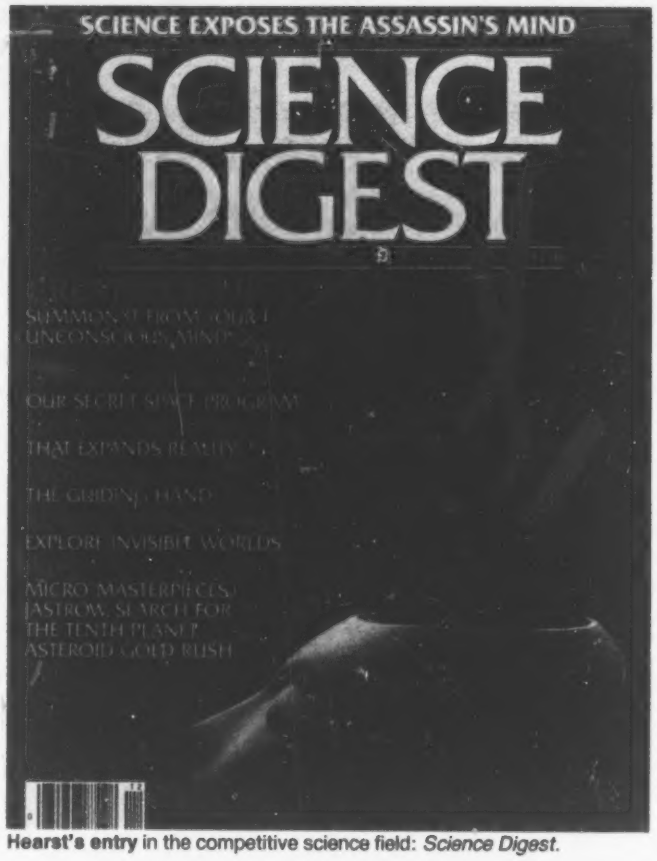
Hearst Corp.

Hearst Corp., New York, is the eighth largest U.S. media company. With revenues estimated at $1.1 billion from media operations in 1980. Total revenue figures for the company were not available.

The company's strong magazine division, with 20 publications, and broadcast holdings are the major contributors to media revenues, with the 15 Hearst newspapers next in revenue importance.

Privately held Hearst continues its strict policy against releasing figures, but lately the company has become more open about other aspects of its business. While chairman Randolph A. Hearst (son of founder Willam Randolph Hearst, who died in 1951) hasn't gone public, his top execs are out building a new image of the company as bullish, aggressive and thriving. Details on acquisitions and new projects now flow with great regularity from the refurbished Hearst building in New York and there have been plenty of acquisitions and new projects to announce. A tv and print advertising campaign aimed at showing a revitalized Hearst ran last spring and summer.

In what has been a tough year for many magazines, Hearst magazines have for the most part continued to prosper. With other women's magazines down, Hearst's *Good Housekeeping* was reported up 3% in ad pages at midyear.



SCIENCE EXPOSES THE ASSASSIN'S MIND
SCIENCE DIGEST
SUMMONS FROM YOUR UNCONSCIOUS MIND
OUR SECRET SPACE PROGRAM THAT EXPANDS REALITY
THE GIRDING HAND
EXPLORE INVISIBLE WORLDS
MICRO MASTERPIECES
JASTROW SEARCH FOR THE TENTH PLANET
ASTEROID GOLD RUSH

Hearst's entry in the competitive science field: *Science Digest.*

Harper's Bazaar, Science Digest, Sports Afield and *Town & Country* also have been on the increase, the last up a hefty 30% after an executive suite revamp.

Cosmopolitan was down 3% in ad pages and *House Beautiful* and *Popular Mechanics* also slipped. A new magazine, *Country Living*, is scheduled to make its debut as a monthly in February. Like *Town & Country*, it will be going after an upscale market. *Town & Country*, expanding from its country club magazine base over the last few years to become a service magazine for the wealthy, has increased circulation from 150,000 in 1977 to more than 254,000 today. Hearst execs credit editor Frank Zachary for the dramatic increase. They hope to produce more editors like him, through an extensive publishing training program for promising newcomers.

Hearst also is going outside for new talent. Thomas Hoving, a former director of New York's Metropolitan Museum of Art, was named editor-in-chief of the company's London-based *Connoisseur*. A Chicago adman, James N. Perkins, was named president-chief exec of Hearst/ABC Video Services, the cable programing joint venture of Hearst and ABC Inc. Mr. Perkins, as head of Washburn Associates, created and produced "The Home Shopping Show," a half-hour weekly cable tv program on which advertisers demonstrate products and services to viewers.

Another major appointment was that of Thomas P. Losee to the post of assistant to Hearst Magazines exec vp-general manager, K. Robert Brinza. The 40-year-old Mr. Losee had been publisher of *Harper's Bazaar* and *House Beautiful*. He was succeeded at *Harper's Bazaar* by D. Claeys Bahrenburg, who had been vp-associate publisher of *Rolling Stone*.

Higher up, Benson M. Srere was named executive assistant to Hearst president-ceo Frank A. Bennack Jr. He had been vp-general manager of Hearst's King Features Syndicate division.

Through mid-November, Hearst hadn't made a cable tv acquisition, but Mr. Bennack called it a "natural extension" of Hearst when the company set up a Cable Communications division in May and named Raymond E. Joslin to head it as vp-general manager. Mr. Joslin, former head of Joslin Communications, Stockton, Cal., is the current president of the California Community Television Assn., the industry's largest regional trade group.

Mr. Perkins, head of Hearst/ABC Video Services, is reporting to a board co-chaired by Mr. Joslin and Herb Granath, vp, ABC Video Enterprises. Mr. Perkin's staff of about 50 has begun work on the Beta women's channel that is targeted for a January start on Satcom I. Eventually the partnership unit will take over programing for ABC and Warner Amex's joint venture in cultural programing, ARTS.

Hearst is in the process of adding a fifth tv station to its broadcast holdings following an agreement with Metromedia in September to acquire KMBC-TV, the ABC affiliate in Kansas City, for $79,000,000 in cash. With Federal Communications Commission approval, Hearst will be in the top tier of U.S. broadcasting with five vhf tv stations the FCC maximum.

While there is some struggling among the Hearst daily newspapers (the *Seattle Post-Intelligencer*'s troubles are being stressed in a bid to set up joint operation with the *Seattle Times*), the company isn't showing signs of abandoning the field.

Hearst acquired the *Midland* (Mich.) *Daily News, Huron* (Mich.) *Daily Tribune* and *Edwardsville* (Ill.) *Intelligencer* in 1979, following the purchase of two Texas dailies (*Midland Reporter-Telegram* and *Plainview Daily Herald*) a year earlier. This August it acquired 28 Los Angeles area free circulation weeklies that will be combined as an advertising package once a week with the *Los Angeles Herald-Examiner*, the Hearst daily that is shifting toward all-morning publications in its battle to recover circulation. This year, after more than a decade of circulation losses, the *Herald* appeared to have stopped the slide and reported a small gain.

The Hearst acquisition spree this year included the purchase of William Morrow & Co., a fiction and nonfiction book publisher, for $22,250,000. This followed the acquisition in 1978 of Arbor House Publishing for an undisclosed price.

N.S. HAYDEN

A scrapper who's in his biggest fight yet

People in Salem, Ore., remember N.S. (Buddy) Hayden. He's the no-nonsense publisher—a street fighter," says a former colleague—mighty Gannett Co. dropped into Salem to "save the franchise," according to one account, when Gannett's *Oregon Statesman* and *Capital Journal* found themselves losing advertising to an upstart weekly.

Within a little more than two years after he became Gannett's man in Salem, the weekly was out of business, just as Buddy Hayden had predicted in a desk-top speech he made upon arrival. He was rewarded with the publisher's post at Gannett's *Camden* (N.J.) *Courier-Post*.

Now Buddy Hayden finds himself in another newspaper scrap and this time the odds aren't quite in his favor. In May, 1980, he became publisher of Charter Co.'s *Philadelphia Bulletin*, once one of the country's largest evening papers but now struggling for survival in a hard-ball market dominated by Knight-Ridder's *Philadelphia Inquirer*.

Last August, in what some at first saw as an intimidation tactic but which later appeared to be a serious proposal, Mr. Hayden gave the paper's unions an ultimatum: Agree to nearly $5,000,000 in contract concessions or the paper closes down for good. The unions agreed.

In September, the *Bulletin* launched a circulation drive that Mr. Hayden says has boosted newsstand sales by 12%. As part of the effort to get the paper distributed from more retail outlets, he has hired 20 marketing/circulation representatives to regularly woo retailers. He's also changed the paper itself by adding a new Today section with a daily theme.

Next, Mr. Hayden, 44, said comes; "Circulation the No. 1 project." "Advertising linage will come back as linage grows." He claims that the *Bulletin's* ad linage has begun to creep up, from a 25.8% full-run share in August to 27.6% in October. But that's still below the already anemic 33% share last year, when the *Bulletin* lost $13,000,000, followed by a loss of more than $10,000,000 in the first half this year.

FCC approval);RADIO:WBAL (am), WIYY(fm), Baltimore; WISN (am), WLPX (fm), Milwaukee; WTAE (am), WXKX (fm), Pittsburgh; WATA (am), San Juan, Puerto Rico.

Houston Chronicle

Houston Chronicle Publishing Co. is the 55th largest media company in the country, with estimated revenues of $133,700,000 in 1980, all from its single media holding, the *Houston Chronicle*, which is ranked No. 1 in advertising linage in the Southwest.

The newspaper is part of Houston Endowment, a private charitable foundation born at the death of Houston businessman Jesse H. Jones in 1956, who left the newspaper, several banks, corporations and various other properties in the endowment.

A federal tax statute, the Tax Reform Act of 1969, says that by 1989 the endowment can have no more than 50% interest in the *Chronicle*, launching countless rumors that the newspaper will be sold. But *Chronicle* president Richard J. Johnson stands firm in saying, "We have no plans whatsoever to sell the paper."

If the newspaper were to be offered for sale, estimates are it would sell from $200,000,000 to $400,000,000. The Houston Endowment lists the market value of assets at $105,000,000.

Published for 80 years, the Chronicle has surpassed all other newspapers in the country in classified advertising linage, with 48,000,000 lines in the first nine months of 1981. Added to 35,500,000 lines in retail and 7,900,000 in general advertising, the newspaper has totaled 91,400,000 lines the first nine months. In 1980 retail linage, the *Chronicle* ranked third, preceded only by No. 1 *Los Angeles Times* and the *Chicago Tribune*. Media Record figures for 1980 rank the *Chronicle* with 104,265,118 total lines, second only to the *Los Angeles Times'* 107,027,765 lines.

In 1980, Everett Collier, political activist and editor of the newspaper for 15 years, was assigned to the post of senior vp, leaving the position of editor to Philip Warner, former assistant editor, who had been groomed for the job for nine years under Mr. Collier.

■ In April of 1980, the *Chronicle*, always an evening paper, added a morning edition. All home delivery outside Harris County was shifted to morning delivery, along with some single sales.

Simultaneous with the start of the morning edition was the addition of 15 reporters to the *Chronicle* staff to expand coverage for readers in the outlying areas of Houston.

Mr. Johnson said the morning edition was created because of the difficulty in distributing the newspaper in the fast growing city. Plans are also under way for a satellite plant and for a new press within the next two to three years to increase printing capacity and improve distribution.

"In a congested city such as this, we cannot continue to put all our printing in one area and still provide the distribution demanded of us," Mr. Johnson said.

The *Chronicle* won a Clio this year for its 1980 campaign via Rives, Smith, Baldwin & Carlberg. The campaign, which highlights the virtues of newspapers, continues this year, featuring author Alex Haley and actress Kristy McNichol in separate testimonials for the newspapers.

Recent format changes in the newspaper have included the expansion of business news into a section this past June, as well as the creation of a new Lifestyle/Fashion section.

In October, the newspaper began *Apartment Extra*, a direct mail piece for apartment dwellers that includes editorials, entertainment and dining guides and ads. The *Extra* is mailed to apartments in four areas of Houston.

Two years ago, the *Chronicle* began a sports information telephone line. And because of the success of the information line, traffic, weather and business lines have since been added.

MEDIA PROPERTIES
Newspapers: *Houston Chronicle.*

Houston Post Co.

The Houston Post Co., Houston, is the 43rd largest media company in the U.S. with estimated 1980 revenues of $165,000,000 all from media. The *Houston Post* accounted for 77% of the company's revenues, while its one radio and two television stations accounted for the rest.

The privately held company which jealously guards financial figures has a net worth of $200,000,000, according to a 1978 article in *Texas Monthly*. Oveta Culp Hobby, owner of the company, reportedly argued that the estimate was a little high.

The *Post* has strong competition from the paper across town, the *Houston Chronicle*, numerous tv and radio stations and 70 suburban papers, according to *Post* managing editor Kuyk Logan. However, the *Chronicle/Post* skirmish has never been waged to the pitch of the newspaper war being fought across the state in Dallas. Last year, the *Chronicle* went all day, a move newspaper followers expected would wake up the *Post* and set them fighting. It didn't.

The *Post* reported full-run ad linage for August of 4,648,312 lines, or 75% of the *Chronicle's* lines. Sunday *Post* linage of 1,839,370 lines was only slightly more than half of the *Chronicle's* 3,486,360 lines. The *Post's* daily and Sunday linage in August were both down from the previous August.

"They see the *Chronicle* and they have just decided not to go for it," said one newspaper observer in Texas. "The management is just not that aggressive."

■ The management is headed by Oveta Culp Hobby. The Hobby family has owned the paper since 1939. Mrs. Hobby is chairman and editor and reportedly actively involved in the paper. That report is disputed by some although her strong presence in Houston is not. The paper is said to still have a small-town flavor, a touch of boosterism, "boosting city, boosting civic pride," according to Harry Hurt III, author if the *Texas Monthly* article.

Editorially, the paper has not changed much. Mr. Logan said there are plans on the drawing boards but he declined to discuss them.

In the past year, the *Post* has opened a satellite bureau in North Houston and is planning another for South Houston, Mr. Logan said.

In broadcasting, the company owns television stations in Houston and Nashville and a radio station in Houston. The Houston station, KPRC-TV, an NBC affiliate is ranked third in the market and is in a hot contest with the No. 2 station, CBS affiliate KHOU. The ABC affiliate, KTRA, leads the market. Revenues of KPRC-TV have been estimated at $26,000,000-$27,000,000.

Nashville television station WTVF-TV is No. 2 in the market, and in a hotly contested race with the No. 3 station.

Revenues for the station have been put at $9,000,000.

Jefferson-Pilot Corp.

Jefferson-Pilot Corp., Greensboro, N.C., is the nation's 74th largest media company, with media property revenues of $81,595,000 in 1980, or nearly 10% of total revenues of $885,021,000. Media revenues came from the company's holdings in radio, television and publishing.

The company's biggest business is insurance, which accounted for 90% of total revenues last year. Total net income was $92,526,000.

While Jefferson-Pilot Corp. president W. Roger Soles described 1980 as a good year, revenue and income for the year were below the record level it saw in 1979. Results for 1980 were the second highest in the company's history, however.

■ For the six months ending June 30, Jefferson-Pilot reported total revenues of $433,019,000, up from $392,578,000 for the same period in 1980. Net income for the 1981 period was $53,945,000, compared with net income of $46,066,000 for the first six months of 1980. Prospects for the remainder of the fiscal year indicate that earnings may be under pressure because of inflation and high interest rates and by depressed business conditions in some areas.

The broadcasting and publishing divisions both experienced restructuring of management, acquisitions and radio format changes in 1980, all instrumental to attaining long-range goals. The company acquired two Miami radio stations, WGBS and WLYF, from Storer Broadcasting Inc. early last year.

Cullie Tarleton, a former vp-manager of WBT, the company's am radio station in Charlotte, N.C., was named senior vp-radio of Jefferson-Pilot Broadcasting, a new position created when the broadcasting group restructured its top management. All 11 Jefferson-Pilot stations now report to Mr. Tarleton.

"We believe that additional support from top management will be beneficial in terms of improving our radio group's peformance," said Wallace Jorgenson, president of Jefferson-Pilot Broadcasting.

■ This year, Denver stations KIMN (am) and KYGO (fm) changed their formats to country music from rock, resulting, Mr. Jorgenson said, in a dramatic improvement in those stations' performance. Also this year, Mr. Jorgenson said that Jefferson-Pilot Broadcasting has been working with its newly acquired Miami stations to fine-tune their formats.

In addition, the company's television news bureau installed receiver dishes in Charlotte to pick up news from its newly opened Washington office.

Jefferson Data Systems, a subsidiary of Jefferson-Pilot Broadcasting, is marketing, nationally, Electronic News Processing (ENP) —a computer news programing system.

Through its Jefferson Productions division, the broadcasting arm installed a digital editing system that allows editing on film of commercials produced by the division. The company produces commercials for national and large regional advertisers.

"As to our future," Mr. Jorgenson said, "we are looking into teletext. At this point we are not prepared to announce anything, but we have formed a committee to look at its possibilities."

The company's publishing subsidiary, Jefferson Pilot Publications, purchased the *Sayer* (Okla.) *Journal* in 1980. The paper was a small family-owned daily that publisher Bob Gilmore turned into a semiweekly Dec. 1 to pare costs and boost advertising revenues.

■ Recent management changes in the subisidiary include the following: Mike Herrera was named publisher of the Laredo, Tex., newspaper and Dan Ragan was named publisher of the Clearwater, Fla., newspaper in 1980. Also in 1980, Scott Trundle was named exec vp of the subsidiary.

Since 1980, Jefferson-Pilot Publications has spent a total of $3,700,000 in a program to upgrade its printing plant operations in Laredo, Clearwater and Beaumont, Tex., according the Harold E. Martin, president of the subsidiary.

An advertising training program, headed by Lou del Casillo, was also set up to help each of the papers reach individual advertising goals. A part of this program, Mr. Martin said, is a marketing survey for each of the publications to help pinpoint strong and weak areas for each of the newspapers' markets.

Journal Co.

The Journal Co., Milwaukee, is the nation's 48th largest media company with an estimated $148,600,000 in media revenues in 1980 out of a company total of $283,500,000.

However, the company's net income of $17,100,000 was down 14.5% from the 1979 figure of $20,000,000. The Journal Co.'s profit margin dropped to 6% from 7.4% in 1979.

The Journal Co., a privately held company, is owned primarily by its employes under a stock plan initiated in 1937. The company includes Newspapers Inc., publisher of the *Milwaukee Journal* and *Milwaukee Sentinel*.

Donald B. Abert, chairman, called 1980 "a truly recessionary year." He said tight credit and high interest rates affected many advertisers in the automobile and real estate businesses.

Newspapers Inc., which also includes Trumbull Newspapers of Connecticut, had $123,600,000 in sales, in second place to commercial printing with sales of $126,600,000. The printing subsidiary consists of Perry Printing Corp. of Waterloo, Wis., and Tempo Communications.

Broadcast operations had sales of $25,000,000 up from the 1979 figure of $21,300,000. The gain was credited to KNTV in Las Vegas, Nev. and Teltron Cable TV, a cable television operation in central Wisconsin. Other broadcast properties include WTMJ-AM, WKTI-FM and WTMJ-TV in Milwaukee.

Teltron Inc., a subsidiary of the Journal Co., was established about a year ago to handle cable operations in Wausau, Stevens Point and Wisconsin Rapids, Wis., and to develop electronic information services. Midwestern Relay Co., which offers microwave transmission services, posted a 10 % sales gain with $4,640,000. MJE Corp., which provides educational materials, fell slightly to $3,590,000.

Knapp Communications Corp.

Knapp Communications Corp., Los Angeles, is the country's 99th largest media company, with 1980 revenues of $50,000,000 from media operations all from consumer magazines. Magazines accounted for about 92.6% of the company's total revenues of more than $54,000,000. The privately owned company projects revenues of $70,000,000 in 1982.

Knapp Communications is best known for the magazines *Architectural Digest* and *Bon Appetit*. In September, it acquired the U.S. edition of *Geo*.

The past year or so has been one of significant growth for the company, represented by expansion in all of its divisions.

The first foreign-language edition of *Architectural Digest*—an Italian version titled *AD*—began publication in May in Milan. That was the first step in Knapp president Cleon T. Knapp's "planned program to 'internationalize' the publication." Negotiations are under way with publishers in France, England, Germany and Japan for editions in those countries as well.

Domestically, *Architectural Digest* last year posted a 26% gain in revenues to $27,500,000, while *Bon Appetit* posted a 29% rise to $25,480,000, according to *Folio*.

Knapp Press, the company's book publishing subsidiary, acquired Rosebud Books, a publisher of regional guides and promotional books that will operate autonomously as a separate division in Los Angeles.

■ Knapp subsidiary Wilshire Marketing estimates $4,000,000 in sales for 1981. Its current plans include publication of a nationwide restaurant guide, organization of the *Architectural Digest* Fine Arts Society, publication of a "hard-to-find" fine foods catalog and a cooking school directory and cookbook.

Knapp's reputation for being able to turn around faltering magazine properties will be put on the line with *Geo*, which the large German publisher Gruner & Jahr A.G. could not make profitable.

In the purchase, Knapp acquired all assets and liabilities of *Geo's* U.S. edition, the right to publish the magazine worldwide in English, as well as English-language books based on material from the magazine, and all electronic publishing rights in the U.S. Purchase price was not disclosed. Knapp says that "no major overhaul of format or content is planned in the immediate future."

Another new magazine, acquired in April, is *San Francisco*, which Knapp bought from owners James Clark and West German publisher Wolfgang Dummer.

In other ventures, Knapp recently developed a corporate art collection and "limited edition" art posters by William Gatewood, commissioned through Mirage Galleries in Santa Monica and promoted through *Architectural Digest*.

Knapp also secured English-language rights to the famous Gault-Millau guidebooks. The first volumes, guides to London, New York and Paris, will be published next spring by Knapp Press.

Construction of Knapp Plaza, a high-rise office complex immediately east of Knapp's present Wilshire Boulevard headquarters, began this year and is scheduled for completion at the end of 1983.

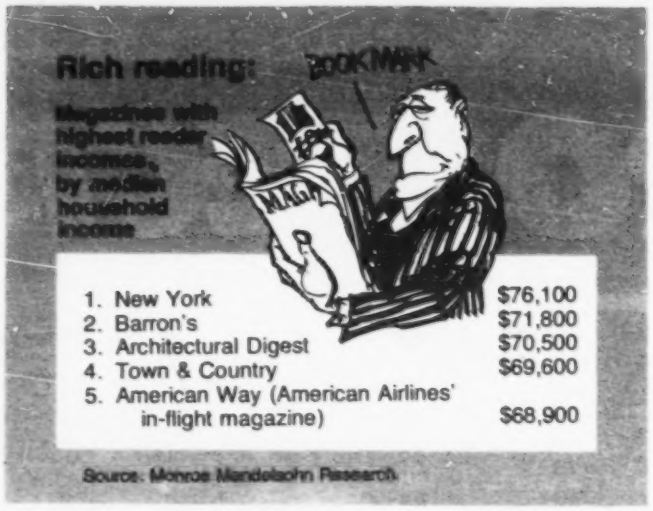
Knight-Ridder Newspapers

Knight-Ridder Newspapers, Miami, is the country's ninth largest media company, with 1980 revenues of $1.099 billion, 75% of which came from its newspaper properties. The remaining revenues of this virtually all-media company came from three television stations and financial newswires. Nonmedia units, including a book publisher and several newsprint supply operations take care of the rest. Net income last year almost topped $93,000,000.

The publicly owned company had revenues of $905,487,000 and net income of $71,041,000 through the first nine months of 1981, putting it ahead of last year's pace.

This year is the first of an ambitious five-year plan to create a more diversified communications company.

That means that Knight-Ridder will continue to eye acquisitions in cable and over-the-air tv as well as pursue its experiments in electronic publishing.



Rich reading:
BOOKMARK
Magazines with highest reader incomes, by median household income
1. New York $76,100
2. Barron's $71,800
3. Architectural Digest $70,500
4. Town & Country $69,600
5. American Way (American Airlines' in-flight magazine) $68,900
Source: Monroe Mandelsohn Research

During the year, the company made three major appointments in top management level posts. Richard Capen was named senior vp-operations, with responsibility for all nonelectronic aspects of the company's businesses. In addition, Albert Gillen, senior vp-broadcast, cable and Viewtron, and James K. Batten, senior vp news and editorial, were named to Knight-Ridder's exec committee.

Last April at the company's annual meeting, president-chief executive officer Alvah Chapman Jr. told shareholders that Knight-Ridder "is moving into the most exciting period in its history."

An indication of the new direction for Knight-Ridder was its unsuccessful attempt with Dow Jones to acquire UA-Columbia Cablevision, the nation's ninth largest cable tv company. Together the partners offered $80 a share but when the ensuing bidding drove the price to $90, Knight-Ridder and Dow Jones bowed out.

Nevertheless, this past year did see the addition of a fourth tv station. Knight-Ridder paid Landmark Communications $48,300,000 for WTAR-TV, Norfolk, Va., changing the call letters of the CBS affiliate to WTKR-TV.

Later in the year, Knight-Ridder, together with TeleCable Corp. and 19 Tampa, Fla., area residents, joined forces to apply for the cable tv franchise to serve that city.

But perhaps the biggest video news from Knight-Ridder came from its wholly owned viewdata subsidiary. In 1980, the unit equipped 204 homes in Coral Gables, Fla., with Viewtron screens and keyboards, giving the homes the opportunity to call up information and news, order goods and services, pay bills, entertain and educate—all without leaving their homes.

Among the advertisers in the program were Eastern Air Lines, Sears, Roebuck & Co., J.C. Penney Co., Shell Oil and Merrill Lynch, Pierce, Fenner & Smith. Those supplying information included Dow Jones, Associated Press, Knight-Ridder's *Miami Herald* and Macmillan Publishing Co.

Midway through 1981 the first phase of the viewdata test was completed and Knight-Ridder announced that it will launch a full-market trial of the service starting in 1983, when some 5,000 Florida homes will be equipped. "This marks the real beginning of our commercial business," a company official said.

Recently, Affiliated Publications Inc., Boston, publisher of the *Boston Globe* agreed to become a partner with Knight-Ridder in its viewdata tests.

If the 1983 experiment is successful, the two will initiate a joint venture to bring the service to Boston sometime later in the decade. American Telephone & Telegraph has also been a partner in the viewdata adventure.

The company's capital spending program is divided into two segments: Normal capital equipment requirements and expenditures under the five-year plan. Over the past five years normal expenditures have averaged about $25,000,000 and it is expected this level of spending will continue in the near future.

Meanwhile, five-year plan expenditures have totaled about $107,000,000 for the past three years and include $47,000,000 for a new production facility for the *Detroit Free Press*; $18,000,000 for expansion of the San Jose plant and $23,000,000 for the Lexington newspapers. These spending levels will continue in the future. All of the company's capital spending of recent years has been financed by internally generated funds.

LFP Inc.

LFP Inc. (Larry Flynt Publications), Los Angeles, is the 97th largest U.S. media company, with estimated revenues of $52,000,000 from media operations in 1980, or 15% of total revenues of $350,000,000. The company's three monthly sexually oriented magazines, plus a variety of one-issue publications sold during the year, were the major contributors to media revenues. Much of its additional income is derived from the company's distribution arm.

The publishing division of LFP, Hustler Magazine Inc., currently produces three monthly magazines: Hustler, founded in 1974, with a current circulation of 1,600,000 and newsstand price of $3.50; *Chic*, begun in 1976 and now with a circulation of 250,000 and $2.95 price, and the three-year-old *Gentleman's Companion*, with a cover price of $3.50 and an unaudited circulation of 150,000. *Hustler* and *Chic* are both ABC-audited magazines.

Unaudited special issue magazines published throughout the year, which contribute to total revenues, are such "one-shots" as *Best of Hustler, Hustler Rejects, Best of Hustler Humor* and *Beaver Hunt*.

All the Flynt publications are essentially alike. A recent description of *Gentleman's Companion*, says it is a magazine designed to be sexually stimulating and informative and most of all entertaining. Articles dealing with sexuality are written in a straightforward aggressive manner, ultimately informing the reader of the latest in the sexual arena."

Top officers in the *Hustler* publishing empire, are Larry C. Flynt, publisher and chairman of the board, and his wife, Althea Leasure Flynt, president and associate publisher. Althea Flynt also holds the title of editor of *Hustler* and has assumed other management duties since Mr. Flynt was left partially paralyzed from a bullet wound inflicted in an attempt to assassinate him in 1978.

Mr. Flynt is no longer the highly visible personality he was during the series of obscenity trials in which he defended *Hustler's* constitutional rights under the First Amendment. But while still recuperating from the attack on his life, he has remained active in the affairs of the company, particularly those of Flynt Distributing Co., which handles the worldwide distribution of all the company's publications as well as that of some 50 other publishers with up to 300 different titles.

Over-the-counter sales, not advertising, have been the mainstay contributor to the fortunes of *Hustler*. As evidence of this, company sales execs note that despite a cover price increase to $3.50 in January, the circulation of *Hustler* magazine in the first six months of 1981 was higher than in the previous six months when the cover price was $2.95, "bearing out the strength of the magazine and its appeal to close to a million and half buyers per month."

Flynt Distributing has shown dramatic growth since Mr. Flynt took over his own distribution activities in 1977 and now holds the No.5 position among the nation's distributors. Since 1978, net revenues to wholesalers from the sale of magazines distributed by Flynt reportedly have jumped from $11,000,000 to $36,000,000, a leap of 227%.

Recent advertising by the company points out that profits from *Hustler* and all Flynt-distributed magazines "go to the wholesaler/retailer communities, *not* to Uncle Sam's post office." The company says the *Hustler* delivers the highest profit per-copy-sold to wholesalers and retailers of all high-circulation ABC-audited magazines: Seventy cents to wholesales; 85 cents to retailers.

■ The Flynt sales force has expanded as rapidly as the distribution company. The company maintains offices in Los Angeles and New York, with a field sales force of 100 men and women—about 20% are marketing specialists who devote full time to developing new business in major supermarket, convenience store and drug chains.

Magazines: *Hustler, Chic, Gentleman's Companion.*

OTHER OPERATIONS
Flynt Distributing Co.

Landmark Communications

Landmark Communications, Norfolk, Va., is the country's 39th largest media company, with revenues of $182,000,000, all in media. According to company chairman Frank Batten, 65% of Landmark's revenues were derived from newspapers, 10% from tv and radio and 25% from cable tv.

For the past 16 years, the privately held company has been expanded from its traditional image as a newspaper company. Although the company maintains its newspaper interests—10 dailies and 22 nondailies, with a combined circulation of 511,000—Landmark now has 19 cable systems in 14 states, two radio stations and two tv stations.

The company is applying for a cable franchise in Scottsdale, Ariz., and last April announced a joint application with Knight-Ridder Broadcasting for a franchise in Tampa, Fla. Landmark also has "several cable acquisitions pending, which should be announced before year's end," Mr. Batten said.

The company bought the rights to a transponder on RCA's Satcom I from the proposed but abandoned Premiere network in July, 1981, for $10,500,000. Then, in early October, the company leased rights for a transponder on Space Net I, to be launched in 1984, from Southern Pacific Communications.

■ When Landmark leased the Satcom I transponder, Mr. Batten announced it would be used for "a unique information service for cable audiences."

The service, dubbed the Weather Channel, is scheduled to go into operation in late spring of 1982. The brainchild of "Good Morning America" meteorologist John Coleman, the channel is to provide 24-hour weather forecasts for both local and national weather. Mr. Coleman, who was appointed president of the Weather Channel, approached Landmark early this year with the concept, which the company estimates will cost $20,000,000 to start.

A staff of 21 meteorologists will man the Weather Channel, which will be advertiser-supported with a maximum of 12 minutes of national commercials, and two minutes of local spots. Broadcasts will be continuous and live, with color radar, color satellite pictures and numerous weather features.

Local forecasts and advertising will be filtered through the Weather STAR (Satellite Transponder Addressable Receiver), which will be distributed free by Landmark to cable operators with 10,000 or more subscribers, and leased to those with 6,000 or less. The Weather Channel itself is free to operators on basic cable.

Mr. Coleman called the response from cable operators "absolutely fantastic" and said in early October that the Weather Channel had received commitments from multiple systems operators totaling more than 2,500,000 subscribers. It is not expected to break even until its third year of operation.

Although Landmark's TeleCable is the nation's 15th largest operator, with subscribers in 14 states, the Weather Channel is the company's first attempt at cable software. Because of the favorable response to the Weather Channel, however, Mr. Batten said that Landmark is "exploring other software possibilities."

Landmark sold WTAR-TV, Norfolk, Va., to Knight-Ridder Broadcasting for $48,300,000 in March. Landmark sold the station to avoid cross ownership reprisals, since it owns the *Virginian-Pilot, Ledger Star*, WTAR (am) and WKEZ (fm) in the Tidewater area. WTAR's president and general manager John O. Wynne succeeds Mr. Gietz as president of Landmark's broadcast division, and he is also responsible for new video programing ventures.

Although Mr. Wynne said, "I doubt anything as good as the Weather Channel will come along in the next two or three years in video," Landmark has been actively exploring video hardware.

New ventures analyst Bahnson Stanley said the company is looking into videodiscs, film production and distribution, video conferencing, on-line database systems, video programing, tv syndication, home security systems and cable services such as program guides and accounting/billing services. Mr. Stanley also noted that Landmark has been checking into computer software such as home videogames.

It has been a year since Landmark, the nation's 25th largest print news organization in circulation, acquired its last noncable acquisition, Citrus Publishing in Florida. Mr. Batten said, "Landmark is focusing on cable at the moment because it has the most potential for us."

Added Mr. Stanley, "We don't care how we deliver information, we just want to deliver it."

Lee Enterprises

Lee Enterprises, Davenport, Ia., is the country's 54th largest media company with media property revenues in 1980 of $135,103,000, or 99% of total revenues of $136,958,000. Newspapers accounted for $99,591,000 or 73% of total revenues, and broadcasting $35,512,000 or 26% of the total. Total net income for fiscal 1980, which ended Sept. 30, 1980, was $20,050,000.

The publicly owned company made the biggest acquisition in its history in 1980, with the purchase of Lindsay-Schaub Newspapers, publisher of five dailies and two weeklies for $64,400,000.

The company is now planning its role in what it calls "the telecommunications decade of the 1980s."

"There is a lot of random activity out there," says Lloyd Schermer, Lee Enterprises president. "What we must do is think about what we have now, and how we might use that [technology] effectively in the future."

What they have now are 18 newspapers scattered throughout the Midwest and West, four tv stations, four radio stations and a two-channel cable tv service in Mason City, Ia.

Years of work in computer capability are bearing fruit, Mr. Schermer says. One long-term goal, he says, has been to be able to provide advertisers with 1% to 100% of the occupied dwelling units in a given area, newspaper subscribers or not. "Our computer capability with seven of our newspapers is close to achieving that now," Mr. Schermer says. The next step, he says, will be too develop a delivery system equally as sophisticated.

■ The company has spent more than $100,000,000 on tv stations and newspapers in the past four years. Some company followers believe the company may have overextended itself a bit in its 1980 spending. Initially, the company borrowed $47,000,000 to acquire the five dailies and the two weeklies making up Lindsay-Schaub. Subsequently, it sold three of the dailies and both weeklies to Hearst Corp. for $15,400,000.

Also in 1980, under Federal Communications Commission pressure, Lee sold KIMT-TV in Mason City, Ia., where the company also owns a newspaper. That sale brought in $9,500,000 and a capital gain of $4,950,000. And in August, 1980 Lee bought the *Winona* (Minn.) *Daily News.*

Partly as a result of the Lindsay-Schaub acquisition and partly with an eye to making current and future acquisitions more manageable, Lee restructured its top managements in 1980. Richard B. Belkin was named vp-broadcasting and corporate planning, and James E. Burgess became exec vp with increased responsibilities in both operations and in administration.

To better consolidate and manage the newspaper operations, two new groups were created: Newspapers-East, with Robert D. Ross as vp, and Newspapers-West, with John Talbot as vp.

The company's interest in new technologies notwithstanding, Lee's current strategy seems to be to concentrate on existing properties, zeroing in on the more recent acquisitions to make them more profitable. "There will always be use for the printed word," says Mr. Schermer. "The object is to enhance newspapers with electronics."

Spending in 1980 was not limited to newspapers; about $7,000,000 went into the NAPP system, a 50%-owned joint venture with a Japanese company, to provide more NAPP printing plates to meet consumer demand. Recent breakthroughs might make the unit's polymer plates more economical than offset in the future. Another breakthrough is the development of films and papers that require no silver or chemicals, but only tap water for image development. The films will be for use by commercial printers.

Satellites, earth stations and tv software are all of possible interest to Lee, Mr. Schermer says. "We're scratching around," he says. "We're in good businesses, where there are more opportunities than threats."

LIN Broadcasting Corp.

LIN Broadcasting Corp., New York, is the country's 85th largest media company, with revenues of $61,300,000 from media operations in 1980, or 95% of total revenues of $64,500,000. Television operations accounted for approximately 75% of LIN's operating income, radio 21%, and radio paging (beepers) 4%. LIN recently acquired the Guest Informant, a specialty publisher of hard cover magazines that are placed in hotels in major cities.

Morris Berkowitz, LIN vp-secretary treasurer, said that LIN is proceeding with a diversification plan that includes possible acquisitions of newspapers, book publishing companies, additional tv stations and cable tv operations. He noted that at the outset of the cable boom LIN had an opportunity "to purchase in that area but we never thought it would catch on. Now the costs are astronomical." LIN has over $100,000,000 in cash and borrowing power to finance its expansion plans.

While the company's principal line of business is broadcasting, LIN also is taking a strong interest in cellular mobil radio, a new technlogy that will provide, for the first time, adequate spectrum for mobile and portable telephones.

The company is in the process of fine-tuning the formats of several of its radio stations. As a group, the profits of the fm stations were up and the am stations were down. Revenues from the fm stations constituted almost 45% of total revenues in 1980, up from 37% in 1979.

LIN operates am and fm stations in Philadelphia, Houston, St. Louis, Milwaukee and Rochester, N.Y. KILT-FM, Houston, which had broadcast modern country music, changed to a beautiful music/country music format.

Following its acquisition by LIN, WEMP (am) went from contemporary music to Schulke-II, while WNUW (fm) airs adult contemporary music. The St. Louis and Philadelphia fm stations also switched to the beautiful music/country format. Its am sister also changed its programing from adult contemporary music, as did WUSL (fm) in Philadelphia.)

Of LIN's four tv stations, three are NBC affiliates and one ABC. LIN credits its presence in the growing Texas market for the company's strong tv operations.

Macfadden Women's Group

Macfadden Women's Group, New York, is the country's 95th largest media company, with total fiscal 1980 revenues of $54,500,000 from publishing operations. Macfadden Holdings, which includes seven romance magazines and two men's publications, accounted for $32,500,000 in revenues last year; *US*, managed under the separate division of Peters Publishing, generated $22,000,000.

Privately owned by Peter Callahan, a 39-year-old accountant, the New York-based company has made "turnaround" properties its target for growth. Mr. Callahan's initiation into magazine publishing, came with his purchase of the 60 year-old Macfadden Women's Group from Bartell Media Corp. in 1975. With assumption of a $100,000 printer's debt and $7,500,000 in circulation liabilities, Mr. Callahan secured the collection of fan and confession magazines for a personal investment of $800.

■ Even more startling to the publishing community was Mr. Callahan's acquisition of *US* from the New York Times Co. in spring of 1980. The every-other-week magazine, positioned against Time Inc.'s highly successful *People*, was rumored to have lost $7,000,000 to $10,000,000 in its three years of operation. Mr. Callahan, with co-financing from Warner Communications, acquired *US* for no cash

down, a $1,500,000 commitment in circulation liabilities and an obligation to pay the New York Times Co. a percentage of the magazine's profits as designated at the time of closing. Warner Publisher Services, a division of Warner Communications, retained national distribution rights for *US*.

Mr. Callahan says the company's goal remains one of aggressive acquisition. "We love to buy things economically and step in the shoes of people who have invested fair sums of money, but only when we're satisfied there's a magazine market."

■ When Mr. Callahan purchased Macfadden's Women's Group, the magazines showed a loss of between $1,500,000 to $2,000,000. "The problem was everybody thought these magazines were dead or had no place to go but out of business," he said. "The emphasis at that time was on the major publishing markets of Chicago-New York-Los Angeles, but we sell a lot of product between those towns."

Mr. Callahan's strategy with the group was to concentrate on working class audiences in those other areas. He gradually phased out the group's fan magazines, which proved unprofitable in the face of weekly tabloid competition, and added two romance publications. Under the editorial direction of Florence Moriarty, the company tried to restore the confession books to that original readership of "blue collar women who have husbands, families, values." For a while, says Mr. Callahan, the content of the magazines was "somewhat salacious."

Mr. Callahan says that advertising sales for the women's group have fluctuated indeterminantly over the last six years. *True Story*, the flagship, turned in its best figures to date in 1980, he says, with a 15% increase in national advertising linage and a 33% rise in ad billing. Earlier, he made major cuts in *True Story*'s rate base, weeding out unprofitable sources of subscriptions in two steps. The original 2,000,000 figure was reduced to 1,800,000 and then 1,400,000 gradually leveling off at 1,500,000. Mr. Callahan says any loss in ad revenue was more than made up in mailing cost savings.

He attributes *True Story*'s gains to juvenile toy industry sales, as well as support from major food, cosmetic and cigarete companies.

■ With the *US* acquisition, he saw a rich inheritance of $5,000,000 worth of supermarket racks and, at the time of purchase, 640,000 in newsstand sales. That figure now stands at 800,000. Total circulation is roughly 1,100,000 compared with 1,000,000 in spring, 1980, and 850,000 the previous year.

The magazine "recorded a small loss" last year, says Mr. Callahan, and he expects it will break even in 1981.

The next test for *US* is conversion to a weekly frequency, slated for fall, 1982. Mr. Callahan says the move is important to the magazine's performance against People, but not critical. "Matching frequencies will enhance our ability to compete.

It certainly makes the magazine more timely. And we have a lot of fixed costs we can spread over 51 or 52 issues. If we double our newsstand revenues, we have an opportunity to double the size of our business. Currently, says Mr. Callahan, "*US* is typically at every other [supermarket] checkout position. We endeavor to get every checkout position."

The cost of doubling the number of supermarket racks, expanding the magazine staff and conducting a tv campaign ($1,000,000 minimum) won't necessarily put *US* in the hole in 1982, Mr. Callahan says. "We have every expectation of making a profit the very first year, subject to the amount of money we put behind the conversion."

Mr. Callahan also believes that *US* is building an identity and readership among younger adults. According to Michael Boylan, managing editor of *US* under the Times' management and now exec vp of *US*, and vp of the women's group and Macfadden Holding Co., *US* is targeted at 18 to 34-year-olds with intentions of "entertaining first, informing second."

Macfadden's men's magazines, *Cheri* and *Pillow Talk*, represent a departure from Mr. Callahan's past publishing forays. "After several attempts to buy magazines in that category, we decided to start our own." *Cheri* was launched in 1976 with a capital investment of $250,000; *Pillow Talk* followed in 1977.

He says advertising for *Cheri* is up 10% over last year, *Pillow Talk*, modeled after the letters format of Penthouse's *Forum*, is now in a every-other-monthly frequency slot as a result of a "terribly overcrowded field."

Mr. Callahan has also organized a film production company, Cheri Enterprises, a division of Cheri Publishing. The first show, called "America Uncovered," will be marketed to cable for airing in January.

McCall Publishing Co.

McCall Publishing Co., New York, is the country's 56th largest media company, with total revenues in 1980 of $133,000,000, all from *McCall's* and *Working Mother* magazines. *McCall's* accounted for 96% of total revenues and *Working Mother* 4%.

This year has been a difficult one for many women's service magazines, but McCall's claims to have done better than some of its chief competitors. Ad revenues have been "flat in all areas," said president-publisher Raymond Eyes, but he said there haven't been any severe problems. "No single product has given us grief," he said.

He added that package goods advertising has held up fairly well, giving *McCall's* a solid advertising base.

The company recently has attempted to broaden its circulation base in order to attract younger readers. Mr. Eyes said that effort has been successful.

He cited *Working Mother*, which made its debut in 1979 as an every-other-monthly, as an example. McCall's was responding to the high percentage of U.S. mothers who held jobs outside the home. "One [survey] showed that 27% of all mothers with children under six months [of age] work," Mr. Eyes said. "And consider the market for working women with children under 18."

Circulation of *Working Mother* rose to about 300,000 this year from 200,000 in 1979, and the magazine switched to monthly publication in October. Its guaranteed advertising rate base will be raised to 400,000 next March.

Working Mother carries about 90 ad pages an issue. The magazine has reached its breakeven point and will begin to make money next year, Mr. Eyes said.

McCall's' circulation rate base will remain at 6,200,000 but the magazine will increase its ad rate by about 6% effective with the February, 1982 issue. It also will raise the subscription price to $11.95 a year from $10.95 with the same issue.

Magazines: *McCall's, Working Mother.*

McClatchy Newspapers

McClatchy Newspapers, Sacramento, Cal., is the 52nd largest media company in the country. Its 1980 revenues were estimated at $136,800,000, all from media operations. The private, family-owned company has newspaper, radio, tv and an increasing number of cable tv holdings.

In the past year or two, McClatchy Newspapers has shifted its philosophy, media property emphasis and management.

A management restructuring in August, 1980, put two younger members of the McClatchy family —brothers C.K. and James—into key posts. C.K. became president and editor of McClatchy Newspapers, while James became chairman of the board and head of long-range planning and development. Another change boosted Erwin Potts, formerly vp-newspapers, to corporate vp.

The McClatchy brothers are said to be more interested in expanding the company than was their aunt, Eleanor McClatchy, who had run the company for years before gradually turning over the reins to C.K. starting in the early 1970s. Eleanor, who became chairman emeritus in the management changes, died in late 1980.

The McClatchy blueprint now calls for geographical as well as media segment growth, particularly newspapers and cable tv. James McClatchy's planning and development committee is examining a number of publishing and broadcasting experiments.

McClatchy Newspapers bought an 80% interest in the Anchorage (Ala.) *Daily News* in January, 1979. At that time, editor and publisher Kay Fanning was struggling to survive with 12 employes and 12,000 subscribers. Today the paper boasts more than 40,000 subscribers, and the staff has grown by more than tenfold. The McClatchys took a chance on the *Daily News* because they see Alaska as a significant growth area.

■ The company also is positioning its community newspaper for growth. It says its weekly *Lincoln* (Cal.) *News and Messenger* serves the fastest growing suburban area of Sacramento. Another community paper, the *Gilroy Dispatch*, in California's southern Santa Clara county, became a daily paper the first week of November. It had been published three times weekly.

McClatchy's *Tri-City Herald* of Richland, Wash. is located in an area that has been listed as one of the fastest-growing parts of the country. However, Richland is a nuclear industry center and the slowdown in nuclear construction may impede the area's growth.

"We're successful because we're not located in stagnating centers like some eastern or midwestern cities that are experiencing economic decline and decay," says Mr. Potts, the corporate vp.

The company's best-known papers are the *Fresno Bee, Modesto Bee* and *Sacramento Bee*. Last Jan. 1, the *Sacramento Bee* opened the doors to its $40,000,000 building addition.

McClatchy owns eight radio stations (four am-fm combinations), but sold two tv stations in recent years to amass capital for investment in a new area for the company—cable tv. KMJ—TV, Fresno, was sold to San Joachim Communications for $13,500,000, while KOVR, Sacramento, was sold to the Outlet Company, of Providence, R.I. for $65,000,000.

Recently, the FCC approved an application by McClatchy Newspapers to operate an almost-defunct television station in the Knoxville, Tenn., market. The station, which is not operating yet, is the only over-the-air tv holding of the company.

■ The balance of the McClatchy holdings are in cable tv. The company owns Fresno Cable Television, serving 6,000 subscribers and still growing. McClatchy also owns an adjacent system close to Fresno County in the Visalia-Tulare area called Sequoia Cable, which is just being built. McClatchy owns 80% of Tel-Cab Communications cable in Reno, Nev. The system began operating last Jan. 1.

Finally, the company owns 60% of a mature, active cable system called Norcal Cablevision, which supplies 35,000 homes with programing in the communities of Yuba City, Marysville and Oroville, north of Sacramento. Viacom is McClatchy's partner in that venture.

Aside from cable as an investment in the future, McClatchy is looking at the infant field of electronic publishing, hoping to find the best way to wed newspapers with cable. "Any new ventures for the company would be in that direction," a company exec said.

MEDIA PROPERTIES:
Newspapers: ALASKA—*Anchorage Daily News* (80% owned). CALIFORNIA—*Fresno Bee, Modesto Bee, Sacramento Bee, Clovis Independent, Gilroy Dispatch, Hollister Freelance* (50% owned), Lincoln News and Messenger, Morgan Hill Times. WASHINGTON—*Tri-City Herald*, Richland.

Cable/video: Nor-Cal, Yuma City, Cal., (60% interest); Sequoia Cablevision, Visalia, Cal.; Fresno (Cal.) Cable; Tel-Cab, Reno, Nev., (80% interest).

McGraw-Hill

McGraw-Hill Inc. is the country's 13th largest media company, with revenues of $644,800,000 from media operations in 1980, or 64% of total revenues of $1 billion. Business magazines, trade magazines and newsletters, including such publications as *Business Week* and "Platt's Oilgram" provided 30% of total revenues last year.

A variety of information services including "Dodge Reports" for the construction industry, Standard & Poor's Corp.'s debt-rating service and computerized economic data bases accessible to clients, accounted for another 30%. Four television stations provided 5% of total revenues.

Total profits last year were $86,536,000, up 12% from 1979.

The company, which publishes more than 30 business magazines and 29 newsletters, says it is trying to be the "preeminent supplier of information to business and the

Can't stay away from making deals

KARL ELLER

His first acquisition attempt for his new employer went awry at the last minute, but it didn't take Karl Eller long to put a fresh deal together. Since February, Mr. Eller has headed the Columbia Pictures Communications division of Columbia Pictures Industries. Within months, he nearly had TDI/Winston, the nation's largest transit advertising company, in the Columbia fold, but the deal collapsed in May.

Two months later, though, Columbia was putting the finishing touches on an agreement to acquire Outlet Co., the broadcasting company, for $100,000,000 in stock. The Eller-orchestrated move will bring Columbia its first tv stations.

Nobody is surprised at Columbia's new aggressiveness. Best known for building Combined Communications into a multi-million-dollar public company that he sold to Gannett Co. for $367,000,000 in 1979, the soft-spoken Mr. Eller is perhaps without equal in the business of buying and selling media properties.

He has been wheeling and dealing throughout his career, except for a brief stay on the sidelines after he and Gannett parted ways. But he soon was back in action for Charter Co., for whom he acquired the *Philadelphia Bulletin*. "I just can't stay away from the media business," he said at the time.

What's on the shopping list for Columbia now? Just about anything in media, the 53-year-old Mr. Eller says. "[There is] nothing specific we can talk about now, but we're looking."

Mr. Eller does say he's not particularly interested in cable tv systems, however. "We're concentrating on the programing side, not the hardware," he says. "It's too cash-intensive for us." Besides, he adds, "The programing side is where the money will be made."

professions through both print and electronic media." It is especially interested in expanding its already substantial position in computer-related publishing.

■ This year, Joseph L. Dionne, formerly exec vp-operations, succeeded Harold W. McGraw Jr. as president-chief operating officer. Mr. McGraw remains chairman and chief exec. Mr. Dionne is expected to become ceo upon Mr. McGraw's retirement, scheduled for early 1983.

Although parts of the publishing and broadcasting side of McGraw-Hill's business operate in what are considered mature markets, the company expects publishing and broadcasting to grow 10% to 14% annually. It is especially interested in growth through acquisition.

Mr. Dionne has expressed optimism about *Byte* magazine acquired by McGraw-Hill in 1979, and another computer publication, *Personal Computing*.

"We are interested in the role of the computer in medicine and in providing legal information for professionals," Mr. Dionne said upon his promotion.

"We are also very interested in computer literacy, teaching computer neophytes how they can use computers in their business and personal lives."

Meanwhile, the company has taken steps to reduce the cyclical effects of economic downturns on its publications division by seeking balanced growth in ad pages, income from subscribers and service income from conferences, seminars and newsletters.

The launch of *Business Week International* at the beginning of 1981 is the company's most important new thrust this year. Initially, it is aimed at 300,000 managers throughout Europe, Asia, Africa, Central and South America.

■ Last year, the company also began "Coal Week International," a newsletter, and *NC Shop-Owner*, a quarterly under the *Industry Mart* umbrella. *National Petroleum News* was sold.

McGraw-Hill said that *Business Week* last year led all U.S. magazines in ad pages for the sixth straight year, held fourth place among U.S. magazines in ad revenue and led in total business and industrial ad pages for the 44th consecutive year.

Broadcasting operations consist of tv stations in Bakersfield, Cal.; Denver; Indianapolis and San Diego. Two are ABC affiliates, one NBC and one CBS.

Last year, new computerized systems were installed to permit the relay of live signals from greater distances than before. Equipment was also installed to improve weather reporting capabilities. The company's broadcasting division has led the industry's battle—so far unsuccessfully—against the relaxation of FCC rules against syndication overlap.

The Record
NEW JERSEY'S LARGEST EVENING NEWSPAPER

SOURCES: S&MM, 1981 • A.B.C. AUDITs, 1980
*N.Y.-N.J. SMSA includes the five boroughs of New York City, and the suburban counties of Westchester, Rockland, and Putnam, N.Y., and Bergen County, N.J.

$145,181,100 and broadcast operations $22,225,000. Of the newspaper revenues, $116,145,000 came from advertising and $24,000,000 from circulation. Total profits for 1980 were $28,300,000, up 11% from the previous year.

Acquisition is the key word in the Media General outlook, as the company emerges from a decade in which it has invested heavily in internal expansion. From 1970 to 1980, the company spent $135,000,000 on new plant and equipment.

In June, 1980, Media General bought Highlander Publications, California's largest chain of local newspapers, for $12,700,000. The company publishes 17 free distribution weeklies in the San Gabriel Valley area of Los Angeles County.

With the move, Media General entered into battle with Times Mirror Co., whose *Los Angeles Times* was aiming for total market penetration through a test of a free weekly newspaper called the *Best of the Times*. The *Best of the Times* was not a success, but Times-Mirror officials say they still plan to be prominent in that market in some other form.

■ To make its "total market penetration" more complete, the company added two more chains later in 1980. First was the Herald Press Newspaper Group, based in Azusa, Cal. This chain's circulation area borders that of the Highlander weeklies. Herald Press was merged into Highlander's operations.

Later, the company bought Mission Viejo-based Golden West Publishing, a chain of free weeklies in southern Orange County, for $8,000,000.

Alan S. Donnahoe, president of Media General, said the combined circulation of the 1980 acquisitions is 580,000.

The company says, "The move into the field of weekly publishing reflects our view that this field now offers the most realistic asset values in journalism." Weekly newspapers also represent untapped potential for national advertising as well as the opportunity to move from weekly to semi-weekly to daily newspaper status, justified by local population growth.

Mr. Donnahoe said that although no acqusitions have been completed in 1981, the company is "looking at anything in the communications field," and that "lots of properties are under consideration."

The primary contributors to Media General's newspaper operations have been the *Richmond Times Dispatch* (morning and Sundays) and the *Richmond News Leader* (evenings); the *Tampa Tribune* (mornings and Sundays) and the *Tampa Times*, and the *Winston-Salem Journal* (mornings and Sundays) and *Sentinel* (evenings).

The company has spent $4,500,000 on modernization and expansion of its broadcast facilities over the past five years, and says it will invest an additional $1,400,000 in 1981.

Meredith Corp.

Meredith Corp., Des Moines, is the country's 21st largest media company, with revenues of $330,459,000 from media operations in the fiscal year ended June 30, 1980. Magazine publishing accounted for about 65% of the company's total revenues of $403,425,000 and broadcast properties for about 17%. Total profits in fiscal 1981 were $25,575,000. Most of the company's 20% profit gain came from broadcasting and book publishing; magazine publishing showed a slight decline in profits.

Although at one time Meredith had interests in businesses not directly related to media, Robert A. Burnett, president and chief executive officer, says the company now is pursuing only areas that are "a natural outgrowth" of its media properties.

"All of our interests are tied together with the thread of our basic related businesses," says Mr. Burnett, pointing to printing, mail order and even real estate as areas with which Meredith can capitalize on the well known *Better Homes and Gardens* name.

An example of how Meredith sees this philosophy relating to the future is its current experimentation with evolving technologies.

In January, 1981, the company created a new operating unit, Meredith Video Publishing, to evaluate business opportunities in cable and satellite programing, based on the editorial content of its publications. The subsidiary since has co-produced "The Better Homes and Gardens Idea Notebook," a series of half-hour programs on home decorating, improvement and landscaping. The series is carried on the USA Network.

Meredith also is participating in a project with CompuServe, through which it offers supplemental food information from *Better Homes and Gardens* to home computer owners. In 1980, in conjunction with Texas Instruments, it developed a program called "Weight Control and Nutrition," designed for use with a TI home computer.

With *Better Homes and Gardens*, Meredith also will be one of the publishers providing information for Times Mirror Co's. electronic home information service experiment, scheduled to begin in several hundred Southern California homes next February.

Although he says it is unclear where any one of these projects may lead, Mr. Burnett feels it's important to investigate them. "I suspect we're going to have a presence on the software side," he says, noting that hardware or cable delivery systems are competitive with Meredith's printing operations. He says the company also could add newspapers, radio stations, more magazines and one more television station.

Meredith regularly updates the look and content of its magazines to reflect changes taking place among its readers. In April, 1981, the company changed the name of *Apartment Life* to *Metropolitan Home* and broadened its focus to include all "young, affluent adults in major metropolitan areas," whether they live in apartments or not. The company says the old name had become "self-limiting" and "no longer indicative of the magazine's content."

According to Mr. Burnett, Meredith will continue to revise its editorial products in light of audience trends. However, he says, this may not always mean a name change. For example, several less noticeable changes have been in Successful Farming this year in the form of graphic revisions and the introduction of new topics.

Mr. Burnett says he believes the company now has found "what we think we should be doing."

In late 1980, Wayne A. Miller, president of the publishing group, died. He was succeeded by Jack D. Rehm, who had been group vp and general manager of magazines.

Metromedia Inc.

Metromedia Inc., Seacaucus, N.J., is the country's 20th largest media company, with revenues of $333,720,000 from media operations in 1980, or 73.5% of total revenues of $454,000,000. Broadcasting accounted for 50% of total revenues, outdoor advertising about 24%. Operating profits for these businesses last year were $107,000,000.

Although tv, radio and outdoor advertising divisions contributed the majority of operating income in 1980, the company believes there is significant growth potential for suppliers of quality programing, which is the main business of its Metromedia Producers subsidiary.

In preparing for future growth, Metromedia has restructured its production subsidiary, and costs related to those changes are expected to put the division in the red this year. As part of its effort to expand into the production of programing for cable, pay tv, videocassettes and disks, Metromedia hired Robert D. Wood, a former president of CBS Television Network, to head the production subsidiary.

A substantial part of the division's revenue is derived from syndicated distribution of the "Merv Griffin Show," but the number of stations carrying the program last year was down to about 70 from 100 a year earlier. The division also distributes on a syndicated basis tv series produced by others and made-for-tv movies originally produced by the division for network tv.

The company's commitment to improving the division is indicated in its proposed acquisition of WCVB-TV, in Boston, this year for $220,000,000, a record price for a tv station. The purchase, which must be approved by the Federal Communications Commission, also includes BBI Communications, a production and distribution arm that provides the station with more than 60 hours of locally produced programing.

The ABC affiliate is sometimes described as America's most innovative local broadcast operation. Before the deal is approved, Metromedia must sell one its five vhf tv properties since FCC rules prevent a corporation from owning more than seven tv stations, including five vhf's and two uhf's. That is being accomplished by an agreement in principle to sell KMBC-TV, Kansas City, to Hearst Corp. for $79,000,000 to pave the way for the acquisition.

Last year, Metromedia boosted its radio holdings by acquiring Texas State Networks, four radio networks that provide news to 135 stations throughout the Southwest and KJR, Seattle, in an exchange transaction for KNEW, Oakland. Also last year, the company's KSAN, San Francisco, a leading rock station in the 1960s, became the first major fm country music station in its market.

Through its Foster & Kleiser subsidiary, Metromedia is the leading outdoor advertising company, with about 40,000 structures in 16 markets. Metromedia focused on local selling last year by offering packages that reach specific market groups. The approach gives advertisers a chance to use outdoor ads close to the outlets in which their products are sold.

As part of its corporate objectives, the company is getting out of the mail order business by selling Figi's and its related data center to American Can Co. In another move, Metromedia plans to buy 10 railway cars and up to 620 buses from New York's Metropolitan Transportation Authority and lease them back to the city as part of a tax-deduction plan allowed by the recent changes in federal tax law.

Minneapolis Star & Tribune Co.

The Minneapolis Star & Tribune Co. is the nation's 29th largest media company with revenues of $213,700,000 for fiscal 1980, which ended Feb. 28. All revenues were

from media operations. Net earnings dropped 9% to $7,700,000 last year from the previous year.

The privately owned company has recently talked of mergers on two different fronts. First, the company has agreed to merge with its sister company, the Des Moines Register & Tribune Co. The companies are headed by two different factions of the Cowles family. In addition, the company is planning to consolidate the news staffs of its Minneapolis newspapers.

A merger with the Des Moines concern would result in a new, yet-unnamed company with headquarters in Minneapolis. John Cowles Jr., president of the Minneapolis company, would become chairman and chief executive officer of the new company. David Kruidenier, Mr. Cowles's cousin and chairman and ceo of the Des Moines company, as well as publisher of the *Des Moines Register and Tribune*, would become president of the new company.

The merger, expected to be approved early next year by shareholders, would end years of operating independence for the two companies. The newspapers in both cities, however, will retain editorial independence.

■ The new company would have annual revenues of $330,000,000, based on 1980 figures, considerably more than either company produced last year.The expanded financial base could be used to finance existing programs and new ventures. The company would also have substantially more assets on which to borrow. A combined company also would be more attractive to investors should it decide to go public. The company doesn't plan now to offer stock to the public, but it is anticipating that a secondary market will develop over time.

The company, in July, 1980, sold *Harper's* magazine, a prestigious publication that was never a financial success for the company.

The magazine was reported to be losing $1,500,000 a year when it was sold to the John D. and Catherine T. MacArthur Foundation of Chicago.

Two new ventures in which the company has interests are cable tv and electronic news dissemination. The company owns the 54,000-subscriber Cablescope, the 20th-largest cable system in the country. The company also is participating in Compuserve, an information system based in Columbus, O.

■ Christopher Burns, formerly an electronic information specialist with the Washington Post Co., recently was hired as associate publisher of the Minneapolis newspapers, with responsibility for marketing and electronic information.

Expansion in these areas might be slow, however. The company said in a letter in its 1980 annual report that prospects for the "electronic newspaper have been exaggerated."

It said the daily newspaper "is the backbone of our business, and we expect it to remain so for the foreseeable future."

The company's two principal newspapers, the morning *Tribune* and the afternoon *Star*, plan to merge their business news staffs to produce an expanded daily business section for both newspapers.

If the combined business section, which represents a departure from previous policy, is successful, sections such as arts and entertainment, sports and community news might also be combined.

Talk of the staff mergers once again touched off rumors, denied by the company, that the *Star*, like so many other afternoon newspapers, will fold or be merged totally with the *Tribune*.

The company this fall was criticized for its financial backing of a consortium of business leaders who promoted construction of a domed sports stadium in downtown Minneapolis. Mr. Cowles emerged as a leader of the group. In addition, the Star & Tribune Co. donated to the consortium $1,000,000 worth of land close to its offices. In exchange, the consortium received development rights over a 50-block area surrounding the stadium, which is to open in spring, 1982.

Rumors abounded that Mr. Cowles used his influence to kill serious reporting efforts by the Minneapolis newspapers into the consortium's maneuvering to obtain the development rights. Several days after the dome was inflated in October, the *Star* published several articles detailing the efforts of the consortium and its connection with the Minneapolis newspapers and Mr. Cowles. The articles drew mixed reviews from the public.

Morris Communications Group

Morris Communications Group, Augusta, Ga. is the country's 71st largest media company, with estimated revenues of $89,000,000, virtually all of which come from its newspaper properties throughout the South and Southwest.

Morris became prominent on the national media scene in the early 1970s when it purchased for $41,000,000 the Amarillo Globe News Publishing Co. and *Lubbock Avalanche-Journal* from the Wittenburg estate, a family with wide interests in the Texas Panhandle.

These two newspaper properties, lumped in Southwestern Newspaper Corp. in the Morris hierarchy, presently account for about half of the total corporate revenues. Morris has pumped considerable capital into upgrading the Amarillo product in particular, which added a $5,000,000 annex to its Amarillo facility to house a new $3,500,000 Goss offset press. Several years after purchasing the Amarillo newspaper, Morris bought Southwest Offset, now called Southwest Publications, primarily a book and

magazine printer.

Morris's second largest division is Southeast Newspaper Corp., contributing just under 40% of media revenues. It includes the home-based *Augusta* (Ga.) Chronicle and *Herald* and the Sunday *Chronicle-Herald*, the *Savannah* (Ga.) *Morning News* and *Evening Press*. and the *Juneau* (Alaska) *Empire*.

Another subsidiary, Athens Newspapers Inc., owns the *Athens* (Ga.) *Banner-Herald*, which has estimated revenues for 1980 of around $4,300,000.

In addition to the 10 dailies published by the three subsidiaries producing total circulation of 320,817, Morris also publishes five weekly newspapers.

Other: Southwest Publications.

Multimedia Inc.

Multimedia Inc., Greenville, S.C., is the country's 44th largest media company, with revenues of $163,563,000 in 1980, all from media operations. Newspapers accounted for $71,332,000, or 44% of revenues; broadcasting $83,281,000, or more than 50%, and cable tv $8,950,000, or about 6%.

The company includes program production and distribution in its broadcast revenues.

Earnings for first nine months of this year were $17,884,000, compared with $15,180,000 in the year-earlier period, an 18% increase, while revenues for the nine months were $140,953,000, up 20%.

The publicly held company publishes 13 daily and 22 nondaily newspapers, and owns six tv and radio stations in seven cities. In addition, Multimedia operates 58 cable tv franchises in Kansas, Illinois, North Carolina and Oklahoma, with approximately 137,000 subscribers.

By the end of 1981, Multimedia expects all of its newspapers except the *Staunton* (Va.) *Leader* to have computers and video display terminals for the production of news and classified ads. Satellite receiver dishes will be installed at its papers in Winter Haven, Fla., and Clarksville, Tenn., to receive wire service news.

■ The broadcast division experienced a good year in every phase in 1980, company officials say. In program syndication, the "Donahue" show, a Multimedia production, was expanded to 224 stations and into Canada, Bermuda, Alaska and Hawaii.

Multimedia says it has set new standards for quality children's programs through its "Young People's Specials." The series received the Peabody Award and 18 Emmys and is seen on 136 stations.

Multimedia is reported to be the largest syndicator of country music programs for tv. The company also plans to start syndicating a nightly news magazine series called "America," which will be co-produced with Kelly Brothers Television. Plans call for the show to begin airing in the fall, 1982.

In the broadcast ownership area, Multimedia is awaiting FCC approval of its station trade with Pulitzer Publishing Co. Under the deal, Multimedia would trade two of its tv stations—WXII-TV in Winston-Salem, N.C., and WFBC-TV in Greenville, S.C.—and cash for Pulitzer's KSDK-TV in St. Louis.

■ As the potential for cable tv has grown, so has Multimedia's involvement. The company expended major efforts during 1980 to expand a new division, Multimedia Cablevision.

The number of cable subscribers "will grow rapidly as we continue construction in Wichita and suburban Chicago, and as we implement our purchase agreement for the Tar River Communications cable group in North Carolina," Wilson C. Wearn, chairman and chief executive officer, told the stockholders earlier this year.

In April, Walter Bartlett became president-chief operating officer, succeeding Mr. Wearn who became chairman-ceo in November 1980, after Kelly Sisk, the former chairman, died. Assuming Mr. Bartlett's previous position, broadcasting division president, is James T. Lynagh, formerly a vp, Post-Newsweek Co.

Multimedia also named Donald D. Sharra, former president of Kansas State Network, as president of the company's cable tv division.

National Enquirer

National Enquirer, Lantana, Fla., is America's 57th largest media company. It has no media holdings outside of its two print media operations, which generated total revenues of $129,000,000 from advertising and circulation in the fiscal year ended last March 31.

The company's mainstay, the *National Enquirer*, continued its domination of the weekly tabloid market in 1981 and remained, as its cover proclaims each week, the "largest circulation newspaper in America" 4,800,000, according to June, 1981 ABC figures; management claims it's nearly 5,000,000.

But while 1981 has doubtless been highly profitable for the company, it also has experienced some much-publicized trouble — the celebrated Carol Burnett lawsuit. Last June, a Los Angeles jury awarded the comedienne $1,600,000 based on an erroneous 1976 story concerning her alleged antics in a Washington, D.C. restaurant: It marked the first time that the paper had lost a suit in court.

A judge later halved the Burnett award, but Enquirer attorney Irving Younger says the ruling remains under appeal. Mr. Younger noted that the paper now faces 18 lawsuits, "give or take one," but he said that most are inactive and predate the Burnett case.

Only three "celebrity suits" are pending, filed by Cary Grant, Richard Pryor, and most recently by Raquel Welch, in the wake of an *Enquirer* cover story this year that said her marriage was collapsing. Mr. Younger claims the tabloid will not lose again, called the Burnett error "the kind of glitch that can occur in even the best machines." He said that he believes the company's fact-checking system rivals that of any media organization in the nation. Company offials anticipate no visible editorial changes as a result of the Burnett suit.

Legal troubles aside, the company continues its unusual success story. The *Enquirer's* mixture of celebrity gossip, medical and personal advice, cheesecake and cute kids has remained fairly constant, and company execs don't foresee any major changes in format. Owner-chairman Generoso Pope Jr. (described as a maverick entrepreneur) and editor-president Iain Calder remain atop the corporation's very tight management structure. The only notable change saw Michael J. Hay replace Thomas Kuncl as the *Enquirer's* executive editor.

Advertising director Ralph Gallagher said the paper's ad linage remains constant at 27 of each issue's 64 pages; after the Burnett ruling, several major advertisers said the case would not influence their decision to advertise there. Neil P. Carey, senior vp, marketing, noted that the gradual increase in the paper's circulation shows that the *Enquirer* still perches atop the still-expanding tabloid field, despite increased competition in the past five years from tabs such as the *Midnight Globe*, Rupert Murdoch's *Star* and the *National Examiner*.

A second Enquirer publication, *Weekly World News*, was launched in 1979, and Mr.Carey said its circulation has reached 600,000 "without any hype." A 1,000,000 figure is targeted for mid-'82, he said, adding that the tabloid mimics its parent publication, but offers more of a current news emphasis.

Though their established formula clearly works, National Enquirer Inc. has planned some changes for 1982. In October, the company changed ad agencies, leaving Grey & Davis in favor of Compton Advertising. The switch reportedly was linked to a conflict of interest — Grey took over a London agency handling the Murdoch group. The company began testing a major new tv campaign in San Antonio and Indianapolis during late October, Mr. Carey said.

"If our testing works out well, we will definitely be a very big television advertiser next year," Mr. Gallagher said. Mr. Carey said the bulk of the company's current advertising is on television, adding that the new spots seek neither to clean up the company's Burnett-bruised image nor a specific market. The new spots, if expanded, will be aimed at a larger general audience than any previous Enquirer campaign.

The company has no plans at this point to diversify into any other media or publications. "We just don't go for any of the fancy stuff," Mr. Carey said. "We just publish 52 weeks a year and work from there."

GUESS WHO WILL CLEAN UP.

Right. *You.*

And everyone else who has something to sell the multi-billion dollar corporate group travel market. Because you are going to spend a lot less to get considerably more.

The reason: the two key publications in the field—Directory of Incentive Travel International and Worldwide Meetings & Incentives —have done something to gladden the hearts of advertisers. They both joined the family of *Harcourt Brace Jovanovich,* America's leading publisher of business and professional journals.

So?

So from now on when you schedule ads in both travel books to reach the 30,000 plus decision makers for the major users of corporate meetings and incentive travel internationally, you can earn a special "Team Discount" of up to 41%!

And you'll get some other enticing advantages from the HBJ connection. Such as sales lead programs, market research and audio-visual support of a magnitude no independent publisher could afford to offer.

We apologize for not inviting you to our celebration. But considering all we have going for you, you might consider one of your own.

Why not call us right now and discover how little it costs to *really* clean up?

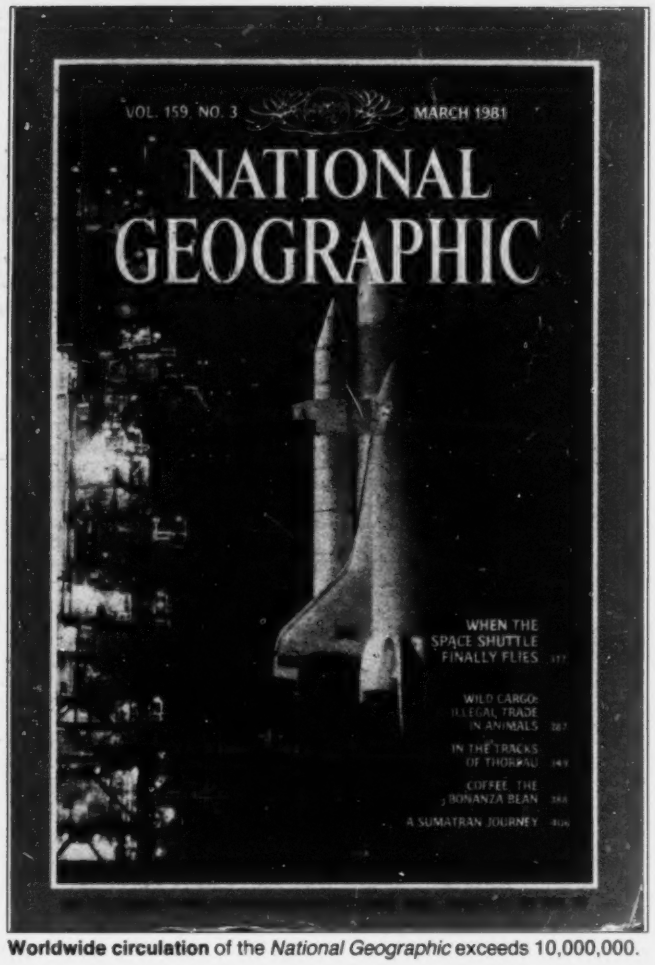
National Geographic Society

The National Geographic Society, Washington, is the nation's 50th largest media organization, with advertising and circulation revenues estimated at $143,312,999 in 1980, or 66% of the nonprofit association's total revenue for the year of $217,180,871.

The society at the turn of the century pioneered development of a mass market for general interest magazines on science and geography. Alexander Graham Bell, better known for the telephone than his presidency of the infant society, invented one of the most successful magazine marketing strategies ever when he coupled subcription to the magazine with society "membership," giving customers a sense of participation in the stories covered.

The market created by *National Geographic* has established a publishing segment that has attracted a number of challengers, most significantly the Smithsonian Institution's prospering *Smithsonian* (approaching 2,000,000 circulation),



VOL. 159, NO. 3
MARCH 1981
NATIONAL GEOGRAPHIC
WHEN THE SPACE SHUTTLE FINALLY FLIES
WILD CARGO: ILLEGAL TRADE IN ANIMALS

COFFEE, THE BONANZA BEAN
A SUMATRAN JOURNEY

Worldwide circulation of the *National Geographic* exceeds 10,000,000.

and the U.S. edition of *Geo*, under new ownership after anemic subscription sales.

But *National Geographic* is not only the saint of its field but also one of the biggest sellers in the entire publishing industry. Audited worldwide circulation hit 10,733,000 (8,615,000 in the U.S.) last June 30. Society president Gilbert M. Grosvenor reports in the December issue that by yearend, 1981, membership in the society will reach 10,850,000, an increase of more than a third from 10 years ago. *National Geographic* was the third largest consumer magazine in the U.S. last year, bested only by *TV Guide* and *Reader's Digest*.

The enormousness of the society's sales effort is illustrated by the *Geographic's* 84% annual renewal rate among members. Simply to stay at its 10,000,000-member level, the society signs up 1,600,000 new readers of the magazine every year.

"Right now the *Geographic* is in a strong, healthy economic condition," Mr. Grosvenor says. But the society is testing television and newspaper ads to sell new society memberships as the costs of direct mail, its traditional sales medium, go up.

Mr. Grosvenor, who became president of the society last year after 10 years as editor of the magazine, is the third generation of his family to hold the top spot at the society, and he's a visionary. "I'd be greatly disappointed if within the next five years or so we aren't using the videodisc technology to deliver information," he said. "You could put an entire atlas on just one portion of the disc."

While no firm projects are under way, he also sees the *Geographic* sizing up new information products for the "retired market," and possible general-interest family film theaters. Mr. Grosvenor compared *National Geographic's* award-winning television specials —in terms of their long-range planning and production time—to the kind of work "the old Walt Disney organization used to do, but aren't doing any more."

But he's not so certain that the *Geographic's* circulation will go on growing indefinitely, contending that the uncontrolled circulation growth was a "fatal mistake" contributing to the demise of *Life*, *Look*, *Collier's* and *Saturday Evening Post*. There's room for growth overseas, he said, but the society has yet to publish a foreign-language edition.

While circulation for the *National Geographic* has grown, ad volume has dropped from the 1960s when Mr. Grosvenor said the society was "turning away" advertisers and carrying 800 to 900 pages a year. "I happen to think we are as attractive an advertising medium today as we were then," he said, adding he hopes to raise the magazine's profile with advertisers.

More zoned editions are a possibility (the *Geographic* has seven regional and five metro editions), as four-color page ads in the full-run U.S. edition now cost $95,575, with black and white $73,520, a potential impediment to some advertisers.

■ The society successfully entered the children's magazine field in 1975 with "National Geographic World," aimed at 8 to 12-year-olds, which now boosts circulation of about 1,800,000. Unlike the *Geographic*, the children's magazine does not carry advertising. The *Geographic* still does not accept ads for tobacco products, alcoholic beverages or proprietary drugs, and carries fewer ad pages (388 vs. 1,020 in 1981) than *Smithsonian*. But both magazines actively woo other advertisers.

Mr. Grosvernor called 1981 a banner year, citing editorial innovations in the magazine, including, an extra, 13th edition devoted entirely to the energy problems facing the U.S. and a new "minibook" approach that groups longer, interelated articles together in a single issue. And, after 94 years, the *Geographic* has added a letters to the editor page.

Long a Washington "institution," the society has just broken ground on a new $30,000,000 office building in anticipation of future growth.

When completed, the new structure will join two existing society buildings and dominate an entire block of prime downtown Washington real estate.

The society is a major publisher of books (in excess of 4,000,000 copies sold each year), atlases and maps, a producer of educational films, filmstrips and globes, and co-producer with WQED-TV, the public tv station in Pittsburgh, of the highly acclaimed "National Geographic" tv specials. Nearly all of the costs of the tv specials, now in their 16th year, are underwritten by Gulf Oil Corp., and tv operations are not a significant revenue producer for the society. Of last year's $143,312,999 in media revenues, about $106,000,000 came from the cost of the Geographic to members, $26,405,336 from advertising and $10,907,663 from "National Geographic World" subscriptions.

MEDIA PROPERTIES:
Magazines: *National Geographic*, "National Geographic World."

New York Times Co.

New York Times Co., the country's 11th largest media company, had revenues from media operations—newspapers, magazines and broadcast facilities—of $678,976,000 in 1980, up 13% from the year before and equal to 93% of total revenues of $733,237,000. Net income totaled $40,609,000.

The *New York Times* brought in almost two-thirds of the company's revenues last year, and its total of $463,356,000 represents an 18% gain over the paper's revenues in 1979. Operating profit for the paper jumped 15% to $31,445,000 in 1980 from 1979, a continuation of the strong rebound from 1978, when the paper lost $12,557,000 because of a citywide newspaper strike.

The company's strong performance continued into 1981, as revenues for the first nine months of the year were up 19% to $205,600,000 and net income rose 22% to $36,400,000. Each of this year's three quarters has produced a record for that quarter in earnings and revenues.

Again, newspapers led the company, as the *Times* and 18 small papers in the South recorded a 32% gain in operating profit to $9,900,000.

■ These gains came after the *Times* had, in 1980, one of its most impressive years ever. It carried more advertising than ever before—90,100,000 lines—and saw its circulation grow to 887,211 daily and 1,461,673 on Sundays. The *New York Times Magazine*, with 4,397 ad pages, was once again second—McGraw-Hill's *Business Week* was No. 1—among all major consumer magazines in total ad pages in 1980. The price of the paper also went up—to $1.00 on Sunday.

Despite some initial resistance from advertisers and readers, the national edition of the *Times*, introduced in 1980, continued to show gains in 1981. The company decided earlier this year to expand its operations by opening a second printing plant, in Lakeland, Fla.

The plant, which will complement the Midwest facility in Chicago, will be used to speed morning delivery of the national newspaper in the South. The national press run is currently 52,000 copies weekdays and 134,000 Sundays, figures that will not change dramatically with the addition of the new plant.

The company's 18 dailies and weeklies in Florida, North Carolina and Louisiana showed an 18% gain in operating profit in 1980, with the group's two largest papers, the *Lakeland Ledger* and *Wilmington* (N.C.) *Star-News* registering substantial gains in circulation and advertising shares.

■ The magazine division had a more lackluster year than the rest of the company, as revenues dropped to $148,223,000 from $153,656,000 a decline of 4%, while operating profits increased 43% to $13,961,000. Both those figures were affected by the sales of *Us* and the Australian *TV Guide*.

The company's *Family Circle* continued its position in 1980 as one of the top-selling magazines in the country, but experienced the same problems being felt by most of the traditional women's magazines, as ad pages declined 11% and circulation dipped 3%. Results look a little more promising this year, with ad pages up 7% through the first 14 issues of 1981.

Golf Digest saw its ad pages decline to 822 in 1980 from 945 the year before, but rebounded in 1981, as pages for the first six months of the year were up by about 5%. *Tennis* had the reverse experience, as its pages jumped by 8% in 1980, but declined by about 6% through the first half of 1981.

The company's other magazine holdings—Australian editions of *Family Circle* and *Better Homes and Gardens*—were sold to an Australian conglomerate for a reported $11,000,000.

The company expanded its broadcast operations in 1980 by acquiring a Huntsville, Ala., tv station, bringing to three the number of southern tv stations the company now owns. The New York Times Co. also owns WQXR-AM-FM in New York, which recently went to all-night programing and which counts a weekly cumulative audience of 952,000 listeners for its classical music programing.

Operating profit for the broadcast group rose by 21% in 1980, to $3,842,000, while revenues increased 46% to $17,252,000.

The New Yorker Magazine Inc.

The New Yorker Magazine Inc., New York, is the nation's 98th largest media company, with revenues of $50,138,975 from media operations in 1980, or nearly 88% of total revenues of $57,797,248. *The New Yorker*, the 56-year-old literary magazine, accounted for all the media revenues.

About 13% of total revenues came from Boulder Enterprise, a Colorado printing subsidiary, and less than 1% came from minority interests in an electronics company and a publisher of medical books and journals.

The publicly owned company earned $6,736,835 before taxes last year. George J. Green, New Yorker president, says 1981 will be "the best year we've ever had," topping last year's record net earnings of $3,619,599 and exceeding the 1980 record high of 4,222 ad pages in *The New Yorker* by 75 to 100 pages.

Next year, "represents much more of a challenge" because of the national recession, said Mr. Green, who is chairman of the Magazine Publishers Assn. But he added there is a consistently strong market for high price, quality goods.

■ "There just seem to be more people willing to spend on the kind of items advertised in *The New Yorker*," he said. He noted that the magazine's readership is stable, with a subscription renewal rate of 75.5%—one of the highest among U.S. weeklies.

"Unlike other publishers, we haven't spent a great deal of money over the last several years in promotion," Mr. Green said. "We may in 1982, if the grim economic predictions are correct."

But even in a sluggish economy, *The New Yorker's* advertisers "realize that our audience represents potential buyers in bad times," he said. "So I think our advertisers come to us even more in bad times that any other time, because of the concentration of potential customers."

Last year saw *The New Yorker* shift to a cold-type and photopolymer letterpress printing system, replacing its former linotype and engraving processes.

■ In September, the company acquired 60% of *Horticulture*, a 77-year-old Boston-based gardening magazine with a circulation of about 105,000. Eliot Wadsworth II, owner of White Flower Farm in Litchfield, Conn., owns the rest of the publication.

The first issue of *Horticulture* reflecting New Yorker's ownership will appear in January.

"We are going to improve the editorial product and develop circulation because of the better editorial material," Mr. Green said. He added he expects a resulting boost in *Horticulture's* current ad volume of about 300 pages a year.

In March, 1980, New Yorker acquired a 33% interest in Raven Press Books Ltd., which gives the company a foothold in medical journals. "The journal business is one there can be growth in," Mr. Green said. The company's policy is to keep an eye out for more

"compatible" companies to buy into, Mr. Green said.

The company's other interests include wholly-owned Boulder Enterprise, which prints computer forms and letters, chiefly for the publishing industry, and 35%-owned Teleram Communications, which makes and sells video display editing terminals for newspapers. Teleram wasn't profitable last year because of development costs, but will be profitable this year, Mr. Green said. Profits will be up this year after a decline in 1980, he said.

Recent personnel changes at the company include the naming of Robert F. Young as advertising director of *The New Yorker*, replacing William P. Buxton, who retired, and Douglas W. Florenzie as circulation director, replacing Frank Ogden, who also retired.

MEDIA PROPERTIES:
Magazines: *Horticulture*, *The New Yorker*.

OTHER OPERATIONS:
Boulder Enterprises (35% interest), Raven Press Books Ltd. (33% interest), Teleram Communications.

S.I. Newhouse & Sons

Samuel I. Newhouse & Sons, New York, is the country's fifth largest media company, with estimated 1980 revenues from media operations of $1.25 billion, or 89% of total estimated revenues of $1.4 billion. Its estimated profits last year were $100,000,000.

Nearly three-fourths of the company's media revenues are generated by newspapers, followed in size by magazines published by its Conde Nast subsidiary, radio stations and cable tv systems. Media revenues exclude an estimated $150,000,000 derived from Random House books.

Newhouse is the country's largest privately owned media company, according to AA figures.

The family-owned and-operated New York-based company has no chief executive officer. Its top management structure seems to be based more on a division of labor among family members Samuel Newhouse Jr., his brother Donald, and their uncles Theodore and Norman.

That arrangement has existed for three years, since the death of Samuel I. Newhouse, father of Samuel Jr. and Donald. Mr. Newhouse ran the company with a scorn for titles and other executive trappings. Today Samuel I. Newhouse Jr. is the Newhouse the others defer to and the acknowledged company publisher.

Still, there have been some changes in the company, one of which seems to be a decision to expand more aggressively into businesses other than newspapers. Analysts who watch the company even though it is not public say there are several indications of this.

- Says one, "They have been saddled with some not very profitable newspapers, including the *Cleveland Plain Dealer* and the *St. Louis Globe-Democrat*. And while the Booth Newspapers chain in Michigan was a profitable group when acquired, it is not nearly as much so now largely because of the Michigan economy. Also, *Parade* magazine is not doing well because of the recent proliferation of local Sunday magazines as well as management problems."

Perhaps more telling, however, is the fact that Newhouse has not bought a newspaper in the last three years, unlike many of its competitors.

On the other hand, Newhouse has made additions to its other divisions, particularly Conde Nast magazines. During the last three years, Newhouse acquired GQ from *Esquire*, started up *Self* and now is planning to revive *Vanity Fair*.

It has been sprucing up existing properties, including *House & Garden* and *Mademoiselle*. *House & Garden* is considered the weakest publication within Conde Nast, having suffered declines in ad revenues and, until recently, no real increases in circulation. *Bride's*, *Vogue*, *Glamour*, *GQ*, and *Mademoiselle* have all been growing.

Over the last 10 months, Conde Nast management has made visual and editorial changes in *House & Garden* and started pursuing a younger reader. As a result, according to the company, *H&G* was the only shelter magazine to show a total circulation gain from January to June, posting an 11.2% increase. Newsstand sales increased 9.2%.

In the last two years, *Mademoiselle* also was changed editorially and this year its look was revamped. Its current circulation, about 70% newsstand normally is about 700,000 although some months it can rise to as high as 900,000, up from 400,000 20 years ago.

There are indications that *Self*, much touted as one of the most successful new magazines ever, may now be experiencing some growing pains.

Conde Nast management says it is booming with 800 ad pages projected for this year and over 1,000 for next, but *Self* carried fewer ad pages in October, 1981 than 1980, sources say. They add that while *Self* has managed to enlist the ad support of beauty advertisers, it has had a harder time cultivating second, third and fourth categories of advertisers.

Due to its strong health stance, it has not been able to rely on cigaret and liquor advertisers for support nor has it managed to build a strong fashion ad category.

Other indications that Newhouse is actively seeking to grow in areas apart from newspapers, include its acquisition of Random House for about $65,000,000 in February, 1980.

In broadcasting, Newhouse has sold its tv properties in Syracuse, Elmira and Birmingham, N.Y., Harrisburg, Pa.; Portland and St. Louis to the Times Mirror Co., while retaining its radio stations in those cities.

Concurrently, it has ventured further into cable with the acquisitions of Vision Cable Co. and Daniels Properties—CATV Interests.

Established cable operations of Newhouse include NewChannels and MetroVision. The company's increased interest in cable, those close to the company believe, signifies a broadening of focus and more interest in providing information rather than just entertainment, paralleling similar moves by Time Inc. and Ziff Corp., which also got out of broadcasting.

Still, some in the industry believe Newhouse may once again begin acquiring newspapers. One potential candidate already rumored is the *St. Louis Post Dispatch* and sources believe Newhouse also may try to buy up the opposition in other cities.

The man who beat Ma Bell

There's "no way" he would take on politics fulltime, says Robert G. Marbut, but his nearly fulltime politicking earlier this year helped block American Telephone & Telegraph's proposed test of its "electronic Yellow Pages" in Austin, Tex.

Mr. Marbut, 46, is president and chief executive officer of San Antonio-based Harte-Hanks Communications and chairs the telecommunications committee of the American Newspaper Publishers Assn. The publishers group doesn't want AT&T to be able to originate information that would be sent into homes via its telephone lines; newspaper people see that as a formidable threat to newspaper advertising.

AT&T scrapped its proposed Austin test after Mr. Marbut led a successful lobbying effort that resulted in the Texas Public Utilities Commission's ordering new hearings on the matter.

Mr. Marbut also has gone to Washington with his case, and in early October the Senate voted 90 to 4 to pass a bill that says AT&T cannot be an electronic publisher in markets where it owns the local telephone business. House action is pending.

ROBERT MARBUT

Meanwhile, Mr. Marbut is overseeing the fortunes of Harte-Hanks, a rapidly growing newspaper and broadcasting company that is no slouch itself in the electronics information business. One Harte-Hanks paper, the *Middlesex News* in Greater Boston, this fall became one of 11 newspapers in the Compuserve project, a videotext service that offers dial-a-computer information access to subscribers who own home computers.

Mr. Marbut says he's glad Congress is looking into the "whole communications law," which he wryly suggests is "a little out of date," much of it being embodied in the Communications Act of 1934.

He's convinced the political process will work, Mr. Marbut says, but adds that it's a little slow for somebody used to daily deadlines.

Understanding a bit before readers do

"It was one magazine I had my own subscription to," Myrna Blyth says of the *Ladies' Home Journal*. "Millions of women love it already—I just want to make them love it more."

MYRNA BLYTH

Mrs. Blyth, 42, was recruited by Charter Co. last May to revitalize the 98-year-old *Journal*, which, like other traditional women's service magazines, has been experiencing flat circulation and advertising revenues. She became the magazine's editor-in-chief after a six-year stint at another women's magazine, *Family Circle*.

Editorial liveliness, Mrs. Blyth says, comes from understanding readers' life style trends "a little bit before they do." As a working mother of two sons, ages 11 and 14, she feels in a position to do just that.

Charter is giving Mrs. Blyth's efforts strong support, she says. One indication: Starting with the February, 1982 issue, the *Journal* will have 25% more editorial content. The magazine also will sport a new look, designed by new art director, Tamara Schneider, formerly of *Seventeen*. That makes *Ladies' Home Journal* the largest women's magazine with a woman art director and editor, Mrs. Blyth says.

For a magazine whose slogan boasts, "Never underestimate the power of a woman," that may make a big difference, Mrs. Blyth suggests.

News America Publishing

News America Publishing, New York, the U.S. arm of Rupert Murdoch's international publishing empire, is the country's 32nd largest media company, with estimated U.S. revenues of $210,000,000 in the fiscal year ended June 30, all from print media.

The highlight of the company's year was a profit-draining battle by its New York Post for increased circulation and advertising shares of the New York markets.

Company execs decline to say just how heavily the red ink flowed at the *Post* this year, but they do concede that its losses were greater than the profits brought in by other News America properties.

The all-out war for late afternoon domination in New York pitted the *Post* against the *Daily News Tonight*, the newcomer launched last year by an archrival, the Tribune Co.'s *Daily News*.

"The intention of [the *Post's*] new competitor was no less than to break the *Post*," Mr. Murdoch contended in his company's 1981 annual report. In order to stave off any inroads by *Tonight*, Mr. Murdoch cut the price of the *Post* from 50 to 25 cents and launched a morning edition in a frontal assault against the morning *Daily News*. After *Tonight* folded in August, Mr. Murdoch claimed to have won the war.

In the past year, Mr. Murdoch later pointed out, the Post's guaranteed circulation soared to 850,000—double the figure when he acquired the *Post* in 1976. The *Daily News* lost circulation in the same period. The *Post's* average circulation for the six months ended Sept. 30 stood at 764,387. For the *Daily News*, the figure was 1,483,333, and for the *New York*

Times, it was 887,211.)

The company also claims that the *Post's* advertising volume inched up by 4% during the first six months of 1981. Though better department store advertising still eludes the *Post*, execs claim their newspaper has about 16% of the daily advertising market in New York.

Mr. Murdoch predicts that the *Post* soon will overtake the *New York Times* in circulation, then will attempt to forge past the leading *Daily News*. "We will establish a 1,000,000 circulation plateau," Mr. Murdoch said. "At the right time, we will have a Sunday paper."

Despite the *Post's* high profile, News America's most profitable U.S. publication continued to be its weekly tabloid, the *Star*. This past year, with the placement of the *Star* in midwestern Kroger Co. supermarkets, the paper was said by News America sources to have achieved full penetration of major supermarket and convenience store chains.

In the past, the *Star's* advertising has been dominated by mail order houses, but a number of national advertisers have joined recently, including television networks, film studios and cigaret and liquor companies. The *Star*, which has 17 pages of ads available 52 times per year and usually fills them, grossed about $60,000,000 in 1981.

News America trimmed its roster of glossy magazines down to one—*New York*—this past year with the divestiture of *New West*. The magazine reportedly had been losing about $1,500,000 per year, even though its advertising revenues had been expanding.

Currently, the company plans no additional divestitures or acquisitions, according to Martin Singerman, president of the News Group magazines subsidiary.

At *New York*, total ad pages climbed slightly last year to 2,600 pages. Automobile ads fell off, but the major retail, media and corporate advertising categories showed signs of promise and have been targeted for future growth. After suffering through a losing year in fiscal 1980, *New York* reportedly posted record profits in fiscal 1981. *New York* grossed about $28,000,000 to $30,000,000 during 1981.

The Village Voice, the company's liberal weekly, brought in about $14,000,000 during 1981 on approximately 2,700 pages of advertising, including its healthy classified sections. Because of the installment of a computerized system for taking classified ads, the *Voice's* classified section was able to produce about 17.5% more volume this year than last on reduced overhead.

Circulation at the *Voice* stands at around 145,000 and has probably reached its peak, says Mr. Singerman, who also serves as publisher of the *Voice*. The recently introduced *Voice Literary Supplement* brought in 45 pages of advertising during its three-issue trial run, mostly from the publishing industry.

Beginning in February, it will be published 10 times a year in 24-page sections supported by 10 pages of advertising.

During 1981, the company formed News Group Productions, a new division designed to develop television and film properties based on articles culled from company publications. Two projects are in the works, an NBC pilot of dramatizations of actual stories and a sports show based on stories from the *Post*.

MEDIA PROPERTIES:
Newspapers (dailies): *New York Post, San Antonio Express, San Antonio News.*
Newspapers (nondailies): *Star, Village Voice*, Houston Community Newspapers (all in Houston—*Community News, Humble Echo, Sentinel, Suburbia-Reporter, Sun, Sun Woodland.*)
Magazines: *New York.*

Oak Industries

Oak Industries, Rancho Bernardo, Cal., is the country's 78th largest media company with estimated revenues of $76,000,000 from media operations in 1980, or 19.7% of total revenues of $385,586,000. Oak's subscription tv operations (stv), by far the largest in the industry, were the sole source of 1980 media revenue.

A public company based in Rancho Bernardo, Cal., Oak Industries operates stv under the ON TV consumer trade name; stv is over-the-air pay tv delivered via scrambled uhf tv signal.

The company's major business continues to be equipment manufacturer for electronic, cable tv and other industries, but it is diversifying into service, systems and software tv ventures. Equipment sales to the exploding cable tv industry have helped bankroll this diversification.

"The outlook for [stv and cable tv equipment] gives us confidence that earnings per share gains are sustainable at about 30% per year for the period 1982 to 1985," well above U.S. average, said Theodore E. James, an analyst at Montgomery Securities, San Francisco. Oak's operating profits last year rose 51%.

The cornerstone of Oak's stv success has been ON TV in Los Angeles, now with about 325,000 subscribers. It is the world's largest single stv operation, accounting for more than one third of all stv subscribers in 1980. Oak in October bought out managing partner Chartwell Communications Group's 49% interest for $55,000,000.

Other ON TV stv operations that Oak manages (some with partners) are in Phoenix (now 38,000 subscribers), Miami/Fort Lauderdale (40,000 subscribers), Chicago (104,000 subscribers) and Dallas (a few thousand). ON TV's success in Chicago has been spectacular as it turned an operating profit in June, 1981 (with 70,000 subscribers), just eight months after launch.

On the other hand, the newest Dallas operation presents a marketing challenge as ON TV is the third stv service there. Oak is field testing in Dallas its second generation of stv decoders—the Sigma model. Because of ON TV's Los Angeles success, the first generation of Oak stv decoders have been prime targets of so-called "pirates" —those who make and sell unauthorized decoder devices that deprive stv operators of monthly subscription fees of about $20.

Oak's stv advertising philosophy entails a mass market approach with heavy tv spending, consistent with the stv industry.

Aside from ads, special discount promotions reducing installation costs or security-deposit fees "are a real big hook" in signing subscribers, said Scott Rogers, marketing director. Local sports telecasts and "networking some major sports to all our systems" are key elements in the ON TV product mix, he added.

Oak plans to introduce ON TV to Washington, D.C./Baltimore and Houston in 1982. Oak has licensed ON TV in Cincinnati and Philadelphia.

Oak this year diversified into cable tv by acquiring two California cable tv systems with about 30,000 subscribers. The company says it is scouting for more cable properties. Also acquired this year was an 81% interest in VideoNet, a Woodland Hills, Cal. closed-circuit video conference company.

Oak also has set up a subsidiary, Oak Media Development, to establish new business in tv program ventures.

In a major development in its hardware business, Oak in 1981 sold Orion model direct broadcast satellite (dbs) decoders to a Canadian company that is launching a commercial dbs service.

Also, Oak in late 1981 reported that backlogged equipment orders had reached $180,100,000, reflecting continued high demand.

MEDIA OPERATIONS:
ON TV subscription tv (Los Angeles, Phoenix, Chicago, Miami/Fort Lauderdale, Dallas); Cable tv systems in two cities; Oak Media Development.

OTHER OPERATIONS:
Oak Communications (largely stv and cable tv hardware and decoders), Oak Technology.

Oklahoma Publishing Co.

Oklahoma Publishing Co., Oklahoma City, the 41st largest media company, had estimated revenues of $170,000,000 in 1980, generated primarily from revenues from its Oklahoma City newspaper operations and Dallas-based subsidiary, Gaylord Broadcasting Co.

The biggest single property is the company's newspaper division dominated by the Oklahoma City papers, the morning *Daily Oklahoman*, the evening *Oklahoma City Times* and the *Sunday Oklahoman*, with estimated revenues of about $80,000,000.

Circulation and advertising have been strong for the papers, thanks largely to the boom market buttressed by tremendous oil and gas activity, and a general drift by the nation's business into the Sunbelt. Ad linage across the board is up about 6% this year, according to Howard J. Nicks, vp-general manager and treasurer.

■ Oklahoma City newspaper circulation trends have followed patterns set in other parts of the country favoring morning papers. "Back in the '30s, the evening paper was around 135,000 to 140,000 and the morning was smaller, but the morning just hit an all-time high of 205,505 while the evening is now about 90,200," Mr. Nicks says. He says the evening paper, however, with circulation pared back primarily to a five-

In Syracuse, we're giving away thousands of free consumers.

It's true. Your ads reach so much extra spending power in Syracuse, it's like reaching thousands of extra consumers free.

For example, Syracuse spends over twice the average amount per person on scotch.* Sixteen percent more than average per person on food.** Our median income is $775 above average.** And the story goes on and on.

What's the best way to reach this profitable audience? Only The Syracuse Newspapers can promise you the kind of coverage you need. The Syracuse TV audience is fragmented by one of the highest cable penetrations of any major market. And we have two new studies that prove it. Just call Dave Kaczorowski at 315-470-2085 for more information about opportunities in the Syracuse Market.

Represented nationally by Newhouse Newspapers

county SMSA around Oklahoma City, has been on a gradual upswing the past five years.

Sunday paper sales, which tend to follow morning circulation patterns statewide added to evening readership in the city, have increased 7,000 in the past year to 315,000. The papers used to have about 60% readership duplication, but that has fallen closer to 25% to 27%, says Mr. Nicks.

Unlike the company's broadcast division, the newspaper division has not been acquisition-minded. Its sole other property, purchased in 1977, is the *Colorado Springs Sun*. The *Sun* has about 23,500 subscribers at the time it was purchased and has been built up to 40,000, "largely because it is in a big growth market as well as tourist center," says Mr. Nicks.

■ The Oklahoma City papers are at the vanguard of newspaper sophistication. The papers went electronic about three years ago, and have just completed putting in an electronic library. Retrieval service will be provided to individual reporter's terminals next spring. New presses and perhaps a new printing plant may be in the offing the next couple of years, Mr. Nicks notes.

Gaylord Broadcasting traces its roots to the purchase of an Oklahoma City radio station in 1928, billed as the first am station west of the Mississippi. "I think it was in some man's garage," says a company officer of the radio property. The company now has the FCC's maximum allowable limit of seven tv stations, as well as three radio units, all in major markets.

Gaylord, named after the founder of Oklahoma Publishing Co., E.K. Gaylord, who directed the company from 1903 until his death (at the age of 101) in the mid-1970s, began to acquire tv properties slowly in the mid-60s, purchasing its last unit in 1977. His son E.L. Gaylord now heads the company. "Our philosophy has been to look for turnaround opportunities instead of trying to buy into highly successful and as a result high priced stations," says Crawford Rice, exec vp at Gaylord.

Mr. Rice says that although the company has reached its FCC set limit of seven tv properties, "we are still in the marketplace if an opportunity presents itself. However, he notes the company is putting much of its thrust these days into software.

Two years ago Gaylord set up a movie production company in Los Angeles called Gaylord Production Co. The newly released movie, "Soggy Bottom U.S.A" is the first big project of that movie house. Complementing that end of the business was the purchased in mid-November of Yongestreet in Los Angeles, producers of "Hee Haw." We bought the company because "Hee Haw" has a long life, and the company already had people in place which would enable us to move more quickly into the tv production field," Mr. Rice says.

"With all this new technology, whether cassettes, pay cable, signals received directly from satellite, there is a big need for programing. Regardless of the delivery system, the programing need is there."

Gaylord, like many other broadcasting operations across the country is bidding for low-power tv station. The company has 43 applications pending before the FCC.

The tightly held company's only other media property is the *Farmer-Stockman* magazine based in Dallas. *Farmer-Stockman* prints monthly from the Oklahoma City newspaper plant some 65,000 copies for distribution in Oklahoma and 140,000 for Texas. It sold its *Kansas Farmer-Stockman* a year ago.

Outlet Co.

Outlet Co., Providence, R.I., is the country's 82nd largest media company, with media property revenues of $64,200,000 in the year that ended Jan. 31, or 49% of total revenues of $132,300,000. Tv stations contributed $54,000,000 of the media revenues and radio stations $11,000,000.

The company projects revenues of $150,000,000 for the year ending next Jan. 31, including media-property revenues of $76,000,000.

Outlet's nonmedia operations consist of 72 women's wear stores.

The publicly owned company is in the process of being acquired by Columbia Pictures Industries in a tax-free stock exchange valued at more than $100,000,000. The acquisition reportedly was spearheaded by Karl Eller, the well known media exec who now is president of Columbia Communications, Phoenix-based subsidiary of Columbia Pictures.

■ The acquisition was agreed to in principle in September and now awaits shareholder, FCC and Security & Exchange Commission approval. "We don't anticipate any surprises," said David Henderson, Outlet corporate vp and vp-broadcasting.

Outlet currently owns five vhf tv stations, five fm stations and two am stations, while Columbia Communications owns three am and two fm stations.

Part of the agreement requires that Outlet sell its retail stores. Commenting on the merger, Mr. Henderson said: "There is clearly a belief that the current administration is in a deregulatory mood. We see restrictions loosening, allowing more licenses per market.

"With greater capital from Columbia we could diversify more readily than on our own."

Park Broadcasting

Park Broadcasting, Ithaca, N.Y., is the country's 81st largest media company, with estimated revenues from media operations of more than $65,000,000 in the year ended June 30, or 81% of total revenues of $80,000,000. The privately held company owns seven television stations, seven am and seven fm radio stations and more than 45 daily, nondaily and shopper newspapers, with a combined circulation of more than 500,000.

Established in 1962, when Roy H. Park, then 52, bought his first broadcast station, WNCT-TV, in Greenville, N.C., the company soon began an intensive acquisition program that continues today.

It purchased its first newspaper in 1972. At that time, Mr. Park said, "My goal now is to establish a good group of newspapers, only I want to do it much faster than the 10 years it took to build my broadcast group."

He apparently has achieved his goal, and this past year added yet another title to the company's growing list: The *Helena* (Ark.) *World*.

While the total circulation of Park's newspaper group is smaller than that of many large city daily newspapers, the company is not looking for a large acquisition.

In 1977, Mr. Park said: "We're trying to buy more newspapers now. And I'm looking in the smaller towns. We know how to operate in small towns. We wouldn't know how to operate in New York City, Buffalo or Oakland, I'm a real country boy. My background is more rural."

While his background may be rural, the company's philosophy is not. In 1977, Park Broadcasting became the first organization to own the maximum amount of broadcast stations (21) permitted by the FCC.

Mr. Park, now 71, parlayed a merchandising background into what is now a multi-million-dollar media company. In 1948, he joined with Duncan Hines, then an author of food and lodging books to form Hines-Park Foods, which licensed manufacturers to produce food products under the Duncan Hines brand.

In 1956, Procter & Gamble Co. acquired Hines-Park in a tax-free merger. The merger, Mr. Park said, provided him with the "initial financial base on which to start building businesses which I would own outright." Mr. Park served as a P&G exec for seven years following the merger, and continued as a consultant until the late 1960s.

■ It was while he was with P&G that he first saw the power and potential of television and decided to get into broadcasting.

Park's main business—broadcasting, newspapers and outdoor advertising—employ 1,710 people, and are held in three corporations, Park Newspapers, Park Broadcasting and RHP Inc., which controls other companies.

Penthouse International

Penthouse International, New York, is the country's 49th largest media company, with 1980 media property revenues estimated at $145,700,000, or 94% of media operations total revenues of $155,000,000.

The privately held company was founded 16 years ago in England by Robert Guccione. As chairman, he remains the driving force behind the company, maintaining control of all facets of the business, though he is primarily "an idea man" for new projects and goals, a Penthouse staff member said. His goal: "To command the largest privately owned company in the world." Toward this end, he has consistently sought to expand the company by using profits from skin magazines, primarily his highly successful *Penthouse*.

Penthouse is responsible for about 80% of company revenues. Sixty-five per cent of total sales is solely derived from the 4,600,000 copies it sells monthly, mostly on U.S. newsstands. Since 95% of its circulation is single-copy sales, the company is less affected by postal-rate increases than other magazine publishers. Rival *Playboy* sells 40% of its 5,300,000 monthly copies by subscription.

While some *Penthouse* projects have been successful, others have cut into profits.

■ *Forum*, started in 1967 to handle the overflow of letters to *Penthouse*, has had some success with a steady circulation of about 650,000. However, *Lords*, a man's fashion quarterly also started in 1967, folded after four issues, with a reported loss of $1,000,000. *Viva*, a sort of monthly *Penthouse* for women, lasted five years until 1978 and lost an estimated $14,000,000. A third magazine, *Photo World*, died within a year (1970), and lost about $1,000,000.

In a complete departure from its previous magazines, *Penthouse* introduced *Omni*, a science magazine, in 1978. Monthly circulation is currently 800,000, and a spinoff television program, "Omni—The New Frontier," made its debut in October, mostly by way of ABC affiliates. The half-hour, staff-produced syndicated science show is supposed to feed the magazine and vice versa.

Prior to this year, Penthouse was a family operation. Mr. Guccione's father is still secretary-treasurer. His eldest son, Robert Jr., is the circulation director. His sister is vp and his daughter runs the West Coast advertising/sales office. Other relatives fill various positions within the organization.

The family is still there, but the company is undergoing a transformation. A new president, Mark Meagher, joined the company in April, 1981. Mr. Meagher, 50, former president of the Washington Post Co., came on board "to establish systems that didn't exist before," he said. (Mr. Guccione previously had held the presidency.)

■ For the first time ever, all departments will have budgets in 1982. Mr. Meagher, and new exec vp David Myerson, have established personnel reviews and evaluations for *Penthouse*'s 350 employes in an attempt to rid the company of its "revolving door" reputation. However, some insiders feel Mr. Meagher was brought in to manage the expanded company assets that resulted from a recent buying spree by Mr. Guccione.

Acquisitions in the last few years have included two Atlantic City, N.J., properties expected to be made into casinos in spring, 1983; International Nuclear Systems Organization, a fusion energy company, and film production companies. "We have been diverting huge sums of cash flow without generating the revenue," Mr. Meagher said.

The biggest potential asset is this year's purchase of about 38% in Telemine Co. Earlier this year *Penthouse* signed on to use Telemine's satellite access to produce PET. (Penthouse Entertainment Television). PET is being designed as a

Petersen Publishing Co.

Petersen Publishing Co., Los Angeles, is the country's 75th largest media company, with media property revenues of $79,269,000 in 1980, or 90% of total revenues of $88,075,000. The company's media revenues came largely from special-interest magazines.

Petersen expects total revenues this year of about $93,230,000.

The privately owned company is seriously considering its first expansion into broadcasting and new video technologies.

In 1981, Petersen formed a six-member corporate development committee to guide company expansion in publishing and into video programing.

Included on the committee are Frederick Waingrow, Petersen president, and several Petersen publishers and execs.

■ Under consideration for 1982 is a new monthly male magazine, either through acquisition or internal development. Mr. Waingrow has indicated the new title probably will involve a subject in which Petersen is already entrenched—outdoor activities or sports, for example.

In addition, Petersen plans to increase the number of one-time issues it publishes. New one-shots would include all areas of current Petersen interest, plus others.

Mr. Waingrow said audio-visual, home entertainment and home computers are possible subjects for single issues in the coming year. Petersen is also reviewing the sports field, particularly baseball, football and hockey, for possible one-time issues.

Mr. Waingrow said Petersen has received numerous inquiries from public and cable television operators concerning the possibility of using Petersen-generated programing. He hinted the company is in serious talks about a possible joint venture.

While in fiscal 1980 Detroit's troubles triggered a sales slump for Petersen's two strongest titles, *Hot Rod* and *Motor Trend*, 1981 has been different.

Mr. Waingrow said advertising sales for Petersen's auto group have increased in 1981, and noted that over-all Petersen expects a 10% increase in revenues in 1982. He described 1981 as the strongest year financially in Petersen's history.

■ Petersen's top management remained relatively stable this year, with only one key personnel shift. *Motor Trend* publisher Robert E. Brown moved to the new management post of senior vp-corporate development in Petersen's automotive group, based in Detroit. Don Williams, former head of advertising at B.F. Goodrich's tire group, succeeded him as *Motor Trend* publisher.

Despite the uncertain future of the U.S. auto industry, Petersen's automotive group may be in a strong position if Detroit shifts, as some experts expect, from a mass marketing strategy to a more targeted one that would include more aggressive wooing of hard-core auto enthusiasts through special-interest media.

Some industry sources believe, however, that its practice of hiring relatively inexperienced editorial talent at low salaries hinders the over-all quality of Petersen publications and may restrict growth.

MEDIA PROPERTIES
Magazines: *Car Craft*, *4-Wheel, Guns & Ammo*, *Hot Rod*, *Lakeland Boating*, *Hunting*, *Motor Trend*, *Motorcyclist*, *Off-Road*, *Pacific Photographic*, *Rudder*, *Sea*, *Skipper*, *Skin Diver*, *Sports Car Graphic*, *Teen*. Also, one-shot special-interest publications.

Pittway Corp.

Pittway Corp., a highly diversified Northbrook, Ill. is the 65th largest media company in the U.S., with media property revenues of $112,000,000 in 1980, all of it gained through the Pittway Corp.'s Cleveland-based Penton/IPC subsidiary.

Penton/IPC, with revenues amounting to about 35% of Pittway's total revenues of $311,700,000, publishes 27 trade magazines and also is involved in direct mail marketing, educational consulting and real estate.

Advertising in the magazines accounted for 69% of Penton/IPC revenues last year. Advertising sales increased 10%, contributing to the publishing segment's record profits.

The best performers in ad page gains were *Machine Design*, *Progressive Architecture*, *Modern Office Procedures*, *Materials Handling Engineering*, *Energy Management*, *Welding Design & Fabrication*, *Materials Engineering* and *Used Equipment Directory*.

■ According to *Folio* magazine, Penton/IPC's largest magazines in revenues are *Machine Design* ($14,435,000 in 1980 revenues), *Industry Week* ($11,536,000), *New Equipment Digest* ($9,047,000) and *Progressive Architecture* ($5,347,000).

The company anticipates a record year in sales and profits in 1981 because of the publishing company's performance and strong growth in Penton/IPC's real estate resort segment.

Chairman Irving Harris said 1981 has been a year of "greater selectivity in choice of media. Our challenge is to continue to improve Penton/IPC publications and services so that when choices are made among competitive magazines serving similar markets, Penton/IPC magazines will be selected to carry advertising programs."

The company has increased its involvement in real estate with the recent opening of Saddlebrook, an

Playboy Enterprises

Playboy Enterprises, Chicago, is the nation's 40th largest media company, with media property revenues of $170,000,000 in calendar 1981. That amounted to 47% of total revenues of $363,200,000. Nonmedia revenues came from gaming, clubs and hotels and other businesses. Total profits were $14,341,000 for the year.

Playboy is a company undergoing a major facelift. After a long and expensive battle over licenses for its United Kingdom gaming operations, Playboy sold the casinos and betting shops in early November to Trident Television Ltd. for $31,400,000. The U.K. gaming division provided 85% of the company's operating earnings in fiscal 1981.

The money from the sale, plus an accumulation of more than $40,000,000 in cash and short-term investments, left the company with the option to enter new businesses. Derick J. Daniels, president and chief operating officer, said Playboy would enter "fields that make sense" in the communications and entertainment arena.

■ During the year, Playboy was faced with problems in its other divisions, too. The company's flagship magazine, *Playboy*, showed only modest increases in subscription sales. And its 12% jump in gross ad revenues—to $73,619,000—came largely because of ad rate increases. Circulation from January to June averaged 5,200,000, down 8.8% from 1980. Ad pages fell to 1,199 pages for the first 11 issues of the year, down 2.9% from 1,234 pages last year.

Total earnings from the magazine division fell by more than 50% in fiscal 1981 to $6,017,000, compared with $14,744,000 in 1980. The company attributed the drop to the decline in newsstand sales, an estimated $4,000,000 in losses from Games and a $1,400,00 decline in revenues from *Oui*.

In June 1981, Playboy decided that publishing two competing magazines in the men's category was not "sound policy," according to Nat Lehrman, senior vp-magazine division director. The company sold *Oui* for an undisclosed amount to Goshen Litho, a New York company that publishes *Blueboy* and other magazines. Management said it placed hopes for increased revenue this year for *Games*, "The 4Star," a monthly puzzle newsletter and a syndication package of *Games* puzzles for newspapers.

Another venture, *Playboy Guides*, also is slated for more development. The company set eight publication dates through November, 1982, for the guides, which range in topics from fashion to entertainment to *Wheels*, covering automobiles, motorcycles and other recreational vehicles.

Operating earnings in fiscal 1981 from the television and movie production, and book publishing divisions dropped 67% to $964,000. Cable television programing plans emerged during the year, and the company said the new media would be a significant development area in the years ahead.

In August, Playboy Productions and Rainbow Programing Services, a consortium of cable tv operators, agreed to form a pay cable tv program service called "The Playboy Channel." Hugh M. Hefner, company founder, chairman and chief executive officer, said at Playboy's recent annual meeting that cable would eventually produce profits exceeding the former gaming holdings.

"The Playboy Channel" is described as a "translation" of *Playboy* magazine, including such features as fashion, interviews and "provocative" pictorials. The programing is scheduled to be introduced in early 1982 on the existing Escapade adult pay cable network operated by Rainbow. The name of the network will change to "The Playboy Channel" at a yet to be determined date.

In addition to its London gaming operations, other nonmedia operations proved troublesome in fiscal 1981. The clubs and hotels division reported a loss of $5,153,000 last year, and execs said domestic and overseas franchise development, rather than company-owned clubs, would hold the key to future growth in the division.

Playboy announced in late November it planned to sell its money-losing resort hotels in Lake Geneva, Wis., and Great Gorge, N.J. to a joint venture partnership formed by Eugene Golub, a Chicago real estate investor, and Americana Hotels Corp., also of Chicago.

The company's long-awaited Atlantic City hotel and casino was opened in April, 1981, after several delays and cost overruns. The company said the facility had experienced a "slow start," which it attributed to high startup costs and strong competition from other casinos. Mr. Hefner said the gaming problems in the U.K. were not expected to affect the U.S. hotel and the company's application for a permanent operating license.

MEDIA PROPERTIES:
Magazines: *Playboy, Games, Playboy Guides*

OTHER OPERATIONS:
Book division, cable programing venture with Rainbow Programing Services, gaming operations, hotel operations, licensing, limousine services, modeling agencies, motion picture and television production, Playboy Clubs.

Post Corp.

Post Corp., Appleton, Wis., is the country's 83rd largest media company, with revenues of $63,129,000 from media operations in 1980. Media accounted for the majority of the company's revenues, with an additional $18,000,000 coming from Post's commercial printing operations, giving the company $81,129,000 in revenues.

Revenues for the first three quarters of 1981 were $57,067,000 and the company expects to match or slightly exceed the previous year's revenues. During 1981, newspapers proved to be the strongest performers in Post Corp.'s stable, showing slightly higher profits than in 1980. The broadcast division reported revenues at about the same level as 1980 with higher costs of doing business.

The privately owned company rid itself of a considerable financial burden in early 1981 by killing 10 of 12 suburban Milwaukee weeklies in January. John Rickert, general manager, said the company believed it didn't make sense for the papers to continue because they were competing against strong dailies and weeklies in many of the communities.

In May, the company sold the remaining two papers to Hutchinson Publications of West Allis, Wis. The papers were losing approximately $800,000 a year.

"It has certainly helped the outlook for our newspaper division and it is one of the reasons the third quarter looked very strong for our papers," said Roy Valitchka, the company's marketing director. "They were the only weak performers we had."

Post added five new weeklies to bring its total of Cleveland-area papers to 17. They serve 66 communities in the area. With the exception of the unprofitable Milwaukee chain that was dropped, Post papers worked from a solid financial base in 1981.

In addition to the Cleveland-area publications, Post holds papers in the Boston and St. Louis areas, as well as the company flagship, the *Appleton Post-Crescent*. Ad revenues for the Appleton daily are up this year, said Mr. Valitchka.

Although newspapers form the base of Post Corp.'s operation, the company has continued to expand in broadcasting. Because of the economy and a softness in local spot sales, ad revenues for the five television stations were lower than anticipated.

The only major format changes for any of the tv stations came at WEAU in Eau Claire, Wis. and at KLUK in Green Bay. Both moved from a 30-minute local evening newscast to a one-hour news magazine format that wraps around the national network newscast.

■ The move was seen to give a competitive edge to WLUK, which is in a highly competitive market. In Eau Claire, WEAU competes with one of the largest and most established cable tv-wired areas in the country. Cable in Eau Claire got its start years ago because the terrain doesn't allow traditional antenna reception. The regular tv stations are transmitted via cable.

Post has not yet entered the cable arena, but it is examining the possibility of acquiring a system. It has applied for low-power television licensing from the Federal Communications Commissions, which may be a first step toward becoming involved in cable.

"We want to think carefully about cable and how best we can use our knowledge of the news business," said Mr. Valitchka. "We don't want to be doing rolling video text on a screen. If we get into cable, we want to have something worthwhile to offer."

Not just a question of vanity

"I didn't want to be a publisher of anything, but this was the most exciting idea I've heard in years," says Joseph E. Corr Jr. So he chucked his marketing vice presidency at Heublein and on Sept. 1 officially became the leader of the proposed revival of a magazine-industry legend: *Vanity Fair*.

The showcase of literary talent that expired in 1936 is scheduled to reappear in early 1983. Times are ripe for a literary renaissance, Mr. Corr says. He feels a "new elite" of affluent, educated and widely dispersed readers emerged in the 1970s and will support the new *Vanity Fair* as they are such magazines as *Architectural Digest* and *Town & Country*.

The new magazine will feature great writers, Mr. Corr says, just as its venerable namesake did with the likes of Robert Benchley and Dorothy Parker. The new *Vanity Fair* will discover unkown writing talent; it will offer the work of the very best magazine designers, illustrators and cartoonists; it will encompass everything from sports to satire. Mr. Corr anticipates first-issue circulation of 250,000, and an abundance of upscale advertisers offering "super-premium products" such as crystal and luxury cars.

Despite his marketing and promotion background—he was manager of sales and promotion for *Life* from 1968 to 1971 and as president of Time Distribution Services was responsible for introducing *People* to the nation's newsstands—Mr. Corr plans a low-key promotion for *Vanity Fair*, one that he says will rely heavily on word-of-mouth.

JOSEPH CORR

Providence Journal Co.

The Providence Journal Co., Providence, R.I., is the nation's 63rd largest media company, with estimated revenues from media operations in 1980 of $117,009,000 or 71% of its estimated total revenues of $162,800,000.

The privately held company publishes three newspapers and is expanding into other media businesses.

Circulation of the dailies—the morning *Providence Journal* and the *Evening Bulletin*—total 219,000. In other words, when considered together, the two papers are second only to the *Boston Globe* in circulation size in the New England daily market. The Sunday *Journal*'s 233,813 circulation places it fourth in the region.

The Sunday publication continues to make circulation gains in what some consider an economically weak part of the country.

The newspapers recently initiated customized research for advertisers, including delivery of preprints into demographically determined specific locales. A number of national advertisers, backed by the papers' research facilities, use the editions for testing newspaper ads.

■ The *Journal* and *Bulletin*, three-time winners of Pulitzer Prizes, employ a large news staff out of its Providence facilities, 12 regional offices and a Washington bureau.

A subsidiary, Providence Journal Broadcasting, operates the all-news WEAN (am) in Providence. The station employs the largest broadcasting news staff of any radio or tv station in southern New England and has a score of news awards to its credit. In addition, the company owns a contemporary music fm station in the Providence area.

The broadcasting unit's lone tv station, the independent WPHL-TV, Philadelphia, has broadcast rights to the Philadelphia Phillies baseball games and also is said to devote considerable time to public affairs programing. The station reportedly operates the largest commercial production facility in the market.

Less than a dozen years ago, the Journal Co. entered the burgeoning cable tv field with the establishment of Colony Communications, which serves more than 120,000 subscribers in systems in New England, Florida and Pennsylvania.

Colony's special services are expanding to include fire and medical alert systems, data and information retrieval, utility and meter reading and energy management. Community affairs efforts have resulted in a recent presentation of a National Cable TV award to Colony's New Bedford, Mass., system for creation of a channel devoted to Portuguese programing.

Colony also operates an over-the-air pay television unit, Multipoint Distribution Service (MDS) in Boston, Springfield and Providence, and transmits Home Box Office programs over the system to more than 15,000 households.

Colony's most recent personnel change in its upper ranks was the hiring of Roger R. Turner from Park Broadcasting to assume the post of vp-director of operations.

Michael P. Metcalf, publisher and chief operating officer of the corporation, says: "The Journal Co. is committed to maintaining and building upon its reputation as the information center and as a major advertising medium for southeastern New England, while simultaneously developing its base in the print and electronic media on a regional and national level."

Providence Gravure.

Pulitzer Publishing Co.

Pulitzer Publishing Co., St. Louis, is the country's 38th largest media company, with estimated 1980 revenues from media properties of $190,500,000. The St. Louis company is privately owned with the majority of stock held by the Pulitzer family.

The *St. Louis Post-Dispatch*, Pulitzer's flagship newspaper and largest revenue producer, has been losing money for more than three years. The company says that should change by 1983.

Pulitzer's other holdings, including the *Arizona Daily Star* in Tucson, a radio station and five vhf tv stations, are said to be in fairly good financial shape.

Although Pulitzer has been the dominant name in St. Louis media for more than 100 years, the company seems determined to lessen its dependence on that old industrial city and to position itself in smaller markets in the middle of the Sunbelt.

Two years ago it traded its local radio station for one in Phoenix. Earlier this year it agreed in principle to swap its St. Louis tv station, KSDK-TV, for two Multimedia Inc. Sunbelt stations and cash.

In the deal—which still must receive FCC approval—Multimedia will give Pulitzer WFBC-TV in Greenville, S.C., WXII in Winston-Salem, N.C., and $8,500,000. All three stations are NBC affiliates.

The cash will give Pulitzer several investment options, including the purchase of a uhf tv station or other newspaper properties. "Magazines, cable, print and broadcast media all would be considered," said Nicholas Penniman, Pulitzer assistant general manager.

Pulitzer is looking for a niche in the cable market as a producer of software and has formed a subsidiary, Pulitzer Productions, to experiment with electronic information dissemination. The company's move into this field is strictly exploratory. "We're cautious," Mr. Penniman said, "because others who have gone into it are not as optimistic as they once were."

In 1979, under the federal Newspaper Preservation Act of 1970, the *Post-Dispatch*, an afternoon paper, and Newhouse Newspapers' morning *Globe-Democrat* merged all operating functions except editorial. The two now split profits and losses equally.

■ Although both dailies are losing money, Pulitzer's newspaper is clearly the dominant entity. The *Post-Dispatch* controls the operating agency and has 1,600 editorial, business and printing employes. It also owns the presses. The *Globe-Democrat* has only 200 employes, all in editorial, operates from rented quarters and is printed on contract by the *Post*.

Local observers speculate that Newhouse eventually will give up on St. Louis and leave Pulitzer with a market monopoly. Another possibility is a Pulitzer takeover of the *Globe-Democrat*.

During labor negotiations last summer, auditors revealed that the joint operating agency had lost more than $11,000,000 during the three-year period ending in 1980. Agency revenues during those years reportedly totaled slightly more than $300,000,000.

■ The losses, along with the sobering effect of the *Washington Star*'s death, persuaded most of the papers' unions to agree to an 18-month moratorium on wage increases. If all accept the wage freeze, it will give the *Post-Dispatch* a chance to get its house in order and take advantage of an expected upturn in the economy, Mr. Penniman said.

He said the *Post-Dispatch* is "leaner" and better managed than it was a few years ago. He pointed to empty offices in the executive suite as evidence of the new austerity. He also noted that the composing room has less than one-third the number of employes it once had.

During 1982, the *Post-Dispatch* plans to initiate a blanket-coverage delivery system designed to put advertisers' supplements at every door in the metropolitan area. The supplements would be delivered with the newspaper to subscribers and alone to nonsubscribers.

The system will offer market segmentation and zoning options to advertisers, Mr. Penniman said.

The company hopes the system will help the dailies compete more effectively with the Suburban Newspapers of Greater St. Louis, a powerful free-weekly publisher that blankets most of the metro area, delivering to 800,000 households and offering retailers a wide range of zoning options. The suburban weeklies have grabbed a big share of the supermarket advertising away from the dailies.

Broadcasting: TELEVISION—KSDK-TV, St. Louis; WLNE-TV, Providence, R.I.; KETV, Omaha, Neb.; KOAT-TV, Albuquerque, N.M.; WGAL-TV, Lancaster, Pa. RADIO—KTAR (am), KBBC (fm), Phoenix.
Cable/video: Pulitzer Productions Inc.

RCA Corp.

RCA Corp., New York, the third largest media company, had revenues from total media operations, consisting of National Broadcasting Co.'s tv and radio networks and the owned radio and tv stations divisions, of just over $1.5 billion in 1980, when parent RCA Corp. topped $8 billion in revenues.

NBC was "on its way to a good year" in 1980 until the Carter Administration's boycott of the '80 Moscow Summer Olympics "shattered its earnings prospects," said Edgar Griffiths in his last annual report statement as RCA chairman. The Olympics situation caused a $33,700,000 loss, which with political campaign coverage pushed earnings down 29% as gross NBC sales rose 11% to a record level. Without that writeoff, NBC earnings would have surpassed the 1979 mark, he noted. In 1979, NBC contributed nearly $1.4 billion of RCA's total sales, which were about $7.5 billion.

NBC said the tv network finished the calendar 1980 year with its "best competitive [prime time ratings] position since 1972," thanks largely to the "Shogun" miniseries, the "Centennial" rerun and World Series '80 coverage, plus strong weekly series "Little House on the Prairie," "Real People" and "Diff'rent Strokes." Still, NBC wound up third, well before the full 1980-81 prime time season Nielsen ratings were tabulated.

RCA, in reporting $2 billion in third quarter '81 revenues and $5.9 billion for the year's first nine months, took a $150,000,000 after-taxes writedown, chiefly on NBC-TV programing and Hertz Corp. The write down, according to new RCA chairman (and former ARCO president) Thornton Bradshaw, was a form of "cleaning house," leaving the company with a $109,300,000 loss for the third 1981 quarter and a $9,000,000 nine-month loss. Thanks to this move, RCA expects a "modest" profit when '81 results are compiled.

The considerable NBC write off—estimated by some industry sources at just over $30,000,00—involves a batch of lackluster prime time series, miniseries and pilots. These shows, given virtually no chance of improving on their dismal Nielsens the first time out, are being "eaten" rather than repeated, sources said.

Mr. Bradshaw's selection of successful independent tv producer Grant Tinker (MTM Enterprises) to replace Fred Silverman as NBC chairman was generally welcomed inside and outside NBC as a promising sign.

Robert Mulholland, the NBC-TV Network president whom Mr. Tinker promoted to NBC president, also was widely praised, especially by affiliates.

The over-all picture at NBC heading into autumn '81 was not without several positive develop-

ments. Mr. Tinker saw the final fall schedule of the Silverman era as a promising one, but emphasized that he himself will not "play an active role in programing" at the network.

NBC Sports, besides boasting strong ratings for the 1980 World Series, the Rose Bowl and Wimbledon tennis, pointed out that its Sunday afternoon pro football ratings in fall '80 were "considerably larger" than in 1979. All told, NBC produced some 430 hours of 1980 sports coverage.

On the affiliate front, NBC-TV had 213 stations contracted at the end of 1980 and has since inched up to 215. In Saturday morning children's ratings, NBC this fall has been making its best showing in years, thanks to entries like "The Smurfs" and "Spider-Man."

Still, NBC is having more than its share of rating woes and sometimes it is hardest hit by circumstances beyond its control. Early in the fall '81 season, NBC continues to lag well behind its rivals in prime time, in part due to production delays created by last summer's writers' strike. NBC has seen such interim series as "The Flintstones," "Here's Boomer" and "Fitz & Bones" bomb in the Nielsens, while creative changes put Angie Dickinson's series out of the running for fall and into the mid-season. In November, NBC got more bad news when Rock Hudson's sudden heart surgery forced his series into hiatus until next year.

For the four weeks ended Nov. 1, NBC averaged a 15.3 rating and 24.1 share. That was 5.1 points behind No. 2 ABC in rating and 8 points behind ABC in audience share.

In news, for the five fall weeks through Oct. 30, NBC had a 12.1 homes rating and 23 share, compared to ABC's 12.3 and 23 score and CBS' 12.7 and 25. The Tom Brokaw/Roger Mudd anchor team takes over the NBC helm in April, when John Chancellor begins work on several prime time documentaries. In daytime, NBC has been a sluggish third, hampered by too many low-rated game shows and strong counter-programing by ABC and CBS. Even in late night ("Tonight") and early morning ("Today"), where NBC long went unchallenged, NBC has had quite a ratings fight on its hands, mainly with ABC.

■ Meanwhile, in radio, the NBC Radio Network boasted strong affiliations in such major markets as Philadelphia, Cleveland, Miami and St. Louis for a total of 311 outlets at year's end. Its eight owned am and fm stations attained their "highest audience ratings" in their history, NBC radio execs boasted. In addition, the young adult-appeal Source network has now attracted 163 affiliates. The Source is not only one of several recently started radio networks, but also may be the first of several new satellited NBC networks.

As Mr. Bradshaw said, primarily regarding NBC's status, after he took the RCA position, "Obviously, in the broadcast business or any business, results are what counts. One always asks how long a person gets to win a ball game. Sometimes in broadcasting, judgments are made too soon."

Looking ahead, NBC hopes to hold onto its recently signed $180,000,000 college football tv contract covering 1982 through '85. Completion of that College Football Assn. deal has been tied up in the courts because of opposition from the National Collegiate Athletic Assn. NBC would have 61 of the top 81 college grid teams the CFA lured from the NCAA. NBC also had to spend big—$11,000,000 a year for the three years ending in 1984—because CBS forced the bidding up on the Rose Bowl.

REESE SCHONFELD

This is more fun than the law

Despite reports of monthly losses reaching $1,000,000, the Cable News Network—and the 24-hour news format—are going nowhere but up, says CNN president Reese Wolfe Schonfeld.

"By the second quarter of '82, we'll be showing a profit," says the lawyer-turned-newsman who joined Ted Turner in August, 1979 to head and help form the revolutionary CNN.

"This is natural growth. We started [June 1, 1980] with 1,700,000 [subscriber] homes, we now have nine and a half million homes, and we're growing by 12,000 to 15,000 homes per day," Mr. Schonfeld says.

What's more, CNN will introduce yet another 24-hour news service, CNN II, on Jan. 1. This headline service will cover "all the news in the world" in half-hour cycles, with six minutes per half hour allowed for local news. CNN II has the jump on its main competition, Westinghouse/ABC's Satellite News-Channel, scheduled for a spring 1982 start, Mr. Schonfeld notes.

Mr. Schonfeld, 50, was a Columbia University law student in 1956 when he opted for parttime work as a UPI Movietone copyboy rather than executive training at CBS Inc.; he says he figured news would be "a hell of a lot more fun." After earning his J.D. in 1960, he foresook the law to write, edit and produce for UPI TV News. In 1975 he founded the Independent Television News Assn., where Ted Turner found him in 1979.

As part of NBC's last major theatrical movie buy, totaling more than $77,000,000 for 15 films, mainly from Paramount Pictures, the network secured the rights in late 1980 to such features as "Urban Cowboy," "Meatballs," "Ordinary People" and "Airplane," stretching across several seasons.

Although NBC comprises RCA's media empire for now, the future may well find at least some of RCA's SelectaVision videocassettes and videodiscs carrying commercials. That, however, will take a while since consumer sales are not mass enough to make such approaches financially viable.

■ RCA is getting into the catv field via RCTV's Entertainment Channel, a joint venture with Arthur Taylor and Rockefeller Center. Herb Schlosser, RCA Cable Inc. president and also RCA Corp. exec vp, is handling RCA's involvement in this project, due for an early '82 startup as a pay cable service. RCTV, which is spending $50,000,000 to buy BBC tv programs for the cable service, will sell commercial time, but that is getting a lower priority than originally expected.

Another RCA operation indirectly affecting the media world is RCA Americom, whose Satcom satellites helped spark catv and pay cable's upsurge in recent years, starting with Ted Turner's Atlanta superstation and Time Inc.'s Home Box Office network.

MEDIA PROPERTIES
Broadcasting: TELEVISION—NBC-TV Network. Stations: KNBC-TV, Burbank, Cal.; WMAQ-TV, Chicago; WNBC-TV, New York; WKYC-TV, Cleveland; WRC-TV, Washington.
RADIO—NBC Radio Network; The Source. Stations: KNBR (am) and KYUU (fm), San Francisco; WMAQ (am) and WKQX (fm), Chicago; WNBC (am) and WYNY (fm), New York; WRC (am) and WKYS (fm), Washington.

Reader's Digest Assn.

Reader's Digest Assn., Pleasantville, N.Y., is the country's 25th largest media company, with estimated media property revenues of $270,000,000 in 1980, all from the U.S. edition of the *Reader's Digest*. The U.S. edition of the 60-year-old magazine accounted for about 25% of the company's total estimated revenues of $1.1 billion last year.

The company also generates revenues from foreign editions of the *Digest*, book publishing and mail order sales of records and other products.

While the *Digest* is perhaps unique in having thrived as a general-interest publication, its U.S. circulation has remained flat at about 18,000,000 in recent years, reinforcing the view of some magazine industry analysts that the *Digest* has reached its peak in the U.S. market. The company has been criticized in recent years for failing to use its powerful *Digest* base to market new magazines, but it steadfastly has insisted that as a privately owned company it was not compelled to pursue growth for growth's sake. "Mr. Wallace [DeWitt Wallace, founder of the magazine] always felt that if there was additional talent around it ought to be invested in making the *Digest* even better," Richard McLoughlin, *Digest* publisher, said.

As Mr. Wallace grew less active in the company in the late 1970s and John A. O'Hara, former director of the books and recorded music division, became chief executive in 1978, Digest Assn. followers began to detect a new, if gradually introduced, sense of change at the company.

In early 1979, the company sampled *Digest* readers for their thoughts on eight new magazine concepts. The upshot of that testing was *Families*, the company's first new magazine since the *Digest*. The premier issue appeared last fall with a solid 67 pages of paid advertising, and the magazine began regular monthly publication in October, 1981. It has continued to do well with both readers and advertisers, a Digest official said.

In an interview earlier this year, Edward T. Thompson, *Digest* editor-in-chief and a member of the company's three-man executive committee, said, "I'm sure you won't have to wait 60 years for the next new magazine" from the company. Publisher Mr. McLoughlin later confirmed that the other seven ideas tested in 1979, including such test titles as *Do-It-Yourself Digest*, *Money Digest* and *Sports Digest*, were serious proposals and that one or more of them eventually could become Digest magazines

The company reportedly will consider seriously only magazines with a potential circulation of at least 1,000,000. Its targeted circulation for *Families*, which started with a 500,000 circulation rate base, is 2,000,000, although company officials acknowledge that a circulation of as much as 5,000,000 is possible.

■ In another recent diversification, the company in late 1980 acquired 51% of The Source, a computer software company that transmits data by telephone lines to subscribers with home computers. The Digest Assn. presumably will provide information from its vast storehouse—as well as expansion money—to The Source, but no specific plans have been announced.

Mr. Wallace, who with his wife started the *Digest* in a Greenwich Village basement and saw it grow to be the world's largest-circulation magazine, died last March at the age of 91. His widow, Lila, now controls all of the company's voting stock.

MEDIA PROPERTIES
Magazines: *Reader's Digest*, *Families*.

Rodale Press

Rodale Press, Emmaus, Pa., is the nation's 92nd largest media company, with revenues from media operations in the year ended July, 1981, of about $55,000,000, all from magazines and newsletters stressing health and individual self-sufficiency.

A book publishing division brought total revenues to about $85,000,000 last year. The company says its total revenues will top $98,000,000 in the current fiscal year.

The privately owned company publishes *Organic Gardening*, launched by the company's late founder, J.I.Rodale, in 1942 and still is increasing in circulation, which now stands at 1,300,000. Other Rodale publications include *Prevention*, the largest health magazine in the nation, with a circulation of 2,388,246 (estimated readership of more than 6,000,000); *Bicycling*, which this year increased its circulation 27.5% to 200,000; *New Shelter*, a home improvement publication that has doubled its circulation to 525,000 since its February, 1980, debut, and *New Farm*, which recently changed its editorial direction to appeal to all farmers without compromising the company's commitment to "organic" farming.

In addition, Rodale publishes "Executive Fitness" and "Body Bulletin," newsletters aimed at company execs and their employes. Rodale says the combined circulation for its magazines and newsletters is 5,000,000, up from 4,600,000 a year ago.

■ Earlier this year, Rodale's 14-year-old *Theatre Crafts*, the largest paid-circulation publication in its field, was sold to the magazine's editor, Patricia Mackay, and now is published in New York.

Rodale plans an April, 1982, debut for *Spring*, a women's service magazine designed primarily to reach those in the 20-to-40 age group who seek "high energy living." The pilot issue distributed earlier this year was well received, Rodale says.

Spring will start with a circulation base of 250,000. Newsstand sales, introduced in recent years after the company's longtime orientation toward mail order, will be used along with subscription solicitations.

Spring will abide by the Rodale policy that bans ads for liquor, cigarets, "junk foods" and other products that the company considers harmful. Emrika Padus, a *Prevention* editor, is executive editor of the new magazine.

Rodale's book division, under a new president, Richard Huttner, publishes 30 to 35 new titles annually and operates three book clubs. Book topics range from agriculture to fitness. In 1980, Rodale reported sales of 2,400,000 books, representing a 16% increase through the retail trade and a 20% rise in mail orders.

The company's electronic publishing division, has undertaken a new 13-part "Home Dynamics" series, which began airing on cable tv this fall.

Although J.I.Rodale met resistance at first in his bid to make Americans aware of natural type living through organic gardening and health prevention, the company, now headed by son Robert, is finding widespread acceptance of its ideas.

The company is trying to make even more Americans aware of Rodale through such recent actions as sponsorship of the American Lung Assn.'s antismoking campaign; opening of corporate advertising offices in New York, and a series of op-ed page public service ads in the *New York Times*. The *Times* ads were devoted to Rodale's Cornucopia Project, designed to develop strong food systems for this country.

Company officials expect Rodale to keep expanding. "We ended fiscal 1981 with a strong finishing kick, with net sales nearly 25% over last year," says Robert Teufel, president of Rodale Press and publisher of *New Shelter*. "We are entering new markets, expanding our newsstand base and gaining broader public awareness. With the continued vitality of *New Shelter* and with *Spring* waiting in the wings, next year promises to be even better."

MEDIA PROPERTIES:
Magazines: *Bicycling*; *New Farm*; *New Shelter*; *Organic Gardening*; *Prevention*; *Spring*.
Newsletters: "Body Bulletin"; "Executive Fitness."

Rollins Inc.

Rollins Inc., Atlanta, is the nation's 94th largest media company, with revenues of $54,700,000 in 1980 from media-related operations. The bulk of the company's total revenues of $400,100,000 for the year came from its termite and pest control and oil and gas services businesses.

For 1981, media operations are expected to reach $62,100,000 by the end of the year, giving this segment 13.7% of total projected company revenues of $454,600,000.

Although dominated by its termite business ($194,600,000 in revenues in 1981 vs. $182,600,000 in 1980) and oil and gas service ($147,100,000 vs. $95,700,000 in 1980), Rollins began as a media

company when founder O. Wayne Rollins, now chairman, opened up his first radio station in Radford, Va. Rollins eventually sold that property, but over the years has added three television stations, five am and one fm radio stations, an outdoor advertising business and cable operations in two states.

The media division is concentrating most of its efforts in cable expansion in the Northeast. Rollins is building systems in southeast Massachusetts and contiguous areas of Rhode Island, where it has won 16 franchises. The company has an additional 11 applications for franchises in Massachusetts.

■ Under the division name of Rollins CableVue, the company already operates systems in and around Bradford, Conn., and Wilmington, Del. Despite the heavy activity in catv, cable trails outdoor advertising and tv operations as the media group's breadwinners. Radio holds down the fourth and final slot. Revenues from radio, in fact, have been relatively flat the past few years, while outdoor, tv and cable have shown good increases, says a corporate official.

Rollins Outdoor Advertising has plants in Philadelphia, Washington, the Delmarva Peninsula (Delaware-Maryland), Wilmington, Del., and San Antonio, Corpus Christi, Victoria, Austin and Laredo, all in Texas.

Rollins, which went public in 1960, still has 40% of its stock in the hands of the Rollins family. The family has strongly influenced the company's meticulous approach to acquisitions by emphasizing potential rather than its performance.

For example, in its three tv markets—Charleston, W.Va.; Pensacola, Fla., and Plattsburgh, N.Y.—the company turned the single-market stations into dual market ones by merely moving the transmitter after making the purchases.

Says one corporate official, "Our philosophy with radio properties is to meet the single greatest unmet need in the community," which has translated into programing formats for the agricultural community, format for the black community, college community and, in the Chicago area, jazz buffs.

MEDIA PROPERTIES:
Broadcasting: Television—WCHS-TV, Charleston, W.Va.; WEAR-TV, Mobile, Ala./Pensacola Fla.; WPTZ-TV, Plattsburgh, N.Y. Radio—KDAY (am), Santa Monica/Los Angeles; WCHS (am), WBES (fm), Charleston, W.Va.; WBEE (am), Harvey/Chicago, Ill.; WRAP (am), Norfolk/Portsmouth, Va.; WAMS (am), Wilmington, Del.
Cable/video: Rollins CableVue in CONNECTICUT—(80% interest) Branford, Guilford, Madison, New Haven, North Branford, North Haven, Wallingford. DELAWARE—(100% interest) Elsmere, Newark, Newcastle, Newcastle County, Newport, Wilmington.

Schurz Communications

Schurz Communications, South Bend, Ind., is the nation's 95th largest media company, with revenues of $52,000,000 in 1980, all from media operations.

"The current year has been sluggish so we'll either be flat or down slightly. We would hope general business conditions improve and that we would grow with the economy," says chairman Franklin D. Schurz Jr.

The Schurz daily newspaper flagship is the *South Bend Tribune*; it also owns radio and television stations and cable tv operations. The Augusta, Ga., station, WAFT-TV, a uhf operation, is moving from the outskirts to the downtown area. Cable systems in Hagerstown, Md., and Coral Springs, Fla., will be revamped from 12-channel capacity to a larger number of channels.

"We're certainly taking a look at information systems [in tandem with newspapers] and we're talking with several cable operators," Mr. Schurz says.

"Our biggest problem has been the sluggish economy, which has caused some advertisers to leave the market," he adds. "We've had slight increases in newspaper circulation." Mr. Schurz says the company has no plans to enter the non-media business.

How a cable ties together disparate set of interests

KAY KOPLOVITZ

As an undergraduate at the University of Wisconsin in Madison, Kay Koplovitz had some seemingly disparate interests.

She studied cross-cultural communications—the ways that people from different cultures communicate verbally and nonverbally. She also majored in science, because she was fascinated with technology.

It was while she was working at a local educational tv station to help pay her way through school, she says, that "a lot of things came together." She discovered broadcasting.

She soon caught the attention of the Wisconsin Broadcasters Assn. and won its "Up-and-Coming Broadcaster of the Year" award. That led in turn to an internship at WTMJ-TV in Milwaukee. Then she went to graduate school at Michigan State University, where she continued to bridge disciplines with intellectual connections: Her master's thesis was on "the political ramifications of international satellite communications."

She has spent much of her career since then proving the accuracy of that early broadcasting award, and winning accolades like "the most powerful woman in cable." Today, at 36, she is president and chief exec of USA Network, the fast-growing advertising-supported cable tv network that is expected to gross $12,000,000 or more from advertising this year. USA Network is 50% owned by Time Inc., which recently acquired its interest from UA-Columbia Cablevision; the other half is owned by the Paramount Pictures Corp. subsidiary of Gulf & Western.

USA Network now reaches 9,000,000 homes, Mrs. Koplovitz says. She predicts rapid expansion to penetrate the present 13,000,000 cable-wired homes not on the network. Furthermore, she says, the company's goal is making USA Network, "the most-viewed network in the U.S." by the end of the decade.

■ Mrs. Koplovitz joined UA-Columbia in 1973, where she became a vp in charge of programing for Madison Square Gardens Sports, the predecessor of USA Network. In 1978, she moved the programing beyond sports by introducing Calliope, a children's program. By April 1980 she had the top job at USA Network.

Last May, USA Network began offering "You!" magazine, the first cable programing aimed at women. That was soon followed by "Better Homes & Gardens' Idea Notebook" and "Alive & Well," two more programs tailored for the female audience.

"Sports is still our front card," says Mrs. Koplovitz, noting that USA Network has most major sports leagues under contract and carries top-rated professional and amateur sporting events from around the world to all 50 states. In October, USA Network began offering the Scholastic Sports Academy, aimed at teens and pre-teens and hosted by Hubie Brown, former coach of the Atlanta Hawks professional basketball team. All the commercial time for the show has been bought for the forseeable future by Kellogg Co.

Mrs. Koplovitz comes by her interest in sports naturally, having speed skated competitively as a kid in her home state of Wisconsin. She continues to enjoy tennis, skiing and hiking. She's also interested in the environment; she's no crusader, she says, but she does want to see wilderness areas preserved. "Once it's gone, it's gone," she says.

■ Mrs. Koplovitz also seems to have a natural affinity for reaching the 15 to 34-year-old audience that standard broadcasting finds so "elusive." One of her most intriguing innovations was Nightflight, a late-evening package of cult films, rock music and entertainment news. "Nightflight," which premiered in June, is making "remarkable strides," she claims. One viewer, a 30-year-old tv sportscaster from Green Bay, Wis., wrote Mrs. Koplovitz that he wasn't "a crazy teen ager" who doesn't know what he wants, but that he always hurries home from his station to catch "Nightlife.

"Nightflight," a joint venture with ATI Video of New York, will offer its audience a special treat come New Year's Eve—a Rolling Stones feature that Mrs. Koplovitz calls "USA's answer to Guy Lombardo."

Still ahead for USA Network, which went to 24-hour programing in October: A new information and entertainment program for women (perhaps to meet the new competition from the planned "Daytime" program of Hearst/ABC Video), set to begin in March or April. It will feature "lots of personalities," Mrs. Koplovitz says.

E.W. Scripps Co.

E.W. Scripps Co., Cincinnati, is the 15th largest U.S. media company, with estimated revenues of $515,300,000 in 1980, all from media operations.

The privately held company is owned largely by the Scripps Family Trust. The company has some 40 subsidiaries, including Scripps-Howard newspapers, of which the *Pittsburgh Press* is the largest, but the *Rocky Mountain News* in booming Denver is the fastest growing.

In addition to daily newspapers, the company has among its holdings community weekly newspapers, area business publications, United Press International (UPI) wire service and United Media Enterprises feature services.

The company owns about 75% of the stock of Scripps-Howard Broadcasting Co., Cleveland. Stock of Scripps-Howard Broadcasting is traded publicly and the company is treated as a separate entity in Advertising Age's listing.

Edward W. Estlow, president and chief exec of E.W. Scripps, said the company intends to look for continued opportunities in print and electronics. "Our goal is to add publications according to high reader interest and opportunity, including dailies, weeklies and special interest publications." He noted that the company's broadcast and cable tv holdings also have been expanding.

Scripps-Howard jumped into area business publishing in February, 1980, with the acquisitions of Cordovan Corp., Houston, which had four regional business weeklies—a field it's credited with starting—and four monthly magazines at the time of acquisition. In the midst of an expansion when acquired, Cordovan now has 10 business weeklies, including *Dallas-Fort Worth Business*, acquired in 1980, and *Pittsburgh Business Journal*, acquired last August.

■ The 10 Cordovan business weeklies have a total circulation of approximately 100,000. Bob Gray, vp and general manager, said that "over a period of time" he sees the company adding more business papers either by startup or acquisition. In 1981, discussions aimed at acquiring *Washington Business Review* were discontinued.

As losses by United Press International reportedly mounted to over $7,000,000 in 1980, E. W. Scripps let it be known that it wanted to modify the ownership of the nation's second largest press service. Reuters News Service is known to have shown some interest, but Mr. Estlow said "discussions are continuing with several organizations." UPI, which dates back to 1907 when E.W.Scripps founded United Press, has been 95%-owned by Scripps Co. and 5% owned by the Hearst Corp. since 1958, when Hearst's International News Service merged with UP. UPI's losses have continued this year. *Editor & Publisher*, citing industry sources, reported UPI is expected to lose $8,000,000 this year, on revenue's projected to around $90,000,000.

Despite its losses, UPI has expanded, opening a $10,000,000 computer and technical center in Dallas last year to serve as the center for all UPI communications and to provide research, development and manufacturing for specialized equipment, including Unifax II, a high quality picture receiver that led to a new UPI service providing weather satellite photos.

■ UPI also opened new $3,000,000 headquarters in New York this year equipped with newly developed computerized, digital photo editing and transmission equipment.

With UPI's news, audio and stocks services now on satellite, about 600 users have contracted for receiving dishes. About 100 are already in place and the goal is to have most operating by 1983.

UPI this year joined a teletext experiment with KNXT and KCET, Los Angeles, and it has been experimenting with supplying information for computer-accessed data bank ventures by Mead Corp. and Reader's Digest Assn.'s The Source, among others.

The Scripps-Howard lineup of daily newspapers was reduced by one, to a total of 16, with the sale in

1980 of the ailing *Cleveland Press* to industrialist Joseph Cole for a price believed to be in excess of $10,000,000. Of the remaining dailies, five are morning papers with a combined average daily circulation of 722,449; eleven of the 16 properties, six have Sunday papers with a combined average circulation of 1,559,272.

In Denver last year the *Rocky Mountain News*, for the first time in modern history, moved ahead of the *Denver Post* in weekday circulation figures and a longstanding rivalry heated up when the *Post* was acquired by Times Mirror Co. This year, the *Post* launched a daily early morning newsstand edition in September.

In the first year under Times Mirror ownership, the *Post* circulation went from 260,000 to 276,000 daily, and from 351,149 to 357,157 Sundays.

During the same period, however, Scripps-Howard's *News* boosted circulation from 271,153 to 288,410 daily, and from 293,004 to 306,627 Sundays. In one of the more unusual results of the intense competition, Times-Mirror hired private detectives to investigate circulation practices of the *News*.

The Scripps lineup of weekly newspapers grew to 27 with a combined circulation of 382,159 in October of this year with the addition of the *Brea Advocate, La Habra Advocate, Placentia Journal, Yorba Linda Journal* and *Anaheim Hills Journal*, all in Orange County, Cal. The five new weeklies have a combined circulation of 70,517. E.W. Scripps also publishes weeklies in Florida and Kentucky.

OTHER OPERATIONS:
United Press International wire and broadcast services. UPI is a partner with Independent Television News, London, in UPITN, worldwide tv film service and also is a partner with Knight-Ridder's Commodity News Service in UNICOM, international financial and commodities news wire available in Europe, Asia and Latin America. Also, United Media Enterprises, parent company of United Features Syndicate and Newspaper Enterprise Assn. news features syndicates. Subsidiaries of United Features include TV Data Inc. and TV Watch. Tele-log is a division of NEA. Berkley-Small Inc., Mobile, Ala., circulation supply company. SCW, Berkley, advertising art and feature service. Scripps-Howard Supply, purchasing company.

Scripps-Howard Broadcasting Co.

Scripps-Howard Broadcasting Co., Cleveland, is the nation's 76th largest media company, with revenues of $76,991,679 in 1980, up 10% from 1979. Net income was $16,460,580 in 1980, up 3%.

Television broadcasting services contributed 93% of the publicly owned company's total revenues in 1980, down from 95% in 1979. Due to the company's growth in other areas, the percentage will continue to drop in 1981, although television will remain the undisputed leading contributor to company sales.

For the nine months ending Sept. 30, company revenues were $61,739,000, up from $54,495,000 for the same period in 1980. Net income for the first nine months was $12,448,000, up from $11,301,000 for the same period in 1980.

The company attributed its "modest increase" in operating revenues in 1980 to "the uncertain economic conditions which existed throughout the year." An increase of only 7% in 1979 was attributed to "a softness in national spot revenue throughout the Midwest."

The broadcasting company, which began in 1935 with a Cincinnati radio station (no longer part of it operations), became a public company in 1963 and today remains the only public subsidiary of E.W. Scripps Co. (See separate AA listing.) Scripps-Howard Broadcasting Co. is 75% owned by E.W. Scripps Co.In December, the company will dedicate a 44,000-sq.ft. office and studio facility for KBMA-TV, Kansas City, Mo. Construction of the multi-million-dollar building began in 1980.

During 1980 Scripps-Howard Broadcasting spent $7,605,000 to acquire radio stations WBSB (fm), Baltimore, a contemporary music station, and KMEO (am,fm), Phoenix, which uses a "beautiful music" format. This year the company acquired KUPL (am,fm), Portland, Ore., from Tracy Broadcasting Co. for $4,750,000.
With the latest additions, the company has six tv stations, four am and four fm stations. The Federal Communications Commission allows a company to hold seven of each.

Is Scripps-Howard looking for more? "Yes," said Donald L. Perris, president. "We plan to fill out our television [allotment] and we will have some more radio. I don't know if we'll ever actually get up to 14, but we will definitely have a few more fm stations in the near future.

"We are also concentrating now on our cable operation. When it all gets built, our interest in various systems will bring us up to about 80,000 subscribers, and we hope to go on past that," Mr. Perris said.

As part of its rapid expansion in cable, the company established a subsidiary, Scripps-Howard Cable Services Inc., Wellesley, Mass., early this year.

Cable systems developer Richard W. Loftus, formerly president and owner of AM-Video Corp., Boston, was named president of Scripps-Howard Cable Services. Mr. Loftus sold his company to Prime Cable, another multiple cable-system operator.

The company took its first step into cable in April, 1980, when it became a partner with Daniels & Associates, Denver, in a cable system serving Ann Arbor, Mich. Since then the company has acquired a system serving De Bary, Fla., and has joined in a franchise with Mickleson Media for a system currently under construction in Tulare County, Cal. The company, in participation with the *Chicago Tribune* and Continental Cabelvision, has been awarded a franchise for a system to serve Springfield, Mass. In November, the company acquired a group of systems serving seven communities in Lake County, Fla.

In July, Cablevision of Connecticut, a partnership in which Scripps-Howard Broadcasting is a participant, was awarded the franchise for southern Fairfield County, Conn., an area that includes 10 lucrative New York City "bedroom communicommunities," such as Norwalk, Westport and Stamford. Four competing applicants for the franchise have gone to court to appeal the award by Connecticut's Division of Public Utility Control. If the award is allowed to stand, Charles Dolan, the head of Cablevision, will serve as managing partner. Scripps-Howard will run only the news operations within the system..

In addition to its regular broadcast and cable interests, Scripps-Howard Broadcasting is an investor in Cylix Communications Network, Memphis, a national high-speed data transmission company utilized by business.

In a Scripps-Howard Broadcasting staff shift this year William F. Brooks, formerly assistant general manager, became general manager of WPTV, West Palm Beach, Fla., the company's fastest growing tv station. He succeeded Robert R. Regabuto, who became general manager of the company's WCPO in Cincinnati. Robert D. Gordon, who had headed WCPO, left the company to become president of Western Broadcasting Co.

MEDIA PROPERTIES:
Broadcasting: TELEVISION—WPTV-TV, West Palm Beach; KBMA-TV, Kansas City, Mo.; WCPO-TV, Cincinnati; WEWS, Cleveland; KJRH-TV, Tulsa; WMC-TV, Memphis. RADIO—KMEO (am,fm), Phoenix; WBSB (fm), Baltimore; WNOX (am), Knoxville, Tenn.; WMC (am,fm), KUPL (am,fm), Portland, Ore.
Cable/video: Scripps-Howard Cablevision Corp., a limited partner in Ann Arbor Cablevision, serving Ann Arbor, Mich. Scripps-Howard Cable Services Co., with T and W Cable Co. serving De Bary, Fla., and the Lake County, Fla., franchise serving Leesburg, Fla.

Seattle Times Co.

The Seattle Times Co., which owns the daily *Seattle Times*, and *Walla Walla* (Wash.) *Union-Bulletin*, is the country's 70th largest media company, with revenues last year of about $93,500,000, all in media.Its revenues have more than doubled in the last five years.

Partly because of the costs of starting a morning edition last year, the company's 1980 earnings fell 17% to $2,900,000 from the record $3,500,000 earned in 1979.

The company is controlled by Seattle's Blethen family, which owns 51.5% of the voting stock. Knight-Ridder Newspapers holds 49.5% of the voting stock and 65% of the nonvoting stock.

The *Times* has dramatically outdistanced its daily competitor, Hearst Corp.'s *Post-Intelligencer*, in revenue, profit, advertising and circulation. An afternoon paper that became an all-day publication in February, 1980, the *Times* agreed to a joint operating agreement with the rival *P-I* last January under the 1970 Newspaper Preservation Act.

Under the agreement, which still requires U.S. Department of Justice approval, the two newspapers would pool their business production and distribution operations but keep their news operations separate. The *Times* would receive 6% of the joint operation's profits as a management fee; of the remaining profits, the *Times* would get 66% and the *P-I* 34%.

The *P-I*, which has incurred yearly losses since 1969, stands to make as much as $1,800,000 in 1982 under the joint operating agreement. The paper's projected loss this year is $2,259,100. The *Times* expects its highest profits ever under the agreement, which would permit dropping the morning edition launched last year to compete with the *P-I*.

The *Times* says it expects to hire "a significant number of noneditorial *P-I* employes, but a net reduction of newspaper employes in Seattle is inevitable if the agreement is adopted."

Opposition to the merger has been strongest from local retailers and other advertisers who fear that a joint operation would result in a single advertising rate covering the placing of an ad in both papers. Advertisers say such a situation would make it economically unattractive to place an ad in just one newspaper. All rates will be set by the *Times*.

David Brewster, publisher of a Seattle weekly and head of POINT (People Opposed To a 1-Newspaper Town), contends that a merger "would cost jobs, cause advertising rates to skyrocket, strangle other editorial voices, and impoverish the journalistic and intellectual life of the region. . . ."

The merger remains in abeyance, pending Justice Department action.

MEDIA OPERATIONS:
Newspapers: *Seattle Times; Walla Walla* (Wash.) *Union-Bulletin.*

Southern Progress Corp.

Southern Progress Corp., Birmingham, Ala., is the country's 87th largest media company, with estimated 1980 media property revenues of more than $61,000,000.

Formerly the Progressive Farmer Co., the privately owned company enjoyed its 16th consecutive year of increased sales and profits in 1980. "All of our divisions are now profitable, and we intend to double in revenues within the next five years," said Emory O. Cunningham, president.

Primarily a publisher of magazines directed toward audiences in southern states (principally the Carolinas, Virginia, Texas, Oklahoma, Kentucky and Tennessee), Southern Progress publishes three regional magazines: *Progressive Farmer, Southern Living* and *Delta Report*. It also has one regional trade publication, *Southern Supermarketing*, and one national magazine, *Decorating and Craft Ideas* acquired in 1975 from the Tandy Corp.

Oxmoor House, the book publishing division of the company, published 13 titles of general interest to southern readers in 1980.

Southern Progress recently diversified into a variety of areas related to its publishing endeavors: Agresponse, a direct-mail agricultural marketing company; Akra Data, a computer center for magazines and books; Publishers Services division, providing computer typesetting for the company's various publications; Progressive Farmer Insurance, and Sunland Plans, a fund-raising program for schools and clubs.

The company's only broadcasting venture is the Progressive Farmer Radio Network, based in Starkville, Miss., and serving approximately 50 stations throughout the South. The corporation does occasional tv broadcasting of its "Southern Living Cooking School" classes but has not divulged plans for any further involvement in broadcasting.

MEDIA PROPERTIES:
Magazines: *Progressive Farmer; Southern Living; Delta Report; Southern Supermarketing; Decorating and Craft Ideas.*
Broadcasting: Progressive Farmer Radio Network.

OTHER OPERATIONS:
Agresponse; Akra Data; Publishers Service division; Progressive Farmer Insurance; Sunland Plans; Oxmoor House book publishing.

Stauffer Communications

Stauffer Communications, Topeka, Kan., is the country's 90th largest media company, with media property revenues of $55,600,000 in 1980, or 92% of total revenues of $60,400,000.

Newspapers generated 76% of media revenues and 70% of total revenues. Net profits last year were $3,800,000.

Stanley H. Stauffer, president of the publicly held company, said Stauffer's 1981 objectives "are to increase revenues by 15% and net income by 17%. The strategy to reach these figures is to increase revenues and profitability of our existing units by expanding products and services, and then fill revenue and profit gaps by making at least one media acquisition."

When only the best will do.

Specializing in Media, Account Management, Traffic, Advertising/ Sales Promotion. We'll make your search easy and successful.

Contact Karen Katz, VP
Director of Advertising Services

Forum Personnel Inc.

Stauffer has two media acquisitions pending but has not disclosed whether these will be in publishing or broadcasting.

■ The company publishes the *Topeka Capital-Journal*, an all-day paper formed in 1980 out of the morning *Capital* and the afternoon *State Journal*. The paper has a Sunday edition, as well.

Stauffer also publishes 18 other newspapers in Arkansas, Kansas, Michigan, Missouri, Colorado, Nebraska and South Dakota. Its *Capper's Weekly* is the third largest newspaper in circulation in the six-state midwest region consisting of Iowa, Kansas, Missouri, Nebraska, Colorado and Oklahoma.

Other principal newspaper holdings are the *Grand Island* (Neb.) *Independent*, the *Holland* (Mich.) *Sentinel*, and the *Shawnee* (Okla.) *News-Star*.

Stauffer operates two television stations in Topeka and Santa Maria-Santa Barbara, Cal., and nine radio stations—six am and three fm—in Phoenix, Des Moines, Amarillo, Topeka, Shawnee and Springfield, Mo. The company also controls 50% of Total Television, a cable station in Amarillo.

MEDIA PROPERTIES:
Newspapers: COLORADO—*Glenwood Springs Post*. KANSAS—*Arkansas City Traveler, Newton Kansan, Pittsburg Morning Sun, Topeka Capital-Journal*. MICHIGAN—*Hillsdale Daily News, Holland Sentinel* MISSOURI—*Blue Springs Examiner, Hannibal Courier Post, Independence Examiner, Marshall Democrat News, Maryville Forum, Nevada Daily Mail* NEBRASKA—*Beatrice Sun, Grand Island Independent, York Daily News-Times*. OKLAHOMA—*Shawnee News-Star*. SOUTH DAKOTA—*Brookings Register, Yankton Daily Press & Dakotan*. Also *Capper's Weekly*, distributed in six-state Midwest region.
Broadcast: TELEVISION—KCOY-TV, Santa Maria/Santa Barbara, Cal.; WIBW-TV, Topeka. RADIO—KARZ (am), Phoenix; KRNT (am), KRNQ (fm) Des Moines, Ia.; WIBW-AM-FM, Topeka; KGBX (am), Springfield, Mo.; KGFF (am) Shawnee, Okla.; KGNC-AM—FM, Amarillo; Kansas City Royals Baseball Radio Network.
Cable/video: Total Television of Amarillo (50% interest), serving Amarillo, Tex.

OTHER OPERATIONS:
Capper's Insurance Service, computer software.

Storer Broadcasting Co.

Storer Broadcasting Co., Miami Beach, Fla., is the 36th largest U.S. media company, with revenues of $197,068,000 in 1980, all from media operations.

Some good news in the p.m.

BY B.G. YOVOVICH

Everyone has heard the "bad news" part of the afternoon newspaper story: The demise of such major metro dailies as the *Washington Star* and the *Chicago Daily News*, and the problems facing p.m. papers in such cities as Los Angeles, Philadelphia and Boston.

The "good news" about afternoon papers has received much less attention, but there is some. For example:

- In Houston, the *Chronicle*, an afternoon paper that has shifted to "all-day" publication, has been improving its competitive standing *vis-a-vis* its a.m. competition. Today, the *Chronicle* leads the morning *Post* in circulation and far outstrips it in advertising linage market share, 58% to 42%.
- In Seattle, it is not the p.m. paper but the morning *Post-Intelligencer* that is in trouble. Trailing in circulation and losing ad linage market share, the *Post-Intelligencer* reportedly has lost more than $14,000,000 since its last profitable year in 1968, compared with the consistent profitability of the *Times*, the *Post-Intelligencer's* formerly p.m. and now all-day competition.
- In Baltimore, the two afternoon dailies continue to account for a total of nearly two-thirds of the daily circulation.
- In Dallas, Denver and Detroit, afternoon papers continue to prove formidable foes to their a.m. rivals.

How have such p.m. papers managed to buck the trend and remain competitive and even prosperous? To answer that, it's helpful to look at the problems facing the afternoon paper generally. Probably the most significant problem for p.m. dailies in major metro markets has been the post-World War II movement of middle-class families from the central city to outlying suburbs, a migration that hurt p.m. papers more than their a.m. counterparts.

"Morning papers have all night to distribute their papers, so traditionally they have circulated over a wider geographical area," explains Leo Bogart, exec vp of the Newspaper Advertising Bureau and author of "Press and Public," a recently published study of the newspaper industry. "Morning papers' circulation traditionally has covered more of an ADI (Area of Dominant Influence)-type area, and, as department stores [and retail chains] have moved into suburban areas, they have been more interested in ADI-type distribution.

"Also, the change in the composition of the central cities, with a higher proportion of blacks and Hispanics with lower incomes and lesser reading skills," made the inner city areas "less attractive for advertisers, Mr. Bogart adds."

Those p.m. papers that tried to widen their distribution and follow their readers to the suburbs, however, ran afoul of another change in American society: Growing reliance on the automobile.

"The number of autos in the U.S. has increased almost two and a half times as fast as the nation's population," points out Mr. Bogart, and the p.m. papers' delivery trucks found themselves ensnarled in increasingly congested afternoon rush-hour traffic.

Afternoon papers also weren't helped by changes in the patterns of news coverage, as television evening news rose in importance.

"Think of the way the world works now," says Lee Guittar, publisher of the afternoon *Denver Post*. For example, "the President rarely gives a news conference in the morning any more, and most sporting events are played at night now," making coverage of such events more difficult for p.m. papers.

A change in advertising media strategies also has contributed to the demise of some major p.m. papers. Rather than split their advertising evenly among the metro dailies, advertisers have increasingly run ads in only one metro daily paper and put the rest of their newspaper budgets into suburban papers that have sprung up in outlying areas. This approach has been extremely detrimental to papers that trailed significantly in circulation and ad linage market share, and, once a paper got too far behind in market share, a "tipping" phenomenon occurred that helped the stronger metro daily move to a position of overwhelming dominance in the market.

■ Generally, it has been p.m. papers like the *Washington Star* and the *Chicago Daily News* that have had smaller circulations and that have suffered from "tipping", but a few morning papers have been victims as well.

Media experts point to Seattle as a classic example of a market in which the traditionally dominant evening paper has succeeded in tipping its morning competion into financial trouble. As a result, the morning *Post-Intelligencer* has petitioned the Justice Department for permission to go into joint operation with the now all-day *Times*.

One final factor has pushed readers to a.m. papers: The shift in the U.S. labor force from blue-collar to white-collar jobs.

"Blue-collar workers and those that are employed in light manufacturing industries tend to start work earlier in the morning and to get home by three or four in the afternoon," says Mr. Guittar of the Denver Post. He says this makes them more likely to read a p.m. rather than an a.m. publication. In fact, publishers and media observers point to heavy concentrations of early-rising work forces as significant factors in the continued vitality of p.m. papers in such cities as Dallas, Buffalo, Baltimore and Detroit.

Blue-collar workers are not enough to keep a paper afloat, however, particularly given the continuing shift to white collar jobs in the U.S. The most common step taken by p.m. papers is to begin distribution of a.m. editions in an effort to attract executives and office workers in the morning. Morning editions also make it possible to reach outlying parts of the metro area that are virtually impossible to supply with afternoon editions.

The *Detroit News*, for example, began by moving its printing operations out of the city in 1973 to avoid strangulation by rush-(our traffic, and it installed an all-electronic newsroom to facilitate communications between its downtown newsroom and the outlying plant. The *News* has since begun an a.m. edition that is distributed outside Detroit proper, and just recently opened a new printing facility in Lansing. Linked by microwave transmitters to the Detroit-area facilities, the new plant is expected to further enhance the *News'* potential for" out-state," or non-Detroit, circulation growth of its a.m. edition.

■ "We couldn't have done it without the technological capabilities," says *News* editor William Giles. The *News* is the nation's largest circulating evening paper and enjoys a better than 60% to 40% lead in ad linage market share over the competing morning paper, the Free Press.

The p.m. papers in Denver, Dallas and Houston also have begun a.m. editions for distribution outside central city areas, but the rapid growth those cities have enjoyed has given the strategy a slightly different emphasis from the one in Detroit.

"We call it our 'Immigrant Marketing Plan'," says *Dallas Times-Herald* publisher Thomas R. McCartin. Since 1977, the previously p.m. paper gradually has been converting its suburban delivery from afternoon to morning editions, beginning the process in Dallas' fastest-growing, most predominantly white-collar suburbs.

"There are lots of people moving into areas like Dallas and Denver, and most of them are managerial, white-collar workers who are already established morning-paper people," explains Mr. Guittar. The *Times-Herald* strategy calls for its a.m. edition to capture these new readers rather than lose them to the competing morning *Dallas News*.

The Denver Post, a Times-Mirror Co. paper, as is the *Times-Herald*, is employing the same strategy with the morning *News*.

As part of this evolutionary process, the *Times-Herald* now offers home delivery of either a.m. or p.m. editions in all parts of the metro area, and it's likely that the *Denver Post* will follow suit in its market.

In Houston, the *Chronicle* began an a.m. edition two years ago that circulates outside the city and also began using outlying facilities to help its p.m. edition as well. For example, features and classified sections for the p.m. editions now are shipped to the outlying distribution centers along with the early morning papers and are inserted in the late-breaking news sections of the evening editions.

■ "This makes it possible for us to delay our p.m. deadline [on breaking news]," says *Chronicle* publisher Richard J.V. Johnson, "and helps us put out a better product."

The most innovative afternoon newspaper strategies may turn out to be those currently under consideration at the *Baltimore Evening Sun*, sister paper to the morning *Sun*.

"We put together a team of people from all parts of the paper—advertising, circulation, editorial, research and production—on one committee and have had them take a look at those geographical areas that offer us the best prospects for success," says John "Reg" Murphy, publisher of both the *Sun* and the *Evening Sun*.

"The density of circulation is important, and we've identified specific Zip code clusters where we are going to concentrate our heaviest circulation efforts. We believe our best prospects lie in building dense circulation."

"The newspapers that have been most successful over the last 30 years are those that can deliver high-density audiences to local advertisers, dense audiences that television hasn't been able to deliver" agrees Stanford University economist and newspaper follower James Rosse. "The p.m. papers that are in the best shape are those with solid, dense local distribution. That's what they can sell to advertisers and what is best protected from other media."#

Trying to prove the experts wrong

BY CHARLES P. WINGIS

With the publishing landscape already littered with the remains of evening newspapers across the U.S., the *Los Angeles Herald Examiner* has been regarded as a sure bet to become another statistic in the escalating mortality rate. It was just a matter of time, the pundits said.

But the *Herald* may yet prove the "experts" wrong. Having weathered more than a decade of crippling labor disputes, declining circulation (down to 281,000 daily from its 1967 peak of 750,000, when it was the biggest p.m. paper in the country) and plummeting advertising revenues, the *Herald* appears to have stabilized and to be on the upswing. "After losing 30,000 copies [circulation] every year for the past 10 years we've finally stopped the hemorrhage," says Frank Dale, the paper's publisher.

It still may be too soon to call the *Herald Examiner* a clear survivor, but its willingness to try new approaches coupled with the bullish backing of its parent, Hearst Corp. may be giving it a better shot than some other p.m. papers have had.

Here, at any rate, is how one evening newspaper is attempting to defy the odds. To start with, in the process of trying to survive the *Herald* gradually has become something quite other than a "traditional p.m. newspaper." In fact, about 65% of its 180,000 copies daily circulation is now delivered in the morning, and the remaining 100,000 in the afternoon and evening, making the *Herald* a true "all-day" newspaper.

And if current testing of morning delivery to outlying suburbs continues to show positive results, there is the distinct possibility that, within the next several years, the *Herald* may become Los Angeles' second morning newspaper.

Mr. Dale sees this as being "perhaps years away." But if it does come to pass, the market's second newspaper will be thrust into and even more heated battle with its old rival, the *Los Angelese Times*.

Mr. Dale, who has been called a "worried man keeping up an enthusiastic front," admits the *Herald* is "not burning up the streets" of Los Angeles. But compared to other second newspapers across the country, he says, "we're doing much better and continuing to upgrade. Current daily circulation is down less than 4,000, or 3%, from a year ago, and Sunday circulation is up slightly, to 307, 124 from 306,179.

■ Despite the brighter outlook, a recent article in *Los Angeles* magazine cited an estimate by *Times* publisher Otis Chandler that the *Herald's* current losses might be as high as $1,000,000 per month. Mr. Dale disputes this figure calling it "a lie and a big one at that." He adds, "It may be that he [Mr. Chandler] is not aware of how efficently a newspaper can be run. Why, the *Times* has more people in their editorial room that we have in our entire plant.

Privately held Hearst does not release financial figures, but the *Herald*, Mr. Dale says, "showed gains on the bottom line in 1979 and 1980 was even better." He concedes, however, that with the exception of a strong first quarter, "1981 has been a very difficult year for us," as it has been for many newspapers.

But in the area of classified ads, the *Herald* has bucked the national trend and posted some significant, although relatively small, gains in linage. It was "by luck, more than skill," says Mr. Dale. "It just so happened that about the time classified sales began to fall off drastically, the *Herald* was able to get under way a classified promotion that had been in the works for some time."

■ Launched in the second quarter, the promotion helped sustain classified sales through July, during one period producing an average of 460 "family" or "personal" type ads per week. As a result, classified linage at the *Herald* for the first nine months of 1981 enjoyed an increase of 4.6% over last year, with a 10.4% gain in classified revenues.

"That," said Mr. Dale, "helped to increase our relative share of field, which is still very small compared to them [the *Times*], but when you come up with any kind of increase it's worth talking about. Not such a big deal," he added, "except it's one of those little signs that we must be doing something right."

National advertising for the first three quarters was also up, totaling 2,890,236 lines through September, up from 2,846,326 lines a year earlier. Retail linage through the first three quarters was down slightly—5,662,990 lines from 5,743,714 a year ago. But David Feldman, sales director, says, "We expect to wipe out that 80,000 line deficit and wind up ahead for the year without any problem."

Although total linage remains lower than it was prior to the disastrous Newspaper Guild strike of the late 1960s, it is still up about 50% over 1977 figures.

A more aggressive editorial stance has been no small factor in the *Herald*'s stabilization process, local newspaper followers believe. A revitalized and award-winning editorial staff, put together by former editor James G. Bellows, has scored some significant news beats over the *Times* during the past few years, attracting increased public attention to the *Herald*.

Effective Dec. 1, Mr. Bellows resigned to take over as managing editor of "Entertainment Tonight," a television show featuring news in the entertainment field.

His successor is Mary Anne Dolan, 34, who had been managing editor at the Herald for the past two years. She had previously been assistant managing editor of the *Washington Star*, where she worked for nine years, the last three under Mr. Bellows.

The appointment of Ms. Dolan, believed to be the first woman named as top editor of a major metropolitan daily, had been established well in advance of Mr. Bellows' resignation, Mr. Dale says. "Jim Bellows did what every good manager is supposed to do; he prepared his own successor," the publisher says. She'll give the *Herald* the same kind of sparkle he did and in a short time she'll put her own stamp on the paper.

While the editorial salaries at the *Herald* remain far lower than those paid to *Times* staffers, Mr. Dale points out that a labor contract negotiated with the union about 18 months ago was designed to bring *Herald* employes "up to par with their counterparts in this industry in this market" by the time the contract expires in March, 1983.

For the first time, the contract permits the *Herald* to give merit pay increases to individual employes. Under the previous contract everyone had to get the same raise. "That," says Mr. Dale, "is typical of most union contracts, making you move along at the pace of the least productive employes, rather than the most productive. Now we're at the point where we can compensate the workers who are really carrying the load."

In September, for the first time since Mr. Dale arrived at the *Herald* in 1977, the paper launched a major ad campaign to build circulation. Mr. Dale had all but suspended advertising "until we had a product we could promote."

Theme of the campaign, "Love Us or Hate Us, L.A.'s Mad about Us," positions the *Herald* as a feisty, irreverent paper that may offend or please on a given day but is still read. The $500,000, 10-week campaign effort features 60-second radio spots heard an average of 26 times daily on as many as 15 stations during commuter drive time.

■ In yet another effort to boost its city circulation, the *Herald* in January will begin a six-month test of newspaper sales on certain buses of the Los Angeles Rapid Transit District (RTD). If results are promising, as is expected, newspaper racks will be installed on buses throughout the RTD system. Also participating in the RTD test is the *Daily News*, of Van Nuys.

Hearst and the *Herald*'s boldest move to date, however, was the parent company acquisition last August of 28 weekly and two daily newspapers from four suburban Los Angeles newspaper groups. Mr. Dale had pushed for the action, which is designed to meet advertiser demands for greater penetration of the market. The aim is to link the suburban papers with the *Herald Examiner* to form an advertising network with a special rate structure permitting advertisers to select as much coverage as they choose.

The newspapers have a total controlled circulation of about 425,000, mostly in southeast Los Angeles, a blue-collar and minority area largely ignored by the *Times*, and in the San Fernando Valley. Nearly all the weeklies are published on either Wednesdays or Thursdays, bringing Hearst's circulation on those days to more than 700,000, a substantial portion of which is morning delivery. This total, Mr. Dale says, is larger than the circulation of the Times in Los Angeles County. The *Times* total daily circulation averaged 1,011,798 for the six months ended Sept. 30.

■ Details of the new advertising package (dubbed "Great Day L.A.") were unveiled to the newspapers' combined sales staffs for the first time on Nov. 10, so it will be some time before its impact can be measured. The new rate card provides a variety of "rate breaks" for advertisers using different combinations of newspapers from eight separate groups. Advertisers will be offered "spot" buys in any publication, "group" buys for two to five groups, or "network" buys, which are defined as any two groups, plus the *Herald Examiner*.

There will also be a retail network buy and a national network buy. No matter what the combination, advertisers will place only one order and receive only one bill. In all there are 273 different combinations to chose from.

If the plan works as expected, Mr. Dales ses a "cross-fertilization" of advertising from one publication to another, with all of them the ultimate beneficiaries.

The move has been called an "expensive gamble" by some observers. Mr. Dale calls it a serious effort to deepen penetration of "the most horizontal [geographically dispersed] large market" in the country. "Penetration here is a problem for everyone, including the *Times*," he says. He estimates the *Times'* share of the potential audience in Los Angeles and Orange counties at less than 27%. The *Herald's* is only 7.5%, he days.

■ "The *Times* may have ignored the minorities" Mr. Dale says, "but they sure haven't ignored the penetration problem." He points to the *Times'* $215,000,000 capital spending program to upgrade its Orange County facilities and for a new press in the San Fernando Valley.

"They're [the *Times*] making a substantial vertical effort to increase their penetration into those key areas," Mr. Dale says. "The *Herald* is also aiming for greater penetration into those same areas, we're just doing it in a different and, I think, very adequate way."

FRANK DALE

"After losing 30,000 copies of circulation every year for the past 10 years, we've finally stopped the hemorrhage."

Charles P. Wingis is associate editor-special projects in the Los Angeles office of Advertising Age.

Of that total, broadcast stations accounted for $128,744,000, or 65%, and cable communications systems accounted for $68,324,000 or 35%.

According to Standard & Poor's Corp., broadcast stations accounted for 92% of last year's profits, and cable systems 8%.

Storer has been involved in cable tv since 1963, and since 1978 has sold its six radio stations and borrowed money under a $200,000,000 revolving credit agreement in order to continue expansion into cable.

■ The company currently has a contract to sell its last radio station, WLAK (fm), Chicago, for $8,000,000 to Viacom, New York, subject to FCC approval. Storer reportedly has no plans to reenter radio in the future.

This year, the company purchased Coastal Cable. Groton, Conn.; Connecticut River Cable Co., Clinton, Conn., and Monmouth Cable of New Jersey. As of Sept. 30, Storer was providing service to 750,000 cable subscribers in 20 states.

Storer's original goal of 950,000 basic subscribers by the end of this year has been reduced to 900,000, which the company still expects to accomplish. "If we miss it, it won't be by much," said Kenneth Mosher, vp, treasurer and chief financial policy officer. Mr. Mosher said the company will achieve 950,000 subscribers not long after the close of the first quarter of next year.

■ Storer has obtained additional financing for its expansion into cable by selling 2,000,000 shares of common stock in April, 1980, and $100,000,000 worth of 8½% debentures in November, 1980. It sold another 1,900,000 shares of stock in July.

Previously, the company's last major period of transition was from 1948 to 1950, when it began pursuing an interest in tv after 21 years in radio.

Today, the company still owns seven tv stations. located mainly in industrial cities.

■ But Storer's major movement unquestionably has been into cable. Although its basic subscriber count stands at 750,000, there are 3,000,000 homes in Storer's wired areas, providing a substantial reserve of unsold households.

The company is ranked sixth among cable operators, but may rank as high as fourth in potential subscribers.

Taft Broadcasting Co.

Taft Broadcasting Co. is the nation's 64th largest media company, with media-property revenues of $112,190,000 for the year ended March 31. Broadcasting accounted for all of the media revenues, or 47% of the company's total revenues of $239,925,000. Taft's entertainment group, which produces and distributes video programing, contributed revenues of $82,132,000, or 34% of total revenues. Net profits last year were $24,250,000.

The publicly held, Cincinnati-based company has set its sights on cable tv. This year it formed two partnerships with Tele-Communications Inc., Denver. One is TCI-Taft Cablevision Associates, which will acquire and operate cable systems. The other, TCI Programs, will develop programing in 1982 for both basic and pay cable stations.

In April, TCI-Taft Cablevision filed an application for Miami's cable tv franchise. In addition, Taft launched "Entertainment Tonight," a daily program carried live via satellite, covering entertainment news. The show is carried on Taft's seven stations and sold to broadcasters in 85 other markets.

Taft has installed satellite-to-earth stations in all of the tv stations, and its stations broadcast heavy amounts of sports programing. This was the first year that WDAF-TV, Kansas City, aired Kansas City Royals baseball, while WGR-TV, Buffalo, continues broadcasts of Buffalo Sabres hockey, Baltimore Orioles baseball and Washington Bullets and Capitols basketball.

The entertainment division, which includes such units as Hanna-Barbera Productions and QM Productions, continues to focus on the production and distribution of animated features and live-action tv programs. QM also is developing comedy series pilots, tv movies and pay-tv specials.

Inroads were also made this year within the theme park arena, with the opening of the company's Canada's Wonderland. This brings the company's total number of such amusement centers to four. The company recently sold its Marineland near Los Angeles.

Taft believes it has an "excellent mix of businesses for the 1980s," Charles S. Mechem Jr., chairman, told shareholders this year. He called fiscal 1981 "a year of significant accomplishment," despite a 24% decline in earnings caused by the weak economy, the actors' strike and entertainment development costs.

Tele-Communications

Tele-Communications, Denver, Colo., is the nation's 66th largest media company, with media property revenues in 1980 of $111,900,000, all from cable tv. Microwave operations added $12,510,000 to bring total revenues to $124,400,000. Net income for fiscal year 1980 was $8,253,000. Revenues have more than doubled over the past three years, with revenues in 1980 up 35% over 1979 figures.

Acquisitions by the company are made swiftly and quietly. "We do about two acquisitions a month," says company president John C. Malone. With this strategy, it claims the rank of the third largest cable tv company, and according to Mr. Malone, it has "realistically set its sights on the No. 2 position."

In 1980, the number of catv subscribers jumped by 235,000 and pay tv subscribers by 150,000, the biggest increase in the history of the company. By the end of the year, the final count of subscribers reached 1,100,000 for basic cable and 469,000 pay tv, scattered throughout some 40 states.

Last year's growth was gained by three methods: Acquisition, addition of new services to already existing operations, and acquisitions of systems from third parties.

Last year's growth included the addition of 34 catv systems, at the cost of some $34,000,000. In addition, two large projects were completed during the year. One, a communications system, was constructed for the U.S. Coast Guard and the second was a major route expansion of existing facilities that added a 7,200 channel capability to Omaha-Salt Lake City route for data and voice transmission.

Recent developments include the January, 1981 partnership with Taft Broadcasting, which established two joint venture partnerships, TCI-Taft Cablevision Associates, Denver, to handle acquisition, development and operations of catv systems and Taft-TCI Programs, Cincinnati, O., to develop programing for both pay and basic cable.

That move was followed by the March 31 purchase of about 83% of the outstanding common stock of Horizon Communications Corp. from Equitable Life Assurance, for $30,000,000 in cash. The purchase swelled the basic subscriber list by 135,000. And in May, 1981, that list was augmented by 60,000 more with the purchase of Cable Information Systems in New York.

Following that, in June, Taft-TCI made an agreement to purchase Cape Cod Cablevision Corp., Barnstable, Mass., which, if the deal goes through, could yield another 28,000 subscribers. As of March 31, 1981, TCI, through its subsidiaries, served 1,277,000 basic subscribers and 563,000 pay tv subscribers in 43 states.

■ The company generated additional buying potential in August, 1981, when it announced that TCI Growth, a wholly owned subsidiary, had received the okay from nine banks for a new credit line of $130,000,000, funds that will be used for both future acquisitions and consolidation of affiliates.

Stock offerings are another way the company generates equity for future acquisition. One, issued in November, 1980, offered 3,000,000 shares of class A common stock and brought in over $70,000,000. Another, more recent offering occurred in April, 1981, when 1,800,000 more shares of class A common stock were offered.

The top priority of TCI is expansion, but there has been an strong effort made to build a strong, homogenous management core surrounded by heterogeneous elements—the diverse elements gathered by acquisition. That is accomplished, according to Mr. Malone, by promoting from within. "We have never used a headhunter," he says, and he compares the strength of this method to the growth of a crystal.

Attempts also are being made, by decentralizing and delegating more responsibility to to the regional operations, to keep the company from getting top-heavy at the home office.

Thomson Newspapers Ltd.

Thomson Newspapers Ltd., Toronto, Ont., is the 33rd largest media company in the U.S. with revenues of $208,144,200 in 1980, all from newspapers.

Thomson Newspapers U.S. properties include 80 newspapers. The company has an additional 54 Canadian daily and weekly newspapers which bring additional revenues of US $230,600,000. Its U.S. headquarters is in Des Plaines, Ill. At yearend 1980, total daily circulation in the U.S. was 1,100,200; in Canada, total circulation was 1,166,700.

The company is a 71%-owned operation of the Thomson family, which holds a vast publishing and business empire in the U.S., Canada and Europe. International Thomson Organisation Ltd., Toronto, is a separate, 81% family-owned company with interests in business publications and book publishing in the U.S., United Kingdom and the Continent; national and regional newspapers in the U.K.; U.K. consumer magazines; package tour operations and travel agencies in the U.S. and U.K., and substantial holdings in North Sea oil fields and other petroleum-related businesses.

Both Thomson Newspapers and International Thomson Organisation are headed by Kenneth R. Thomson, who also holds the title of Lord Thomson of Fleet. He inherited both the title and the companies from his father, Roy H. Thomson. The elder Mr. Thomson started the newspaper company in 1934 with the acquisition of the *Daily Press*, Timmins, Ont.

Thomson's first U.S. acquisition—the purchase in 1952 of the *St. Petersburg* (Fla.) *Independent* (subsequently sold)—was the start of a movement southward from its Canadian base. The company has been consistent in operating style, and, as in Canada, it favors non-competitive newspapers in small and medium-size communities.

In 1967 alone, Thomson acquired 18 U.S. newspapers. Since then, it has bought about six to eight per year. St. Clair McCabe, president of the U.S. operations, said the company does not approach acquisition with cut-and-dried rules.

"If we think a newspaper can make a good contribution, we'll buy it," he said. "Thomson is not a very exciting newspaper chain. Our basic business is not that of a large, metropolitan newspaper, and we wouldn't be interested in that sort of property."

An exception to that corporate rule came in 1980, when Thomson acquired F.P. Publications Ltd., a

leading Canadian chain whose flagship paper was the *Toronto Globe and Mail*. Following the purchase, the Canadian government conducted an inquiry into media concentration. The Kent Commission issued a detailed report on the issue and recommended that Thomson limit futher acquisition activities in Canada.

In addition, after it closed F.P. Publications' *Ottawa Journal*, Thomson was charged in May, 1981, with antitrust actions under Canada's Combines Investigation Act.

■ The government and public attention has forced the company to shift its future growth to the U.S. market, said Robert Duncan, a communications analyst with Wood Gundy, a Toronto brokerage.

In its 1980 annual report, Thomson called the acquisition of additional U.S. newspapers "one of our principal objectives."

So far in 1981, it has acquired five U.S. papers: *Tifton* (Ga.) *Gazette, Enterprise* (Ala.) *Ledger, Sikeston* (Mo.) *Daily Standard,, Thomasville* (Ga.) *Times-Enterprise;* and *Kokomo* (Ind.) *Tribune*. The company also formed an equal partnership with Abiti-Price to expand and operate that company's newsprint mill in Augusta, Ga.

Financially, 1981 is shaping up to be a healthy year for the chain. For the first six months of the year, net income (for Canadian and U.S. operations) reached $43,816,992, compared with $246,349,037 in the same period last year. Mr. Duncan estimated that the company's earnings this year will end up about 25% ahead of last year.

Time Inc.

Time Inc., New York, is the country's fourth largest media company, with an estimated $1.35 billion in revenues from media operations in 1980, or 47% of total revenues of $2.88 billion. Magazines brought in almost half of the media revenues, with the company's extensive holdings in video properties accounting for the rest.

Over-all, the company earned $222,700,000 in 1980. The company also derives income from book publishing, forest products, industrial contracting and various other operations. Although the past year has been a good one for Time Inc. —especially in the magazine group —some of its ventures have proved to be disappointments.

The company pulled the plug on the *Washington Star* in August, ending its 3½-year struggle to make the afternoon paper a profitable competitor to the *Washington Post*. The company estimated that it lost $35,000,000 on the venture, and that losses were beginning to mount at a rate of $20,000,000 a year.

What sounded the death knell for the paper was its continuing inability to break the morning *Post's* hold on local advertising. Although one of the country's largest papers, with a circulation of 323,000—and arguably one of its better ones—the *Star* had only 25% of Washington's ad linage and only 20% of its ad revenues at the time of the paper's death. Those two anemic shares, many analysts agree, doomed the paper.

■ Time-Life Films also went down the tubes, as the parent company shut down that unprofitable operation in 1981.

But for a company that in recent years has seen its nonpublishing operations, such as forestry, contribute an increasing portion of the bottom line, 1981 was a year in which the magazine division again proved to be a winner.

After struggling through much of the decade, *Money* has taken off, with ad pages, ad revenues and circulation all rapidly setting new records. And Time Inc.'s newest property—*Discover*—has quickly established itself as a leader in the science magazine field, with its rate base rising by 150,000 to 750,000 in January. Altogether, the company's magazines brought in revenues of $747,000,000 in 1980, with that figure expected to grow considerably by the end of 1981. Last year's net income was reduced by 20%, largely because of the startup costs of *Discover*, again a figure expected to improve by the time year-end results are in.

For the third quarter of 1981, the company's operating income rose 23% to $220,992,000, while net income declined 7% to $95,685,000, a drop company officials attribute to the shutdowns of the *Washington Star* and Time-Life Films.

Time Inc.'s video subsidiaries continue to grow into impressive moneymakers.

Although the company does not report the individual results of its Home Box Office operations, industry analysts have said that the pay tv subsidiary, with its estimated 7,500,000 subscribers, will probably bring in a profit of almost $80,000,000 this year. That profit—which represents 22% of Time Inc.'s estimated total profit—means that the cable subsidiary has just about drawn equal with the magazine division in terms of contributing to the company's bottom line.

HBO did not show a profit until 1977, but now the seven-year-old enterprise is proving successful enough to allow expansion. The company just formed Cinemax, a service that relies almost strictly on movies for its programing. The new venture is a way that Time Inc. can effectively compete against some of the other cable services, such as Showtime and The Movie Channel, that rely on movies around the clock, while allowing HBO to maintain its mix of movies and original programing.

Some of that original programing is coming from Time Inc.'s other properties. *Money* has just completed a deal to develop a regular show based on articles in its issue. *Discover* is reportedly also on the verge of developing a cable show using its editorial resources, and word is strong from Time Inc. insiders that the company is about to go through with a cable magazine show that *People* editor Richard Stolley and publisher Richard Durrell have been working on since the summer.

Time further strengthened its position in the video business in August when it entered the advertiser-supported cable network field as half-owner of USA Cable Network, one of the top four in that category. Time agreed to pay $15,000,000 for the 50% share owned by UA-Columbia Cablevision, with the other half going to Paramount Pictures Corp. from Madison Square Gardens Productions, both of which are subsidiaries of Gulf & Western. There is also an option for Time to buy full control of the operation.

USA Cable Network, thanks to a lineup of 1,450 systems reaching more than 8,000,000 homes, is expected to gross at least $12,000,000 on ads in 1981.

Times Mirror Co.

Times Mirror Co., Los Angeles, is the country's seventh largest media company, with revenues of $1,128,378,000 from media operations in 1980. Newspapers accounted for $874,343,000 in revenues, or 61% of the company's total revenues of $1,857,349,000.

Magazines accounted for $114,100,000 in revenues and tv and cable operations together produced sales of $139,935,000. Total profits last year were $253,826,000.

The publicly held company is on an expansion drive, which in 1980 included the acquisition of the *Denver Post* and five tv stations. In 1981, it installed new publisher-chief executive officers at the *Los Angeles Times* and the *Denver Post*.

Times Mirror is pursuing a $215,000,000 capital improvement program that includes the expansion of its Orange County, Cal., plant and plans for a new satellite facility in the San Fernando Valley, also in Southern California, by 1985. The company is also modernizing its pressroom at Times Mirror Square headquarters.

Times Mirror is continuing to strengthen its position in cable tv. It is testing a two-way interactive cable information system in Southern California and plans in 1981 to introduce new programing services to cable via satellite.

Named as *Los Angeles Times* publisher-ceo in 1981 was Tom Johnson, president and chief operating officer of the *Times* from 1977 to 1980. He is a former publisher of Times Mirror's *Dallas Times Herald*.

Mr. Johnson succeeded Otis Chandler, who became chairman and first corporate editor-in-chief of Times Mirror.

Since Mr. Johnson's arrival, a key *Times* goal has been to strengthen the paper's presence in suburban markets where *Times* penetration is low.

■ It was in 1980 that the *Times* attempted to better reach those markets in an experiment with a free weekly newspaper called the *Best of the Times*. This distillation of news features from the daily *Times*, was seen as an attempt to offer advertisers "total market coverage" and a means to boost *Times* circulation. It was apparently unsuccessful. In March, 1981, the *Times* ended the experiment after if failed to generate significant ad revenues.

On the other hand, Times Mirror recently established a fully staffed free weekly in Irvine, Cal., called the Mirror. The paper is published under the company's *Orange Coast Daily Pilot* subsidiary, Costa Mesa, Cal.

The *Los Angeles Times* itself continues to set U.S. records in ad linage. In 1980 it retained its leadership position, with total ad linage of 161,075,507. On Sunday, the *Times* is also the national linage leader, reporting total Sunday linage of 54,047,742.

Magazines accounted for Daily circulation at the *Times*, which averaged 1,011,798 over the six-month period ended Sept. 30, is second in the nation, ranking behind the circulation of the *New York Daily News*. Its Sunday circulation—1,250,620—is third, behind the *Daily News* and the New York Times.

In 1980, the *Times* signed a consent decree with the Federal Trade Commission agreeing to restrict volume discount ad rates it offered heavy advertisers. Now the paper wants the FTC to drop the case and is attempting to marshal industry support.

The company's 1980 acquisition of the afternoon *Denver Post* for $95,000,000 was seen by management as a strategic move into one of the fastest growing U.S. markets. Lee J. Guittar, former publisher of the company's Dallas Times Herald, was named president, publisher and ceo of the *Post*, succeeding Donald R. Seawell, who continues as Post chairman. Mr. Guittar is also group vp-newspapers of Times Mirror and chairman of the *Dallas Times Herald*.

Continuing its battle against the afternoon odds and the *Rocky Mountain News*, the *Denver Post* began an early morning edition in September, 1981. It is expected to increase street sales 10,000 to 15,000.

The *Post's* circulation averaged 255,663 in the six months ended Sept. 30, compared with 272,373 over the same period in 1980.

In 1980, the *Dallas Times Herald* had its fifth straight record year.

Its daily circulation averaged 242,821 over the six months ended Sept. 30, while the Sunday figures stood at 335,089.

■ But the once friendly competition between the *Times Herald* and the rival *Dallas Morning News* broke into a heated struggle in 1981 after the *Morning News* managed to lure Field Syndicate columnist Ann Landers from the Times Mirror newspaper. Times Mirror attorneys are said to be considering some kind of legal action over this move.

Five new tv stations and a major expansion in cable helped the Times Mirror broadcast and cable group post a 46% increase in operating profits to $47,200,000 in 1980 on revenues of $139,900,000.

The seven-station Times broadcast group has a joint programing venture in the works and is said to be concentrating on station programing and promotion to improve ratings at the stations for the season.

Times Publishing Co.

The Times Publishing Co. of St. Petersburg, Fla., had estimated media property revenues of $81,990,000 in 1980, making it the 73rd largest media company in the U.S. The privately owned company publishes the morning *St. Petersburg Times* and the *Evening Independent*.

It also owns the "Congressional Quarterly"; Modern Graphic Arts, a commercial publishing subsidiary, and *Florida Trend* magazine.

"We're in an expansion mode in all of our divisions," said Eugene Patterson, president of Times Publishing and editor of the *Times*. "We're benefiting from a very stable management group and several long-term financial investments."

Times Publishing is a Florida pioneer in localized news editions and advertising. In 1982, it plans to publish regional editions of the *Times* in five different suburban areas surrounding St. Petersburg, with an emphasis on dominating and penetrating the markets directly north of the city.

■ To facilitate its plans for that area, the company opened its first satellite printing plant, costing $6,000,000, this year in New Port Richey, north of St. Petersburg.

The company's regional editions are published seven days a week and offer part-run advertising rates to give local advertisers a rate they can afford.

"Intensely local advertising and news coverage will be the major thrust of the company's operations over the next year," Mr. Patterson said. "Our circulation objective is to become the largest newspaper between Miami and Washington, D.C."

The Times had an average circulation of 219,899 for the six-month period ending Sept. 30; the *Independent's* circulation was about 37,517 over the same period.

The company earlier this year acquired Congressional Monitor, which publishes a daily report on congressional committee activites in Washington. "Congressional Quarterly" is moving heavily into textbook publishing.

Toledo Blade Co.

The Toledo Blade Co. is the nation's 62nd largest media company, with revenues of $118,700,000, all of which came from media operations. The Toledo-based company is privately owned and has both newspaper and broadcast holdings.

The *Toledo Blade*, flagship of the operation, continues to hold its own as the city's only evening newspaper. Advertising revenues have held steady in 1981 for the *Blade* despite the fact that Toledo, like many Northern industrial cities, has suffered through some hard times.

The company's other newspaper holdings, the Pittsburgh Post-Gazette, *Redbank* (N.J.) *Register* and *Monterey* (Cal.) *Pennisula Herald*, had slight ad revenue increases over 1980.

The main action for The Toledo Blade Co. has been in broadcasting, where the company is trying to diversify its holdings. The company has been in cable tv for 15 years with its Toledo-area Buckeye Cablevision.

■ "The future of cable is very bright and we want to be right in the middle of it," said Gary Brubacker of the broadcast operation. "We have good penetration in the area and the system is growing."

The cable system reaches 68,000 households with 60 channels and two pay services. Blade Co. also owns a 12-channel cable system in Monroe, Mich.

Federal Communications Commmission deregulation action in 1981 allowed Buckeye to unify its cable coverage for Toledo.

Previously, because of certain restrictions, people in certain parts of the area received different programing than other subscribers nearby.

■ In 1981, Blade Co. purchased Erie County Cablevision in Sandusky—a system with 13,200 subscribers.

The company also has traditional broadcast holdings. This past year it purchased WLFI-TV in Lafayette, Ind., a CBS affiliate. It already owned WLIO-TV in Lima, O. The company has one radio station, WWSW in Pittsburgh.

Toledo Blade Co. is owned by brothers Paul Block Jr. and William Block. The business has been in the family since 1926 and the *Toledo Blade* will celebrate its 185th anniversary in 1985.

MEDIA PROPERTIES
Newspapers (dailies): *Toledo Blade; Pittsburgh Post-Gazette; Shrewsbury-Redbank* (N.J.) *Register; Monterey Peninsula* (Cal.) *Herald*.
Broadcast: TELEVISION—WLFI, Lafayette, Ind.; WLIO, Lima, O. RADIO—WWSW (am), Pittsburgh.
Cable/video: Buckeye Cablevision, serving Toledo and suburbs; Erie County (Ohio) Cablevision, serving Sandusky; Monroe Michigan Cable System, serving Monroe.

And did you know...

• The number of U.S. tv and radio stations passed the 10,000 mark last January.
• The average price for the 35 tv stations sold last year was $15,261,428—more than double the $6,757,042 average of 1979. The 424 radio stations that exchanged hands sold for an average price of $801,023.
• Metromedia Inc. is paying $220,000,000 to Boston Broadcasting Corp. for WCVB-TV Boston—the most ever paid for a single station, and more than three times the previous record of $65,000,000.
• Westinghouse Electric Corp.'s acquisition of Teleprompter Corp. for $646,000,000 last year was the largest merger in broadcasting/cable history.
• In 1977, Park Broadcasting became the first company to own the maximum 21 radio and tv stations allowed by the FCC (7 am, 7 fm and 7 tv.)
• In 1981, it costs $175,000 for a 30-second commercial on "60 Minutes," the most expensive 30-second commercial in tv history.
• In 1924, Herbert Hoover said, "I believe the quickest way to kill broadcasting would be to use it for direct advertising."

Triangle Publications

Triangle Publications, Radnor, Pa., is the nation's 14th largest media company, with estimated 1980 revenues of $560,000,000, all from print media. It publishes *TV Guide*, *Seventeen* and the *Daily Racing Form*. In June, Triangle folded its 16-month-old *Panorama* magazine.

In the midst of burgeoning video technology, privately owned Triangle, headed by Walter Annenberg, a former U.S. ambassador, has been forced into defensive moves to protect its flagship *TV Guide* from obsolescence. In 97 of its 110 editions, *TV Guide* has incorporated program listings for basic cable and/or pay cable. It has also been testing a cable-pay tv edition sold alongside the regular *Guide* in the Southwest.

In late summer, the company scrapped plans for tests of editions in four markets that would have included a 24-page cable guide section. It would have been printed on colored paper, bound into the book and put after regular broadcast listings. Officials said they found the cable listings mixed with the regular listings to be preferable.

TV Guide had total 1980 revenues of $613,850,000, including $239,468,000 in advertising revenues, according to *Folio* magazine. *Folio* presents pre-commissionable ad expenditures and gross circulation and newsstand sales. It averaged 18,426,194 in circulation in 1980; for the first six months of 1981, the estimated ad revenue was $120,641,008 and circulation was 18,084,966, allowing it to maintain its position as the largest-circulation magazine in the nation.

■ Triangle officials maintain that *TV Guide* is healthy and vital enough to accommodate the changing requirements of a video publication.

"We have the right editorial format and content," said Merrill Panitt, editorial director of *TV Guide* and *Seventeen*. "It's a matter of covering more. But no publication is going to cover 150 channels. We'll carry the important ones, the ones that people watch."

TV Guide's commitment to long-term growth in changing media listings was evident earlier this year when the position of editor was divided between David Senler, now editor for national sections, and Roger Youman, editor for local sections.

Some observers believe Triangle's *Panorama* effort was an attempt to guard against the potential extinction of *TV Guide*. *Panorama*, a monthly first published in February, 1980, covered tv and its impact.

The publication ran 296 ad pages last year, with February through December ad revenues of $683,656; ad revenues from January through June, 1981, were $305,390. The company even talked about the possibility of incorporating *Panorama*'s format into tv programs.

But, aimed at upper-income, well educated readers, *Panorama* had garnered only half of its originally guaranteed circulation of 200,000 when the magazine folded in June, 1981. Saying that there was evidently "no need for *Panorama* as a consumer magazine," Mr. Annenberg admitted that the prospects for substantial growth were doubtful.

Analysts speculated that Triangle Communications pumped about $5,000,000 into *Panorama* during its brief life.

Seventeen magazine had total 1980 advertising revenues of $20,555,614, and expects advertising revenue of $22,300,000 for 1981. The magazine's publisher, Frank Wolf, also served as publisher of Panorama.

MEDIA PROPERTIES:
Magazines: *TV Guide*; *Seventeen*
Newspapers: *Daily Racing Form*

Tribune Co.

Tribune Co., Chicago, is the country's 10th largest media company, with revenues of $1.05 billion from media operations in 1980. Newspapers accounted for about 75% of the company's total revenues of $1.23 billion and radio and tv stations together about 10%. Total profits last year were $78,000,000.

The privately owned company is in the throes of change, as it struggles to improve profits at the *Chicago Tribune* and stem losses at the *New York Daily News*. It has installed a new chief executive officer and new editor at the *Tribune* and has scrapped a costly attempt to sell an afternoon edition of the *Daily News*.

At the same time, Tribune Co. is increasing its stake in cable tv and last summer purchased the Chicago Cubs baseball team, partly because of its potential value as cable entertainment.

The new president and ceo of the flagship *Tribune* is Charles T. Brumback, who formerly headed Tribune Co.'s Sentinel Star Co. in Orlando, Fla. Shortly after his arrival last February, Mr. Brumback, a financial exec by experience, imposed an austerity program at the newspaper, since partially lifted, that curbed travel and hiring. In June he tapped James D. Squires, who had been editor of the *Sentinel Star*, as editor of the *Tribune*.

Mr. Squires replaced Maxwell T. McCrohon, who was shunted into the less visible post of vp-news, a new position. Mr. Squires was brought in over William Jones, the *Tribune's* managing editor, who once was considered the odds-on favorite to become editor.

Tribune Co. wants to increase its return on equity from last year's 13.4%, which is well below that of most large newspaper companies. Mr. Brumback will try to contribute to that effort by increasing productivity at the *Tribune*, which he has characterized as a paper that had been "spending like an institution" rather than a business."I'm not comfortable working for a company that is satisfied with trailing the pack," he said.

In August, the company ceased publication of *Daily News Tonight*, its year-old afternoon paper designed to attract homebound commuters who read the *Wall Street Journal* and the *New York Times* in the morning. The company spent $20,000,000 on the venture, but could manage a circulation of only 70,000 for *Tonight*, compared with the targeted 200,000.

Tonight also failed to attract advertising from upscale department stores and other retailers. Two months before the folding, the paper had replaced Clay Felker as *Tonight* editor, hoping that a hard-news approach would work better than Mr. Felkner's "soft" features emphasis; it didn't.

"We have serious financial problems that must be dealt with immediately," Robert M. Hunt, Daily News publisher, said in announcing *Tonight's* demise.

Mr. Hunt said the *Daily News* would lose $11,000,000 this year, despite salary freezes, layoffs and other belt-tightening. The paper said it would seek concessions from its 11 unions, but stopped short of saying it would fold if the unions don't cooperate.

The *Daily News* remains the nation's largest general-circulation newspaper, but circulation has fallen substantially from its peak of 2,000,000 in the early 1970s. Meanwhile, Rupert Murdoch's *New York Post*, which started a morning edition to counter *Tonight*, has been gaining circulation.

■ The *Tribune* and *Daily News* both ranked among papers suffering the largest declines in circulation from Sept. 30, 1980 to Sept. 30, 1981. Average *Tribune* circulation fell 3.9% to 754,043, while *Daily News* circulation fell 2.7% to 1,483,333.

In June, Tribune Co. announced it would pay $20,500,000 for the Chicago Cubs, in a move that caught the sports and media worlds by surprise.

For the moment, the Cubs continue to produce revenues for the Tribune's WGN radio and tv in Chicago, and the company is believed to be looking at the baseball team's potential role in the Tribune's growing interest in broadcasting and cable tv.

■ Tribune Co. has indicated a willingness to spend heavily in baseball's free-agent market to improve the Cubs, even as the company tries to hold the line on spending at its newspapers.

Late last year, Tribune Co. paid about $33,000,000 for Douglas Communications Corp., a Mahwah, N.J., cable company, merging Douglas with existing cable operations to form a new cable subsidiary. At the same time, the company formed another subsidiary, Tribune Co. Broadcasting, which hopes to develop its own programming.

The company also is spending heavily on capital improvements. Last year, it approved a record $517,500,000 capital spending budget to build, among other things, a new Canadian newsprint mill and a $185,000,000 offset printing plant in Chicago.

■ Management hopes the new plant, which it says is the largest in the industry, will improve productivity and capacity, as well as the readability of the *Tribune*, which has been plagued by typographical errors, missing punctuation and poor legibility.

The capital spending and acquisitions have increased the company's outside borrowing and interest costs substantially, however, adding to the difficulties faced in reaching satisfactory profit levels. Long-term debt soared to $117,700,000 last year from $20,800,000 in 1976.

UA—Columbia Cablevision

UA-Columbia Cablevision, Westport, Conn., is the country's 91st largest media company, with revenues of $54,930,000 in the year ended Sept. 30, 1980, all from cable tv services provided to 170 communities in 16 states. Net earnings last year were $4,790,000.

Revenues for the year ended Sept. 30, 1981, were "approximately $80,000,000," Robert Rosencrans, company president, said.

Last month, UA-Columbia's acquisition by Toronto-based Rogers Cablesystems and United Artists Theatre Circuit (a joint venture) was completed. Effective with the change, UA-Columbia's name was changed to Rogers UA Cablesystems.

At the end of September, the company provided cable to nearly 500,000 basic-service subscribers, up from 429,000 in April. About 450,000 of the basic-service subscribers also bought pay-cable service, up from 318,000 in April. Through September, the company cable service had passed 900,000 homes. Mr. Rosencrans said the company is about the ninth-largest U.S. cable tv operator.

■ UA-Columbia agreed last June to be sold for $90 a share, or a total of $400,000,000, ending a four-month bidding war marked by escalating offers and litigation threats. The battle began in February, when Knight-Ridder Newspapers joined with Dow Jones & Co. to offer $72 a share, or $237,600,000 for UA-Columbia. United Artists, then owners of 28% of UA-Columbia, vowed to fight the Knight-Ridder and Dow Jones bid, and finally triumphed when Rogers Telecommunications joined in the $90-a-share offer accepted UA-Columbia in June.

With the acquisition, Rogers Cablesytems, already Canada's largest, gains a more significant foothold in the fertile U.S. market. Rogers was already a minority shareholder in UA-Columbia. With its 51% share of UA-Columbia, the Canadian company can now claim 2,000,000 subscribers in Canada, the U.S. and Ireland.

The company has no immediate plans to add new territories, Mr. Rosencrans said, although that is a possibility.

In a major move this year, UA-Columbia sold its 50% share in the USA Network to Time Inc. in October for $30,000,000. This was done because his company's resources are best devoted to cable, rather than programing, Mr. Rosencrans said. "[USA's] service was really exceptional...but we thought the demands for investment in that [kind of] business would be extraordinary, with Getty Oil, Ted Turner and CBS attracted to compete. We're not as well equipped as they to fight that battle."

And furthermore...

• *Business Week* in 1980 completed its sixth straight year of running more ad pages (4,941 last year) than any other magazine.

• The single magazine issue with the largest ad revenues in the medium's history was the November, 1981, *Better Homes and Gardens,* which ran 177 pages of ads costing $12,315,582.

• The largest single magazine issue in total pages was the September, 1981, *Vogue* — 610 pages.

• The 67 pages of ads carried by the fall, 1981, issue of *Families* was the most ever for a premier issue.

• Gannett Co.'s and Knight-Ridder's 6% shares of total U.S. daily newspaper circulation were exceeded in 1946 by Hearst Corp., whose 17 papers controlled 10.4% of daily circulation.

• The most expensive four-color full-page ad in a U.S. magazine: $89,600, *Reader's Digest.*

• *Geo* last year was the fastest growing consumer magazine in total revenues, ad revenues, average circulation, subscription revenues and subscriptions. It was sold by Gruner & Jahr this year because it was losing too much money.

United Cable TV Corp.

United Cable TV Corp., Englewood, Colo., is the country's 84th largest media company, with revenues of $62,838,000 in the fiscal year that ended in May, all from cable television. Net income was $7,897,000.

Reflecting the general boom in cable tv, the publicly held company has grown rapidly in recent years. By subscriber count, it is the 11th largest U.S. cable company.

Last year's revenues rose 41% from the previous year, and net income was up 23%. That pace continued in the first quarter of the current fiscal year, when revenues jumped 48% to $20,311,000 and earnings increased by 36% to $2,475,000.

At the close of calendar 1980, the company had 362,150 system subscribers; that number grew by 22% to 443,536 by Oct. 31 of this year.

■ United Cable was founded in 1953 by two brothers who brought tv to Casper, Wyo., by sending broadcasts from Denver network tv stations via microwave to Casper, where the signals then were transferred over cable to homes. Tv signals at that time were too weak for Casper, which had no local tv stations, to receive from Denver.

United has long since left behind the trappings of such frontier technology. The company, which has 35 systems covering 84 communities in 16 states, is deep into testing new services to augment its current cable base.

Its showcase system in Tulsa, whose 90,000 subscribers account for more than one-fifth of United Cable's subscribers, is investigating other revenue sources such as in-home security and banking services, rigging tv sets as minicomputers with keyboards, meter reading, teletext and pay-per-view services, as well as advertising and time sales.

■ United Cable, unlike its larger neighbor, Tele-Communications Corp., has not been acquisition-minded. "The value of cable properties is so high; many, too, are overvalued, for one thing," says a company official. United Cable has only purchased two systems since 1979: One in Foster City, Cal., and the other in Hammond, Ind. Both, however, were in the initial building stage. Foster, purchased in late 1979, now has 3,500 cable subscribers and 6,800 homes passed.

■ The Hammond operaton, purchased in 1980, indicates the sophistication that has entered the cable business, primarily since RCA Corp. in 1975 granted Home Box Office the right to use its communications satellite. That quickly rendered passe the relaying of programing from one system to the next. HBO promptly went national from its regional base and other pay cable operators took after in hot pursuit.

Hammond, with only 11,000 cable subscribers out of 30,000 homes passed has 27,000 pay subscriptions, meaning United Cable subscribers have an average of 2.45 pay systems per home, one of the highest in the nation.

United Cable has responded to internal growing pains by broadening its management base. A year ago, David Vanvalkenburg was brought in from Time Inc.'s American Television & Communications Corp. to become exec vp and chief operating officer. He joined company founders Gene Schneider, president and ceo, and Richard Schneider, senior vp/engineer, in United Cable's office of the president.

U.S. News & World Report

U.S. News & World Report, Washington, is the 58th largest media company in the country, with estimated revenues in 1980 of $125,000,000, nearly all from media operations.

The weekly news magazine accounts for more than 90% of total revenues. The remaining 10% comes from two newsletters, interests in radio programing and electronic publishing services and a book division.

Company president James McIlhenny and chairman John Sweet say the privately owned concern is "an extremely wealthy company," and has been profitable in at least seven of the last 10 years.

Things began to change noticeably at the company a few years after David Lawrence, founder of the 41-year-old periodical, died in 1973. "It was decided to aggressively manage the assets of the company," says Mr. McIlhenny.

Mr. Lawrence was interested almost entirely in making the magazine successful. He did allow a book division to start up in the 1960s, but it never received his full support and remained largely dormant for years.

■ In the mid-1970s, the company started moving slowly to diversify and now is actively looking into new, but related, business interests. "We're not only a magazine," says Mr. McIlhenny. "We're a communications business." The company is also looking into ways to improve the image of *U.S. News*. (The magazine actually evolved from a newspaper, *United States Daily*, which Mr. Lawrence began in 1926.)

U.S. News has always been "the third news magazine," with 2,100,000 in circulation to *Time's* 5,700,000 and *Newsweek's* 3,000,000. Part of the reason is that *U.S. News* has never sought to conform to the flashy readability of its competition. It claims to be the "serious" news magazine; it doesn't have sections on entertainment, for example.

In 1977, in an effort to shed its stodgy reputation among advertisers and even the magazine's staff, Mr. Sweet budgeted $1,200,000 for an advertising campaign. New York agency Ted Chinn & Co. came up with ads featuring celebrities such as Cheryl Tiegs and Andy Warhol telling what *U.S. News* was not—"no fun," "no razzle-dazzle" and "no glitter." In the first two years of the award-winning campaign, ad pages and circulation were up. "I think it increased ad pages, but it would be difficult to prove it in actual numbers," says Mr. Sweet.

The magazine recently moved its account to North Castle Partners,

Greenwich, Conn., which has developed the new slogan: "We're on the inside looking out for readers."

The magazine was redesigned in 1977 and 1979, and in June, 1980, four-color r.o.p. capacity was added. *Newsweek* had this capability in 1977 and *Time* will have it in January, 1982.

There also are some new faces at the company. Mr. McIlhenny, now president, was hired in 1980 as vp primarily responsible for business and financial operations. He previously had spent 12 years at Macmillan Inc., eventually becoming one of three vps there.

In 1978, William Dunn, formerly vp-advertising, moved up to publisher. Last year, Raymond Naimoli, formerly controller at *Scholastic* magazine, signed on as financial vp.

■ U.S. News recently hired Nat Kingsly, a radio and print veteran to develop new projects. One of the first was to buy a controlling interest in Parkway Communications Corp., a major producer and distributor of fine arts radio programing. Parkway is expected to begin syndicating news and public affairs programs, drawing on the editorial staff of *U.S. News*. Mr. Kingsly also is hoping to get involved in producing tv shows on political and social issues.

A major goal of the organization is to beef up its book division under recently hired publishing exec Roy Pinchot. To date, 62 titles have been released.

Mr. McIlhenny expects this division—eventually—to bring in 25% of revenues, with a volume of $35,000,000. Currently, the book division accounts for only a small fraction of the 10% of the company's total revenues from nonmagazine sources.

In a move to derive money from its land holdings, U.S. News earlier this year announced that it would lease some of its downtown Washington land for development of a major hotel, an office building and high-rise condominiums. The project will cost $200,000,000 and is expected to be completed in 1983.

MEDIA PROPERTIES:
Magazines: *U.S. News & World Report.*
Newsletters: "Washington Newsletter" (monthly); "Washington Business Report" (monthly); news syndication service.
Broadcasting: Parkway Communications (radio programing).

OTHER OPERATIONS:
Book division; interests in Publishers Phototype and Computer Typesetting Service.

Viacom International

Viacom International, New York, is the country's 59th largest media company, with media property revenues of $122,260,000 in 1980, out of total revenues of $160,146,000.

The largest media segment is cable television, which had revenues in 1980 of $66,321,000, followed by tv and radio stations, with revenues of $55,939,000 (including those from Viacom's 50% ownership of Showtime with Teleprompter).

The company's Enterprise program distribution division accounts for the rest of total revenues.The publicly owned company, organized in New York in 1971 as the cable and syndication subsidiary of CBS Inc., has grown rapidly since its spinoff from the network a decade ago. In 1980, total revenues amounted to eight times those of 1971; operating profits for the same period increased tenfold.

In its early growth stages, Viacom's strategy was to use cash generated from the lucrative syndication arm, the Enterprises division, to help expand a young cable operation. Program distribution still makes the largest contribution to operating profits.

Viacom's library of off-network syndicated programs includes such titles as "The Mary Tyler Moore Show," "The Bob Newhart Show" and Tandem Productions' "All in the Family," which has been sold in 109 television markets for nearly $100,000,000. In 1979, the company acquired a package of 28 theatrical films from CBS for approximately $30,000,000, a deal that rates as Viacom's largest single product acquisition and one of the largest in television syndication history.

Access to off-network titles, however, is becoming increasingly difficult as more companies discover the low capital requirements and profit potential of syndication. The television series "Hawaii Five-O" represents Viacom's most recent acquisition in that category.

Says Viacom president Terrence Elkes: "There's no question that the marketplace is more competitive. It's one of the major reasons that we've become more aggressive in network programing and first-run programing."

The company is stressing original production in these areas. It has coproduced first-run programs, made-for-television movies and two theatrical feature films.

■ Mr. Elkes says Viacom's goal as a diversified communications entertainment company is to "continue to grow in the area of software production and acquire various outlets in the chain of distribution."

Viacom formed the Entertainment Group in 1979, incorporating the Enterprises division, programing development and production and Showtime under one umbrella. Mr. Elkes says the move represents a "consolidation of all software resources, which we see as becoming more interchangeable."

Showtime, the pay television operation owned jointly by Viacom and Teleprompter, currently has about 2,500,000 subscribers. It ranks as the nation's second largest satellite-distributed pay tv service in a field dominated by Time Inc.'s Home Box Office. In an effort to narrow the gap with HBO, Showtime went to 24-hour programing in July. Here again, Viacom is emphasizing original material. The biweekly comedy series, "Bizarre," is an example of the sort of "creative episodic programs" the company hopes to develop.

The acquisition last year of the Sonderling Broadcast Corp. for $28,000,000 netted Viacom eight major market am-fm radio stations and a CBS tv affiliate in Albany, N.Y. The station, WAST, has since switched to NBC affiliation. The purchase was viewed by some as a tactical move against possible takeovers, given the complexities of FCC license transfer, and the recent memory of Storer Broadcasting Co.'s bid for Viacom in 1977.

■ Mr. Elkes dismisses that notion, saying, "The action represents a strategic decision made long before any takeover attempts. Besides, we already have a station in Hartford, Conn. Legal protection gets no better with the number of properties."

The company purchased WLAK, an fm radio station in Chicago this year. Says Mr. Elkes, "We think radio is a major growth business offering another potential for programing."

Viacom's cable television division is actively competing for franchises, and today counts more than 485,000 subscribers in roughly a dozen systems.

The cable division was recently awarded a 20-year extension of its franchise in San Francisco, and plans to spend $65,000,000 there in constructing and rebuilding cable systems. Viacom is pursuing franchises in Montgomery County, Md., and South Prince Georges, Va., and has been awarded a franchise in Mountain View, Cal., pending clearance.

Mr. Elkes says the company would like to add one or two franchises a year. He adds, "We don't take a shotgun approach to franchising, but a rifleshot. We choose selectively."

Warner Communications

Warner Communications, New York, is the country's 77th largest media company, with $76,500,000 in media revenues in 1980, primarily from cable tv operations. Media operations represented only 4% of total corporate revenues of $2 billion for the worldwide communications and entertainment conglomerate.

Warner's media activities are centered in Warner Amex Cable Communications (50/50 ownership between Warner and American Express Co.), which had revenues of $107,800,000 in 1980. The other major contributors to media operations are DC Comics, and "Mad Magazine" and "Mad Spec which had estimated revenues of $22,000,000 last year. Recorded music and music publishing, not counted as media, is the largest Warner division, contributing 40% to total revenues in 1980.

Warner's cable operation got its start in the early 1970s when Warner purchased Continental Telephone Corp., TeleVision Communications Corp. and Cypress Communications Corp., thereby creating Warner Cable. Warner sold 50% of the unit to American Express in 1979 to gain capital for expansion. Amex used the joint venture to enter consumer entertainment.

Warner Amex is now the fifth largest multiple system operator in the U.S., behind American Television & Communications (Time, Inc.), Teleprompter (now owned by Westinghouse Electric Corp.), Tele-Communications and Cox Cable Communications. It has 850,000 subscribers in 144 markets in 27 states.

Additionally, Warner Amex could emerge the big winner in the heated battle for franchises in the four unwired boroughs of New York, sometimes referred to as the biggest "virgin territory" for cable in the Northeast, if not the U.S. In recent action, the city board of estimate's cable working group recommended Warner Amex for portions of the Queens, Brooklyn and Staten Island franchise pies. Warner Amex was one of seven of 13 contenders recommended for franchises in the area. (AA, Nov. 23)

■ Two Warner Amex cable systems carry advertising and plans are under way to sell advertising on additional systems. Basically, advertising is a local buy and rates are inexpensive.

Warner Amex Satellite Entertainment Corp. is the programing division of the joint venture. It features a video jukebox called MTV: Music Television. A 30-second spot on MTV costs from $400 to $1,200. In only three months after startup in August, MTV was 30% sold. Warner finds sponsors for 75% of allotted commercial time with the local affiliate selling the rest.

The Warner unit also procures advertising for Cable News Network. "Although advertising revenues from cable are not significant at this time," says a Warner official, "it is expected to become important in the years to come."

QUBE, a two-way interactive system first offered in Columbus, O., features limited advertising, but the possibilities are endless for generating income if the service becomes affordable and meets with consumer acceptance.

Warner also sells outdoor advertising space at each of 32 amusement centers operating under the name of Malibu Grand Prix.

■ Warner is the largest distributor of magazines through its publisher services operation, but few are its own. It just concluded a deal, however, in which it plans to purchase 56% of *Us*, when it goes from twice-monthly publication to weekly in the fall of 1982. The company owns "Mad Magazine," which has no ads, and DC Comics, formerly Detective Comics, most of which have ad pages. DC publishes more than 30 titles each year, including *Batman, Wonder Woman and Superman.*

Warner beefed up its media investment in early 1981 by purchasing 8.6% of the stock in Harcourt Brace Jovanovich, which so incensed the book and trade magazine publisher that it forced Warner to issue releases indicating it was merely interested in Harcourt for investment purposes. According to a Wall Street analyst, however, "This is Warner's style—to buy a little stock and sit tight. If they like what they see, they'll buy more stock. Warner did this with the recent Franklin Mint acquisition and other companies."

OTHER OPERATIONS:
Consumer electronics and toys, recorded music and music publishing, direct response marketing, filmed entertainment.

Washington Post Co.

The Washington Post Co. is the country's 12th largest media company, with revenues of $646,692,000 from media related operations in 1980, or 98% of total operating revenue. The flagship *Washington Post* accounted for 42% of total operating revenues of $659,535,000; the weekly *Newsweek* magazine, 38%, and the four Post-Newsweek tv stations, 12%. Net earnings were $34,335,000, up 17% from 1979.

The company's 20% return on equity in 1980 was among the best in the newspaper industry.

Over the past 30 years, Post Co. has built the *Washington Post* into one of the nation's top daily newspapers and a clear rival to the *New York Times* as a publication vital to national opinion makers. With Time Inc.'s decision to close the ailing afternoon *Washington Star* this summer, the *Post* is entering a era as the only surviving [illegible] circulation daily in the na[illegible] capital.

Newsweek has prospered as the second largest newsweekly, behind *Time* and ahead of *U.S. News & World Report*. And the company has pulled four network-affiliated tv stations into a profitable broadcast division that could be the springboard for new tv ventures.

Under Richard D. Simmons, president of the company since Sept. 1, Post Co. also has begun ridding itself of money-losing properties. In late October it sold the daily *Trenton* (N.J.) *Times*, which has been in the red for three straight years and losing circulation, to Allbritton Communications Co. for a reported $10,000,000 to $11,000,000.

A week later it announced it was trying to sell *Inside Sports*, its 18-month-old sports monthly. The magazine had a pre-tax loss of $12,000,000 in 1980, and could lose

as much as $10,000,000 more this year. Mr. Simmons said company strategists were wrong when they assumed that the magazine could survive on newsstand sales.

Unlike many other newspaper companies, Post Co. so far has stayed out of the race into cable tv ownership. But it is participating in three separate "electronic publishing" tests as a supplier of information. Using telephone lines, Post stories are sold to subscribers of the CompuServe database service, based in Columbus, O.; Post stories are transmitted via videotex signals by WETA-TV, the public tv station in Washington, and a "Newsweek International" newsletter is distributed electronically in Europe by Prestel International, a British company.

Post Co. chairman Katharine Graham, as chairman of the American Newspaper Publishers Assn. this year, has been a major figure in the newspaper industry's effort to bar American Telephone & Telegraph Co. from entering the electronic publishing field as an information provider.

Chairman Graham, 63, brought in Mr. Simmons, 46, from Dun & Bradstreet Co., where he was vice-chairman and had helped the company diversify into electronic distribution of information. Separately, Mark Edmiston advanced from exec vp to president of Newsweek Inc. this year, replacing Peter Derow, who left to head the CBS Publishing Group.

Post Co. appears to be in the final laps of a major investment program. After pumping $210,000,000 into its operations from 1978 to 1980, the company will spend about $50,000,000 more this year before slowing the pace in 1982 and 1983.

The *Washington Post* appears to have been the biggest beneficiary of the spending push: A new, $68,000,000 satellite printing plant; a reported $15,000,000 to acquire the printing plant of the shuttered *Washington Star*; $7,000,000 for a computerized newswriting and editing system, and millions more for modernizing and expanding the *Post's* original printing plant.

While critics fear that monopoly newspapers cut back on quality, *Post* publisher Donald Graham, 35-year-old son of the chairman, added about 30 *Star* reporters and columnists to his paper's already huge editorial staff of more than 400 to give it even more breadth.

Partly because of the heavy capital spending, and a loss on the sale of the *Trenton Times* and another subsidiary, the company's earnings were down 24% in the first nine months this year, to $14,300,000 from $18,900,000. Earnings were also hurt by the costs of a 25% jump in the *Post's* daily circulation to more than 730,000 after the *Star* folded; the costs of the additional circulation were higher than the *Post's* ad rate increases.The company's *Everett Herald* in Washington state launched its first Sunday edition in April, and *Newsweek* added a new monthly advertising edition, *Newsweek Woman*. And its Detroit tv station, WDTV, is getting a new, $13,000,000 broadcast center.

MEDIA PROPERTIES:
Newspapers: Everett (Wash.) *Herald*; *Princeton* (N.J.) *Spectrum*; *Washington Post*.
Magazines: *Newsweek*; *Inside Sports* (up for sale).

(49% owned); *International Herald Tribune* (30% owned); Los Angeles Times-Washington Post News Service (50% owned); Newsweek Broadcasting; Post-Newsweek Distribution (distribution of video programing); Post-Newsweek Productions (production of video programing); Publishers Phototype (24% owned); Robinson Terminal Warehouse (newsprint warehousing; 92% owned);Washington Post Writers Group (features syndication).

Westinghouse Electric Corp.

Westinghouse Electric Corp., Pittsburgh, is the country's 27th largest media company, with revenues of $266,500,000 from its Westinghouse Broadcasting Co. operations in 1980. Total operating profits were $64,400,000. Media represented 3% of total Westinghouse sales of $8.514 billion.

Daniel L. Ritchie, president and chief exec of Westinghouse Broadcasting, New York, said company activities in 1980 signified the biggest change Westinghouse has seen since it entered the broadcasting business in the late 1940s.

On Oct. 15, 1980, Westinghouse Broadcasting announced plans to acquire Teleprompter Corp., the second biggest U.S. cable tv company. Eight months later—in July—the FCC approved the $646,000,000 deal. Teleprompter's revenues, which could hit $240,000,000 in 1981, will nearly double the size of Westinghouse Broadcasting.

Westinghouse paid almost 28 times Teleprompter's 1980 earnings and 4.4 times its shareholders equity to acquire the company.

■ "Teleprompter really provides us with the opportunity to become involved in what we feel the future will be," Mr. Ritchie said. "Commercial television and radio today will survive and do quite well in the mass market but the explicit growth is going to be in the cable areas."

He emphasized that Westinghouse's strength is in the area of programing. To that end, the company has begun one project and is exploring the possibility of others.

In August, Westinghouse's Group W Satellite Communications and ABC Video Enterprises entered into a joint venture to create Satellite NewsChannels, a 24-hour all-news cable tv service.

The channel is designed to provide news that is updated every 18 minutes, much like Group W's all-news radio. A second service will be designed to attract people who want a deeper look at the news.

■ Westinghouse has also entered into a joint venture with Walt Disney Productions to create and operate a family entertainment pay-cable channel.

Mr. Ritchie is concerned about the FCC's deliberations and ultimate decision concerning prime-time access. On Aug. 13, NBC asked the FCC to return to the networks the half hour of prime that currently belongs to local stations.

Westinghouse has put the half hour to good use with its syndicated "P.M. Magazine." More than 100 stations receive the show and more than 1,000 people across the country are employed to produce local inserts for the show.

Mr. Ritchie said that, in terms of revenues, an adverse decision on prime time access wouldn't be a crushing blow to Westinghouse because of a pattern set by NBC, which offered a healthy number of commercial spots to the affiliates in the half-hour in question.

Mr. Ritchie said that Westinghouse Broadcasting will not be looking to expand in the near future. However, he indicated that new properties could be acquired as a result of the company's obligation to dispose of its cross-ownership in various cable systems.

The FCC has required Westinghouse to dispose of 13 Teleprompter systems that operate in the same areas as Westinghouse tv stations. He said this would give the company the opportunity to buy or trade for other systems.

Wometco Enterprises

Wometco Enterprises, Miami, is the country's 69th largest media company, with revenues of $95,400,000 from media operations in 1980, or 27% of total revenues of $357,187,000. Broadcasting accounted for about 16% of total revenues and cable and subscription tv combined for about 11%. Total earnings last year were $20,797,000.

The publicly held company also owns movie theaters, tourist attractions and food vending operations and is one of the country's largest Coca-Cola bottlers. Although the bottling and vending businesses are each larger than the broadcasting or cable-stv divisions, Wometco sees the media operations as providing most of its growth in the 1980s.

"We think we are in a good position to grow and prosper in the tv communications industry, no matter which direction it may take," said Mitchell Wolfson, president and chairman.

At the end of July, Wometco's cable tv business had 176,000 subscribers, including 130,000 pay-cable tv subscribers, in 121 franchises in eight states and the Bahamas. In May, the company raised $17,000,000 for cable tv expansion by offering 1,100,000 shares of Wometco Cable TV to the public. Wometco retains 84% of the stock and incorporates the cable company's results into Wometco's financial statements.

■ The company's cable operations are solidly profitable. Its stv business has been losing money but is in what Mr. Wolfson called a "turnaround" situation this year. Wometco's stv operation, known as Wometco Home Theatre, offers over-the-air programing to subscribers in the New Jersey-New York City metropolitan area and at the end of June began serving the Philadelphia-southern New Jersey market over Channel 65 in Vineland, N.J.

The New York-New Jersey stv business had been operated as a joint venture with Universal Subscription Television of Burlingame, Cal., but the venture was dissolved for undisclosed reasons in June.

As a result, Wometco became sole owner of WSNL-TV a Smithtown, N.Y., station (in Long Island) used for stv programing, and now operates WWHT-TV in Newark and Home Theatre in New York with a remaining minority partner, Blonder-Tongue Laboratories of New Jersey.

In the broadcasting division, Wometco owns and operates four vhf and two uhf stations and an fm radio station. With southern Florida's continuing economic strength and heavy national advertising spending, WTVJ in Miami, Wometco's flagship station and Florida's first tv station, is a major contributor to the division's profits.

MEDIA PROPERTIES:
Broadcasting: Tv—WTVJ-TV, Miami and West Palm Beach, Fla.; WLOS-TV, Greenville/Spartanburg/Asheville, N.C.; WZZM-TV, Grand Rapids/Kalamazoo/Muskegon, Mich.; KVOS-TV, Bellingham, Wash.; WWHT-TV, Newark, N.J.; WSNL-TV, Smithtown, N.Y. Radio—WLOS (fm), Greenville/Spartanburg/Asheville, N.C.

Citrus Tower; Coca-Cola Bottling Co. franchise vending operation in southern U.S.; Conch Tour Train sightseeing tours; Miami Seaquarium; motion picture theaters in Arkansas, Florida, the Bahamas, Dominican Republic, Puerto Rico, Virgin Islands.

Worrell Newspapers

Worrell Newspapers, Charlottesville, Va., is the country's 88th largest media company, with estimated revenues of $60,000,000 from media operations in 1980. It is a privately held company, with all its holdings in media.

The past few years have been busy ones for Worrell, as it attempts to diversify its holdings. During 1979 and 1980, it acquired several broadcast outlets, but has made no acquisitions during 1981.

The company did take over management of three publications in Broward County, Fla., that have a combined circulation fo 80,000. The move may lead to eventual purchase of these publications.

Worrell owns 24 dailies in 18 states. making it the seventh largest media company in number of newspapers, although it is about 40th in combined circulation. The chain's *Potomac News*, based in Virginia near Washington, had a 10% gain in circulation when the *Washington Star* folded.

"That is not the way we like to increase circulation—at the expense of a great newspaper," said John Fitzwater, director of marketing. The *News* has been a strong performer, as has *The Daily News* of Lynchburg, Va. The Lynchburg paper, with circulation of 40,000, was a 1979 acquisition.

The broadcast division made no acquisitions, but did boost power in its CBS affiliate station in the Virgin Islands. That makes WBNB in St. Thomas one of the major stations in the Caribbean.

Although it made no broadcast buys during the past year, Worrell is looking to expand and diversify by getting into more broadcast ownership. There are, however, no pending moves into cable or radio.

The family-owned company is run by Thomas E. Worrell Jr., 36. In the five years he has been chief exec, the company has nearly doubled in size.

Ziff Corp.

Ziff Corp., New York, is the nation's 35th largest media company, with media property revenues estimated at $200,000,000 in 1980. Consumer and trade publications accounted for about 89% of that total, and six tv stations the remainder.

Estimates of total revenues for the diversified publisher and broadcaster run between $225,000,000 and $250,000,000.

William Ziff, chief exec of the company, guards the company's privacy fervently. He inherited the company from his father, a man not at all like William Ziff in style or temperment; just as the son avoids the limelight, his father, a well known author and lecturer, was always in it.

After his father's death in 1953, William Ziff bought out William Davis, a cofounder of the then 17-year-old company. The Davis name still is part of the titles of company divisions.

Ziff's strategy has always been to build, largely through acquisitions and internal spinoffs, an empire of consumer and business special interest magazines.

Among its more highly trade-promoted properties is the Ziff-Davis Magazine Network, which targets the young, well heeled, active male. They are *Boating, Car & Driver, Flying, Photography, Skiing* and *Stereo Review.*

However, if promotion expenditures are any indication, *Psychology Today,* which Z-D positions as the special interest publication of the future, is a major focal point, some say because of William Ziff's fascination with it.

This past August, *PT* launched a new consumer and trade print campaign via Chiat/Day, New York. The theme of the campaign: "Sooner or later America arrives where our readers have already been."

■ In August, 1980, Z-D acquired *Uniques,* a Santa Barbara, Cal.-based quarterly featuring photographs and descriptions of palatial dwellings being sold for an average of $1,000,000. Since then, Z-D has moved the magazine's headquarters to New York, changed its name to *Unique Homes,* expanded its coverage, increased the cover price from $2.95 to $4.95, and announced plans to increase its frequency to every-other-month with the February issue.

Although clearly committed to special interest and business magazines, the company has shown signs of diversifying into database publishing, and has studied the application of current business publications to a database. Z-D has also launched a new quarterly, *Data Sources,* with data on software and equipment geared to the information-processing industry.

Recent computer acquisitions include Information Access Corp. and Managements Inc.

The company also has shown more than a passing interest in the economic theory and consulting businesses. Last year, Z-D acquired Wharton Econometric Forecasting Assn., a think tank previously associated with the University of Pennsylvania's Wharton Graduate School of Business. Earlier this year, the company acquired Barr Rosenberg & Associates, San Francisco, a consulting operation that specializes in Modern Portfolio Theory.

With its focus on publishing and-databases, Ziff sold two fairly new acquisitions, Russ Craft Greeting Cards, Dedham, Mass., with holdings in gift and greeting lines and 17 broadcast companies, and Norcross, a Chester, Pa.-based greeting card company.

MEDIA PROPERTIES
Magazines: CONSUMER PUBLICATIONS—*Adventure Travel, Backpacker, Boating, Boat Owner's Buyer's Guide, Camera Arts, Car & Driver, Car & Driver Buyer's Guide, Cycle, Cycle Buyer's Guide, Fly Fisherman, Flying, Flying Annual & Pilot's Buying Guide, Modern Bride, Popular Electronics, Communications Handbook, Electronic Experimenters, Handbook, Popular Photography, Photography Annual, Photography Directory & Buying Guide, Psychology Today, Skiing, Stereo Review, Stereo Directory & Buying Guide, Unique Homes, Yachting.* BUSINESS & TRADE PUBLICATIONS—*A/C Flyer, Aerospace Daily, Aviation Daily, Business & Commercial Aviation, Hotel & Travel Index, Meetings & Conventions, Official Hotel & Resort Guide, Official Meetings Facilities Guide, Photomethods, Skiing Trade News, Travel Weekly, Weekly of Business Aviation, World Aviation Directory, World Travel Directory.*

Cigaret sales up in 1981

By JOHN C. MAXWELL JR.

We estimate that the cigaret industry will end 1981 with a strong 2.6% gain in units.

As usual, Philip Morris has shown the fastest growth, increasing some 6% in units and adding a share point. Reynolds is up about 3.6% and adding 0.4 of a share point. Liggett Group has increased 2.8%, primarily because of its generic cigarets, which now appear to have about a 0.4% share.

■ In the top 10, Reynolds' Salem moved into the third slot and Camel became No. 5; these were the only changes in that group. Camel is the fastest-growing major product group in the industry, with an estimated gain of 25% this year. It is interesting to note that Camel nonfilters are up some 2.6%.

Also, the rate of decline seems to be abating for such products as Pall Mall and Lucky Strike. This may harbinger a "return to taste."

The same thing happened in Germany, where the preponderant share of the market worked itself down to very low tar and nicotine and then reversed itself and went back to more flavorful products. It would be wise to watch the full-flavor and nonfilter products to see if the same trends occur here.

Reynolds' portfolio moved ahead nearly across the board this year, with More leading (up about 33%). Philip Morris also saw nearly all of its portfolio move ahead in units, with Marlboro up 6% and 0.6 of a share point. Merit and Virginia Slims were also up substantially.

■ Brown & Williamson's Barclay appears successful, with a 1.3% share for the year. In the case of Lorillard, the growth brand is Newport (up some 23%).

Low-tar cigaret consumption (*i.e.*, products with 15mg or less of tar) now accounts for almost two-thirds of the market, with the ultralow tars (*i.e.*, 0 to 6mg) in the area of 11%.

From what we can see, we continue to feel that the cigaret industry will grow modestly over the years.

On another subject, there has been considerable discussion about raising federal excise taxes on cigarets. In fact, a bill has been introduced to this effect every year for the past four years. It is our belief that this would be a bad move on the part of the government. Currently state and local governments get a goodly share of their income—some $4 billion annually—from tobacco taxes. A large increase in the federal excise tax might have an adverse effect on consumption growth, and in turn would mean a drop in income from this source of taxation for state and local governments, further aggravating the fiscal situation in many states. It would be nonsensical for Washington to expropriate this source of revenue from the localities.#

Mr. Maxwell is with Lehman Brothers Kuhn Loeb Research, New York.

Estimated low-tar cigaret consumption and full-year market shares by company

Company	Billion units 1980	1981	% of market 1980	1981

Magazine debuts in video format

NEW YORK—About 200 subscribers this week will get their first look at the initial "issue" of *Video Newscasting Network*, a 30-minute business magazine in video form.

More than 150 of those charter customers who signed up for four years are general managers at tv stations, mainly in the U.S., but including Canada, according to Tom Madden. The onetime Fred Silverman aide at NBC now is president of *VNN*, formerly called *Video News Network* (AA, June 22).

Given all those tv station decision makers receiving *VNN* in videocassette form, Mr. Madden has been focusing his ad sales efforts on syndicators. Paramount Television Domestic Distribution, through senior vp Randolph Reiss, made *VNN*'s first major "long-term" sponsor buy, with its three commercial minutes on the premiere show to emphasize the first-run "Entertainment Tonight" series and the offnet potential of "Mork & Mindy" and "Taxi."

To attain his goal of booking subscribers at the roughly 700 commercial tv stations in the U.S., Mr. Madden has ordered a total of 650 copies of the first *VNN* to whet nonsubscriber tv execs' appetites. A small syndicator with a package of drop-in featurettes on tax topics also has bought a two-minute block of time on the opening show.

Roughly 50 of the 200 starting subscribers, Mr. Madden said, are execs in the syndication, ad agency and cable tv fields. Indeed, he said he already is considering two *VNN* spinoffs, one geared solely to advertising execs, the other to catv people.

Interview subjects in the opening *VNN* will include current Federal Communications Commission chairman Mark Fowler (interviewed by former FCC chairman Richard Wiley, who is *VNN*'s Washington anchorman); Mike Weinblatt, Showtime president, who will give a sneak preview of its prime time comedy series, "Romance"; Paul Klein, who will examine the November sweeps tv ratings data; Roger Rice, Television Bureau of Advertising president, and William Baker, tv group president, Westinghouse Broadcasting Co. "Television Digest" editorial director David Lachenbruch will cover industry hardware features for *VNN*, starting with a comparison of the latest in lightweight electronic news-gathering cameras.

■ Mr. Fowler's comments will continue in the second video issue, due to reach subscribers' offices two weeks after the first one. Also due are sessions with Gus Hauser, chairman, Warner Amex Cable Communications, and an Anheuser-Busch exec, who will discuss the brewer's local tv and catv buying strategies and commercials. And, in a light moment, A-B will show *VNN* subscribers a spot that never will run anywhere else: A "beer hunter" spoof of the Russian roulette scene in "The Deer Hunter," with A-B people popping beer cans by their heads rather than pulling a gun trigger.#

USPS halts drug efforts

WASHINGTON—Twenty-one companies have agreed to stop direct mail marketing of "look-alike" drugs, and 40 other companies remain under investigation, according to Postal Service inspectors. The drugs resemble amphetamines and depressants, widely known and abused substances, and are marketed to junior high school and high school youths who believe they're buying the real thing, the Postal Service said.

Ad bureau sells NABSCAN

NEW YORK—The Newspaper Advertising Bureau has sold its NABSCAN division to a consortium of research companies and individual investors. NABSCAN will be incorporated as a separate entity by its new owners.

Although the identities of the buyers were not made public by the bureau, it is known that the group includes Market Science Assn. of Pittsburgh, a research organization that has been the chief processor of NABSCAN data.

NABSCAN, the National Advertised Brands Scanning Reports, was established by the bureau in 1974 to gather and report grocery product movement data from supermarket checkout scanners. It has become the largest such operation in the world, scanning checkout data from more than 450 supermarkets in 30 states.

Its president, Richard Neale, has indicated he will return to the bureau and a new head will be selected by the new owners.

Bureau president Jack Kauffman said one of the reasons the operation was being sold was because it has grown so large that it was in danger of dwarfing the bureau itself.

"Since the bureau's mission is to sell newspaper advertising, rather than operate a market research company, we decided somewhat reluctantly that NABSCAN belonged outside of the bureau," Mr. Kauffman said.

"We are totally committed, however, to the continuing use of NABSCAN data," he added. "We know how accurate it is; we know how timely it is, and we have seen again and again how scanner data can pinpoint consumer response to even minor changes in promotional strategy and execution."

Mr. Neale said that all current contractual agreements with participating stores, suppliers and clients would remain in effect.#

Sugarman loses in House

WASHINGTON—A congressional oversight subcommittee that has looked into the Federal Trade Commission investigation of Joseph Sugarman's mail order promotions has reported that Mr. Sugarman's comics books and other materials "do not present a fair rendering of the facts."

In comics books, speeches and advertisements, Mr. Sugarman has contended that JS&A, his Illinois-based mail order operation, has been the victim of a vendetta by FTC's staff. FTC, in turn, has insisted that its investigations show numerous violations of the mail order industry rules requiring notice to consumers whose orders are not filled promptly.

■ Rep. John Dingell (D., Mich.), the subcommittee chairman, said he does not normally get involved in cases while they are still pending in court, but added that in the investigation of the Sugarman case it was necessary because Mr. Sugarman's charges against FTC had been "widely disseminated and raised legitimate concerns in the minds of thousands of people."

While the report focuses almost entirely on the Sugarman case, it includes a strong endorsement for the FTC mail order industry rules, which Mr. Sugarman has attacked as "confusing." Referring to a statement that the Direct Mail/Marketing Assn. submitted during the subcommittee's Sept. 18 hearing, Rep. Dingell said, "It appears the rule is accomplishing the objective of protecting consumers and businessmen alike without imposing undue regulatory burdens upon the industry."

The subcommittee's staff conducted an in-depth investigation, he explained, after congressmen received "a stream of letters" from small businessmen and JS&A customers based on a comics book Mr. Sugarman published.

■ FTC's investigation began in late 1979, and sparked a fierce response from Mr. Sugarman, who contends that most of his problem relates to delivery breakdowns beyond his control because they occurred during a big snowstorm. Early last year, however, a federal judge in Chicago rejected Mr. Sugarman's complaints against FTC and ordered him to turn over his files to FTC investigators. FTC subsequently reported that over 8,000 orders had been held 60 days or more in the August, 1977-December, 1978, period, well before the snowstorm, and at FTC's request the Department of Justice is in court seeking civil penalties against Mr. Sugarman.#

Kahn heads Sara Lee unit

DEERFIELD, ILL.—In another management shakeup at the Kitchens of Sara Lee, P. Frederick Kahn, senior vp-frozen sweet goods at parent Consolidated Foods, has assumed the role of acting president, succeeding William Mahoney.

Additionally, Richard Sharoff, formerly director of planning for the frozen sweet goods group, has exchanged positions with David McSwain, previously Sara Lee's vp-retail marketing.

■ A spokesman for Consolidated said the changes were considered reassignments; Mr. Kahn "wants to learn that part of the business a little better," and Mr. McSwain and Mr. Sharoff were transferred in a "management development" process intended to "move people around to train them," he said.

Mr. Mahoney has moved to the corporate headquarters in Chicago, where he will undertake a special assignment, reporting to corporate president John Cardwell.

The move means Mr. Kahn, who already had responsibilities for Sara Lee, Chef Pierre and Popsicle Industries, will assume control of Sara Lee's domestic and international operations. As recently as last year, Sara Lee's worldwide and U.S. units were operated under two separate managements, with less direct control from the corporate office.

Sara Lee, which has been under pressure from the economy and the competition presented by Warner-Lambert's Entenmann's fresh baked goods, had flat sales in the first quarter, relative to last year, despite an increasing market share.

The company began testing fresh baked goods, produced and distributed by Campbell Taggart, in Chattanooga and Nashville this fall (AA, Sept. 14), but already has pulled out of Chattanooga tests. The spokesman said it is too early to determine the test results.

However, the company also has moved aggressively into a food service program to provide thaw-and-eat bakery products to supermarket in-store bakeries. The spokesman said Consolidated sees the national program, which permits Sara Lee products to be sold under private labels, as "an alternative way to go after the fresh [baked goods] market."#

Agency exec Clyne dies

GREENWICH, CONN.—C. Terence Clyne, 75, founder and chairman-chief executive officer of the former C.T. Clyne Co., New York, died Nov. 30 of a heart attack at his home here.

Before founding his agency, Mr. Clyne had been associated with McCann-Erickson, the old Biow Co. and Clyne-Maxon Inc. Mr. Clyne began his career in 1937 when he worked for Free & Peters radio reps. From 1946 to 1954 he was an exec at Biow Co. on the Bulova watch account, among others, before joining McCann-Erickson to head up the agency's radio-tv department. Bulova also went over to McCann during that time. While at McCann, he was involved with that shop's production of "Sky King" and "Death Valley Days" and brought many advertisers into tv.

Mr. Clyne left McCann in 1961 for Maxon Co., which later became Clyne-Maxon. In 1963, Mr. Clyne was promoted to chairman of the agency's executive committee and president-ceo a year later. Clyne-Maxon merged with BBDO in 1965. That same year, Mr. Clyne purchased a minority holding in WCIX-TV, South Miami. Later the Clyne/BBDO merger was dissolved and the agency then merged with Dusenberry Ruriani Kornhauser. Clyne Dusenberry then became C.T. Clyne Co. Mr. Clyne retired last year and key Clyne executives formed Kornhauser & Calene.#

Dep rolls new item

LOS ANGELES—Dep Corp. is introducing new unscented formula Pears soap for delicate skins. Magazine ad support is done in-house.

Author O'Toole

(Continued from Page 3)

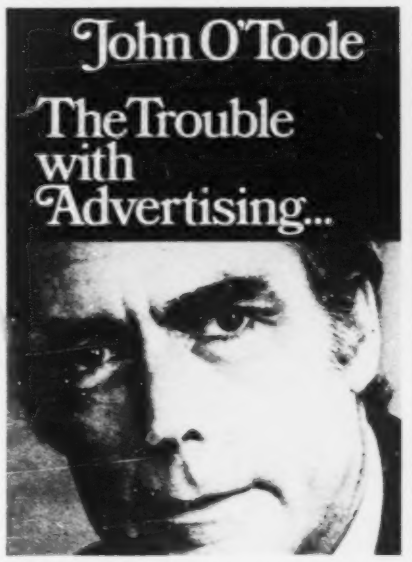
O'Toole envisions the contract would include a section that reads: "My advertising won't lie to you, and it will not deliberately try to mislead you. It won't bore the hell out of you or treat you as though you were a fool or embarrass you or your family. But remember, it's a salesman. Its purpose is to persuade you to trade your hard-earned cash for my product or service.

"In return for your putting up with all this, I'm going to support those newspapers and magazines and radio stations and tv programs you like so much. I'm going to pay for music, situation comedies, news, stories, movies, variety shows, football games, cartoon shows and reportage on every aspect of life you may be interested in . . .

"What do you say? Is it a deal? Great. I'm glad we understand each other."

Certainly, the problem Mr. O'Toole addresses is the fact that the public does not understand, nor necessarily trust, advertising. Partial blame can be placed with the violators of Mr. O'Toole's unwritten contract, false and misleading ads, impersonations of ads and boring ads.

Mr. O'Toole explains the basics of advertising, advertising people, and advertising agencies. He carefully details the entire creative process in a section titled, "Making better advertising while making advertising better." Mr. O'Toole also offers advice on developing strategy, ideas and executions. He includes the fundamental questions to be asked when creating advertising, and also provides a thinking/feeling grid system for figuring out a category's potential.



FCB's John O'Toole joins the ranks of authors writing about the advertising business with this insider's look. Published by Chelsea House, "The Trouble with Advertising" contains material of interest to both outsiders and advertising practitioners.

■ "The Trouble with Advertising" addresses the problems of advertising, the forces that the author sees as adding to the problems (*i.e.*, some government regulation), even the perpetrators of advertising's false image (he's not a big fan of another adman-author, Jerry Della Femina). Mr. O'Toole, like many in advertising, has heard all the grousing about the business. In fact, he heard from yet another critic recently when he was in Chicago for a book-signing.

"A woman walked by, saw the title and said, 'Advertising, that's all a pack of lies,'" Mr. O'Toole recounted. "At that moment, an old and dear friend of mine, John Coleman, came in. He does the weather for ABC in Chicago. He walked up and I said to the woman, 'If you think advertising is lies, I'd like to introduce you to the weatherman.' And I let her turn her wrath on someone else."#

Watching discounts, shoplifters

Retail sales may rebound, but profits?

An Advertising Age roundup

As the Christmas countdown progresses, some retailers across the country indicate an uptick is under way. But with sales being generated through price promotions and other measures that affect the bottom line, fourth-quarter profits are expected to show little if any improvement over fourth-quarter 1980.

In fact, many retail profits will be less than expected, said Walter Loeb of Morgan Stanley. Along with other anaylsts, he is forecasting lowered earnings for more than a few stores.

Additionally, Mr. Loeb is predicting that shoplifting will exact a higher toll from retailers this year, given the fact that many consumers simply "don't have money right now" and that stores have cut back on personnel.

Said one exec from a Philadelphia department store, "There's no doubt that shoplifting is a great area of concern and it's on the rise. People are in a desperate mood. And stores did not hire as many extra salespeople this year as they have in the past."

According to the Business Council in Washington, retail "inventories are generally not considered to be in very bad shape, and retailers are responding quickly to their inventory problems. Therefore, we expect the inventory adjustment this time to be both shorter and milder than that which accompanied the 1980 recession."

In Philadelphia, a major retailer resorted to a one-day, off-price spectacular earlier this month, exclusive of its post-Thanksgiving sales. This was a first for the store, and was deemed necessary because, as one exec put it, "People are very price conscious and worried about the economy."

From New York, B. Altman & Co.'s George Hanley, vp-sales promotion director, said, "The business is there, but you have to reach for it. It is not the year of the pet rock," a reference to a fad item of a freer-spending time.

Midwestern retail chains expect to follow a pattern that has emerged during the yuletide season over the last several years—soft sales in early December followed by heavy buying within the last two weeks before Christmas. But they, too, are attempting to lure customers with price-discounting promotions.

Major retailers are reluctant to predict the extent the Christmas

Clean sweep

General Motors is turning to a sweepstakes promotion to bring in customers. The four-page color newspaper insert will run Jan. 10.

GM tries sweepstakes

By RALPH GRAY and JAY McCORMICK

DETROIT—General Motors coupon clippers, usually an elite set of investors, will be joined by some 2,000,000 others if all goes well in an upcoming GM "Match & Win" auto sweepstakes.

It's the first time the No. 1 auto maker has used such a promotion to stimulate the auto market, which has remained sluggish despite such inducements as rebates, interest rate ceilings and special sales.

The national new car sweepstakes is the most far-reaching dealer showroom traffic builder in GM's history. It was announced last week by company president F. James McDonald, a move that underscored its importance at GM headquarters.

GM is hoping for a 5% redemption rate for the 41,000,000 newspaper insert sweeps coupons that break Jan. 10 in 257 Sunday papers.

The promotion gives GM a healthy shot at the women's market, since women are the primary users of coupons. In some cities, the four-page insert will be the centerpiece of a larger coupon insert that includes coffee, cereal and pet food advertisers.

The coupon package was produced by George F. Valassis & Co., Livonia, Mich., which sends them out every two weeks to 135 cities. The GM insert

SAYS IT'S 27TH LARGEST

D&C, Free shops join as $175 million agency

By FRED DANZIG

NEW YORK—A new agency, Laurence, Charles & Free, has been formed by the principals of 29-year-old Daniel & Charles Associates and F. William Free & Co., a 12-year-old agency.

The new entity, claiming 1982 billings at the $175,000,000 rate and the ranking of No. 27 on the roster of largest U.S. agencies, based on the latest agency chart compiled by ADVERTISING AGE, maintains a publicly held status. This is because Daniel & Charles is owned by Mickelberry Corp., New York, a public company active in the manufacture and marketing of meat specialty products and in agency ownership. (Mickelberry also owns Nadler & Larimer.)

On the client side, the new agency continues as a major Bristol-Myers agency with Ban, Bufferin and Comtrex, and Drackett's Mr. Muscle oven cleaner, Endust and Drano, all from Daniel & Charles. It also is Abbott Labs' agency for Murine and Selsun Blue, again via D&C.

■ American Brands is a shared client, with Tareyton and the revived Lucky Strike cigarets at D&C and Carlton handled by Free. Carlton, billing $28,000,000 in 1980, is Free's largest client. The merger, of course, carries the blessings of American Brands and Bristol-Myers.

But one client that is not surviving this get-together is D&C's Schenley Industries, with its estimated $5,500,000 in billings for such brands as Ancient Age, Canadian MacNaughton, DuBouchett cordials and other beverages. D&C had to resign the business because Free brings with it the $15,000,000 Heublein account, consisting of Black Velvet Canadian, Jose Cuervo tequila, McMasters Canadian, Black & White scotch and Irish Mist.

Other D&C clients are American Safety Razor, American Assn. of Retired Persons, Del Laboratories and General Mills' Gorton's food division. Free represents Adidas, Alfa Romeo and Coca-Cola Foods (for Active yogurt).

Laurence, Charles & Free, with 175 employes—50 from the Free agency—remains at 261 Madison Ave., where Daniel & Charles had earlier leased a third floor in order to accommodate its growth. This morning, as that floor fills with staffers from Free, the agency is still coping with a shortage of

Holiday season slide

Nets warm up for 1st quarter

By COLBY COATES

New York—Sports and first-quarter sales tended to dominate talk last week as the tv networks slid into the rerun and specials-filled holiday season.

At this time of year both prices and viewing levels are traditionally at their lowest point, though the pace of activity within the network sales departments is quite fast. As noted earlier (AA, Nov.9), the networks are anticipating a robust first-quarter scatter market, especially in prime and daytime. What's made some network execs even more bullish is the recent but welcome trend of falling interest rates.

"You can't underestimate the importance of interest rates and the correlation between lower rates and the flow of ad dollars," said CBS-TV vp-sales Paul Isacsson. Another barometer of the marketplace, automotives, also is looking up, with Ford and Chevrolet recently having come in with substantial buys in both sports and prime time. Earlier in the year, some execs fretted that automotives were only spending at last year's levels and not adding on to keep pace with inflation. But the word now is that they are in the marketplace at levels that will surpass last year. Still, several agency buyers pointed out that all three networks have inventory in all dayparts, and felt confident that their scatter buys would be at prices not that much higher than the upfront marketplace.

With one eye on scatter, many buyers also are following developments in both college and professional football.

NBC has confirmed the it has given the College Football Assn., the breakaway group representing

Helping make America work

United Automobile Workers Union is working on its sullied image by tying in with the Space Shuttle and other American successes. "Here's one of the latest models put together by the UAW," says one union member in a new tv commercial. The slogan: "The UAW wants to help make America work again." (See story on Page 71.)

Hardee's will try to convert Burger Chef

By RICHARD KREISMAN

The planned acquisition of General Foods' Burger Chef chain moves Hardee's Food Systems another step forward in its evolution from a southern regional chain to a national fast-food marketer.

The Rocky Mount, N.C., company said last week it will start a conversion test of an unspecified number of company-owned Burger Chef units to Hardee's in the first quarter of 1982, and soon after hopes to convince franchisees to move under the Hardee's banner.

While the $44,000,000 sale still awaits government approvals, it is expected to clear because the chains are not direct competitors. Hardee's operates about 1,400 restaurants in the Southeast, mid-Atlantic and upper Midwest. Indianapolis-based Burger Chef is strongest in Midwest markets such as St. Louis, Cincinnati, Detroit and Indianapolis.

■ "This is a logical step for Hardee's," said Breen Condon, vp-general counsel. "The acquisition will give us a bridge to connect the South and the North."

The sale takes General Foods out of the fast-food industry after almost a decade of painful losses with the Burger Chef chain, which it acquired in the late '60s in the hopes of developing a national chain. That never happened, but via a retrenchment the chain rebounded, revamping its menu, adding new products, refurbishing units and spending heavily to advertise the changes.

The 679-unit chain is expected to be profitable this year, according to Burger Chef execs, and industry observers said the Burger Chef turnaround, particularly in improved operations, was a key factor—as well as the price—in Hardee's decision to acquire the chain. Mr. Condon said Hardee's had previously slated several Burger Chef markets for its own expansion over the next few years. "The situation presented itself and it was too good to pass up," he said.

Even if Hardee's moves quickly on the conversion of Burger Chef's 259 company-owned restaurants, it is obligated under franchise contacts to provide marketing and support services to the chain's licensees. Mr. Condon said Hardee's "fully intends to live up to that contract," but will meet with franchisees early next year to propose the Hardee's conversion.

■ If the changes are made, the combined chain will most likely consolidate its ad account. Bo Batchelder, Hardee's senior vp-marketing, was not available for comment. Mr. Condon said no decision has been made regarding agencies —"I don't think it has been considered yet. It is too soon."

Benton & Bowles, New York, is agency of record for Hardee's. Ogilvy & Mather, Chicago, handles

CHINA

In recent years, advertisers and agencies in the U.S. were extremely optimistic about the potential market represented by China's 1 billion consumers. Some, such as McCann-Erickson and client Coca-Cola, still are. But many others feel that China was oversold, and that the Chinese government is putting consumer products at the bottom of its priority list. This week Section 2 looks at the future for consumerism in China—beginning opposite Page 40.

N.Y. catv sale is rumored

By ROBERT RAISSMAN and JAMES P. FORKAN

New York—Word that Teleprompter Manhattan Cable TV might be up for sale traveled fast through the catv and financial communities late last week.

At the same time, New York City's board of estimate officially awarded the non-Manhattan catv franchises.

During a q&a session at Paine Webber's "outlook for the media" conference, J. Richard Munro, president, Time Inc., told analysts, "Teleprompter would love to take a walk from Manhattan," where it has had one-half of the catv franchise since August, 1970. The reason, industry sources said, is the considerable expense that will be required to upgrade that system to match the state-of-the-art technology that will be installed in the other New York City boroughs.

Moreover, the Big Apple may find more than one system trying to leave. Mr. Munro also told the same meeting of security analysts that Time Inc. itself will "look twice" if the city "wants too large a pound of flesh" to modernize the

Coen: '82 ad volume $68.5 billion

NEW YORK—Total advertising investment in U.S. media will be up 11.7% to $68.5 billion in 1982, according to Robert Coen, senior vp of McCann-Erickson U.S.A. His 1982 forecast for the industry is slightly more optimistic than his 1981 prognosis.

Speaking at the 1981 conference on the outlook for media staged annually by Paine Webber Mitchell Hutchens, Mr. Coen predicted national broadcast would be up 12% in 1982 to $11.5 billion, national print would be up 11% to $6.9 billion and other national media would be up 12% over a year earlier, to $19.3 billion.

■ Mr. Coen's 1981 predictions read: National broadcast up 9% to $10.15 billion, national print up 10% to $6.13 billion and other national up 10% to $17.1 billion. The 1981 overall spending figure predicted by Mr. Coen was up 10.8% to $60.8 billion.

The biggest gains in national advertising revenues this year will be experienced by newspapers, up 16% to $2.7 billion, as opposed to $2.35 billion rung up in 1980. The second largest is radio, up 14% to $1.08 billion. Spot tv was predicted to be up 13% to $3.7 billion, other media up 12% and magazines up 11% in 1981, according to Mr. Coen's tally. Network tv shows the smallest gain, up 8% to $5.54 billion from $5.1 billion in 1980.

In various product categories, Mr. Coen tracked the greatest increased spending by wine advertisers, up 77.4% in the first nine months of 1981. Radio, tv and hi-fi advertisers increased spending by 21.7%; airline advertising was up 17.4%; food advertising was up 16.3%; automobile advertising was up 15.8%; pet foods up 15.6%; drug/remedy marketers up 3.5%, and toiletries and soaps/cleaners up a mere 0.8% and 0.3%, respectively.

In national newspaper expenditures, the greatest gain was in industrial advertising, up 44%. Tobacco ad spending was up 27% and hotels/resorts up 25%. The smallest gains were in publishing and media newspaper expenditures, up a slight 6%.

The top product category changes for magazines for the first nine months of 1981 came in automobiles, up 28% over the first nine months of 1980, and in toiletries, up 15%. Alcoholic beverages showed the least gain, up 1%.

LOOKING FOR NEW OUTLETS

Big media prices a turnoff

NEW YORK—The cost of advertising in media has escalated to a point where advertisers are starting to turn away from traditional uses of national media, according to Herb Maneloveg, senior vp-partner and director of media marketing services, Della Femina, Travisano & Partners.

"There is more concern by advertisers on where and how they purchase [media]," Mr. Maneloveg said at the media outlook seminar orchestrated by Paine Webber Mitchell Hutchens. "Bigness is no longer a guarantee of advertiser interest, especially if bigness brings a huge price tag with it," he said.

Elaborating on his theme, Mr. Maneloveg noted that while *Sports Illustrated* was doing well, *Golf Digest* and *Tennis* were doing better; where *"Time* and *Newsweek* are standing still, *Forbes* and the *Wall Street Journal* are going gangbusters," and that *Esquire* was resurgent in its category.

Big names in magazines carrying big price tags, he said, were *McCall's, Reader's Digest,* Time and *TV Guide,* whose four-color page costs are $65,000, $89,000, $75,000 and $76,000, respectively. And a 30-second prime time tv spot costs about twice as much as those magazine full-page ads, he said.

■ At those prices, Mr. Maneloveg stressed, advertisers must find new outlets for their messages, such as early news shows, as well as specialized magazines. Noting that the basis of national advertising efficiency involves both reach and frequency, Mr. Maneloveg pointed out that national rates are making audience reach and frequency difficult. At the same meeting, Lawrence Grossberg, vp, J. Walter Thompson Co., predicted average network ratings would be on the decline as a result of the growth of cable and pay tv. But he added that the amount cable snares will not be as great as many network doomsayers have predicted.#

world news roundup

LONDON—BNRR Needham Ltd. has taken on one of Britain's single biggest brand accounts with the $9,500,000 United Biscuits McVitie's line. Needham, which won the account from Saatchi & Saatchi, already had $3,800,000 of McVitie's business.

HAMBURG—Team/BBDO, still smarting from loss of billings due to the breakaway last summer of Scholz & Friends, is getting back on a winning track again with the gain of a $4,000,000-plus account from Schwarzkopf of Hamburg, one of Germany's top haircare and grooming marketers.

TORONTO—Equal, the aspartame-based tabletop sugar substitute currently in two small U.S. test markets, is scheduled for national rollout in Canada in January.

BUENOS AIRES—Argentina has arranged to lease six of the 24 transponders for Brazil's twin communications satellite as a stopgap measure until it builds its own, not before 1983.

SAO PAULO—J. Walter Thompson Co. will open another office here in early 1982 to further expansion aims in Brazil and handle possible account conflicts. The new agency's first account is Kellogg's baby cereals. JWT already handles Nestle baby foods.

Air appliances clean up holiday sales

By GAY JERVEY

NEW YORK—One Christmas it was Water Pic. Then came hair curlers, blow dryers and multifaceted makeup mirrors. This year, consumers are letting their noses do the shopping, and the result is a holiday business bonanza for air-freshener appliance marketers.

Until recently, such appliances have been a well-kept secret. However, growing environmental concerns and the antismoking clamor have led more people to become skittish about pollutants, inside and out. Thus, these small filters, which clean, deodorize and recirculate indoor air have come of age and are being offered by a growing number of companies.

Like any new category, this one is rife with intramural backtalk about who got there first and whose product reigns superior. One thing that is certain, however, is that at a time when "flat, flat, flat" is nearly all one hears about most businesses' growth expectations, air fresheners are galloping ahead. An estimated 3,600,000 to 4,000,000 units will be shipped this year, up from 1,000,000 last year, with 1982 projections anywhere from 5,000,000 to 8,000,000.

The category currently is dominated by three brands: Norelco, Pollenex and Rush-Hampton, which together account for at least 80% of the business. Exactly how many other contenders there are remains uncertain, with estimates ranging from 10 to 20, and fewer than 10 advertising in a big way. New contenders, particularly those hoping to cash in on the Christmas rush, seem to arrive on the market every day.

At the moment, Norelco leads the pack, with an estimated 56% share, according to "Flynn Reports," a publication of Flynn Audits, New Canaan, Conn., which periodically tracks the appliance business. Pollenex follows with 22%, and Rush-Hampton is just a whisper away at 19%. The remaining 3% is left to the smaller marketers. At press time, however, a more recent Flynn report was due. Commenting on its probable findings, Ron Wahra, account supervisor on the Norelco account at McCaffrey & McCall, New York, demurred that Norelco's lead was likely to slip, if only a bit. He maintained that it's difficult to hold on to that kind of margin even in the best of times, much less with competition getting hotter every day.

North American Philips Corp.'s consumer products division, Stamford, Conn., was the first contender to advertise heavily nationally, backing its line of Norelco clean air machines introduced in May, 1980. Initially, the company confined itself to print, with ads

Class snack

Classy gold packages are used by Nabisco for its new five-item line of dessert cookies, now being introduced into the Northeast (AA, Dec. 7). Print ads like this, from William Esty Co., support the launch.

MUCH TO ANPA'S DELIGHT

House calls for AT&T curb

WASHINGTON—With Senate action completed, a House subcommittee has launched its version of telephone industry deregulation to cheering from the American Newspaper Publishers Assn.

The publishers are delighted because the bill introduced last week by House telecommunications subcommittee chairman Timothy Wirth (D., Colo.) tightly curbs the role American Telephone & Telegraph can play in the market for future electronic information services. Rep. Wirth promised hearings would begin early next year.

ANPA chairman and president Katharine Graham, chairman of the Washington Post Co., greeted introduction of the Wirth bill with a statement predicting that "if these provisions are enacted into law, the American public will be the beneficiary of the rapid development of electronic information services offering an unprecedented diversity of sources." AT&T had no immediate comment.

After intensive publisher lobbying, the Senate amended its bill with language prohibiting AT&T from selling its own "mass media services" to telephone subscribers in its monopoly markets (AA, July 13 *et seq.*). The House bill is even broader, barring AT&T from offering its own "information publishing services" over its Bell lines.

Wirth aides said their bill goes beyond mass media and would keep Bell from assembling and marketing its own data bank services over its own transmission lines. Unlike the Senate bill, it would require all major phone companies to deal on an equal basis with all electronic publishers seeking access to the telephone system.

AT&T had complained bitterly that the restrictions prevent it from offering an electronic version of its print Yellow Pages while other print media are free to exploit electronic transmission for their information. ANPA argued that AT&T would be in position to discriminate against other electronic information suppliers who would need access to Bell telephone lines in order to compete.#

Outlook for '82

(Continued from Page 3)

"We could end up with another significant year for advertising," Mr. Coen said.

Some of the other reports at the Paine Webber conference:

Magazines

Following a year in which magazine ad revenues increased on target—up about 10% over 1980—industry experts are forecasting that 1982 will bring a gain of between 8% and 12% over the $3.3 billion in ad revenues recorded in 1981.

At the Paine Webber conference, Arthur Karlan, vp, Newsweek Inc., said that he was basing this projection on planned rate increases by most magazines, the same standard that he said accurately predicted 1981's revenue gains.

Beyond 1982, Mr. Karlan is optimistic about the future of magazines. He dismissed arguments that the print media will be hurt by the growth in cable and video technology, arguing that "the public needs time to assess information being thrust at them." He said the so-called information explosion "will underscore the basic health of magazines."

He added that the magazine industry will also be helped in the coming decade by changing demographics of the U.S. population.

Although the total adult population is expected to grow only about 12% by 1990, Mr. Karlan said that census figures project a 21% increase in the 18-to-44 age group, a 42% increase in college-educated persons, a 74% increase in homes with an income of more than $25,000 a year and a 17% increase in working women. All of these groups are higher-than-average magazine readers, Mr. Karlan said.

Mr. Karlan's optimism is shared by John Scott, president of Times Mirror Magazines. He said 1982 "should be the best in history for the magazine industry."

Mr. Scott agreed that the industry should experience a 10% to 12% increase in revenues, with a typical magazine in the country's top 100 earning a net profit that will be around 4% of its 1982 revenues.

Newspapers

The recession and its effects on newspapers notwithstanding, execs at some of the largest U.S. papers are confident about their industry as they look ahead to '82.

This last year, despite some drops in advertising, held up better than most analysts had initially thought, and it is expected that 1982 will be at least as good a year as 1981.

For all of 1981, ad revenues are expected to increase by 13%, with linage up about 1%, according to Newspaper Advertising Bureau estimates. The revenue gains break down into a 14% increase in retail, a 10% increase in classified and a 16% gain in general advertising.

For 1982, revenues will probably increase 12%, predicts Edward Parmalee, vp-marketing, Knight-Ridder. Most of those gains will come from increased spending in retail and national advertising, mostly due to what Mr. Parmalee said will be rate increases of around 11% at most major newspapers. Classified linage will continue to be depressed by the economy, particularly in the year's first quarter, but should pick up by the end of the year, Mr. Parmalee said.

Although advertising-to-sales ratios declined last year among many retailers, Mr. Parmalee said these should bounce back as the economy starts to improve later in the year and as store shoppers experience the full benefit of the 1982 tax cut. He predicted that retail sales will be up 9% next year—as opposed to a 7% increase in 1981—and the increase should translate into heavier advertising by retailers.

Newspapers are becoming increasingly efficient in targeting certain of their editions, Mr. Parmalee added, explaining that while full-run editions will only increase about 1% in linage next year, partial runs will show an increase of about 10%.

State, local and national elections will also boost advertising spending, he said.

National advertising in newspapers has become increasingly important to the bottom line, Mr. Parmalee said, pointing out that national ad revenues increased 17% in the past year and that newspapers now have a market share of about 7% in national advertising.

Fred Harris, vp-finance, Dow Jones, predicted that newspaper linage would be "flat to down" in the first half of 1982 and "flat to up" in the last half of the year. Over-all, he thought political advertising would help boost the yearly linage total to about 1% to 2% higher than this year, with revenues increasing by 12%.

Newspaper earnings are being helped by more aggressive pricing of the product, Mr. Harris said, explaining that 32% of all papers now sell for 25 cents, compared to only 8% of the papers in 1979.#

Time tries cable clusters

NEW YORK—J. Richard Munro, chairman of Time Inc., said the company has embarked on a strategy of clustering its American Television & Communications Corp.'s basic cable systems to prepare for inevitable ad revenues.

"We are looking toward markets where we will have the coverage and clout to serve advertisers, who in five to 10 years will be knee-deep in cable tv with important dollars," Mr. Munro told analysts at a media outlook conference here sponsored by Paine Webber Mitchell Hutchens. He said ATC already has begun to trade off certain cable systems that do not fit into the cluster concept. "It [ATC] is emphasizing contiguous growth, accelerating the buildout of systems in major ATC cities or in regions where it has established more than an isolated presence."

ATC, he added, was in no hurry to rebuild or upgrade existing systems because most franchises don't come up for renewal for about five years. He said that as renewals approach, the market will dictate how a system is to be changed.

By clustering systems, Mr. Munro said, ATC could be the leading cable operator in specific chosen markets rather than a minor operator in scattered ones. "We see those markets as profit centers from advertising," he said.

Although the situation parallels the one tv stations are in today, ATC would have two sources of revenue—subscribers and advertisers.

According to Mr. Munro, ATC will have added nearly 500,000 new subscribers by the end of this year, bringing it to almost 1,800,000 homes. He said ATC ranks No. 1 in subscribers among all basic systems.

Time Inc.'s other video subsidiary, Home Box Office, will close 1981 with 8,000,000 subscribers, more than twice as many as the nearest competitor, Mr. Munro said. He noted that the entry of Spotlight, Times Mirror's movie channel, would not affect HBO but could have some bearing on Cinemax, a companion service of HBO.

In 1982, he said, nearly one-third of HBO's movies will be exclusive because of prebuys. He added that HBO will enter into exclusivity agreements with studios for feature films. However, he said the duration of the agreements would not be "forever" and would not affect HBO's profit margins.#

'Business Week' to try series

By ROBERT RAISSMAN

NEW YORK—McGraw-Hill is planning to enter the burgeoning business tv market with a weekly half-hour program based on *Business Week* magazine.

Although the project is still in preliminary stages, Don Rubin, vp-public affairs at McGraw-Hill, said the show could be put into syndication some time in 1982.

"Like most ventures, we are proceeding in stages," Mr. Rubin said.

The first stage, a treatment of the show, has already been produced. It met with approvals and a go-ahead was given for production of a pilot. The pilot is being produced by personnel from *Business Week* and the company's broadcast division.

Mr. Rubin said the show's format, still being shaped, will rely heavily on *BW* contents.

"We have an idea and it's being looked at," he said. "There isn't even a title for the show, so to suggest any kind of format now would be premature."

Joseph L. Dionne, president-chief operating officer at McGraw-Hill, said the program could be the first step in taking the company's publications to specialized markets through television.

Mr. Dionne said the second step in the plan could be production of business news briefs to be inserted in local newscasts. He didn't rule out the possibility of also extending some of the programing to cable.

If the McGraw-Hill project is successful, the show will join a number of new entries. In October, "The Nightly Business Report" premiered as television's first national business news program. The show debuted initially as a 15-minute show on WPBT, the Miami public tv station. Other new entries are the Financial News Network, which began last month on 15 cable and broadcast channels and "Moneyline," which runs nightly on the Cable News Network. Dow Jones & Co., which has been syndicating its *Wall Street Journal* news briefs to commercial tv stations, also is offering its Dow Jones Cable News to catv systems.#

Perfect score for 'Time Z'

NEW YORK—The computer has given Time Inc. new sales ammunition for *Time Z*, the special demographic edition of *Time* that goes to upscale households.

Previously boasting 97% of its 1,200,000 circulation among households with incomes of $40,000 or more, *Time Z* as of Jan. 1 will provide 100% of its circulation in that rarefied category. This was achieved as PRIZM, the syndicated service that defines 10 cluster groups in demographic and life style terms, found upscale readers residing in Zip codes that are not considered upscale. PRIZM tags four of its 10 groups as "magazine dominant." Three are considered "tv dominant" and the rest are dual usage groups. The four magazine dominant groups selected by *Time Z* are said to account for the largest volume of usage in such key product categories as foreign airline travel, table wines, business travel, air travel cards, 35mm cameras, etc.

The stepup in PRIZM coverage coincides with a previously announced rate hike for *Time* and its various editions.#

Dailies show gain in Sept. ad totals

NEW YORK—Expenditures for newspaper advertising in September totaled $1.506 billion, a gain of 15.6% over the same month a year ago, according to preliminary volume figures that are prepared by the Newspaper Advertising Bureau for ADVERTISING AGE.

For the first time this year, the retail category had the largest monthly growth percentage, increasing 21% to $838,300,000. National advertising expenditures for the month were $229,600,000, a gain of 13%. Classified rose 8% to $438,300,000.

For the first three quarters of 1981, ad spending in newspapers totaled $12.828 billion, a 16% gain over the first nine months of 1980.

Retail advertising for the period was $6.828 billion, up 16%; classified advertising was $3.920 billion, up 14%; national was $2.080 billion, up 23%.

The bureau's estimates are based on measurements by Media Records Inc. in 63 index cities, plus other data.

■ In individual categories followed by Media Records, ad spending for headache remedies and sedatives showed the largest gain over the same period a year ago, with a 195% increase to $18,978. Following close behind was spending on coffee and tea, up 155%. Third-largest gain was made by soft drinks, up 127%.

Only two of the 16 categories measured were down in September. Spending on cigarets declined 10% to $6,790,500, while publishing and media categories dropped 3% to $8,534,000.#

Meagher resigns at Penthouse

NEW YORK—Mark J. Meagher has resigned as president-chief operating officer, Penthouse International Ltd., effective Dec. 31. Mr. Meagher, former president of the Washington Post Co., joined Penthouse, publisher of *Penthouse* and *Omni*, last April. With his departure, the title of president reverts to publisher Robert C. Guccione. David J. Myerson, exec vp, becomes chief operating officer. Mr. Meagher, together with Sash A. Spencer, chairman, Holding Capital Management Corp., have completed their plan to open Meagher-Spencer Associates, New York-based company that will seek to acquire companies for private investment purposes. Their company will begin operations on Jan. 12.

Other people moving:

C. Robert Brooks to West Coast advertising manager at *TV Guide*, succeeding **Richard Cook**, who is retiring. Mr. Brooks, a member of the Los Angeles sales staff since 1973, was named Los Angeles ad manager a year ago.

Donald Kilmartin to New York ad manager, *House & Garden*, a new post, from sales rep. Also at *House & Garden*: **Timothy Knipe** to national manager, design and decorating, a new post, from international business manager.

Thom Ferro to national sales manager, Westwood One radio syndication, Culver City, Cal., from regional sales manager.

Robert Pittman to senior vp-programming, Warner Amex Satellite Entertainment Co., New York, from vp-programing. Besides MTV: Music Television and The Movie Channel, he will oversee program development.

Ernest Vitucci to administrative assistant to the director of display advertising, *Los Angeles Times*, from administrative assistant to the retail advertising manager. He succeeds **John Gail**, who retired.

Lynn M. Ingham to associate advertising director, *San Francisco*, from supervisor of fashion accounts. She succeeds **Dan Obst**, who left. **Susan Cohen Strange**, former editorial production manager, *Inside Sports*, succeeds Ms. Ingham.

Robert Netupski to vp-marketing, a new title, *New Britian* (Conn.) *Herald*, from marketing director.

Edward J. Murphy, corporate vp, Jackson Newspapers, New Haven, Conn., adds vacant title of assistant general manager.

David P. Sifford to president, Comworld International, Nashville, new sydication division of Comworld Group, from president, Osmond TV Sales.

Julie Osler to director of pr, RCTV's Entertainment Channel, New York, from a similar post at Showtime Entertainment, succeeding **Lisa Getman**, now director of marketing support services.

Rick Rosencrans to the new post of director of affiliate relations, Cable Networks Inc., New York, from programing coordinator, UA-Columbia Cablevision.

George Cooney to chairman of the newly formed videotape duplication and post-production joint venture of Columbia Pictures Industries and Bell & Howell Co., while remaining New York-based general manager, Columbia's EUE/Screen Gems tv commercial production division. **Robert Pfannkuch** to Northbrook, Ill.-based president of the joint venture, from president, Bell & Howell's video group.

James G. Chapman to publisher, *Energy User News*, published by Fairchild Publications, New York, a Capital Cities Communications company. Mr. Chapman fills a post now being relinquished by **Daniel Newman**, named Fairchild president in 1980. Mr. Chapman also will continue to serve as ad director of *EUN*.

Nory LeBrun to the new post of vp-cable sales and marketing, Turner Broadcasting Sales, Atlanta, from general manager of cable sales. He will coordinate sales and marketing of Cable News Network, CNN2 and superstation WTBS.

Joseph G. Antelo to exec vp, WGN Continental Productions Co., Chicago, from vp-director of sales, WGN Continental Broadcasting Co., succeeding **Jack Jacobson**, who joined Sportsvision as vp-operations. **John Suder**, marketing director at parent company Tribune Co. Broadcasting, acts as WGN's general sales manager until a replacement is named.

Harold J. Silver to exec director of advertising, a new post, Encyclopaedia Britannica-USA, Chicago, from director of advertising. Also, **Alan B. Boyer** to director, direct mail and special list advertising, a new post, from direct mail manager, and **Marguerita Weiss** to the new post of creative director of mail order new products and direct mail lead advertising from director of new products.

Also:

Leslie Walker to the new post of marketing manager, United Cable Television, Grand Junction, Colo. . . . **Lane Saunders** to general manager, KMBY, Billings, Mont., a Peoria Journal Star station, from KOOK . . . **Susan Brumett** to promotion manager, Century Communications, Skokie, Ill. . . . **Vaughn E. Rockhold** to national sales manager, *Government Product News*, a Penton/IPC publication, Cleveland.

ELECTED VPs:

Robert O. Southard, WFRV Television, a newly formed subsidiary of Midwest Radio-Television, Minneapolis . . . **Thomas M. Drape**, Universal Press Syndicate, Fairway, Kan.#

P&G's Wehling elected chairman of PMAA

CHICAGO—Robert L. Wehling, division manager, general advertising, Procter & Gamble Co., has been elected chairman of the Promotion Marketing Assn. of America. Elected vice-chairman was Robert J. Evans, manager-promotion services, Gillette Co.

Elected vps were: Nicholas A. Rago, vp-marketing, Armour & Co.; David M. Levi, director of promotion services, General Mills; Daniel O. Haas, manager-promotion services, Coca-Cola Co.; John C. Young, director of promotion, Scott Paper Co. Robert L. Callahan, general counsel, Coca-Cola Co., was elected secretary and Thomas J. Conlon, president, D.L. Blair Corp., was elected treasurer.

NBC grid bid fumbled; who will recover?

By JAMES P. FORKAN

NEW YORK—Although NBC Sports president Arthur Watson may feel as frustrated as Charlie Brown when Lucy yanks away the football as he starts to kick off, some squeals of delight were heard elsewhere at the apparent collapse of NBC's $180,000,000 College Football Assn. deal.

NBC Sports execs were sorely disappointed when most of the 61 CFA colleges voted against the proposed four-year NBC contract, partly out of fear of expulsion and other reprisals from the National Collegiate Athletic Assn. Big-time football schools had looked to CFA to get more tv exposure, and with it much-needed funds. The network stood to land the most powerful campus grid teams as a prime time attraction.

But, as Yogi Berra used to say, "It ain't over till it's over." The official word at NBC Sports is that the CFA deal is finis, but a spokesman hedged a bit by saying, "It's dead for now." A court case in Oklahoma City still is going on to decide whether the NCAA could punish CFA rebels, it was pointed out. The judge's ruling is expected in early February.

Merry Charlie

Charlie model Shelly Hack and Santa Claus step off together in a bright red, Merry Christmas-message print ad from Revlon. In-house 50th Floor Workshop is the agency. The other message: Charlie is "the gorgeous, sexy-young fragrance."

GANNETT SETS '82 LAUNCH

Ad industry skeptical on national daily

WASHINGTON—Gannett Co.'s announcement last week that it was going ahead with its national newspaper, *USA Today*, produced a standing ovation from Gannett execs at the annual corporate gathering here, but few people outside the company seem to be cheering the paper's chances for success.

"We remain skeptical," said John Morton, newspaper industry analyst for Lynch, Jones & Ryan, a Washington securities firm. "We still haven't sensed any appetite for a national newspaper beyond the *Wall Street Journal* and, to a limited extent, the *New York Times*. And we haven't found any [non-Gannett] newspaper executives who think it's a good idea."

"I really don't see any need for the paper," added Frank McDonald, senior vp-director of marketing and media services for Cunningham & Walsh, New York. "The local newspapers, not to mention tv, do such a good job with national news that why should people turn to a national paper such as this?" Mr. McDonald predicted that Gannett would be "disappointed" with the paper's performance.

Industry execs and followers interviewed by ADVERTISING AGE unanimously conceded, however, that Gannett has researched the idea exhaustively and is probably the one company that could make a general national newspaper a success. "One thing about Gannett—they are not dumbbells," Mr. Morton said. "Maybe they have discovered or identified an audience . . . not readily apparent to the rest of us."

Indeed, Gannett officials said last week the company and its ad agency, Young & Rubicam, have met with no fewer than 51 national advertisers and ad agencies since last summer to sift reaction to the idea, and apparently found little to dissuade them from proceeding. And in announcing the decision to Gannett execs, Allen Neuharth, Gannett chief executive officer, said that the company's previously announced goals for *USA Today* of a circulation of 1,000,000 to 2,000,000, annual revenues of at least $250,000,000 and profitability in three to five years "are not only achievable but exceedable." In the

last minute news

Republic's $20 million account goes to C-M

MINNEAPOLIS—Republic Airlines has named Campbell-Mithun here to handle its estimated $20,000,000 passenger advertising account, which had been at Hoffman, York & Compton. The carrier will be on-air with new creative by late January and is exploring the possibility of using network tv. C-M chairman George Gruenwald had no comment when asked whether the agency's Chicago office will resign Air Chicago, set to start service in the spring (AA, Aug. 8). Air Chicago president Bruce Edmondson said late last week the airline will "most likely" leave C-M.

Harte-Hanks, Belo name C&W in Dallas

DALLAS—Harte-Hanks Communications, San Antonio, and Belo Information Systems, Dallas, named Cunningham & Walsh/Dallas as agency. Both were at KCBN, which becomes Arnold Harwell & McLain Jan. 1 following the move of Harve Chapman from KCBN to president of C&W/Dallas (AA, Nov. 16). H-H budget: $1,000,000-plus.

B.A.T. eyeing Barclay-like cigaret in Britain

LONDON—British American Tobacco is believed to be ready to launch a third major cigaret in Britain, possibly based on the technology of the successful Barclay brand in the U.S. *(see related story on Page 3).* B.A.T. refuses to comment, but three unnamed agencies have been called in to

'Times,' NBC talk cable

By MAURINE CHRISTOPHER and COLBY COATES

NEW YORK—The cable industry constantly buzzes with reports of incipient co-ventures, teaming up assorted communications giants.

Currently cablecasters are watching to see whether a "good exploratory meeting" between NBC/RCA and the *New York Times* will lead to some action on the new video front. NBC sources said this was just one of scores of similar meetings on possible programing projects for cable, and said no further meetings were set with the *Times*.

But their recent meeting is bound to attract attention—if for no other reason than the level of the people in attendance. From the *Times*, there was publisher Arthur Ochs Sulzberger, as well as Sam Summerlin, president of the New York Times Syndication Sales Corp. and head of cable r&d for the company, and Ted Harbert, New York Times Productions vp.

In the RCA/NBC contingent were Herb Schlosser, RCA exec vp for SelectaVision and its liaison with RCTV; Irwin Segelstein, NBC vice-chairman, and Kathryn Pelgrift, NBC vp-corporate planning.

Mr. Summerlin at the *Times* has heard from numerous would-be partners who would like to get one of America's best known newspapers into cable programing.

Reeves Cable Productions, for

(Continued on Page 46)

'N.Y. News' up for sale

NEW YORK—Acknowledging what some industry followers had said was inevitable, Chicago-based Tribune Co. has abandoned its efforts to revive the *New York Daily News* and is trying to sell the nation's largest-circulation general newspaper.

Industry speculation on a possible buyer focused immediately on Rupert Murdoch, publisher of the rival *New York Post*, which has been gaining circulation while the *Daily News* has been losing circulation. A source close to Mr. Murdoch acknowledged that the possible purchase of the *News* has been discussed internally. He also said that *Post* employes planned to drink champagne after the Tribune Co. announcement Friday, in what amounted to a victory celebration for the *Post*.

The *Daily News* has a daily circulation of 1,500,000, up in recent months but down substantially from its peak of 2,000,000 in the early 1970s. Last August, when the a.m. *News* folded its afternoon edition, *Tonight*, publisher Robert Hunt said the *News* would lose $11,000,000 this year. A Tribune Co. spokesman said the estimated loss remains "in that ballpark."

The spokesman said the company is optimistic it will find a buyer for the paper, but declined to say who might buy it and for how much. In its announcement, the company said it has been approached "on a number of occasions in the recent past" by prospective buyers but has always declined to negotiate. "Today we are saying that we would now be receptive to serious offers," Stanton R. Cook, Tribune Co. president and

(Continued on Page 8)

Nestle adds Quik syrup to stem Hershey's flow

By NANCY GIGES

The growth of liquid milk amplifiers has prompted the leader of the powder category, Nestle Quik, to begin testing a chocolate syrup as a line extension.

White Plains, N.Y.-based Nestle Co. will enter areas of New England, the metropolitan Washington market and Florida in February with the new Quik entry. The syrup will compete directly with Hershey Foods' chocolate syrup, which began taking business from Nestle Quik powder when it was introduced in a squeeze bottle several years ago. Until then, Hershey syrup in a can was used primarily as an ice cream topping.

Within the past three years, the syrup category has grown to about $45,000,000 at retail, more than doubling its size. The powder segment, dominated by Nestle Quik, totals about $125,00,000 at retail. These figures from Nestle are somewhat lower than those from other industry sources, who estimate the total market (powder and liquid) at $250,000,000 at the wholesale level, with syrups accounting for about one-third and powders about two-thirds.

According to W. Rufus Jones, Nestle group vp-chocolate and culinary division, the syrup will be positioned as offering the same "irresistible milk chocolate flavor" as Nestle Quik powder. He said the Hershey flavor profile is much different from that of Nestle's. With more of a bitter chocolate flavor, it is better suited as a topping than as a milk additive, he said. But, he added, Nestle realized that when the Hershey syrup was repackaged in a plastic squeeze bottle, it began to appeal more to children. Hershey invests about $2,500,000 annually in advertising its entry.

The exec said that in a taste test among children who use syrup in milk, the Nestle product was preferred 2-to-1 over Hershey. "The overwhelming taste preference was no surprise to us since we formulated Nestle Quik syrup for milk use, whereas the established brand was originally formulated for topping use." However, the Nestle syrup scored at parity with Hershey as a topping, he said.

Nestle plans to spend at about a $2,000,000 national rate to support the new syrup. Its tv campaign will be separate from the Nestle Quik powder tv effort. The dry product is supported with about $5,000,000 annually. McCann-Erickson, New York, is agency for both.

Although advertising plans for the new entry are not yet final, Mr. Jones indicated that Nestle would probably call on the successful

Lu and behold

France's Generale Biscuits, which acquired the Burry division of Quaker Oats and formed Burry-Lu Inc., based in Elizabeth, N.J., is testing imported cookies and crackers under its Lu label in Hartford. Sunday supplement ads support, with tv. Agency is Altschiller Reitzfeld Solin/NCK.

Videodiscs, popcorn—$300

By ROBERT RAISSMAN

The tired cliche, "You can't tell the players without a scorecard," has become the battle cry of consumers trying to follow the latest maneuvers by retailers and marketers of the enigmatic videodisc player.

In efforts to spark disappointing sales, the number of rebates, giveaways and sales schemes grows each week. A St. Louis retailer is giving away a $20 popcorn popper with every purchase and, in reverse logic, a retailer in Atlanta is giving away RCA SelectaVision machines with each purchase of a "big screen" tv receiver.

As the Christmas selling season winds down, both Toshiba and Hitachi have encouraged retailers to sell their players for around $300.

Toshiba has recommended that dealers slash the price from $549 to $349—including a hand-held remote control unit—in a six-week promotional sale. The player can be purchased for $300 without the remote control device. Hitachi is allowing dealers to go as low as $299.95 and $349.95 with the hand-held remote. Hitachi's player was originally priced at $499.95.

Where does all this leave RCA, the company that

world news roundup

London—Levi Strauss, brand leader in the U.K., will double its 1982 ad outlay to $3,000,000, via McCann-Erickson, to recoup market share lost to designer jeans, which doubled their market share to 10% last year.

Antwerp—De Beers, which controls 85% of the world's diamond sales, will launch a $90,000,000 U.S. campaign, promoting diamond jewelry as, not just a girl's best friend, but chic for men, too.

Stockholm—Wasabroed Co., the world's largest producer of hard bread, is being bought by the Swiss multinational Sandoz A.G. for an undisclosed sum. Wasabroed has 87% of the Scandinavian market.

London—Benton & Bowles is looking to buy a second London agency before the end of 1982.

Coke is silent on 'light'

By NANCY GIGES

Despite Coca-Cola Co.'s frequent denials that it has any thought of leaving its major agency, McCann-Erickson, reports continue to circulate that other agencies are gearing up to go after the Coke business and that the Atlanta-based company has already assigned a new product to SSC&B.

Asked to respond to soft drink industry reports that have Coca-Cola considering a "light" version of its flagship brand and that the assignment will be given to SSC&B, now a sister agency of McCann within the Interpublic Group, a company spokesman said the whole area of new products is so competitive that, "as a matter of policy we do not comment in any speculation dealing with the subject."

Execs at other Coca-Cola agencies, however, said they knew of a soft drink assignment that was given to SSC&B in 1980, but they were not aware of the nature of the assignment. John Bergin, who heads the worldwide Coca-Cola account at McCann, served for many years at SSC&B before moving

CABLE AGAIN THE BIG ISSUE

Sponsors, SAG far apart as contract talks near

By BOB MARICH

LOS ANGELES—The growth of cable tv, which precipitated strikes by movie and tv program actors and writers in the past two years, is likely to again emerge as a key negotiations area for the actors' tv/radio commercial contract that expires Feb. 7.

Chief negotiators from both sides appear to have little common ground on at least two cable tv issues as they prepare for talks that will start this month.

Whether cable tv should be classified as the same as or distinctly different from free tv, thus requiring additional compensation for actors, is a dividing philosophical issue.

John McGuinn, a Washington attorney and the advertising industry's chief negotiator, said once advertisers pay either national, regional or local broadcast tv rates for a commercial there "shouldn't be an additional cost for cable tv use."

New Screen Actors Guild national executive secretary Kendall Orsatti, the actors' union's chief negotiator, takes the position that cable tv is "separate and apart," apparently requiring special, extra compensation, although he declined to elaborate on this position.

This larger issue spills over into the so-called "interim cable commercials contract" negotiated last spring that provides for a sliding extra compensation scale for network broadcast tv ads placed on national cable tv networks.

The interim contract "has not been satisfactory as far as the advertisers are concerned," Mr. McGuinn said. "It costs too much for the kind of delivery that we're getting. We'll be looking to change that."

Taking the opposite position, Mr. Orsatti said actors find the interim agreement "is working quite well" and should simply be updated in the next contract.

Joining Mr. Orsatti as the actors' negotiators will be Stanford I. Wolff, American Federation of TV

United goes hard after business traveler

Eastern gets aggressive

By ROBERT RAISSMAN and RICHARD KREISMAN

New campaigns for Eastern Air Lines and United Airlines took to the air last week, with the Eastern effort cutting back on the flying time of spokesman/president-chairman Frank Borman and the United effort putting other-company chief execs into the friendly skies for the first time.

Campbell-Ewald's first work for its new Eastern account is taking a more "positive" approach than the previous "We have to earn our wings every day" theme, apparently because some company officials had come to believe the old theme was too apologetic in nature.

While the campaign, which broke Jan. 1, features Mr. Borman in some spots, it concentrates on Eastern employes and the pride they take in the airline. Thus, the workers are shown urging travelers to "give us a try," as the overall theme proclaims Eastern to be "America's favorite way to fly." Although "earning our wings" has been replaced, a variation of it is still being used as Mr. Borman utters the line in some of the new spots.

C-E and Eastern are focusing on the fact that the airline carries more passengers than any other airline in the free world. The agency's approach to Eastern's marketing problems centers on a more aggressive role for the airline in making superiority claims.

Eastern bases its No. 1 status on the amount of passengers it has boarded. In 1980, the airline boarded 39,000,000 passengers and expects to nearly meet that figure when the 1981 totals are in.

"When your people have worked as hard as ours have to attain No. 1 status, you can't help but puff up and do a little good-hearted bragging about it," said Russell L. Ray Jr., senior-vp marketing at Eastern.

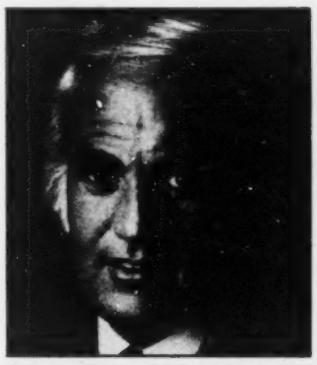
Builds tv-linked conglomerate

Warner's Ross selected as '81 Adman of Year

By JAMES P. FORKAN

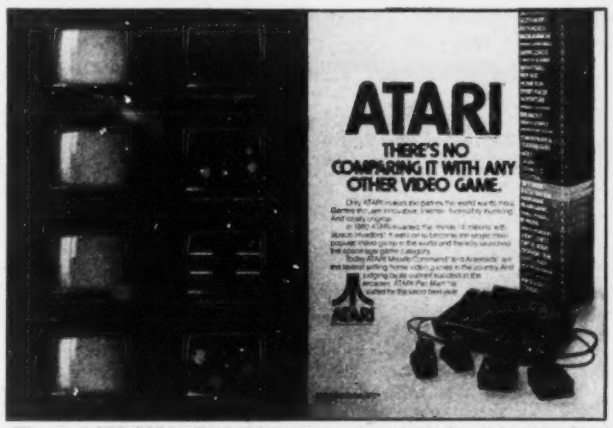


Steven Ross: "Creativity is the common thread."

For such cable tv programing innovations as Music TV and, more importantly, two-way interactive Qube; for the successful marketing of Warner Amex Cable Communications to potentially lucrative metropolitan franchises, and for the phenomenon of Atari videogames, Warner Communications' Steven J. Ross has been named 1981 Adman of the Year by ADVERTISING AGE.

Although it is an entertainment conglomerate whose financial health is based on the popularity of the likes of Superman, Bugs Bunny, the Dukes of Hazzard and Space Invaders, the $3 billion Warner Communications Inc. takes its fun-and-games very seriously.

The white-haired, dapperly-dressed Mr. Ross sees WCI linked to the television set for years to come. Consumers can see films as they move from theaters to pay cable to videocassettes to commercial tv; tv series and cartoons, first on the networks, then in syndication. Through interactive cable services, consumers will be able to shop at



Three 1,000,000-selling videogames are singled cut in this Atari magazine spread by Young & Rubicam.

home for Franklin Mint collectibles and perhaps even for cosmetics, books and records—all the above bearing Warner's "W" logo.

And if, as some forecasters maintain, viewers tire of tv fare, Warner should still generate profits from the home screen, as consumers turn to videogames and home computers.

Warner properties will, indeed already do, cut across all those lines, pulling in revenues at each step along the way. Superman, for instance (a character which WCI acquired with its 1968 buy of National Periodical Publications), has translated its comics book stardom into tv cartoons and a series of live-action motion pictures. The first film, after becoming a box office blockbuster worldwide, has made millions more since then from licensing to pay cable and network tv, from retail sales in vcr form and from various promotional and merchandising tie-ins negotiated by Warner's Licensing Corp. of America unit.

Another Warner property, the Nielsen ratings hit "Dukes of Hazzard," has been racing to its own multifaceted bonanza. In addition to $100,000,000-plus of tie-in merchandise sold during 1981 alone, including several toys made by WCI's own Knickerbocker Toy unit,

SOME CATEGORIES HOT, OTHERS NOT

Marketers view '82

An Advertising Age roundup

Millions of people recognized it. The media recognized it. Finally, late in the year, the government recognized it: The U.S. economy had slipped into an economic recession.

So, for the first time in a few years, business prognosticators can begin from a base of admitted fact. And they have. Recession shades the reports compiled by Advertising Age reporters for our second annual category-by-category forecasts.

What seems surprising is that not all these predictions are gloom and doom. Some businesses expect good years. The industries expecting "positive" results include snack foods, office systems, sporting goods and vitamins.

The predictions of a year or two ago seem to be coming true. There appears to be a market for high-quality, higher-priced items. There is a market for lesser quality, lower-priced-items, in categories such as cosmetics, paper goods, rental cars and pet foods. The middle ground is losing ground.

In all, however, the competitive pressure will be great. Some observers point out that their categories will find more "taking away from the other guy" in the push for new business.

Following are the key findings of these AA industry surveys:

Fast-food/restaurants

Because the fast-food and restaurant industry is so closely tied to disposable income, the nation's economic health in 1982 will be the most critical factor in the recovery of the foodservice business, which dipped late last year along with the economy. However, with the food supply projected to be plentiful, stable beef prices and the lack of a minimum wage increase this year, fast-food chains should be able to hold price hikes, making eating out an attractive value for consumers.

Real growth in most segments will be hard to find, predict industry observers, who blame continuing high interest rates for the slowdown in unit expansions that has fueled industry growth in the past. Technomic Consultants, Chicago, is forecasting a real growth rate of 0.7% for the total foodservice market. The estimated $82 billion commercial segments (full-service restaurants, fast-food, hotel/motel, retail and recreation) will grow at a slightly higher rate of 1% in 1982.

"Eating out is still one of life's little luxuries," said Ron Paul, Technomic's president. "I think it will be a good year, particularly for fast-food, which can capitalize instantaneously on any economic recovery. The tax cut, for instance, should help give consumers a psychological boost."

Some are not as optimistic, predicting a continuing shakeout of marginal chains and operators. For the chains that hang on, many will try new formats, concepts and menu items to revive sales. Major hamburger chains, including

Revival

American Tobacco gives Lucky Strike a new try, via Laurence, Charles & Free, in ads that will appear in markets—Spokane, Wash., and Binghamton, N.Y.—where the revival effort is being tested (AA, Sept. 28).

New drive set for February

Some spurn NRA ads

Tulsa—The 1982 National Rifle Assn. campaign will break in February in some national consumer magazines, but others turned it down as too controversial.

Bearing the theme "I'm the NRA," the estimated $1,000,000 campaign begins with four testimonial ads featuring former astronaut Wally Schirra; Janice Schuler, an 18-year-old member of the U.S. Shooting Team; Noma McCullough, a rifle shooting champion, and Bryan Hardin, a second-grade student.

"The primary message of the campaign is to convey that the NRA consists of 2,000,000 people from all walks of life, with one common interest of shooting as a sport," said Coy Hobbs, vp of Ackerman & McQueen, Tulsa, agency for the NRA.

"We believe that people not familiar with the NRA tend to stereotype the association as a group of backwoods hicks, which is totally wrong," he said. "We have to work to change that image, as well as recruit members."

NRA plans include placement of ads in women's magazines to reach "the surprising number of women involved in competitive shooting and home defense programs," Mr. Hobbs said. The NRA's activities opposing gun control legislation have been the main focus of attack on the group in recent years.

Magazines that rejected the ads, he said, include *California, National Geographic, San Francisco, Sunset, The New Yorker* and *Texas Monthly.*

The campaign will run in *Better Homes & Gardens, Boys' Life, Esquire, Field & Stream, Life, MNI-Chicago, McCall's, National 4-H News, Outdoor Life, People, Sports Illustrated* and *U.S. News & World Report.*#

Bates, Brower, Fitz-Gibbon join Ad Hall of Fame

Washington—Two former ad agency chairmen and a woman who is credited with revolutionizing retail advertising have been selected as the newest members of the American Advertising Federation's Advertising Hall of Fame.

They are Ted Bates, founder of Ted Bates Worldwide; Charles Brower, former chairman of BBDO, and Bernice Fitz-Gibbon, who operated her own retail agency after a distinguished career at Macy's, Wanamakers and Gimbel's.

The selections from among 75 nominees were made by a 26-member council of judges under the chairmanship of Jock Elliott, chairman of Ogilvy & Mather.

With the new additions, 87 have been selected for the Hall of Fame since it was founded in 1949. Members receive a "Golden Ladder" trophy inscribed: "If we can see further it is because we stand on the rungs of a ladder built by those who came before us." Their photos are permanently exhibited at AAF headquarters in Washington.

Mr. Bates, who died in 1972, was described by the judges as "a soft-spoken, private man" who earned his agency a reputation as a pioneer of the hard-sell television commercial. He was involved in the creative activities of the agency, and is personally identified with such campaigns as the Palmolive "14 Day Beauty Plan" and the Wonder bread slogan, "Helps build strong bodies 12 ways."

He began his career in advertising as manager of the Chase Bank soon after earning his bachelor's degree at Yale in 1924. Before starting his own agency in 1940 he held various positions at the George Batten Co. and Benton & Bowles.

Under his leadership, the agency became one of the five largest in the world. He also was deeply involved in public service work through the Advertising Council. He resented the industry's critics, and once said advertising was a "convenient whipping boy for people who are suspicious of the entire free enterprise system." He is the

Auckland—New Zealand's High Court has granted SSC&B:Lintas an unusual injunction preventing two of its former senior executives from contacting any Lintas clients until the matter comes before the court again. The agency also has filed for damages against the two officials and is making a report to the Australian Federation of Advertising Agencies.

Paris—Foucher, France's leading chocolate marketer, last week said it will form its first U.S. company in 1982. The company already has 400 outlets in Japan.

Toronto—Warner-Lambert has hired Harrison, Young, Personen to help J. Walter Thompson Co. and Ted Bates & Co. in placing a $10,000,000 media budget. HYP provides a similar service for PepsiCo Canada, another JWT client.

White collar jobs holding their own

BY JACK MCGUIRE

Given the parlous state of the economy, you might assume the nation's executive recruiters are wringing their hands in despair. Not so.

Survey some of the top headhunters across the country, most of whom specialize in marketing/advertising personnel, and the picture is not all that grim.

It depends, of course, on whom you talk to and where. There are some rough spots and sometimes the focus is blurred by local conditions. But, for the most part, and particularly in the high-salary brackets, the business is hanging in there, holding its own.

It's difficult to find concurrence on all aspects of the job market, current and future, as you skip from one area to another, but on one point there is universal agreement. The blue collar sector is not only soft, it's frayed.

The white collar segment, on the other hand, is doing well, with only scattered signs of wilting. If there's a ring around that collar, the place where it can be detected is in the depressed industries.

With the exception of top-level jobs, relocation, for all practical purposes has become cost prohibitive.

Agencies and corporate marketing departments are becoming more selective in placing candidates. They want seasoned personnel, preferably those who can wear several hats.

As for entry level jobs, the recruiter's report they simply no longer exist.

Other generalizations? Listen for yourself.

Gene Judd, president, Judd-Falk, New York

Since we deal heavily in the consumer goods area—foods, drugs and cosmetics—we're a bellwether of what's happening with the general economy.

Right now it's rather strange out there. Many companies are not making any strong commitment. One shoe has dropped and they're waiting for the other one to fall.

Another barometer of what the economy is doing is in the supportive areas of market research and sales promotion, especially on the new product side. They were once very active but they have been falling off. Many of the companies seem to be assuming those jobs themselves.

We're still seeing plenty of action in the top-level executive positions, but the mid-management business has shrunken. In many ways the situation today is not unlike the recession of '73. A lot of companies have taken the attitude, "let's wait and see."

Ted Chaloner, personnel consultant, marketing/communications, Rogers & Sands, Boston

Things aren't that great at the top and bottom levels, but in the middle, it's not that bad. Most of the agencies seem to be saying "maybe later," but balancing that off, on the corporate side they're looking for people, especially with agency experience.

Many of the jobs in communications in Washington are drying up. A lot of people in public relations in the capital are finding the scope of their position has narrowed and they'd like to get into the private sector. But where? There's not much going in the agencies and broadcasting has slowed from a walk to almost a complete halt.

On the entry level this is a tough market. There are about 52 colleges in the area dispensing hundreds of thousands of graduates each year.

John Kurdziel, vp-executive search, Fox Morris Inc., Philadelphia

There's still a demand for well qualified people. The industrial companies are cutting back, but the major consumer product companies are still strong and hiring. The computer industry is showing great strength. While many industries may not be expanding, they are hiring replacements.

Flexibility is the key word in adapting to the economy and the marketplace and identifying the hot areas.

When it comes to our immediate areas, figures released by the government are somewhat misleading. The greatest impact of the recession has been felt primarily by the blue collar sector.

We're a broad-based company, not tied to any one industry and we've just wrapped up the best year in our 29-year history.

Alan Schonberg, president, Management Recruiters International, Cleveland

The sales and marketing areas are booming. Demand is up all across the country. The only problem is finding qualified people.

While there may have been a slight downturn in the lower level positions, on the top end the demand has increased.

Where the biggest change has occurred is in the type of candidates the agencies and companies are looking for. They want seasoned personnel, preferably those who can wear several hats; people with managerial abilities to go along with their basic skills.

Richard Orleskit, president, Omni Executive Search, Atlanta

We're a national agency, primarily in the food and consumer packaging field, with only a modest percentage of our business placed locally.

Right now it's a company-by-company situation with many of them adopting a wait-and-see attitude and a freeze on hiring. There's plenty of good talent available here, but with housing $10,000 less than it is in New York, the problem is how to get them to move.

On the agency side it's difficult to lure top people from New York or Chicago into the area. The big agencies bring some in, but when they find that upward movement is slow, they jump ship for one of the smaller agencies. But imports rarely leave. They're only recycled around the market.

Verne Kelley, senior vp, marketing, Victor Paul & Associates, Chicago

Upward movement, the promotion rate, particularly on the agency side is rather slow. It started to get that way about a year ago and it hasn't changed.

A lot of people said, "Wait until after the election." Well we waited and nothing happened. There was no big turnaround.

The mid-management level is extremely tight right now. I know of some marketing managers who have been out of work for six months and on up to a year. And every time a good spot opens up, there seems to be a hundred applicant's vying for it.

Chicago has been pretty hard hit but when you attempt to move someone out of here to the Coast, forget it. The housing there is three or four times higher than Chicago, which isn't low. It's okay if the person is a "single" renter. But for a "family" homeowner—no go.

Walt Walker, president, Walker Executive Recruitment, Minneapolis

Things are relatively quiet, a reflection of the times. The companies are being very cautious about who they hire. They're checking over the prospects thoroughly, looking for quality. It's definitely a buyer's market.

One of the biggest factors hindering any mass movement is the high cost of relocation. For a $50,000 job it takes half that much again to pay for the move.

On the consumer side not much is happening in spite of the fact that there are all kinds of spots open for high technology jobs. I think it will be mid-82 before we start to see any real improvement.

Samuel Skeegan, president, Roth Young Personnel of Detroit, Southfield, Mich.

We aren't seeing much expansion in the advertising and marketing areas. But at the same time, there hasn't been any drastic cutbacks.

Detroit is admittedly a depressed area, but those that have been most adversely affected are the blue collar ranks. But our business isn't based on local placement. We work for local firms, but we also move a lot of people out.

Last year may have been a downer, but as far as we're concerned we registered our best year in a decade.

There are still plenty of good jobs for good people right here in the Detroit area.

The automotive companies cut back on marketing personnel during the recession of the mid-70s but kept the accountants and engineers on board. Now they're beefing up their marketing departments again.

On the agency side there's no great demand for people on the account supervisor level, but they are looking for copywriters, art directors and good people in the creative area.

Con P. Curran III, president, Michael Latas & Associates of Colorado, Vail, Colo.

There's plenty of action if you know where to look. Our business

HOPKINS COLMANT

Job survey

(Continued from Page S-2)

is split 50-50 between corporate and agency jobs. And in the agency area, good account people are really hard to find.

The hot spot, and where we are doing most of our placement is in the Sunbelt states. Texas, and Dallas in particular, is very active.

There's fast tempo, a new frontier in these glamor markets. And when I say "frontier" I don't mean California. We're taking them out of there by the carload. The cost-of-living there is out of sight.

What the up-and-coming companies want, are innovative, aggressive people to match their own fast-moving style.

What recession? We doubled our sales last year.

Bob Kopulos, president, Rand-Curtis Resources, Phoenix

How's the job situation? It depends on what business you're talking about. In the pharmaceutical field we have more job orders than we can possibly fill.

The fast-foods area was good in '80 and even better in 1981. There's plenty of movement in the middle to upper positions. But I'm not talking about the immediate area.

Except for San Francisco, Los Angeles and Washington, Phoenix has the toughest housing market in the country. A tract house can set you back for $350,000. When we place someone here, we're talking about moving them out.

Helen Edwards, Helen Edwards & Staff Agency, Los Angeles

We've been in business for 46 years, through good times and bad. Right now we're feeling the effects of the recession and people are holding on to their jobs for dear life.

It has been a quiet year that has just passed, and things probably won't open up until the middle of this year.

We work with people already in the market since the agencies won't pay for relocation.

Hopkins Colmant, president, Advertising Careers Agency, San Francisco

There's not much stirring in San Francisco. We're just starting to see the effects of the recession slowly moving into the West. With 80% of our business on the agency level and the rest corporate, we're getting some activity at the top and bottom but not much is happening in the mid-level.

We rarely bring anyone in from the East or the Midwest; 95% of our business is right here in the Bay area. This is the most expensive housing market in the country, so if they aren't already here, the agencies don't want to talk to them.

On the pr side, about 10% of our agency business, the field is saturated. The best advice we have for any new person entering the field, is don't head West.#

SPACE SALES

We've been a leader in space sales recruitment for over 16 years. That's long enough for most newspapers and magazines to make us their obvious choice.

If you can demonstrate an outstanding track record with a minimum of 1-5 years experience, we can introduce you to your future. Right now.

A NEW ERA

(Continued from Page 30)

one is sensitive to these dangers, unless someone is willing to speak up, serious, unnecessary, unintended harm can be done.

One person can make a difference. Like the young woman of my acquaintance who was in her first week in the art department of an advertising agency. She was working on an important ad the creative director himself had written. She read the headline, which went something like this: "Is this one of those days when you feel like going home and kicking one of the kids?" And she said to herself. "My God, what kind of a business have I gotten into?"

She sulked for a day and finally took her misgivings to the creative director. "Is there a message here that kicking a kid is an acceptable form of behavior? Considering the child abuse problem in our community, do we want to say this?"

The creative director was shocked, but agreed to think it over. The next day he told the young woman: "I don't believe my copy does what you say. But if some people will read it that way, then we shouldn't use it." This young woman had spoken up for what she believed. It made a difference in how her associates felt about her, and how she felt about herself and her career.

In summary, I believe it comes down to this: How will advertising people see themselves? Will they limit their concerns to the sales curve? Or will they recognize that pursuit of the sales curve must be reconciled with some greater cause.

Advertising's destiny in the new era will rest with leaders who can look beyond the short range, who understand that what is good for advertising can also be good for society.

But only if the advertising is created by people who are sensitive to the world around them, and who make sure that advertising is part of the solution instead of part of the problem. #

PROMOTION TRENDS

A look ahead: What's hot and what's not

BY LOUIS J. HAUGH

Because this column is about promotion trends and we are now on top of a new year, it seems appropriate to look at what may happen in this business this year.

Over the last eight years, expenditures in promotion grew at an average of 11% per year. The growth rate is higher than average in each of the last four years.

There were changes within the promotion part of the marketing mix. Dollars invested in trade allowances tended to slip while consumer promotion activity commanded an increasing share of the marketing pie. It is almost an article of faith that consumer and trade promotion expenditures now top advertising outlays for most companies.

There is an additional factor to consider in the process of predicting what may happen in sales promotion this year and beyond. Since the 1960s, promotion expenditures tended to rise in periods of recession more than the average. Promotion outlays seem to be more recession-proof than advertising investment. This seems to follow by intuition alone because promotion tactics are essentially short-term in nature and during a recession, most companies are looking for quick sales fixes.

However, we believe that growth in promotion will be tempered somewhat in this current period of economic distress. Many marketers are unable or unwilling to wean themselves from the short-term event. For example, look at the heady growth in couponing over the last few years.

It would appear that a number of forces, including retailers, agencies and media groups, are marshaling their resources against the growing use of couponing as a marketing panacea. There are a number of reasons. Here are a few.

- The trade wants more allowance monies and perceives coupons as a threat to its share of the pie.
- Agencies believe that they have seen billings drift away in cents-off coupons, sweepstakes or premium offers, taking away dollars that were earmarked for ad schedules. Print media appear to be particularly sensitive to this change in the face of various co-op programs such as those in freestanding inserts and newspapers on best food day.
- Companies are realizing that in some cases a coupon is only a short-term fix and that it may be short-sighted to rely excessively on only one promotion tactic. General Foods Corp., the largest couponer, is reportedly cutting back on its cents-off efforts.

In an earlier column (AA, June 8, P. 58) Vince Johnson of Independent Marketing Observer, St. Simons Island, Ga., said he was "convinced couponing is no longer a healthy marketing strategy." He said he had doubts about couponing's long-term impact for a brand; that couponing costs are often understated; that misredemption is not properly taken into account and that it's next to impossible to track coupons to the store where they were redeemed. This makes tracking the effectiveness of coupons quite difficult, he said.

As he puts it, the "staggering volume of coupons is more than most retailers can handle." He predicted that the 7¢ handling charge will be increased to 9¢, citing several companies that have increased the handling charge on some coupon drops.

Spokesmen for magazines are not particularly enamored with coupons either. William Joseffer, marketing director for grocery products, *Better Homes & Gardens*, was quoted recently as saying that he believed the coupon trend is not a good one. "I think it's gotten out of hand. My conversations with a lot of food people indicate they'll try to reduce coupon frequency because it doesn't build anything and only erodes their profits."

Jay Burzon, associate publisher/advertising, *Woman's Day*, predicted that promotional activity in magazines has peaked. "It's a pendulum. It was happening for a six to eight month period and I think we've been through it. I've spoken to major companies that feel that coupons are too costly. They're worried about the high redemption numbers that cut into their profits."

ESTIMATED PROMOTION INVESTMENT BY TYPE

*Dollars in billions

Of course not everyone in print media feels the same way, but there is a growing concern about the proliferation of promotion ads. This review and introspection suggests promotion, generally, and couponing, in particular, may face a more conservative growth curve over the near term.

And while promotion growth has burgeoned in recent times, we do not expect these expenditures to grow as rapidly this year. It is estimated that $58.7 billion was invested in promotion in 1981, compared to $54 billion the year before. For last year advertising outlays are put at less than $40 billion. Although promotion expenditures will top $60 billion in 1982, up about 10%, we do not expect the growth to be in the 12% to 15% range of the previous four years in spite of a recessionary economy. This does not include the estimated $50 billion-plus that manufacturers invest each year in allowance money.

There will be changes in the promotion mix, however. Our chart depicts estimated investment by promotion type for 1981 and 1982, based upon sources in companies, industry trade associations and business publications.

The chart shows 1982 outlays will be up 9.7% over 1981, a conservative estimate in light of the 10% average growth rate promotion has experienced since 1970.

However, a principal focus of interest for 1982 will be how these funds are allocated. It has been suggested that coupon activity may not keep pace with previous years. Here are some educated guesses about the future of several major types.

Couponing: There are likely to be more intra-company and intercompany co-op events. Face values will remain static below retail price increases over-all. Look for magazines, Sunday supplements and other lower redeeming distribution vehicles to gain in share of the coupon distribution as companies attempt to show the trade support for the brand but not necessarily fund the high redemption nut. The trend away from best food day to Sunday is likely to continue as well. The day of coupon-only promotions is just about gone. More coupon events include large space overlays to accommodate brand-sell advertising, a premium or a sweepstakes. Promotion ads are becoming stridently competitive.

Refunds: This promotion has changed dramatically as redemption rates skyrocketed. It is now possible to estimate liability for such events with some degree of confidence. The "official rules" of refunds are now better understood by consumers, thanks to concerted efforts by the Promotion Marketing Assn. of America and others. More brands are requiring higher numbers of proofs for higher face values. While "slippage" does occur, clearly the number of consumers who stay involved with the refund makes this tactic an important promotion tool.

Premiums: More brands are using high-value premiums to reinforce the brand position and other brands look for free-in-the-mail or near-pack premiums.

These lower-priced items, with broad appeal, can move goods at retail as consumers save multiple proofs to complete the offer. Some promotions now offer a free premium for multiple proofs but include a "can't wait" feature of fewer proofs and some money. We are not in favor of "free" premium offers that require 50¢ or more for "postage and handling." Too many of these events are for items that can be regarded as marginal in value and the fee covers postage, handling and the premium cost.

Sweepstakes: We have seen one report that indicates sweepstakes events increased 300% from a few years ago. There is clutter in this category, and unless the prize structure builds on a copy platform for the brand or increase awareness, a sweepstakes can be a mistake.

In-pack game events seem likely to continue to proliferate. Consumers respond to them, and we have heard of impressive sales increases. There are some adverse rumblings over preseeded winner events. Some of these promotions require the consumer to match a UPC number in the ad with the number on the product in the store. Some of these have not made it clear that the variable is the playing piece, not on the brand.

Further, there are some events that capitalize on consumer ennui and award only claimed prizes. While this is within the intent of the law, some industry sources fear adverse reaction when all prizes are not awarded. The category is returning to the levels of activity it achieved a decade ago when the government cracked down on some disreputable practices.

Promotion management: The biggest change is likely to be evolutionary rather than revolutionary. Because of increased awareness of expenditures in promotion, more companies are taking a closer look at how these funds are managed and invested.

There will be greater emphasis on training. There will be greater emphasis on promotion evaluation. The "art of promotion" is inevitably giving way to the "science of promotion." Creativity is still required but companies are demanding proof of effectiveness too. #

Bud Light rolls via NH&S

By ROBERT REED

The light beer war will escalate this year as Anheuser-Busch prepares to grapple with segment leader Lite from Miller Brewing by expanding the distribution of Budweiser Light.

Bud Light's first hurdle toward expansion was cleared last week as the leading brewer named Chicago-based Needham, Harper & Steers over D'Arcy-MacManus & Masius, St. Louis, to handle its advertising. The two shops had been competing for the estimated $35,000,000 account since the beer's test market introduction last summer.

A-B execs are looking to California as the next Bud Light outpost and are also considering an expansion into other parts of Texas, one of the test states. Those states are hotly contested beer markets with both Miller and A-B becoming the dominant factors at the expense of the nation's second-tier brewers.

But the movement will not be confined to the Sunbelt since wholesalers throughout the country have voiced a growing interest in the first light beer to carry the flagship Budweiser label, said Michael Roarty, vp-marketing.

A-B is undergoing a capital expenditure plan to increase its brewing capacity from an estimated 57,000,000 bbls. to 70,000,000 bbls.—a factor that will provide the brewer with enough flexibility

NEXT BIG REVENUE SOURCE?

Pay-per-view cable tv test set for Conn.

By SUSAN SPILLMAN

NEW YORK—Teleprompter, the second-largest multiple systems operator (mso), will launch one of the first continuous pay-per-view cable experiments this March in Middletown, Conn.

Middletown subscribers, who already have the option of purchasing Home Box Office, Showtime, The Movie Channel and Prism, will be able to pay $3 a shot for individual movies not yet released to the traditional pay networks, plus sports events and Italian-language films.

Having proven that consumers will subscribe to more than one pay tv service, the cable industry is now looking toward pay-per-view as a next major revenue source. Cable industry newsletter king Paul Kagan estimates the industry will generate $2.5 billion from pay-per-view in 1990.

Pay-per-view's potential has been realized on a sporadic basis by the handful of cable systems and over-the-air subscription tv operations (stv) that have offered major boxing bouts and, most recently, the Rolling Stones concert on a pay-per-view basis.

The Teleprompter test, however, represents a new phase in that it devotes a fulltime channel to individual programing viewers can selectively pay for. The channel will feature five different events repeated 12 times each month. Included will be major films shown one to six months before their play on traditional pay networks; Italian-language films catering to Middletown's blue-collar Italian-American population and sports events, primarily boxing.

Pan Am hops to Wells, Rich

By ROBERT RAISSMAN

NEW YORK—Pan American World Airways, searching for a formula to stop its financial slide, has moved its $35,000,000 account for the second time in seven months, this time to Wells, Rich, Greene from Doyle Dane Bernbach.

The move stunned DDB officials, who were informed only one-half hour after the decision was made. "Obviously, we are surprised and disappointed," said Neil Austrian, DDB president-chief executive officer. "We weren't given a reason," he said. "We know, and they know, that the advertising was working. Right now, we just want to get our heads together."

The day the decision was made, Joseph R. Daly, DDB chairman-chief executive, lunched with a Pan Am official. "Everything is fine with Pan Am," Mr. Daly told ADVERTISING AGE last Friday afternoon after the lunch. "The phone has been ringing off the hook [for Pan Am reservations] and it's all because of the advertising."

The switch also surprised some execs at Continental Airlines, which is handled by WRG's Los Angeles office. WRG said it would continue to handle the $16,000,000 Continental account. However, Warren Rucker, director of advertising for Continental, said "there's absolutely no way they can do that," after being told of the switch. "It's a joke, Continental is in direct competition with Pan Am."

But after it was learned that, according to WRG, Continental president George Warde gave the deal

Curtis readies Finesse bow

By JENNIFER ALTER

CHICAGO—Helene Curtis Industries this spring will attempt to enter the premium end of the haircare spectrum with the national launch of new Finesse conditioner.

Curtis is planning to put "major marketing support" behind the new product, according to director of marketing services Margaret Bertrand. The company is telling trade accounts it will spend $10,000,000 in advertising to introduce Finesse, which is called "a variable conditioner for the changing needs of your hair."

■ Network tv and print ads in eight women's books are scheduled to break March 15, using the theme, "Works a little, works a lot." The copy suggests Finesse can be used in a few seconds for a little conditioning and up to five minutes for deep conditioning, explaining, "Cause Monday you need a little Finesse and Tuesday you need a lot."

Backer & Spielvogel, New York, is the agency.

Curtis also is planning to distribute 30,500,000 samples in April, followed by 38,000,000 freestanding inserts and 24,000,000 coupons via the mails.

The positioning of Finesse as a product with variable uses might be viewed as an attempt to meet trends from two directions, one industry source suggested. While the

DISPUTE OVER FORD ADS, SHOP REVIEW

BBDO splits with Avis

By ROBERT RAISSMAN

NEW YORK—BBDO has resigned the $8,000,000 Avis Rent A Car Systems account because the company extended invitations to several agencies to make presentations. The invites came even after the incumbent had offered to start work on a new campaign that would eliminate the car rental company's new effort featuring veteran actor Glenn Ford.

BBDO president Allen G. Rosenshine would not comment on his agency's offer to create a new campaign, but did say, "As far back as three weeks ago I made it clear to Avis that we would not be part of a competition with other agencies."

William Schecter, a spokesman for Avis, said the company had extended invitations to "several" agencies. He declined to say which agencies were contacted or why Avis wanted to make the switch.

Apparently in the running: Young & Rubicam; N W Ayer; Ogilvy & Mather; Ted Bates & Co.; Avrett, Free & Fischer, and Grey.

Sources close to Avis said that David Mahoney, chairman-chief executive officer of the company's parent, Norton Simon Inc., was unhappy with the Glenn Ford campaign from its inception; it began airing in October. It marked the first time Avis has used a celebrity in its ads, and the commercials have drawn many comments over the actor's use of his hands (*see*

'Phil. Bulletin' up for sale

By STUART EMMRICH

Five months after the owner of the *Philadelphia Bulletin* wrangled union concessions and in return promised to pump $30,000,000 into the struggling afternoon daily, the Charter Co.-owned newspaper has been put up for sale.

The announcement last week by Charter Co., Jacksonville, Fla., that it had all but given up on saving the 400,000-circulation paper was not unexpected in newspaper circles. Analysts had predicted that the last-ditch effort to turn the paper around would not work, and for weeks local newspaper people had been predicting that the paper would fold in late January.

Analysts also are pessimistic about the chances of the paper finding a new owner, a situation that would leave Philadelphia, until last month the only major U.S. city with four daily newspapers, a two-newspaper town. Last month, the *Philadelphia Journal* closed. The two other city papers, the *Philadelphia Inquirer* and the *Philadelphia Daily News*, are both owned by Knight-Ridder.

But the auctioning of the Bulletin should have ramifications beyond Philadelphia. It now increases to two the number of financially troubled major newspapers looking for new owners, a fact

CBS non-bowls 'em over in prime time

By COLBY COATES

NEW YORK—Though some observers might quibble and call CBS' six-plus ratings point win in the prime time season's 13th week "atypical," CBS Entertainment president Bud Grant is having none of that.

"As far as I'm concerned a win is a win," he said, laughing off charges that the special holiday programing on all three nets reduced the significance of the wide-margin victory.

CBS' programing maestro also found it amusing that some tv watchers found unusual the network's strategy of running an intact Friday night lineup against the Sugar (ABC) and Orange (NBC) Bowls. "There was never any question of taking 'Dukes,' 'Dallas' or 'Falcon Crest' off. We knew the two football games would split that audience," he said, adding, "The decision to leave them on was really a nondecision." For the record, CBS had a 26.1 rating and 40 share New Year's night; ABC an 11.2 and 17, and NBC, an 18 rating and 28 share.

Looking over the prime time week and CBS' ratings performance so far this season, Mr. Grant rejected the notion that CBS' ratings wins were too dependent on the blockbuster performances of just two nights, Friday and Sunday. "I don't know of any network that wins all seven nights every week."

But he said CBS will begin regularly to add Monday night to the win column now that ABC's pro football advantage has run its course, also noting that with the addition of "Disney" to a Saturday night movie, "there is a remarkable difference between our ratings this year and last."

He was similarly enthusiastic over the network's Thursday lineup of "Magnum," "Knots Landing" and "Nurse," suggesting the best numbers were ahead for "these relatively new shows."

About Tuesday and Wednesday nights, however, the Entertainment boss said, "Sure, we have problems." But he thinks the coming switch of half-hour comedies on Wednesday and Monday will help somewhat. The new lineup

AD PAGES IN FARM PUBLICATIONS FOR 12 MONTHS—1981-1980 88

Vol. 53, No. 2—ADVERTISING AGE (ISSN 0001-8899) is published weekly except semi-weekly the third week in March, the second week in September at 740 Rush Street, Chicago, IL 60611. Second-class postage paid at Chicago and additional mailing offices.

AA names new editor in features

CHICAGO—Robert Goldsborough has joined the editorial staff of ADVERTISING AGE as executive editor with responsibility for the weekly newspaper's feature sections.

Mr. Goldsborough, formerly editor of the weekly *Chicago Tribune Magazine*, initially will direct the launch of AD AGE's Magazine/Section 2, a redesigned and expanded successor to the present Section 2 and Magazine sections. The merged Magazine will continue as a pull-out center section of AA. Scheduled for introduction early this year, it will incorporate all of the theme and feature material currently contained in the separate Section 2 and Magazine sections, along with new features.

R. Goldsborough

■ "Bob's strong background in magazine, features and news administration will be a major asset for AD AGE as he directs this significant advance for our publication," said Todd Fandell, editor of AA, in

Farm Money Management talks to the people in agriculture who mean business. Big business. Among our readers are 45,000 producers, each with farm commodity cash receipts in excess of $250,000. Plus 15,000 farm managers, bankers, and consultants whose job is to keep America's biggest green thumbs in black ink.

These people care what *Farm Money Management* has to say, because our articles and editorials are aimed directly at them. Lending and borrowing, taxes, estate planning, land costs, and investments are just a few of the topics we deal with in each quarterly issue. No other publication addresses itself so specifically toward the large-scale producer and the agri-business community. Consequently, no other publication can match our circulation among this unique and highly desirable segment of the market.

Networks begin Feb. sweeps shuffle

High Court rejects NFL

By JAMES P. FORKAN

NEW YORK—Football and February were very much on the minds of tv network and advertising execs last week.

The February sweeps period was the focal point of a good deal of schedule juggling and the subject of a CBS-TV "February fireworks" promotion push. Although the official sweeps span is Feb. 4 through March 3, sources felt that Feb. 1-3 would also be important since they would serve to build ratings momentum for the latter part of the week.

Aside from Super Bowl XVI, football got top-of-mind awareness thanks to the U.S. Supreme Court decision allowing catv systems to continue importing distant tv signals containing National Football League coverage.

■ In rejecting the NFL's challenge on distant signals, the Supreme Court upheld the Federal Communications Commission's 1980 repeal of catv restrictions, which allows catv systems to carry more such signals of tv network and station programing. The NFL lawyers had argued that this means "a cable system could. . .bring into an NFL team's home territory, when the team is playing a home game on a Sunday, every NFL game being played that day."

The NFL's director of broadcast, Val Pinchbeck Jr., called the decision "disappointing" but not surprising. The NFL has had to cope with the relaxed rules for nearly two years already, he said, but continues to maintain that it is "very concerned about overexposure."

Turning to the NFL rights situation for fall 1982 and beyond, Mr. Pinchbeck said serious discussions with the three commercial tv giants have yet to start and added that the NFL for now is not very interested in cable network connections.

■ "We have had contacts" occasionally about NFL coverage from catv nets that carry sports, Mr.

DING
DING
DING
$1.39
Are you still driving a car that was built when gas was 60¢?
Until March 31, American Motors will pay you up to $500 to get rid of it.
1977-78 $300
1975-76 $400
1974 or older $500
American Motors wants you to have a new car.

The older the better

American Motors' new campaign attacks the tendency of motorists to hold on to their cars longer by offering rebates that increase in value with the age of the car being traded in (AA, Jan. 11). Ad stresses the idea that older cars also tend to be gas-guzzlers.

world news roundup

LONDON—Gillette U.K. and Wilkinson Sword are both making an aggressive bid to break the four-year dominance of French company Biro-Bic in the growing disposable sector (now more than 50%) of the $680,000,000 U.K. razor and blades market. The Gillette account will be worth nearly $10,000,000 to Benton & Bowles and Saatchi & Saatchi this year, while Wilkinson's expenditure through Michael Bungey DFS will jump to nearly $8,500,000. Bic has 15% of the disposables market, while Gillette holds 12.5% and Wilkinson 7%.

GENEVA—Grey Advertising has strengthened its European network by buying a major interest in Geneva's Creative Collaborations S.A., billing $7,235,800, which in turn gets a network to service its multinational accounts, such as Du Pont Europe, Exxon Office Systems and Philip Morris Inc.

MONTREAL—Irwin Toy is appealing last week's Superior Court decision that Quebec's law banning tv advertising to children is constitutionally within the province's powers.

FRANKFURT—Sunbeam subsidiary Rowenta is moving its $4,000,000 lighter and small appliance account to Durana Ketchum here from Benton & Bowles.

LONDON—BBDO looks set to hang on to Avis outside the U.S., with local management in Europe, Asia/Pacific, Canada and South America requesting that the agency be retained on the vehicle rental company account. European billings tally $5,500,000, with advertising coordinated by SJIP/BBDO in London.

Home communications seen big growth area

Where's AT&T headed?

By ROBERT RAISSMAN

NEW YORK—The agreement reached between the Justice Department and the American Telephone & Telegraph Co. will open new product lanes to the company in the race for communications dollars, but it is still unclear how many slots the giant corporation will fill.

Will it be computers, cable, electronic advertising, office information, home information services? All, or a combination of a few? Each expert in communications has an opinion, and the agreement, as it stands now, places little restriction on the Bell.

The agreement requires AT&T to give up its 22 wholly owned local telephone subsidiaries but allows the company to enter fields that were previously restricted, including data processing, communications between computers and the sale of telephone and computer terminal equipment. Under the agreement, the company also retains its long distance (Long Lines) service.

The telephone subsidiaries are worth $80 billion, or two-thirds of the company's assets.

The settlement hit a snag last week when U.S. district court Judge Harold Greene in Washington said the settlement must undergo judicial review and also be exposed to public comment. The two parties must resolve the procedural problems by Jan. 18 or they could be forced to resume the trial.

If the decision stands, industry observers believe AT&T won't drastically alter its advertising and marketing machinery to sell new products.

Louis T. Hagopian, chairman of N W Ayer, agency for AT&T corporate and Long Lines, explained that all AT&T's associated companies had separate agencies. "As the company changes, the advertising might," he said, "but in terms of basic character, AT&T remains intact."

It was apparent before the settlement that AT&T was going to be able to enter new businesses either partially, under an order from the Federal Communications Commission that allowed Bell to set up a subsidiary that would not be subsidized by local telephone rates, or radically under a settlement with the Justice Department.

K.W. Weihe, advertising director-business at AT&T, said in an interview before the settlement that although the company was always developing new products it was hard to plan ahead because Bell didn't know when those prod-

Totino's tv spots draw Jeno's ire

By JANET NEIMAN

Jeno's Inc. last week warned tv stations nationally that they will be subject to a lawsuit if they run either of two spots for Pillsbury's Totino's brand frozen pizza.

The advice came in publicized criticism of Totino's tv spots, created by Paragon Cos., Minneapolis, which Duluth, Minn.-based Jeno's says contain "depictions and statements that are false, deceptive, unfairly disparaging of the industry and unsuitable for broadcasting."

Jeno's issued to the press a statement and copies of a letter it said were sent Jan. 11 to more than 300 tv stations around the country, but several major network affiliates contacted late last Wednesday said their stations had not received copies of the letter. Officials of CBS declined to comment on Jeno's statement that the network rejected Totino's ads because the copy "denigrates the frozen pizza industry and this is unacceptable."

In the criticism, Jeno's took issue with Totino's 30-second commercials for its Classic and Single Serve pizzas, which claim, respectively, that people don't like most frozen pizza because "the crust

CONTINENTAL MULLS 'NOVEL' PLAN

WRG flies the way Pan Am wants to fly

By ROBERT RAISSMAN

NEW YORK—Joseph R. Daly, chairman-chief executive officer of Doyle Dane Bernbach, says it was simply a matter of friendship that caused his agency to lose the $35,000,000 Pan American World Airways account to Wells, Rich, Greene.

The friendship Mr. Daly referred to is between Pan Am chairman C. Edward Acker and former Braniff International chief Harding L. Lawrence. Mr. Lawrence, the husband of WRG chairman Mary Wells Lawrence, is now a WRG consultant.

"The whole thing is very simple," Mr. Daly said, "Mr. Acker and Harding Lawrence are buddies from way back. We were not conscious of the relationship at first, but even if we were, so what? What could we do about it?"

In addressing the eastern conference of the American Assn. of Advertising Agencies, Mrs. Lawrence tried to squelch the idea of friendship as playing a role in the account change. She said Pan Am respected the job WRG did when the agency handled TWA.

She said no other agency had the international expertise of WRG and that was of prime concern to Pan Am. "A few executives with Pan Am—including Mr. Acker—worked with us when we had Braniff," she continued. "They

Airline derby chart shows how the major trunk lines and some of the smaller carriers have switched agencies in recent years. Status comments are based on AD AGE reporting.

Republic Air strives for national image

By RICHARD KREISMAN

Eighteen working days after moving its $20,000,000 account to Campbell-Mithun, Republic Airlines is taking to the air with a new campaign and heavier-than-ever ad doses prescribed to cure the carrier's continuing image as a collection of small airlines.

The new approach includes the first-time use of network tv for the Minneapolis company, and an ad theme, "Nobody serves our republic like Republic," touting the airline's size and 204 destinations.

The sense of urgency and the need for short-term solutions stems from Republic's mounting losses—$52,700,000 through November, 1981.

Republic execs said Campbell-Mithun won the account in December because it proposed immediate changes, including the speedy ad campaign, which the agency began working on the day it got the account.

The carrier's financial situation is more precarious because of the heavy debt it took on when it acquired troubled Hughes Airwest in 1980. Republic itself was born in 1979 when North Central and Southern Airlines merged.

The three-month campaign, featuring network and spot tv, radio, newspaper and outdoor, is aimed at increasing the airline's awareness levels in core markets and off-line cities. Spots breaking today in hub markets show Republic destinations, ranging from Seattle, Wash. to Washington, D.C. Radio spots ask, "Where would you like to go today?" and list a number of Republic destinations.

Network tv starts the week of Jan. 24 when Republic co-sponsors ABC-TV's "F.D.R." retrospective with David Brinkley and later branches out into news and late-night programing. John Harty, director of advertising and sales promotion, said network tv would help increase awareness and presell the Republic name.

Last week Minneapolis agency Kolesar & Hartwell announced it had been awarded Republic's cargo advertising. Hoffman York & Compton had been the agency. Advertising manager John Temple, however, said a decision had not yet been made.

The $1,000,000 assignment would include cargo media, sales promotion and market testing of expanded support for V.I.P. small package delivery service.#

DENTURE BREATH?
FINALLY, A BREATH FRESHENER MADE JUST FOR YOU.
BrethGard
BrethGard is the first and only long-lasting denture breath freshener cream.
BrethGard is not just another mint, spray or mouthwash made for bad breath—it's a specially formulated, long-lasting cream made just for denture wearers. Simply apply BrethGard to your dentures. Then moisture activates its unique long-lasting mint formula, freshening your breath for hours. And hours.

Carter-Wallace is testing BrethGard, a denture breath freshener cream, in Peoria. Ads from Avrett, Free & Fischer note it is "specially formulated. . .just for denture wearers."

Orange juice processors assess situation

Freeze freezes Fla. fruit ads

LAKELAND, FLA.—The damage to Florida's citrus crop caused by last week's freezing temperatures will result in advertising and promotional cutbacks, a sales embargo and some price increases.

As much as 84% of the state's crop was damaged, marking the second consecutive year that the vulnerable trees were hit by cold. The Florida Citrus Commission placed a 10-day embargo on the shipment and sale of fresh fruit, as the industry assesses the situation.

In addition, about $1,000,000 in scheduled advertising will be cut from the commission's $20,000,000 annual budget. About 40 newspapers in the North and Midwest were the first to feel the freeze in citrus advertising; ads scheduled to run in the next 30 to 90 days were immediately canceled.

A "Fresh Orange Sweepstakes" also was planned to be advertised in upcoming editions of several women's books, including *Better Homes & Gardens, Good Housekeeping* and *Redbook*. The commission is negotiating to cancel these insertions.

All of the advertising that has been canceled is for fresh fruit, which constitutes about 10% of the orange crop and about 30% of the grapefruit crop. The rest of the crops go into juice, Florida's main citrus product. Fruit still on the trees and destined for juice processing is not affected by the embargo.

There is no estimate yet as to the dollar volume of the damage. The record-shattering low temperatures striking the citrus belt last week are being compared to the freezes in January of 1977 and

Kodak flashes instant threat

By GAY JERVEY

While the world awaits Eastman Kodak's Feb. 3 introduction of its landmark film disc camera, the company last week trotted out something more familiar: An improved Kodamatic line of instant cameras. With them, Kodak hopes to inflict more damage on rival Polaroid's instant camera line than its earlier entries have done.

They had better. Ever since the colossus of Rochester, N. Y., entered the instant camera market with Colorburst in 1976, its share has hovered around 30% of the $1.5 billion instant photography market—and that share was earned early on. Some analysts place Colorburst's current share at only 25%—and, like instant profits, going nowhere fast. According to analysts, who say the instants' bottom line looks redder all the time, Polaroid's tenacity coupled with the Colorburst's basically "me-too" nature, apparently forced Kodak off its plateau and into some nasty price wars with its Cambridge, Mass.-based rival.

But neither they nor ad budgets of at least $13,000,000 annually have helped. To further darken Kodak's instant picture, Polaroid last May rolled out a high speed 600 instant photo system, the Sun camera, which has met with favorable technological reviews and mounting sales success.

Kodak's answer to the Sun comes in the form of four new Kodamatic models and a high-velocity instant film. Three of the models fold up and have a built-in flash that automatically adjusts to either indoor or outdoor light.

Kodak says its new light system will, by blending shadows and honing colors, improve the poor

'News' sales data upbeat

By STUART EMMRICH

NEW YORK—Bolstered by a prospectus that shows recent gains in circulation and earnings at the *New York Daily News*, Tribune Co. execs are beginning to hold serious talks with potential buyers of the paper.

For the first time in a month since the Tribune Co. announced that the paper was up for sale, the parent company is able to provide interested parties with hard figures about the paper's finances and educated guesses about its future.

■ Those figures reportedly show that the *News*, which lost an estimated $11,000,000 in 1981, was earning up to $1,000,000 a month during the latter part of the year and that circulation was showing an impressive climb to a daily figure of 1,567,000, and a Sunday circulation climb to the 2,000,000 mark.

Although spokesmen for the Tribune Co. and Salomon Bros., the brokerage firm that is handling the sale, refuse to discuss who the company is talking to or its timetable, they acknowledge that earnest negotiations have begun.

"We are actively discussing the possibility of the sale with a number of parties that go across the spectrum of industries," said Jay Higgins of the merger and acquisitions department in the Salomon Bros.' New York office.

While the confidential release of the prospectus has hardened the negotiation process, it has also prompted a call from the paper's unions that the Tribune Co. reconsider selling the paper. The unions are arguing that because the financial condition of the paper seems to be improving, the Tribune Co. should hold on to the *Daily News*.

If a buyer does materialize for the *News*, insiders are betting that it will not be a publishing company but a conglomerate outside the newspaper business.

Knowledgeable sources say that Gannett and Newhouse have taken a quick look at the paper and decided they are not interested. Other newspaper chains have said from the beginning they are not in the market for the *News*.

Los Angeles-based Times Mirror has shown some interest in the *News*' Brooklyn printing plant, which could be modernized and used to push expansion of its Long Island-based *Newsday* into Queens if the *News* folds.

But Tribune Co. execs are adamant: Any deal will have to include the paper; that's their first priority.

■ The real estate associated with the *Daily News* is reportedly one of the key reasons Warner Communications, the only company to publicly show interest in the paper, was willing to talk to the Tribune Co. about the sale. But insiders say that interest is now waning. Warner execs are downplaying the company's interest in the paper and other observers say that chairman Steve Ross took a quick look at the paper and by now has pretty much decided to stay clear.

Meanwhile, other interest has come from some slightly surprising quarters.

News World Communications, the newspaper publisher associated with the Rev. Sun Myung Moon, has contacted the Tribune Co., but a spokesman for News World said the visit was a "sightseeing trip" that may or may not develop further.

■ *News* staffers, though, are preparing for any development. Strains of Hare Krishna chants could be heard in the paper's hallways last week.

Also, Michael Goldstein, founder and former publisher of *Soho Weekly News* and the defunct *Wall Street Final* is letting people know he would like to return to New York newspaper circles as publisher of the *News*.

He is making initial contact with several companies thought to be interested in any package deal offered by the Tribune Co., telling them they can take the real estate and hire him to run the paper as publisher.#

WRG flying Pan Am's way

(Continued from Page 3)

know what they can expect and they feel secure with us at a time they need to feel secure," she said.

Security has not been a feeling generated between major airlines and their agencies over the past months. Last June, DDB dropped American to take Pan Am which, in turn, let N W Ayer have the axe. Bozell & Jacobs quickly grabbed American. In October, Campbell-Ewald moved in to take the $54,000,000 Eastern Air Lines account from Young & Rubicam, breaking up a 17-year relationship.

Close personal ties played a role in that move.

Los Angeles-based Continental Airlines, meanwhile, has not had much chance to work up a personal relationship with WRG, having named the shop just this past December (when WRG dropped Braniff). Continental late last week was trying to decide whether to keep or split with WRG/West because of its new Pan Am account. Mrs. Lawrence has put forth a proposal to set up a subsidiary agency to handle Continental's $16,000,000 billings.

While the subsidiary approach was considered novel by most adpeople contacted, a Continental source called that proposal only one of a couple of "interesting ideas" presented by the agency to resolve the conflict problem. Earlier last week, WRG presented a new campaign to the carrier, and consideration of this was understood to be part of the reason why Continental could make no quick decision.

In contact with Continental and watching developments closely are Benton & Bowles, which had the account whisked away from it by WRG; DDB, and Needham, Harper & Steers, which preceded B&B on the business.

Back in New York, DDB's Mr. Daly said, "We knew other agencies were trying to woo them [Pan Am] away but, frankly, we didn't think about Wells, Rich, Greene."

Mr. Daly said Pan Am seemed pleased with DDB's work. Only two days before the agency was fired, he said, there was a staff meeting at which he was told the ads were working well. At 3:30 p.m. on Jan. 8, William Bernbach, chairman of DDB's executive committee, and Neil R. Austrian, DDB's president-chief operating officer, were called to a meeting with William H. Waltrip, Pan Am's president-chief operating officer. At that meeting they were told DDB was no longer the airline's agency.

"We had absolutely no advance warning," Mr. Daly said. He said he was convinced that the decision was made by Mr. Acker.

The relationship between Messrs. Acker and Lawrence dates back to the early 1960s. Mr. Acker came to Braniff as a senior vp-planning in 1965 from the Dallas-based Greatamerica Corp., a miniconglomerate that also was a subsidiary of LTV Corp., then known as Ling-Temco-Vought. Greatamerica had acquired 57.5% of Braniff in 1964, and sources said Mr. Acker was brought in to help protect Greatamerica's interest.

In 1970, Mr. Acker was named president-chief operating officer in charge of Braniff's day-to-day operations. "They [Lawrence and Acker] were pretty close, obviously," said an LTV exec, who declined to be identified.

But some airline industry execs said a rift developed between Mr. Acker and Mr. Lawrence. During the Watergate years, Braniff was charged—as were a variety of companies—with creating a slush fund for the purpose of making contributions to the 1972 presidential campaign of Richard Nixon. Mr. Acker left Braniff in 1975, and industry sources said the timing of his release cast him as the "fall guy" in the affair in the eyes of the airline industry.

"Ed Acker is a tough, independent-minded businessman," said one airline exec. "He has a lot of airline industry advertising experience and there is a purpose behind what he does."

Commenting on the change, a Pan Am spokesman said WRG was chosen because they suited the airline's needs. "What more can we say and we're not going to say anymore," the spokesman said.

For his part, Mr Daly said the airline industry has become a peculiar business. "I don't think most marketing organizations do business on the basis of friendship," he said. "I have to make a judgment that the airline industry does [place heavy emphasis on friendships], on the basis of what has happened over the past year or so."

Despite its peculiarities, Mr. Daly said DDB has a wealth of airline experience and would not hesitate to get back into the airline business.#

'Coke is it' set to air

ATLANTA—"Coke is it" is the new theme for Coca-Cola Co.'s flagship brand, according to sources at McCann-Erickson, the Coke agency.

The campaign is expected to break within several weeks. Agency execs are making the rounds of local media now to set up buys.

In November, Sergio Zyman, vp-marketing operations, said the company would test several new themes before deciding on a new one. Another exec, Brian Dyson, Coca-Cola USA president, acknowledged that "Coke is it" was one of those under consideration (AA, Nov. 30).

Sources say Coca-Cola management was misled by false reasoning when it moved to "Have a Coke and a smile" in 1979. At the time, those close to the company said management wanted to suggest that consumers drink the cola instead of simply positioning it, for example, as "the real thing."

Management apparently got "hung up" on promoting the end benefit, said one source, but now seems to have returned to the old philosophy of positioning the product as one element contributing to Americans enjoying themselves and their lives.#

for the record

NEW YORK ATTORNEY GENERAL Robert Abrams has proposed legislation to protect cable tv subscribers from the exploitation of personal information gathered by interactive cable systems. The bill would forbid cable companies from disclosing any subscriber information on file without consent. Warner Amex Cable earlier issued its own privacy code.

WARNER AMEX Satellite Entertainment Co. has restructured its marketing unit. Andrew H. Orgel, formerly vp-affiliate relations, is now vp responsible for regional offices. Fred Seibert, formerly vp-on air promotion and production, has been named vp-creative services. Jordan A. Rost, vp-research and previously reporting to Robert G. McGroarty, senior vp-marketing and sales, will now report to John A. Lack, WASEC exec vp.

BIDS FOR CONSTRUCTION of the nation's first direct broadcast satellites were sought last week by COMSAT's Satellite Television Corp. STC said it hopes to begin the three-year project after federal approval.

CURTIS PUBLISHING has sold *The Saturday Evening Post* to Benjamin Franklin Literary & Medical Society, Indianapolis, for $4,500,000. It also is negotiating for the acquisition of the now-defunct *Quest*.

ANHEUSER-BUSCH, St. Louis, remains kingpin of the beer industry with a 29.5% share of the market. A-B's sales increased 8.6% in 1981, selling 54,500,000 bbls., compared with '80. Miller Brewing Co. remains a solid No. 2 with a 22% share. Sales rose 8% to 40,300,000 bbls.

UNITED PRESS INTERNATIONAL has drawn the interest of National Public Radio. NPR has contacted UPI owner E.W. Scripps about an unusual plan to turn UPI over to the NPR as a tax deduction, with NPR then running the wire service as a tax-paying subsidiary.

STIMPSON ASSOCIATES and Solkover Group, both Seattle, have merged to create a $10,000,000 agency. The Stimpson name will be retained and Stimpson's John A. King will be president.

DIAL is offering its advertisers a chance to pick up two new markets through an agreement it has reached with two regional public tv publications, *Focus*, San Francisco, and *Vision*, Dallas.

CAMPBELL SOUP, Camden, N.J., responding to a formal inquiry of the New York Stock Exchange, said it is not aware of any unusual developments that would account for the increased activity of its stock. One rumor was that PepsiCo was interested in acquiring the soup company, but a PepsiCo spokesman denied any interest or contact.

ESPN, Bristol, Conn., booked Tampax (Esty) as a new client and renewed Exxon (McCaffrey & McCall) and Owens-Corning (O&M) to six-figure buys, for a combined $1,250,000 in 1982 commitments.

MARTIN LANDEY, former deputy chairman of Geers Gross, New York, has formed Martin Landey Associates, which will specialize in marketing communications and is located at 747 Third Ave., 10017.

FERBER, JANKLOW & ASSOCIATES, New York, has merged with Chimbel & Bender to form Ferber, Janklow, Chimbel, Bender, with an estimated $5,500,000 in billings. The address is 1790 Broadway, 10019.

VITT MEDIA INTERNATIONAL has closed its Los Angeles branch, with Jim Barker, manager, among those who were dismissed. Vitt execs explained the move made economic sense.

GENERAL FOODS, White Plains, N.Y., said it has not had any contact with ITT concerning possible acquisition of that company's Continental Baking Co. subsidiary.

ACCOUNT ACTIVITY: **Charmglow Products** division of Beatrice Foods, Bristol, Wis., moved its estimated $2,000,000-plus account to **Stern Walters/Earle Ludgin**, Chicago, from Creamer Inc. A national tv, radio and print campaign for Charmglow products is planned. . .**WLS-TV**, Chicago, has split with N W Ayer. A selection is expected by April for the $2,000,000 account. . .**CHANGING TIMES** to **Bradley, Dimmock & Hungerford**, New York, for trade advertising and promotion, succeeding Avrett, Free & Fischer. A new campaign will break in the spring.

Kodak debuts new instant

(Continued from Page 3)

picture quality generally associated with instant photography. Kodak also feels that because its flash regenerates in one to two seconds for pictures taken within five feet, its system has gained a leg up on Sun, which takes five seconds.

■ The cheapest of the new Kodak cameras, the Champ, has a list price of $29.95 and no automatic flash. Increasing in price are the 960L, 970L and 980L, which will cost $114.95 and is the first Kodak automatic focus instant. Kodak's new film, $10.95 per pack, has a film speed of ASA 320, faster than before, but not as fast as Polaroid's 600 ASA.

Shipments to dealers will begin April 19, according to Kodak. In May, it will begin what it promises will be its largest ad campaign ever for an instant, up about 35% from current spending. Magician David Copperfield will present the new products in tv commercials by Young & Rubicam themed "Capture all the magic in an instant."

Kodak is keeping mum about the ad budget but is making it very clear that media choices for the rollout go way beyond the company's traditional buys. Kodak—presumably upon the urging of Y&R, one of cable's biggest agency fans—will enter this medium in a big way and will use at least eight cable networks, including ESPN, Cable News Network, WTBS and Black Entertainment Network.

Kodak also will do its normal network push, appearing heavily on prime time and such proven sports bonanzas as All-Star baseball. Daytime will also be used to snag women, whom Richard McCoy, director-advertising and sales promotion, describes as "prime purchasers." Spot tv will also be used in 20 to 23 markets, with b&w and color ads running in a wide variety of national, regional and special interest magazines, plus newspapers.#

Two-way tv screening out the bugs

BY THEODORE J. GAGE

Until a few years ago, the people who spoke of talkback tv as a realistic direct marketing tool got a firsthand sense of how Leonardo da Vinci might have felt when he spoke of flying machines in the 15th Century.

Today, two-way tv, although practical, is still highly experimental. Individuals and companies that fostered the concept a decade or two ago are seeing the affordable, advanced technical equipment coming on the market that will allow them to realize their ideas.

But because there are only a few companies that have endowed their cable systems with the potential to handle viewer response, it is, as yet, too early for anyone to tell whether the home tv and keyboard will become the center for shopping, banking and entertainment. But in certain homes throughout the U.S., it is happening now.

Comp-U-Card of America

Working in conjunction with parent Times Mirror Co., Comp-U-Card, based in Stamford, Conn., has developed one of the nation's most elaborate viewer-response and input cable systems in the country.

With the Comp-U-Card system, a consumer can get facts and details about a wide range of products by using a keyboard to input various product-oriented questions. Ask, for example, about a tv set and the home tv screen will flash an assortment of questions to get more specifics from you. After the central computer gathers all the viewer's specifications, it will present a selection of tv sets that meet those criteria.

Technically, the system approaches what is seen as the ultimate in two-way (or interactive) tv —where the viewer can communicate with the tv almost as if it were a sales person. But the Comp-U-Card system, like all other systems existing today, has some definite drawbacks.

■ In Comp-U-Card's case, the major problem is the lack of a still or moving picture capability. All information consists of text or simple, animated "computer pictures." Consumers cannot see a true-to-life reproduction of the particular tv set he or she may wish to purchase.

"We are installing alpha numeric systems like these but with video capability in stores," said Walter Forbes, chief executive officer of Comp-U-Card of America. "Frankly, to have both, this alpha numeric capacity and the video, demands more technology at a higher cost than people can afford in their homes."

Such systems, however, are coming, he said. While consumers can order directly through their tv sets using Comp-U-Card, Mr. Forbes conceded that they will hesitate to buy certain products they don't have a chance to see. In a great many cases, though, he said people have shown they're willing to order sight unseen as long as they have the facts before them.

If customers decide to order immediately—they don't have to order, but can choose to examine the products only—the system then offers them about 10 different ways to pay for the purchase. Then the material is shipped to the destination of the individual customer's choice. The 50,000 people nationwide who currently have access to the system pay a monthly membership fee for the shop-at-home privilege.

Subscribers can work a setup either through a two-way cable hookup or through telephone lines. Many cable systems, Times Mirror's included, are building all new cable setups with the two-way capability, even if it isn't immediately put to use.

■ There is a dearth of statistics that might show just how popular such two-way systems are with consumers. Comp-U-Card's system was implemented seven years ago and over the past three years has been gaining speed. Nontheless, much of the system is still experimental. But Mr. Forbes doubts there will be anything but growth.

"By 1990, we [the U.S.] could have 20% of all sales done by this electronic method," he predicted. "Interactive cable lets a consumer ask for information and that's something direct mail can never provide. With fewer sales people who know what they're talking about, this system could, in many ways, be more attractive than stores.

"You also have to consider high costs of gas and parking, plus time. But to succeed, the system has to be interactive. Anyone who thinks people will sit in front of a tv while product descriptions and pictures from a Sears catalog roll past is dreaming. Consumers need to get the information on the product wanted quickly."

Qube

If there is any company that has promoted and supported interactive tv with relish, it is Warner Amex Cable Communications, the jointly owned interest of Warner Communications and American Express Co. The company's Qube, most firmly established in Columbus, O., is rapidly improving its interactive services to subscribers in that city and a variety of locations where Qube cable is being installed.

One of the biggest breakthroughs for Qube came recently with a development that allows the viewer to punch in a wider variety of responses than before on a hand-held unit Previously, the viewer had only five response options on the "response panel."

■ Until now, Qube's interactive capability has been especially useful in two ways: Obtaining viewer opinions and offering educational courses.

But with the advent of the new season, Warner Amex can begin to offer services traditionally reserved for stores and direct mail marketers.

Although some of the older Qube systems, especially in Columbus, require telephone lines to complete the two-way linkup, the newer cable systems include two-way capability using tv, not the telephone, a move that should eventually accommodate moving picture capability.

"Marketers can put on shows and display their products, then get immediate response from people in their homes," said Gustave M. Hauser, chairman of Warner Amex. "I'm sure that in time, it will make mailed catalogs obsolete because it's less expensive and commands a faster response." For a while, though, the two will probably work together.

Like Comp-U-Card, the older Qube systems are limited because they depend on phone lines, which cannot transmit visual images, only text and animated pictures.

Mr. Hauser agrees with Mr. Forbes that no one yet knows just how interactive tv will affect consumers and the marketing mix. Mr. Forbes said it is bound to dramatically alter the direct mail catalog business and have some kind of impact on traditional instore shopping. He said that in five years, interactive tv "will be a lot more compelling than direct mail."

■ While Mr. Hauser was cautious about making any predictions, he said the two big advantages interactive tv will enjoy over both direct mail and instore shopping are cost and time savings.

Currently, the biggest obstacle to a real boom in two-way tv, said Mr. Hauser, is the cost of the necessary equipment for inhome use and the need for more cable systems capable of handling two-way audio and visual communication.

To find out just how and where interactive will fit in, Warner Amex is willing to experiment with almost anything.

"Right now, we're not thinking of profitability or success in terms of large viewership for our interactive," said Mr. Hauser. "It's a matter of learning, of seeing how people respond to various offerings. We're finding out what they like and want and what they don't."

Qube hasn't hired market researchers to estimate what will succeed and what will not because only actual experimentation will yield suitable statistics. And Qube, added Mr. Hauser, is not overly concerned at the moment by how many people use the interactive system when it's offered. The company is tracking the responses of those who do.

"Warner exaggerates sometimes when they talk about the response to various interactive shows," said an industry observer. "They may

The experimental nature of the program assures that some offerings will succeed and some will flop. "It's all part of the learning process we are committed to," he said.

Viewtron

Offered by Viewdata Corp. of America, a subsidiary of Knight-Ridder Newspapers, Viewtron is another home information service giving viewers in selected areas the chance to communicate and retrieve information through their tv sets. For the Viewtron tests in Coral Gables, Fla., American Telephone & Telegraph Co. teamed up with Knight-Ridder. Other companies, including CBS Inc., acted as information providers.

This system uses telephone lines, therefore, also has no moving visual capability. All such systems today, said Morton Goldstrom, marketing director of Viewdata Corp, have visual reproduction "only slightly superior to Legoblocks."

In a limited test, Viewtron offered a variety of informational services using the tv and phone lines, and viewers could respond by using a hand-held device similar to a pocket calculator in conjunction with a keyboard.

With 30 homes at a time being tested, Viewtron services went into 204 strategically chosen Coral Gables homes until the 6-month test ended in September, 1981.

Mr. Goldstrom said Viewdata Corp. officials agreed the testing warranted a bigger program. By 1983, 5,000 homes in south Florida should have Viewtron interactive service. Although primitive in some ways—no sound, stylized graphics instead of moving pictures—the system allowed viewers to call up information from Viewtron's data base, which included the equivalent of about 18,000 pages, or screenfuls, of information ranging from microwaves for sale to instructions on boating safety.

Mr. Goldstrom said that because the audio and visual capabilities of the system were so limited, the fact-providing service had to be fast-paced and interesting. That, and the interactive function, made Viewtron stand out from cable systems that offer rolling text.

"This is information search where you can get exactly what you want immediately," he explained. "You don't have to wade through a mountain of information because you can ask for what you want.

The Viewtron system offered advertising, but it was not of the traditional type. It was fact-packed and informational, much like Qube's concept of the infomercial.

Viewers would not put up with traditional tv commercials, said Mr. Goldstrom, but instead wanted commercial messages that educated and informed.

In fact, he added, Viewtron was more advertising-oriented than any similar system. Advertisers included companies like Eastern Airlines, B. Dalton Co., Sears, Roebuck & Co. and Merrill Lynch.

While it is too early to tell the ramifications of such an information system, Mr. Goldstrom said that it not only could provide a stiff challenge to direct mail marketing, but could become a major source for up-to-the-minute news and information. A major advantage would be that viewers could request news categories or specific stories that interested them.

He said information services will be the most attractive in the short term because of the limitations that exist in transmitting pictures. "Frankly, how many things will you buy without at least being able to see a picture of it?" he asked.

But with test results encouraging enough to prompt the company to launch a more expansive test and to attract the interest of news and information providers like CBS, Dow Jones & Co. and the New York Times Co., Mr. Goldstrom said it looks like Viewtron is on the way to success.

Interactive marketing may be here to stay, and whether such marketing works over the telephone remains to be seen. But Gary Arlen, publisher of "International Videotex Teltext News" and "Teleservices Report", said two-way tv will work. But before it becomes a major marketing force, it must offer full audio and visual to make it attractive to a large number of consumers.#

Our Advertising...

It's Been Put to The Test!

IN an advertising business that believes in testing its product and measuring results by actual sales or requests generated by each ad—there's no room for hunches, fast guesses or tricky slogans.

Here's where direct marketing experience shows up—and professionalism counts—because it takes a lot of know-how to provide a line of winners, and then go on to beat your own best work.

Our business is bottom line advertising. A business not for the fainthearted or the uninitiated. We prove ourselves to clients with every piece of advertising we do. (And we wouldn't have it any other way.)

See what a full-service agency of seasoned direct marketing professionals with over ten years experience in working together can do for you.

Test us! We'll prove it to you.

Advertisers face buyers' caution

(Continued from Page S-10)

with orders. Telemart received 23,000 orders in two weeks. The issue seems to be "inadequate" technology (and management), not a consumer "aversion" to at-home shopping via interactive systems.

HBR also argues that consumers won't want to give up the "personal touch" of store shopping. But creatives counter by saying that consumers would welcome the change.

Interactive tv would give the ever-larger numbers of working people more time and save them gas money, says Mr. Waites. Emily Soell maintains that an encounter between customer and sales clerks in today's crowded stores is often dishearteningly impersonal, with clerks often underinformed and overworked.

And creatives join together in asserting that the hardware itself won't be a turn-off. Mike Fabian, president of McCann-Erickson March, sees anyone under, say 50, as "untraumatized by technology" and welcoming it.

Ms. Soell comments that everybody has a calculator these days, and electronic games have "caught on like wildfire."

■ Although most agency creatives see the new two-way electronics as having great potential as selling tools, they also agree that certain problems must be overcome before the consumer will be equally enthusiastic.

"A basic problem, especially compared with regular tv, is that text and primitive graphics are currently all that can be displayed," says Mr. Waites.

"Tv today communicates in an emotional way; this is not available in videotex or viewdata." Until picture relay improves, the "critical areas" of creative response, says Mr. Waites, will be: To make selection from the information "menu" simpler, more direct and more responsive, and to make "key words" (meant to call up information) more evocative and appropriate.

■ Creatives can use their experience in personalizing to transform these "electronic laundry lists" into products and services that meet somebody's needs.

"There are real challenges there," says Mr. Kobs, who shares Mr. Waites' concern over the lack of powerful graphics. He calls the present system a kind of electronic classified advertising; "You wouldn't buy a dress from the viewdata system; you'd have to see it first.

Tv's obvious advantage is its demonstrability," he says.

But Mr. Kobs does see a promising way to get the selling message across despite present-day limitations. He and Mr. Beauchamp both cite the "infomercial" as providing cable entertainment—a potential advertiser's dream.

This one-half hour format would consist entirely of selling time—through entertainment and product information, as well as the marketers' commercial message. Explains Mr. Kobs: "The viewer would object to a one-half hour commercial, but if he's interested in the subject of say, cake decorating or woodworking, he wouldn't object to a program on these." The idea is to entertain.

Interactive systems test results seem promising. In September, Viewdata Corp. of America (a subsidiary of Knight-Ridder) wrapped up a study begun in July, 1980, in more than 200 Coral Gables, Fla., homes.

■ "Results were overwhelmingly favorable," says marketing director Mort Goldstrom. "Usage was very high, and in follow-up interviews consumers said they liked the service and would pay for it."

He adds carefully that "there's no indication that it's viable, but no indication that it isn't."

Knight-Ridder, Affiliated Publications and Capital Cities Communications are targeting a joint launch in 1983 of a paid-service videotex product in Florida.

Bruce Sanderson, vp-business development for Cox Cable's Indax, predicts "widespread acceptance" of interactive cable by 1983 or 1985, while cautioning that exact predictions are difficult because there's no precedent for the service. All Indax systems are "in the testing mode now" and users are not charged. The system will be commercially available in Omaha, Neb., in the first quarter of 1982. Other systems will follow "shortly thereafter," says Mr. Sanderson.

Predicting the future has always been risky. And if past "predictions" are as correct as they turned out to be, the new media have a sterling future:

"If God had intended that man should fly, He would have given him wings . . . the airship business is a 'fake' . . . ."

—Rear Admiral George W. Melville, Chief Engineer of U.S. Navy, 1901

"The ordinary 'horseless carriage' . . . will never, of course, come into as common use as the bicycle."

Fast growth sends admen on talent hunt

BY WILLIAM GLASS

The direct marketing agency has made a recent and dramatic arrival on Madison Avenue. Since 1979, Benton & Bowles, Grey Advertising, Ted Bates & Co., J. Walter Thompson USA, Doremus & Co., McCaffrey & McCall and McCann-Erickson have all entered the field with divisions or subsidiaries.

The less recent acquisitions (or creations) of direct marketing arms by Young & Rubicam Co. (Wunderman, Ricotta & Kline, Stone & Adler, Chapman Direct); Doyle Dane Bernbach (Rapp & Collins); Ogilvy & Mather (Ogilvy & Mather Direct Response), and Compton (Compton Direct Marketing) have all occurred since 1970.

Such explosive growth has created a demand for talent that far outstrips the supply. On the one hand, this means that career opportunities in direct marketing are extraordinary. As Gary Andrews, director of client services with Wunderman, Ricotta & Kline, puts it: "The opportunity in a direct marketing agency is one light year ahead of the opportunity in a general agency, any way you want to cut it; financially, power base, eventual responsibility or potential."

On the other hand, it means that any agency not wishing to suffer because of inadequate staff had better plan for the future.

One of the reasons for the talent shortage is, of course, the rapid growth of direct marketing.

Why has this growth occurred? The reasons usually given fall into three categories. The first includes changing social conditions: The growing number of women in the work force; rude or incompetant sales people; safety; access to a wide variety of products through direct marketing, and the cost of gasoline.

■ The second group concerns the increasing attractiveness of direct marketing to the advertiser. The No. 1 reason is that because the number of sales resulting from a given direct marketing piece can be figured out, the advertiser can ascertain the exact contribution to profit made by each advertising dollar. Direct response advertising is growing because the rising costs of sales calls make the ability to qualify leads increasingly valuable.

The third reason for direct marketing's growth is probably the most important: The movement from mass marketing to targeted marketing. At the heart of the trend is the computer and its ability to process an enormous quantity of data quickly and cheaply. This permits the advertiser to develop products for and distribute products to narrowly targeted market segments.

Direct mail and special interest magazines traditionally have been the obvious media to reach such audiences. Cable tv, however, promises to bring narrowly targeted offers to the broadcast media. With cable operators talking about having the capacities of an extraordinary number of channels, it is reasonable to imagine the evolution of tv designed for mass audiences into tv designed for special audiences. This would parallel the breakup of mass magazines into special interest publications.

■ And what in particular is causing the growth of the direct marketing agencies? Two reasons are generally given. The first is the entry into the field of nontraditional direct marketers such as Procter & Gamble, Digital Equipment Corp. and the Marine Midland Bank.

The second reason for agency growth is the discovery of tv as an effective direct response medium for a wider variety of products than anyone had ever dreamed.

In 1973, for example, Wunderman, Ricotta & Kline billed under $3,000,000 in tv. In 1981 it billed more than $50,000,000.

■ The changes of the past few years all demand new skills and new styles from those who create the strategies, campaigns and ads.

Account managers, for one, must combine a knowledge of direct marketing with a knowledge of strategic market planning. Says Ed Nash, exec vp of Rapp & Collins, whose book "Direct Marketing" was recently published by McGraw-Hill, "Today there is room—even a demand—for individuals with some kind of package goods background but with talent and a genuine interest in direct marketing. This stems from the increasing need to communicate with clients that are primarily package good companies."

Bill Morissey, exec vp of Ogilvy & Mather Direct Response, distinguishes the new direct marketing person from the old by his concern for positioning and brand image. Account management must now concern itself with broadcast. Even the corporate style that is the hallmark of the large general agency is, more and more, becoming a requirement of the direct marketing agency.

This is not to say that there are no differences between direct marketing and general advertising. As Mike Slosberg, president of Wunderman, Ricotta & Kline, has observed: "The account executive at

(Continued on Page S-16)

To cope with the talent shortage agencies have been forced to recruit from the limited supply of direct marketing professionals, both on the agency and the client side.

William Glass is managing director of the direct marketing division of Rex Associates, New York, an executive search company specializing in advertising and marketing.

Gross billings of top direct marketing agencies (Total in millions)

Agency	Billings 1980	1981
Wunderman, Ricotta & Kline	$ 98.7	$ 109.5
Ogilvy & Mather Direct	38.7	55.6

Amazing!

See page S11

PORTRAIT OF A DIRECT MARKETING EXPERT.

"As a direct marketing firm, we help our clients translate their objectives in terms of a direct marketing strategy. And we do a lot of work in the dealer direct mail area where national distribution is aimed at business prospects.

Part of our job is to evaluate and recommend mailing lists to our clients. In a dealer direct mail program, you need to provide good coverage in every market. We are able, via NBL, to always provide a good list no matter what the market is. Furthermore, NBL probably has the most accurate and up-to-date list for any given geographic market.

"When we want full national coverage and good current lists, NBL usually ends up being the best choice."

We used NBL for a builder supplier (distributor) mailing program at Frigidaire. And we mailed to 92,000 prospects three times to achieve market penetration. According to the Housing and Industry Sales Division, they had over 10,000 customer inquiries. So we had an accumulative response rate in excess of 10% and an average response rate of 3.3%.

We've also used NBL for Litton Microwave Cooking, Toshiba America, and Wickes Corporation.

When we want full national coverage and good current lists for a dealer direct mail program, NBL usually ends up being the best choice. And we back that up with the fact that we've had continued good experience using NBL lists."

Mark Morris, Chief Executive of Mark Morris & Company, Inc., a direct marketing firm.

To find out what we have for you, send $1 for the 58-page NBL List Directory with over 1,000 market classifications, representing 10,000,000 names and addresses.

Talent shuffle

(Continued from Page S-13)

WRK is probably more deeply involved in the profit responsibility of his client than a management supervisor in a general agency because profit and accountability are the business they are in. They are working hand in glove with their client to get a bottom line."

This means that an individual in the field must *want* to be judged by results. As Jim Stetler, exec vp of WRK notes, everyone might not enjoy "having the calipers applied each week."

The same is true in creative. A subjective response or even a Burke score is less interesting than whether or not the ad pulled. A creative person must be prepared for a straightforward presentation's out-pulling a more "imaginative" one.

To cope with the talent shortage, agencies have been forced to recruit from the limited supply of direct marketing professionals, both on the agency and the client side. The result has been a bidding war, and a realignment of salaries.

■ Eighteen months ago direct marketing personnel lagged behind their general agency counterparts in earnings. Now they often earn more. Direct marketing agencies also promote quickly—as soon as competence is demonstrated. But direct marketers alone have not been able to supply the needs of the direct marketing agencies, and the latter have been courting the general agencies in order to find talent.

Although by nature this results in something of a compromise, it also can be mutually beneficial. For example, general agency account people bring experience in strategic planning, and the agency creative people bring experience with tv.

In fact, the near impossibility of finding talented men and women with specific experience has led Wunderman, Ricotta & Kline—for one—to focus primarily on pure talent.

What has actually happened, however, is a readjustment of qualifications needed because of the dearth of the specific direct marketing skills available. In fact, the near impossibility of finding talented men and women with highly specific experience has led WRK—for one—to focus primarily on pure talent.

The agency's Mr. Stetler, compares the search for direct marketing talent to the professional football teams entering the college draft looking not to fill a specific position but for the best available athlete.

■ Inevitably, faced with people whose experience is incomplete, agencies are developing training programs to help fill in the pieces. Ogilvy & Mather Direct Response already has a training program for account execs and now is developing one at the supervisory level. George Wiedemann, president of Grey Direct, has developed the Career Development Program for the Direct Mail/Marketing Assn. and uses it in his own agency.

WRK is putting together a variety of programs relating to staff development. So is Benton & Bowles Direct and Stone & Adler.

In addition to programs developed by the agencies themselves, the DMMA has put together a number of introductory and advanced instructional programs.

The demand for the programs, which are supported in large part by course fees, can be measured by the growth of departmental budget. Dante Zacavish, senior vp of the DMMA, reports that in 1978 the total program budget was about $160,000. Today, it is close to $900,000.

■ Long term, the problems of obtaining personnel are two-fold: Lack of entry-level positions and lack of education (both in teaching the new skills necessary and making the availability of direct marketing positions known through educational institutions.)

As to the first, direct marketing companies traditionally have regarded themselves as entrepreneurial operations and have had little interest in staff development. Therefore, there has been no normal recruiting at the entry level.

This is changing slowly as agencies are coming to realize the seriousness of the deepening shortage and as they pass on this concern to those with the power to do something about it.

Education is the second large concern. Those in the industry constantly talk about the need for the industry to publicize itself. The DMMA Educational Foundation, headed by Dick Montesi, runs two programs designed to address this concern.

The DMMA Educational Foundation has developed a number of successful programs to reach the university student. The best known is the Collegiate Institute, offered twice annually, in which 35 carefully selected college seniors spend a week in seminars exploring the various facets of direct marketing.

Companies interested in recruiting at the entry level are invited to interview them. About 35% to 40% of the attendees find work in direct marketing, and the foundation boasts a list of some 125 professionals who are recent Institute graduates. The foundation also sponsors an eight-week summer internship for racial minorities. Of the 15 students who interned, three were offered permanent positions immediately and others were invited to interview after they completed school.

■ The No. 1 priority of the foundation is to increase the number of direct marketing courses taught in universities.

To this end the foundation has created "Professor Institutes," which bring together a group of 35 professors for three or four days to learn direct marketing. The first institute, held in Chicago last May, resulted in the addition of eight direct marketing courses to college curriculums.

The results of the second istitute —held this past November—are not yet in.

If both it and the two planned for 1982 succeed, they could be the single most important thing being done to assure a steady flow of fresh blood into the industry.

Despite growing pains, the direct marketing industry—and the agency business in particular—will continue its rapid expansion.

Managing the growth will be a difficult and delicate task, but how it is handled will determine which agencies are the most successful.

For some years to come, the critical challenge will be to identify and develop the brains and talent required.#

HOW TO PUT YOUR DIRECT RESPONSE PACKAGES TO THE TEST BEFORE YOU PUT THEM IN THE MAIL.

The ultimate test of any direct response package is what it does in the mail. But considering what's happening to the cost of in-the-mail testing, it's also a measurable test of your nerves. And your budget.

Does that mean we're against in-the-mail testing? Hardly. But we're very much against in-the-mail wasting.

We believe it's not always necessary to drop a mailing to determine if you should drop the token from control. We believe you can discover if a 4-page letter is more effective than a 2-page letter before you mail it. We believe talking, prior to mailing, can provide you with a wealth of information about products, prices, offers, premiums, response devices, personalization techniques, copy appeals and graphics. And we believe utilization of this information can dramatically increase response when you do go in the mail.

Yes, we believe. In research. In primary research. And we're making believers of more and more direct response professionals every day.

They realize the challenge facing the direct response industry in the 1980's lies not in merely trying to cope with higher mailing costs, nor in meeting the increasing number of mailing restrictions. The challenge is doing everything possible to create the most effective, most cost-efficient direct response packages before they're mailed—even before they're tested in the mail.

Primary Research can help you meet that challenge.

Call or write Marcia Wolly, President, for complete information.

SPECIALISTS IN CREATIVE LASER IMAGING

Rodale

(Continued from Page S-35)

"natural" world in general were the best means to health, happiness and longevity. Those are the themes that make up a large part of the *raison d'etre* for all Rodale publications and that served the company's founder until his death at age 72 in 1971.

Both *Organic Farming and Gardening* and *Prevention* became successful and paved the way for more success.

Organic Gardening (as it is now called) currently has a subscription base of some 1,250,000; *Prevention*, some 2,750,000.

The two have been joined by *The New Farm* (an offshoot of *Organic Farming and Gardening*), *Bicycling* and *New Shelter*, which have 100,000, 200,000, and 625,000 subscribers respectively. The company also publishes the "Executive Fitness Newsletter", which goes to 70,000 subscribers. Rodale's magazine business is nearly 100% subscription, although the company is in the midst of an expanded single-copy sales program.

Rodale also spreads its philosophy via Rodale Press Books, which publishes approximately 30 new volumes a year and lists some 160 titles.

In addition, Rodale has made the plunge into cable tv programing with its eight-part "Home Dynamics" series, introduced last fall in Providence, R.I. A second series is in the works.

The company is not a stranger to tv. It began using tv direct response ads for *Prevention* eight years ago, launched New Shelter with tv direct and at the time of this writing was in Florida shooting shots for the kick-off of Spring, the new women's magazine Rodale plans to introduce in April. All of the Pennsylvania publisher's tv spots include the use of 800 dialing. Plant expansion and computerization have kept pace with all of this growth.

■ Rodale handles all of its customer transactions—some 6,000,000 annually—in its 43,000 sq. ft., solar-heated Operations Center. Five years ago, the company made the conversion from manual to computer systems when it began using scannable documents for invoices and early renewal efforts. Rodale also uses its inhouse computer ability to run regression analysis and other multivariate systems to find and mail to the most responsive segments of its house lists. It is also testing this analysis on outside lists.

Yet despite the modernization and growth that has turned Rodale from a small, alternative curiosity into a major publisher that logged $100,000,000 in sales during its Aug. 1, 1980-July 31, 1981, fiscal year, the company is still frequently thought of as a small, family business where people work at rolltop desks and live in communes, Mr. Teufel cheerfully acknowledges.

The Rodale Press president figures one reason customers feel that way is that they know Rodale researchers generate a lot of the material that appears in the company's publications.

For example, "Fitness House," Rodale's executive dining quarters, started out as the test kitchen for the recipes that appear in its books and magazines. And, in addition to a small experimental garden on the nearby Rodale homestead, the company operates a 305-acre Organic Gardening and Farming Research Center in Maxatawny, Pa., where researchers develop new farming methods, foods and food technology and animal and plant breeding programs geared toward discovering new, low-energy resources.

■ On top of that, says Mr. Teufel, many Rodale employes, including board chairman Robert Rodale, J.I.'s son, actually live the Rodale life.

"People know we're involved in research as well as publishing," Mr. Teufel says. "And we know people depend on the information we print, so we take great care to doublecheck every fact, test every product and recipe we develop and make certain that all of our endeavors contribute to society. For us, this comes naturally, because most of the Rodale family of employes are actively involved in the way of life we write about. We all have a personal stake in our ideas."

What this means, adds Mr. Teufel, is that Rodale's sense of "mission" makes the company "more than a business."

In fact, even the almighty advertising dollar has failed to crack the Rodale way in some cases.

In spite of a move to attract mainstream advertisers in recent years, Rodale will not accept ads for any commercially prepared foods, alcoholic beverages or cigarets. The company also turns its back on certain other commercial items, including some household appliances and toiletries it believes do more harm than good.

If anything, Mr. Teufel says, technology has only helped Rodale maintain the personal ambiance it shares with its customers.

OUT or IN, dialing delivers dollars

BY GARY WEST

The Dreyfus lion stalks out of a subway exit and prowls Wall St. while an off-screen voice intones the virtues of mutual funds. An 800 number holds on the screen and throughout America thousands of hands reach for the convenience of their telephone to respond.

Every minute, during the peak month of January, approximately 700 people are dialing an 800 number in response to a tv commercial to order products or request information. But tv direct response constitutes only a fraction of the entire 800 toll-free industry, which American Telephone & Telegraph Co. estimates will make or take 1.6 billion calls in 1981, about 22% over 1980. And the telemarketing industry as a whole is so large that $9.845 billion was spent last year just on the cost of telephone calls, exclusive of labor, media buys or profit.

As immense as these figures are, there is currently no way to fully conceive of the total size of the industry.

Previously the bargain basement of advertising, telemarketing in the last five years has attracted, in addition to Dreyfus Fund, such well known national names as Brown & Williamson Tobacco Co., Time-Life, *Wall Street Journal*, Citicorp and Ford Motor Co.

■ For many people in the traditional ad community, however, there is still quite a bit of confusion as to what telemarketing is, what it can do and where it is positioned in the total marketing picture.

Telemarketing, generically, describes a system of placing or receiving telephone calls to capture orders, generate leads or provide services to existing customers through a scripted message; the purpose is to make or increase sales in a measurable and cost-effective manner. There are two methods used to achieve these purposes: IN WATS (Wide Area Telecommunications System) and OUT WATS.

IN WATS uses the familiar 800 toll-free number to receive order calls from direct response ad campaigns, mail order ads and direct mail. It also collects self-qualified leads (in which a person, answering an 800 number, identifies certain characteristics about him or herself) for future information, brochures and sales calls from consumers and business people.

IN WATS is performed both inhouse and by toll-free answering services; the choice depends on the volume and duration of the campaign and the amount of interaction between operator and caller.

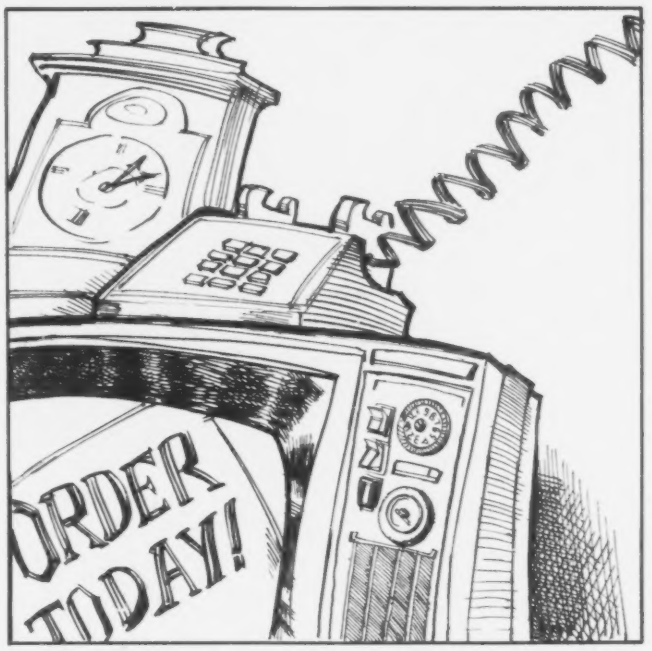
OUT WATS makes sales and research calls, primarily, but not exclusively, on WATS lines to consumers and business contacts to sell products, service accounts and develop leads.

Once again, this is handled both inhouse and through service companies.

■ The telemarketing industry serves eight basic functions: It provides for order capture and lead generation; provides for direct sales and lead generation (OUT WATS); receives calls for such institutions as Runaway Hotlines, Medical Information (IN WATS), and receives orders for catalogs and dealer locator programs (IN WATS), although increasingly it is used as OUT WATS to follow up direct mailings for such companies as Montgomery Ward & Co. and Bloomingdale's.

It also provides for hotel, car and airline reservations (IN WATS); credit card authorizations (IN WATS), and promotion, sweepstakes and product information (IN WATS). It also helps in product introduction.

Possibly the most exciting growth areas are order capture and lead generation, OUT WATS sales and research and product introduction.



In order capture and lead generation, the consumer is prompted by tv, print or radio advertising—along with direct mail—to call an 800 toll-free number at the instant of motivation to order the advertised product or to ask for more information. Operators capture the order for cash on delivery or credit card sale or obtain needed demographic information to qualify the lead.

In some cases, the operator verifies the credit card number, compares the address to the Zip code to prevent errors or "upsells" the caller by making suggestions for multiple orders, increased length subscriptions or the like. Increasingly, the toll-free service company is being required to process the data and deliver the information to the client through daily electronic transmission.

■ Why are order capture and lead generation such growth areas?

Inflation has increased pressure on marketers to make their advertising results measurable; what better way than a medium where, at the end of the day, you know how many *actual* orders you have taken, on specifically which stations and for an exact amount of money per order?

Also, media buyers can now obtain extraordinary research data on the type of audiences, the amount of appeal and viability of different media sources—all at little or no cost as part of the order capture.

Moreover, the marketplace is different. Two paycheck families may have more money but less time to spend it; they understand product value more and enjoy the convenience, speed and use of credit cards. They are becoming more accustomed to telephone sales. Many enjoy the personal contact of a voice at the other end of the phone.

■ As direct response has shown itself to be quite cost-effective in selling products, its value as a source of self-qualified leads has opened the market to mutual fund sales, banks, gym equipment, regional travel authorities, and insurance companies that earlier had shunned the field. (A self-qualified lead refers to a person responding to a toll-free number for more information, for, say, energy saving devices. By responding to the ad, the person automatically identifies himself as being interested in the product and possibly being in the market in the future for something similar.)

Rather than randomly mail to potential consumers, a lead generation campaign that offers free information can yield both valuable demographic data and an avenue for sales of high priced items. For example, the Texas Tourism Office found that while 52% of coupon clippers who asked for a guide to the state visited the area, 63% of those who called for information left their vacation dollars in the Lone Star State.

The bottom-line is cost per order acquisition (CPOA). Such a figure can be determined by dividing the sum of the costs that go to make a sale—commercial products time buys, toll-free answering service, fulfillment—by the actual number of orders. It isn't the cost per thousand but the CPOA that determines the success of a direct response campaign.

Often a service company, through its ability to take more accurate and a larger number of calls per hour, can make the crucial difference. Its ability to "upsell" the

Dial power

(Continued from Page S-39)

caller also helps. If other costs are the same, more orders means a lower cost per order acquisition.

Still, the increased volume in tv direct response has created some problems. Inflation and demand have raised spot costs dramatically, although insurance companies and merchandisers of expensive items are willing to pay more for lead generation programs since their payback has been much higher through the years.

■ Says John Marsh, president of RM Marketing, King of Prussia, Pa., one of the largest buyers of direct response tv time in the U.S.: "Five years ago, this was an easy field to enter. Today, it's harder for new players to purchase the needed time; media sales reps know the market and have established relationships to whom they can sell most of their time. Consequently, it's a higher risk game now for new companies using television direct response."

The future may be even more spectacular, as technology makes the almost impossible real. For example, WATS Marketing of America and National Data Corp. soon will be able to directly authorize the use of credit cards. Someone ordering a product would at the moment a call is made have the funds taken from his account and placed into the advertiser's.

Also, combined time share computer systems will allow direct marketers companies to control their inventories directly from the orders taken by the service companies.

Through computer software, order taking speed will increase radically; a drop of only four seconds on a one-minute order capture would result in a sales increase of 6.7% at no extra labor cost.

By this spring, computers are expected to automatically compare the given address to the Zip code stored in memory and tell the operator if there is an error in the order. Soon, they may be able to compare both items against a stored telephone number, allowing almost foolproof ordering.

George Smith, director of marketing with Avis toll-free services, predicts greatly enhanced 800 service to Canada and Mexico; he also sees a shakedown from the current 25 national service companies to 10 in the coming years. "The industry will be stronger and the quality higher as the demand for responsible order capture forces the less mature companies out of the business," he says.

■ One other area of great interest lately has been OUT WATS sales and research. Today, OUT WATS constitutes less than 10% of the telemarketing industry; it could reach the size of IN WATS in the next decade. The factors for its rise are, once again, economic.

In the last decade, the cost of a sales call and the cost of bulk rate mail both increased by 70%, with first class itself going up by 55%. According to some observers, a single sales call costs nearly $200, with 4.3 sales visits necessary to close a single industrial sale. Add to that equation the results of research concluding that OUT WATS telemarketing, combined with direct mail, yields 2.5 to 7 times the positive response of mail alone, and the conclusion is that telemarketing must be tried.

OUT WATS marketers agree that there are enormous opportunities in the future for them; they do not all agree where that future is. Ernan Roman, vp, business development for Campaign Communications, anticipates that interactive systems, including teletext and viewdata will be a viable force in the 1990s, if the consumer acceptance and cost factors are successfully resolved.

Another possible trend being sparked by AT&T is the perception of telemarketing as a medium, rather than as a service. James Mahood, brand manager of AT&T Long Lines, sees business to business OUT WATS as performing many of the same functions as traditional advertising—creating brand loyalty and identification, stimulating demand and trial and selling against competition. "Telemarketing's lcountability, cost-effectiveness and functions make it a media cost, part of an integrated campaign to raise awareness and sales."

Meanwhile, product introductions through telemarketing is one of the most exciting trends to appear recently.

Telephone expenditures for telemarketing

(Estimated figures)

	(In millions) 1980	1976
Residential originated local calls	$ 569	$ 232
Residential originated toll calls	689	269
Business originated local calls	4,144	3,045
Business originated toll, WATS, 800 calls	4,443	2,502
Total	9,845	6,048

Statistics were prepared by James M. Mahood, brand manager-telemarketing, AT&T Long Lines. The figures were published recently in the "DMMA Fact Book on Direct Marketing."

Because product trial and repeat sales are the keys to the establishment of new brands, it is crucial in today's competitive environment, to get a product into a consumer's hands as quickly and as positively as possible.

A good example is Brown & Williamson's introduction of Barclay cigarets in early 1981. After testing in three markets, B&W rolled out a national campaign that promoted the brand with a strong, simple appeal: "The pleasure is back."

Rather than just spotlight the brand's appeal, additional double full-page spreads encouraged the readers to call a toll-free number for a coupon worth a free carton of Barclay.

According to published reports, Barclay has achieved close to two market share points in an industry where one point is a remarkable success for a newly introduced brand.#

Why would any New Yorker in his right mind use a list broker in California?

Mr. Larry Chait, past president of Direct Mail Marketing Association. An Infomat customer and a New Yorker who is definitely in his right mind.

By count most of the nation's major list houses are in the East. Manhattan alone has enough brokers to bury every mailbox in America under a pile of mail three feet deep.

If that's the case, then why are major clients defecting in flocks to Infomat? Why are they coming 3,000 miles to rent our lists when they can get the same names at the same price from someone down the street?

After all, tradition has it that if you want good list service and good advertising, you go to New York. California has always been the graveyard of ambitious list brokers. No one had ever grown very big out there. Until Infomat came along, that is.

We Changed It All

Infomat has changed that. Not only are we No. 1 in the West, in growth rate we're probably No. 1 nationally, too, having more than doubled in volume in each recent year. In fact, over 60 major ad agencies and ten direct mail consulting firms have come to us for their list mix. Many of our clients—manufacturers, publishers and fund raisers—are so loyal you couldn't pry them away from us with a crowbar.

Our Secret

There's one good reason why New Yorkers and other Easterners are beating a 3,000 mile path to our door: *money.*

We produce exceptional results for them because our list mixes pull better. This may sound like puffery, but in our case it's gospel.

There are other reasons, too:

1. We're very, very cautious. We select mailing lists with the kind of care ordinarily reserved for tiptoeing through minefields. You needn't worry about getting a careless choice.
2. Our decisions are based on careful record keeping. Sad to say, only a handful of the country's 126 brokers do the sort of research that Infomat does.
3. As an Infomat client, you can afford to forget about your list worries once you've hired us. Our total, conscientious care frees you to think about other things.
4. We don't pay our list AE's commissions, which discourages careless choices. Some of our largest competitors do.
5. We're list *consultants,* not list peddlers. We work just as hard to find ways to save you money as you would yourself. For instance, we constantly look for opportunities to do special selections or locate obscure lists.
6. No matter where you are in the U.S., you get the most personal, friendly service you ever had. Just like you lived next door to us.

Success Stories

Relying heavily on Infomat's list selections, an expensive investment newsletter went from zero to 72,000 paid subscriptions in only 21 months.

A West Coast non-profit group consistently gets twice as good a response with Infomat's lists than from any other consultant. For two months, its staff literally could not handle the contriioutions that came in.

An expensive mail order product went from zero to 60,000 units sold in only 18 months using Infomat's list selections.

A very expensive opportunity seekers' publication, using Infomat list selections, went from 1,000 to 48,000 subscriptions.

A $400 seminar had to turn away over 200 people because of too much response!

We introduced a product from South Africa into the U.S. Even with a price tag twice as high as the competition, in less than two months the promotion surpassed the initial response goal by 210%.

The test mailing for another happy client broke even in just 2½ weeks from the mail date, and had paid back all creative and production costs and produced a 400% profit on the initial investment by the eighth week. Subsequent rollouts did almost as well.

The Zipmarket Principle

We have been able to build booming businesses for one customer after another for one main reason: we understand better than most the basic law of direct mail. We call it the Zipmarket Principle. Briefly, it is this:

"Good lists beat good packages."

More specifically:

Even the most brilliant package will fail if mailed to poor lists, but any decent package will pull well if mailed to quality lists.

We call it the Zipmarket Principle because the more you ignore it, the faster your share of the market approaches "zip."

If you have ever used direct mail and got weak results, chances are it was your list mix that was at fault. We know of hundreds of mailers who struggle on year after year, testing mail package after mail package, spending thousands of dollars on mailings that only break even, at best.

They are ignoring the fact that no package is going to change a person's mind if he's just plain not interested in responding to anything in the mail. But if a person *likes* to buy through the mails and has *proven* it by buying other things, he'll probably respond to you, too—even if you send him just an average package.

We hasten to add the obvious corollary to the Zipmarket Principle:

"Good packages help."

That's why Infomat is one of the few list brokers with an in-house creative agency, Infomat Marketing. Specializing in high-response direct mail, it offers you full-service, state-of-the-art package design, printing and lettershop.

How good is Infomat Marketing? Well, it produced this ad. Judge for yourself.

What They Are Saying

"Your ideas increased my response by about 50%." —**Murray Norris**

"What am I going to do with all these checks?" —**Ed Rankin**

"If it hadn't been for your lists I don't believe we would have even broken even." —**M.S., Atlanta, GA**

"Your list selections have produced thousands of dollars of additional income for my clients. Even their test mailings make money when they follow Infomat's advice. You're the best." —**M.E., Marketing Consultant**

"I've been using Infomat for 3 years—I'm extremely pleased. Our circulation for *Gold Newsletter* is constantly increased—thanks to Infomat." —**James U. Blanchard III, National Committee for Monetary Research**

Discover Infomat Now

If you're really serious about getting higher response and opening up new markets for yourself, pick up the phone and call Janie Thompson or Anna Sternberg:

(213) 377-0444
(collect is fine)

Tell them what you've been doing and what your goals are. They'll tell you how we can get to your goals. They'll send you all our mailing list bulletins related to your firm.

If you like, you can send them a sample of your more recent mail package and, at no charge, our creative agency, Infomat Marketing, will analyze it for effectiveness.

Then they'll dig and dig through the 40,000 lists on the market until they find the ones that you'll be delighted with. They will include lists that you may not have heard about or thought of. And in a few days they'll recommend a specific list mix for you based on a careful analysis of your needs—with no obligation.

Call them at Infomat, today. It won't cost you a cent. And you could add a new chapter to your company's history.

Very truly yours,
Craig A. Huey

DIRECT MARKETING

A conversation with DMMA's Rose Harper

BY BOB STONE

"C. Rose Harper, president, The Kleid Co., is the first woman to be elected chairman of the Direct Mail/Marketing Assn." These are the bare facts as they might appear in a current issue of "Who's Who."

But Rose Harper is much more than the president of one of the most professional list marketing consulting companies in the country and the chairman of a major association. Rose Harper is one of the most knowledgeable figures in direct marketing, recognized for her innovations and breakthroughs in the area of list marketing and analysis.

In an interview for ADVERTISING AGE I was able to take some of the measure of this unique person's wisdom and knowledge.

Stone: Please tell us something about DMMA membership.

Harper: Today DMMA has 2,700 member companies, represented by 4,600 individuals. We estimate that this membership accounts for anywhere from 55% to 65% of the total of goods and services sold via direct marketing methods. And for 1981 we expect total volume to reach $120 billion.

Stone: How does DMMA define direct marketing?

Harper: The definition that will be used in the new edition of DMMA's "Fact Book" is: Direct marketing is an interactive system of marketing that uses one or more advertising media to effect a measurable response and/or transaction at any location.

Stone: Aside from the annual spring and fall conferences, what other activities does DMMA sponsor?

Harper: DMMA will sponsor a total of 35 seminars, covering about 82 days of intensive learning, in 1982. Subjects are varied: Catalogs, telephone marketing, magazine marketing, fulfillment, math and finance, copy and art and many more.

Stone: How does the growth of direct marketing compare with retail?

Harper: In 1981 retail sales volume in the U.S. grew 7% over 1979. For the same period, direct marketing sales volume grew 11%. It appears that current growth rates for direct marketing will continue through this decade with possibly a slower growth rate after the mid-1980s.

Stone: How do you feel the new media will affect direct mail usage?

Harper: There is no doubt the new electronic media will affect direct mail volume. But I do not see electronic communications entirely replacing written communications. It is possible the new media and direct mail will, out of necessity, become interactive and mutually supportive.

Stone: Do you know of any direct marketing success stories in the sale of goods and services via cable television?

Harper: DMMA used cable tv for its "Great Catalog Guide." This was intended to communicate the benefit of shopping by mail and the catalog listed more than 550 consumer catalogs in 27 product categories. It was estimated that 2,000 requests would be generated. Actually, more than 7,000 called during the two-week period the commercial was aired to request the "Catalog Guide."

It now appears that a very small percentage of cable tv advertising is focused on a direct sale. It hasn't quite yet reached a high point of interactivity. However, it's hard to believe it won't be successful. It will take time to influence consumers to change their buying habits. Not everyone is attuned to the wired society—yet.

Stone: How do expenditures break down among various media used by direct marketers?

Harper: Here are the figures for 1980 vs. 1979:

	(In Millions $) 1980	1979
Direct mail (postage, paper & production)	9,998.7	8,876.7
Telephone	9,845.0	8,555.6
Newspaper preprints	2,032.4	1,779.5
Television	253.0	217.0
Magazines (mail order merchandise only)	135.0	123.0
Coupons	84.2	72.0
Newspapers	60.6	54.4
Business magazines (industrial products only)	53.0	47.0
Radio	26.0	23.0
Total	$22,487.9	$19,748.2

Stone: What is DMMA doing to educate college students on the disciplines of direct marketing?

Harper: DMMA, through its independent, separately incorporated foundation, has several major programs for college students and professors.

One of the most effective programs is the "Collegiate Institute," run twice a year for a week, introducing 70 college seniors to the basics of direct marketing.

Another program is the "Institute for College and University Professors." Of 60 professors who attended two institutes in 1980, 11 started direct marketing courses.

Three other noteworthy programs include the summer student internship program for undergraduate students, who work a total of eight weeks in DMMA member companies and agencies in New York City; "Career Days" at spring and fall conferences, attracting more than 300 students each, and the first textbook in direct marketing for the college audience—"The Elements of Direct Marketing," being written by Martin Baier, vice-president-marketing, Old American Insurance Co., and professor at the University of Missouri/Kansas City.

When this book on direct marketing is published, we expect a quantum jump in the number of students studying direct marketing.

Stone: What does DMMA expect in postage rates over the next five years?

Harper: The postmaster general stated strongly he will do his best not to have another rate increase for two years (roughly October, 1983). If this holds, we can probably expect two increases in the next five years. How much is difficult to estimate.

Within the next five years, all public service subsidies to the Postal Service will cease and nonprofit subsidies will be substantially reduced.

If service cuts or other economies are not made, the money will have to generate from the rate structure. #

Bob Stone is chairman of Stone & Adler, Chicago.

Canada dailies periled: Report

By TONY THOMPSON

OTTAWA—Large Canadian daily newspapers are seen as modern-day dinosaurs of the media that could be toppled by even small changes in the economic context in which they exist, according to a research paper produced for a federal government inquiry into media ownership.

The report, published as a 110-page booklet, "An Industry in Transition," could make relevant reading for those watching the development, for example, of Gannett Co.'s *USA Today*, from the conclusion it draws of the progress by the *Globe & Mail*, Toronto, in becoming a national newspaper for Canada.

With satellite printing presses on line in Quebec, the Maritime Provinces, Alberta and British Columbia, the *G&M* is available in most major centers simultaneously. "Pride in this recent achievement still obscures the danger that it may pose for local newspapers, particularly if the *G&M* exploits its new potential to create distinctive editorial packages for regional audiences supported by regional advertising," the booklet notes.

■ But the biggest long-term threat to newspapers would come from video technology, although the impact perhaps may not be felt for decades. "Regardless of the timetable," the booklet states, "the threat to newspapers clearly is there and, perhaps, more lethal in its potential than the impact of radio and television has been."

Another report, "Newspapers and their Readers," contains 123 statistical tables and shows that Canadians have similar attitudes to those found in recent U.S. studies.

Of the 3,511 people sampled, the majority found tv to be "most influential, most up-to-date, most fair and unbiased," and "most essential to Canada." Newspapers, on the other hand, were found to be "most essential to the community" and to present the "widest range of opinion."

The inquiry was set up in 1980 following the same-day closure of the *Manitoba* (Alta.) *Tribune* and the *Ottawa Journal*, by Southam Inc. and Thomson Newspapers, respectively, leaving each with the only daily in town.#

The Crown Center complex was center stage last week for the four top agencies competing for the Hallmark Cards account. Al Hampel (far right) led the creative delegation from incumbent FCB.

At Hallmark, 4 agencies present their very best

By JENNIFER ALTER

KANSAS CITY—When Joyce C. Hall decided in the mid-1930s it was time to develop a national advertising program for his greeting card business, he discovered that ad agencies did not look upon his company as a plum account.

"None of them were enthusiastic," recalls the founder of Hallmark Cards in his memoir, "When You Care Enough," "and a good many frankly said they were not even interested."

If the elderly Mr. Hall were to have come out of retirement last week and paid a visit to the modern Crown Center complex his company has spawned, he would have witnessed one of the most intense agency competitions in recent history. And Hallmark, with annual sales at about $1 billion, largely from the 10,000,000 greeting cards it sells each day, is the prize.

Whether the privately held

ABC slotting prime time 60 for fall sales

By COLBY COATES

NEW YORK—In a move that could yield more than $50,000,000 in additional sales revenue, ABC-TV wants to add another minute of commercial time on all prime time nights with the exception of movie nights. To sweeten the deal, ABC affiliates will pick up four 30-second commercial breaks per week.

To stay within nonprogram guidelines established by the National Assn. of Broadcasters code board, ABC will run the two additional units instead of network promo time. This tactic is expected to head off any opposition on the ground that the two commercial units would add to clutter.

The plan was presented to affiliates last week, with a start date to coincide with the beginning of the 1982-83 season. But agency buyers will be negotiating for these units this summer when the upfront season starts.

No official word has come from its competitors yet, but there's not a tv man on Earth that thinks CBS and NBC won't follow ABC's lead.

The move is in response to network tv's two biggest enemies: Rising unit costs and spiraling Hollywood production costs, which are currently running far ahead of commercial cost increases.

ABC-TV sales vp Jake Keever said, "We need the expanded inventory. If we can't get it, we won't be able to maintain the caliber of our programs." Mr. Keever also feels the extra inventory "will tend to slow down unit cost hikes."

The initial reaction of the buying community is highly positive. "I'd love to see expanded commercial time as long as the networks cut back on their promotional time," said one major agency senior vp. His agency has already run the proposal by "six or seven key clients," and "they don't have any problems with it either," he said. "I think it's terrific," added another agency president, who also noted that in a buyer's market, the additional commercial inventory will give agencies a bit

Phil. survivors move to fill 'Bulletin' gap

By STUART EMMRICH

The only two newspapers left in what was a four-newspaper town a month ago are moving swiftly to fill the void left in the Philadelphia market by last week's shutdown of the *Philadelphia Bulletin*.

The *Philadelphia Inquirer* and *Philadelphia Daily News*, both owned by Knight-Ridder Newspapers, have been working on contingency plans since Charter Co. announced on Jan. 6 that the the 134-year-old Bulletin was for sale. But both papers have been planning for what many predicted as the eventual closing of the once-formidable *Bulletin* since last August, when Charter announced the paper was in trouble.

Changes will be seen in both papers as early as this week following the *Bulletin's* closing on Friday. *(For coverage of the New York newspaper situation, see story on Page 3.)*

The *Daily News*, which had been hitting the newsstands at 9 a.m., started coming out with a 6:30 a.m edition today in an attempt to pick up more of the commuter traffic, according to paper spokesman Bill Broom. The paper also will start to become more of a "complete newspaper," beefing up its regular mix of sports and features with more syndicated services and more local news coverage, Mr. Broom said.

But the most extensive changes will be carried out at the *Inquirer*, the Pulitzer Prize-winning morning paper. Editors there plan to increase the paper's staff—picking up a number of *Bulletin* employes—and the news coverage substantially, with emphasis being placed on the suburban areas ringing Philadelphia, where the *Bulletin* was particularly strong. Spokesmen at the *Inquirer* say there soon will be an expansion of the suburban "zone" editions that now are limited to the Main Line area of Philadelphia and parts of southern New Jersey.

The paper also has started adding more people to the sales staff as it looks to increase its already

Cobb to head GF pet food

WHITE PLAINS, N.Y.—Ralph L. Cobb has been named to head General Foods' ailing pet foods business as the company sets in motion plans to focus on profits instead of volume.

Mr. Cobb, corporate vp-group exec and formerly president of the foodservice division, succeeds Robert Sansone, earlier named general manager, beverage division.

GF's pet food business is under tremendous pressure since its strength, the soft-moist segment, has been suffering. GF's canned and dry entries have shown some share gains, but sources say the company has been losing money because it found it necessary to push with heavy deals and other promotional activities. The big winners through all this have been generics and private labels.

Some sources project GF's losses in pet foods for the fiscal year ending in March at close to $10,000,000. Because of the company's difficulties, there has been much talk among competitors, distributors and retailers about whether GF should consider getting out of the business altogether.

The company said the business is not for sale. GF thinks it can operate its pet food business profitably, and "plans are in place to do that," it added. The company is now introducing a five-flavor line of Gaines Gravy Train canned dog food (AA, Jan. 18).#

CBTV ON ITS OWN, HIRES AGENCY

Boycott punch weakens

By JANET NEIMAN

The Moral Majority's decision last week to withdraw its support for a boycott of tv advertisers reinforces the general lack of concern expressed by marketers last week over renewed threats from the Coalition for Better Television.

With the organizational prowess and financial muscle of the Moral Majority eliminated from the issue, already-skeptical advertisers are even more likely to be unconvinced of the CBTV's ability to mobilize a band of consumers strong enough to influence their tv buying habits.

As originally reported in Advertising Age Jan. 25, the Coalition for Better Television has once more taken up the cause that was deferred last June when, according to the group's leader, Rev. Donald Wildmon, advertisers agreed to respond to the CBTV's objections to gratuitous sex, violence and profanity on tv by avoiding sponsorship of offensive programs.

Rev. Wildmon said last week that the boycott will begin March 2 with a press conference at which the names of an undisclosed number of boycott targets will be revealed. "Some programs are receiving generally better marks. . .[but] television over-all has not changed," he said.

Cal Thomas, a spokesman for the Moral Majority, said his group decided not to participate in the boycott because "after conversations and meetings with advertisers and network executives, we believe that improvement has been made in prime time programing in the areas we addressed—sex, profanity and violence. Certainly more could be done. But the application of a stick brought about a change, and now we're trying a carrot." He defined the "stick" as the boycott threat, the "carrot" as the lack of such a threat.

PTA stresses positive with tv program "seal." See Page 78.

Despite Rev. Wildmon's claim that the coalition's influence could extend to millions of consumers even without the Moral Majority, many advertisers, including some of those named as targets in the last go-round, are far less fearful and much more open about the pending boycott than they were last time.

"There was a lot of discussion [among advertisers] when the good Reverend made a lot of flurry about this last year," commented the media director for a major midwestern company. "A lot of them didn't know anything about [Rev. Wildmon] or the coalition; they didn't know who they were dealing with. There was a fear of the unknown. . .Now that they have gained knowledge on the issue, they're not as fearful."

Added a top exec of one Chicago ad agency, "I think a backlash is going on now [among advertisers] that's backfiring on the people creating [the pressure]. Most responsible clients would be prudent

Simple as pie

Chesebrough-Pond's new Ragu Pizza Quick crust mix and sauce (AA, Dec. 21) are touted in tv spots by Waring & LaRosa as "homemade pizza, simple as pie."

Coming next week

Ad Age to debut new Magazine

The Feb. 8 issue of Advertising Age will contain some significant changes as we introduce the new weekly Advertising Age Magazine.

The new Magazine represents a merging of the former Section 2 theme material and the feature articles and columns that have run on the tan-colored pages designated as the former "Magazine" section. The combined product will contain more editorial space, greatly improved use of illustration and more of the kinds of useful and interesting features readers have told us they want.

As a distinct publication with its own identity, the new Magazine will have its own cover and be printed on a heavier grade of paper than the news sections of Advertising Age.

The new Magazine will incorporate in its own center the Section 2 theme material we have been presenting for several years. Next week's issue examining the increasing trend toward corporate involvement in recreational sports is typical.

The new format also will provide a vehicle to more effectively display marketing case studies, analysis of advertising strategies and in-depth personality and company profiles.

Our most popular columnist, James Brady, will be moving to a fixed position in the Magazine, and other new features and columns will be appearing regularly.#

COLA ENTRY

Seven-Up opens up Like test

St. Louis—Seven-Up Co., attempting to carve a slice of the soft drink industry's newest niche, will soon test market Like, a sugarless, caffeine-free cola.

The Philip Morris Inc. subsidiary will introduce the drink in five markets, including Madison, Wis., San Diego and Dayton, O., sources confirmed.

As yet, none of those markets has any media scheduled, but bottlers are said to expect the product and advertising support within the next few months. Backer & Spielvogel, New York, will handle Like (AA, Aug. 3).

Officials for Seven-Up would not comment on marketing plans for the beverage.

■ Like will be the second sugarless, caffeine-free beverage to hit the marketplace. Royal Crown was first with the introduction of RC 100. Since its rollout into 50 states in 1980, that entry has shown indications of being a successful trail blazer for the an emerging segment.

In 1980, RC 100 sold 6,000,000 cases and, in 1981, estimates tally at 15,000,000 cases, according to Manny Goldman, beverage analyst for Sanford C. Bernstein.

"It is crawling its way up to the 35,000,000 and 40,000,000 range," he said.

Industry observers add that Seven-Up is wise not butting heads with cola giants Coke and Pepsi.

What may also be in Like's favor is that it is part of a growing diet drink segment. Industry sources indicate sugarless soft drinks have grown at an 8% annual rate.

Bottlers and industry observers are quick to point out that no matter how popular Like becomes, it will not solve the company's floundering position in the soft drink market. An erosion of the mainstay 7UP brand has dropped the company into fourth place behind Dr Pepper with a 5.4% share.#

TV SWEEPS

What do media buyers look for in the numbers they get from the rating services? This week's Tv Sweeps/Section 2 explores the buyers' side to find out what goes into their decisions and what information they would like to have to help make those decisions easier. The results of the November tv ratings race also are featured, with tables from data gathered by A.C. Nielsen, listing top stations in various categories in 150 U.S. markets, starting opposite Page 42.

1981 SALES OF TOP LIQUOR BRANDS	26
NEWSPAPER AD EXPENDITURES FOR NOVEMBER, '81	78

Vol. 53, No. 5—ADVERTISING AGE (ISSN 0001-8899) is published weekly except semi-weekly the third week in March, the second week in September at 740 Rush Street, Chicago, IL 60611. Second-class postage paid at Chicago and additional mailing offices.

Transportation takes top honors

Record $1.4 billion changed hands in '81

By NANCY MILLMAN

When chief executives of publicly held advertising agencies meet with securities analysts to hawk their stock, they almost always endeavor to dispel the notion of the advertising business as, in the words of JWT Group's Don Johnston, "small-time, cyclical performers with no hard assets whose clients come and go through a rapidly revolving door."

The year 1981 may have made this image tougher than ever to shake, as a record $1.4 billion worth of advertising billings moved from one agency to another. This figure was compiled from Advertising Age reports of account changes over $500,000.

The total U.S. agency volume for 1981, according to the American Assn. of Advertising Agencies, was $24.4 billion in billings. So, although the percentage of total billings is not that large at 6%, the figure of $1.4 billion is a staggering one. In fact, it is double the total of changes five years ago—1977, the last year for which AA compiled this report.

Individual account changes have been well reported and analyzed in these pages during the year, but taken as a whole, patterns become evident.

The transportation category dominated the news because of the multitude of switches in the airline industry. Eastern, Pan Am, American, Continental, Braniff, Southwest, Northwest and Republic Airlines were the major carriers to switch.

Deregulation threw open the floodgates of change. New competition faced long-entrenched leaders. Re-

American widens its appeal

By TOM BAYER

Dallas—In its first campaign for American Airlines, breaking on network tv and in newspapers and magazines this week, Bozell & Jacobs/Southwest has brought American's people to the fore to present the airline as warm, personal and caring.

That is how B&J's research said American is perceived by its passengers. That is not how the airline has been presented in previous advertising; claims of being No. 1 in Airline Passenger Assn. surveys of frequent travelers and pictures of glistening planes have been the hallmarks.

While American is dropping its earlier look for the people-oriented campaign, it is keeping the well-known theme "We're American Airlines, doing what we do best." Peter Finn, B&J/Southwest president, said American has substantial equity in the theme, which is being expanded in the 1982 campaign to position American as "giving you our best."

Mr. Finn said that rather than focus on specific market segments (which the No. 1 campaign did with the business traveler), the scope of the new campaign is broader, focusing on the specific service and standards sought by the various traveling publics.

American still feels it is No. 1 with the professional traveler, but a new APA survey to attest to that fact will not be released until early March, according to David O. Stamey, APA managing director. Mr. Finn said he did not know whether the survey results would be incorporated in any future versions of the campaign.

Price and destination definitely will be an integral part of the American campaign, though, with newspaper ads having been designed in a modular form to

Super numbers score with advertisers

By COLBY COATES

New York—Super Bowl XVI was a super buy.

Playing to an all-time record Super Bowl viewing audience, the game scored a 49.1 rating and 73 share, which translates into a "rough" estimate of 105,000,000 people who watched all or part of it. On a household basis, the game delivered 40,020,000, nearly half of the 81,500,000 U.S. tv households.

Whether it was Anheuser-Busch, Pabst or Miller, or Toyota, Subaru or Ford, advertisers had to walk away from the game with smiles to match the one flashed by San Francisco quarterback Joe Montana, the game's most valuable player. It was Toyota, with a reported $2,000,000 commitment, that emerged as the Super Bowl's heaviest tv spender *(see editorial on Page 16)*.

Based on a rate card price of $345,000 per 30—that figure ranges somewhat depending on a several variables—advertisers came away from the most prestigious buy in tv paying a household cpm of about $8.60. The buy's key target, men aged 18 to 49, worked out to about a $13.20 cpm. For comparison purposes, a prime time cpm ranges anywhere from $5 to $6, with ABC's "Monday Night Football" priced around a $9 cpm against the men, 18-49 target.

It's hard to find a buyer that could knock those numbers, especially since Super Bowl XVI is the highest-rated live program in the history of tv, and third highest of all time, behind the "Who Shot J.R.?" episode of "Dallas" and the last episode of ABC's "Roots."

In retrospect, some adfolks could argue that the game was priced too cheaply, even though this year's unit cost of $345,000 was $70,000 more than buyers paid for SB XV on NBC. They also know one thing: SB XVII, in Los Angeles next year, should fetch a unit price tag in excess of $400,000, maybe even more than $425,000. And buyers will be happy to pay it.

CBS-TV sales vp Paul Isacsson said the network's unit asking price was a "good one" in view of the estimates going in. But he felt that despite the "hullabaloo" over the unit cost, the final numbers deserved an even higher price.

If there was any other loser besides the Cincinnati Bengals, it was those advertisers that purchased overtime. Overtime sales are usually made late in the week before the game. The seller gives each of the game's advertisers a chance at overtime space; if none wants it, they sell to the highest bidder. This year, overtime was reportedly sold at a rate in excess of $200,000.

Overtime generally sells at a cheaper rate than the game because, as one buyer put it, "There's no merchandising value to a maybe." If an advertiser is already in the game, an overtime buy is pure gravy. But if it is a client that

world news roundup

London—Mars is celebrating its golden jubilee in the U.K. market with the launch of its biggest-ever Mars Bar—15% larger than the original bar, at no price increase. Mars is backing the launch, through D'Arcy-MacManus & Masius, with a substantially increased ad budget, including an extra $4,000,000 in the first quarter of 1982.

Toronto—Rogers Cablesystems, despite being strapped for cash and forecasting a loss during 1982, has earmarked $3,000,000 for lobbying to support its bid to acquire more U.S. cable franchises.

Duesseldorf—R.W. Eggert, the largest German-owned agency, announced a 14.3% increase in billings for 1981 ($53,500,000), set against an industrywide average increase of 3.6%. The launch of Henkel's new Liz liquid detergent was a key factor in the rise.

Milan—The Italian government will spend $324,400 on a good-nutrition advertising campaign to stop Italians from overeating. Recent studies show 13% of the country's schoolchildren are overweight.

Ottawa—Church leaders last week asked the Canadian Radio-television Telecommunications Commission to lift the 50-year-old ban on religious groups owning broadcasting outlets. In another move, the Canadian Broadcasting Corp. has refused to air antismoking ads for the Saskatchewan government, because they are "an attack on smokers."

London—Grey Advertising has been appointed to handle all corporate, retail and travelers cheque advertising for Bank of America in the U.K., to the tune of $3,000,000 to $6,000,000.

Top exec still 'confident'

'News' unions offer first aid

By STUART EMMRICH

New York—Robert Hunt, president of the *New York Daily News*, says he is "absolutely confident" that parent Tribune Co. will find a buyer for the paper, but employes at the paper still are scrambling to come up with alternatives to closing the paper, which they fear is Tribune Co.'s most likely action.

The Allied Printing Trades Council, representing all of the paper's unions, was planning to send a letter to the Tribune Co. late last week outlining a proposal under which an employe stock option plan (ESOP) would take over the *Daily News*, according to George McDonald, a spokesman for the unions. Mr. McDonald also spoke of union contract concessions possibly being made in an effort to keep the paper alive. Representatives of the Newspaper Guild also are trying to put together a plan involving employe-management ownership of the paper.

Meanwhile, execs at the *News* itself are denying that a timetable has been set for the paper's shutdown.

"We have set absolutely no dates to close down the *Daily News*, and we are out vigorously trying to sell the publication," Mr. Hunt told Advertising Age. "I'm absolutely confident we can sell it and we have prospective buyers."

But several developments at the paper continue to fuel speculation that potential buyers for the *News* are scarce.

Last week, management held a meeting for the paper's approximately 200 nonunion employes to spell out their severance privileges in the event of a closing. There had been no written policy prior to this.

Les Bridges, marketing director of the paper, said the meeting did not signify that the days of the *Daily News* were numbered, but was held to "ease concern among those people who are not under union contracts."

He emphasized that although he could not guarantee that the paper would not fold by the end of February, as has been suggested by insiders (AA, Jan. 25), "there has been no dictum on the part of the Tribune Co. that a date has been set" and that negotiations are continuing with potential buyers.

Union employes nonetheless are rushing to put together a package of their own. Representatives of the groups say they feel they have to work as quickly as possible to put together a proposal before it is too late.

"Time is fleeting," said Bob Carroll, a Newspaper Guild officer. "We are looking to make an approach to the Tribune Co. no later

(Continued on Page 82)

Accounts

(Continued from Page 3)
cession compounded the problem, shrinking load factors and forcing airlines to cut fares. Red ink became the motif on the balance sheets. From the red ink came top management changes at many of the airlines, or desperate leaders in those companies that did not alter their ranks.

Some airlines were ready to blame their longtime marketing allies for declining occupancy rates and profits, or to turn to close friends who ran agencies for the security they needed.

And the flock of new carriers created or helped by deregulation, and the smaller ones that emerged from their provincial cocoons, also made moves; Scandinavian Airlines, U.T.A. French Airlines, Jet America, Golden Gate, Pacific Southwest, Laker and Midway were some of the smaller carriers changing agencies.

The biggest switch of the year was in the airline category—the $54,000,000 Eastern account, which moved from Young & Rubicam to Campbell-Ewald. The agency that created "The Wings of Man" slogan was forsaken after 20 years in what was reported to be one of the year's many "friendship deals." The friendship is between Eastern's chairman Frank Borman and Campbell-Ewald's top man Thomas Adams. When other agencies heard that C-E was making a pitch for the ailing airline, which just last week reported a $29,400,000 loss in the final quarter of 1981 compared with a $6,900,000 profit the year before, they were anxious to participate in the "review" but were rebuffed. It then became clear to Y&R that the "review" was stacked against them.

The incumbent made several presentations within a week, all of which, sources said, impressed the client. Then C-E was called back in and given a chance to top Y&R. Despite all the other airlines switches, Y&R still has not landed another airline account.

Nor has Benton & Bowles, whose Los Angeles office was stricken by the loss of Continental, which was lured by Wells, Rich, Greene. WRG saw the writing on the wall with its Braniff account, and dropped that $12,000,000 piece of business to take on Continental, billing $16,000,000.

In the Midwest, the airline situation was no less volatile. Early in 1981, Campbell-Mithun, longtime agency for Northwest Airlines, lost the business. What would prove to be another recurring theme in 1981 account changes came into play during this move. As C-M chairman George Gruenwald said at the time, "When there are management changes, there are agency changes." The new regime at Northwest wanted an agency of its own selection and, after a review, chose Grey Advertising.

Agency executives were bombarded with the message: When your client says he's happy, it's not time to relax—especially if an agency with experience in that category suddenly becomes available.

When Campbell-Mithun lost Northwest, management sent a new business solicitation letter to Republic, which was handled by Hoffman-York. (Compton acquired Hoffman-York last year, and Republic was its largest account.) Jon Harty, the carrier's director of advertising and sales promotion, said last February, "We are happy with the excellent work of Hoffman-York." In December, Campbell-Mithun got the $20,000,000 Republic account.

It was product battles and the impact of generic products that made the food category the second largest in account moves.

Nestle moved $21,700,000 worth

Accounts

(Continued from Page 65)

of its brands last year as dwindling shares in major product categories such as tea and coffee, as well as product introductions that were off the mark, put the parent company, Nestle S.A. in Switzerland, in a position to move. J. Walter Thompson Co. and McCann-Erickson were the primary beneficiaries as Nestle took Nescafe, Quik and Nestea from Leo Burnett Co., a total of $15,700,000 in billings.

Generics and private-label brands had hurt Nestea in the instant tea and iced tea segments. And Sunrise, an instant coffee product with chicory, which was launched by N W Ayer, did not reach expectations. Sunrise moved to JWT, as did Nestea, while Quik and Nescafe went to McCann.

A product battle in a major category cost BBDO a major chunk of its Hunt-Wesson business. Cooking oil was the arena as Hunt-Wesson rallied its forces to move aggressively against Procter & Gamble, which has Crisco oil, the leading product, and Puritan, a strong entry in the light oil category. BBDO had handled Wesson oil, for which the company spent $5,500,000 in advertising. Wesson was losing share points, and was at 20% of the market to Crisco's 25%. Hunt-Wesson's light oil entry Sunlite, a $8,500,000 piece of business, was neck-and-neck with Puritan, with about 11% share. Moving for a stronger position, the client placed Sunlite at Dailey & Associates and Botsford Ketchum got Wesson oil.

BBDO also was a victim of an "exploratory" creative test that turned into a major account move. The feisty Backer & Spielvogel shop was asked to test new approaches for Campbell Soup, a longtime resident at BBDO. The "Soup is good food" campaign reaped such good results in a West Coast test that Backer got the whole $12,000,000 kettleful. The agency also later picked up the company's $4,500,000 V-8 vegetable juice from Needham, Harper & Steers, due to a conflict that arose when Needham won Shasta.

In another interesting move in the food category, MCA Advertising won about $13,000,000 worth of Standard Brands (now Nabisco Brands) business in a consolidation move. Standard Brands had hired Marketing Corp. of America's consulting division in 1979 to supply marketing advice. The recommendation was to replace the brand management setup with a category management system and consolidate at one agency, to obtain more clout. The one agency turned out to be MCA's advertising subsidiary. Business moved from Wells, Rich, Greene; Doyle Dane Bernbach; D'Arcy-MacManus & Masius, and Lee King & Partners.

Banks figured prominently in the agency-switching scene last year. The merger of Shearson and American Express, and Sears, Roebuck & Co.'s moves to form a financial conglomerate, put banks in the position of having to be tremendously aggressive in luring the consumer's dollar.

This is exemplified in the Chase Manhattan Bank, which took its $6,000,000 retail account to Wells, Rich, Greene from Dancer Fitzgerald Sample. WRG earlier had picked up the wholesale portion of the bank's business.

A new category for account changes that emerged in 1981: Alternative tv programing. Showtime, Star pay tv, USA Cable Network, Warner Amex Satellite Entertainment, Super Time pay tv all named new agencies, as did Warner Home Video for videocassette rentals, and National Video, a franchise rental operation.

It was a game of musical agencies in the 35mm camera category as Minolta, Nikon, Vivitar and Konica each made a switch.

Many observers expected a domino effect when McDonald's Corp. made its sudden $53,000,000 move to Leo Burnett Co. from Needham, Harper & Steers. It was thought that other fast-food companies would quickly hook up with Needham's expertise in the category, but it hasn't happened yet. Needham execs have said that they have been approached, it is assumed by smaller chains, but they are waiting for the right one.

But the fast-food category was quite active, even without fallout from the McDonald's move. Wendy's International formed a new network of "super agencies" for its co-ops, moving a total of $18,500,000 in billings around the country to eight different agencies.

The regional Pizza Inn chain, billing $9,000,000, went to Stern/Monroe; Bozell & Jacobs got Sambo's from Geers Gross, a $10,000,000 account; Ponderosa left Doyle Dane Bernbach and put its $10,000,000 account at Avrett, Free & Fischer; Godfather's picked Bozell & Jacobs for its $5,000,000 pizza chain advertising, and Church's Fried Chicken went to BBDO, Chicago, from GSD&M, a $1,500,000 account, just to name a few.

What do the ceo's of those agencies say to all this? Foote, Cone & Belding's new chairman Norman Brown contends that, "over-all, advertising is a relatively stable, mature, professional business. Most solid, deeply experienced companies," Mr. Brown said, "continue with their policy of wonderful, long-term relationships."

In addition, Mr. Brown noted, "agencies are in their own cost/price freeze. Our costs go up about 10% each year, and often the increases in clients' budgets are not enough to cover those costs. It is possible that agencies under these conditions would increase their new business activity and shake loose relationships" that otherwise would have stuck together.

Alex Kroll, president of Y&R/USA, which lost the Eastern Air Lines account last year, said that although 1981 had "the coincidence of some spectacular changes," far more clients want "continuity" than they do "change for change's sake—the saddest line in all of advertising."

Research assistance was by editorial assistant Denise O'Neal.

Liquor industry goes flat in '81

By JOHN C. MAXWELL JR.

As has been the case for the last two or three years, liquor industry volume in 1981-82 should be relatively flat. We attribute this to three factors. First, and most obvious, there is the weak economy.

Second, as we have previously noted, people appear to be moving away from alcoholic beverages as a whole. Some years ago, the wine industry was growing at 15% to 20% annually vs. the current level of about 6%; beer was growing around 5% to 6% vs. 2.5% to 3% currently, and the liquor industry was growing 6% to 7% vs. a current growth rate close to zero.

Last but not least, there is the industry's aggressive pricing. Increasingly, companies tell us that in essence they are going to use their liquor divisions as "cash cows" since they consider the industry somewhat mature and feel that its cash flow could probably be used better elsewhere. Therefore the industry will continue to prune brands actively, may lower or cease advertising on brands that show little or no long-term promise and will be aggressive on pricing.

In the liquor industry as a whole the only real 1981 volume growth appeared in the white goods and the brandy-liqueur-cordial group, with nonwhisky volume up about 3%. The whisky area was off almost 2.5%, with the only increases achieved for U.S. bottled Canadian (up 2.5%) and Irish (up about 2%). Vodka continues to have growth problems, and some observers suggest that people are moving away from this product and into white wine. Even rum, as a category, was up a mere 10% vs. substantially higher growth figures in the past.

Of the two major brands in the liquor industry, Bacardi rum was up and the slight drop for Heublein's Smirnoff vodka represented good improvement from its larger drop in 1980. Only a few vodkas showed gains; however, Nabisco Brands' Silhouette is off to a good start. Hiram Walker's Old Smuggler scotch jumped 45% in one of the industry's best unit gains. J&B scotch, down slightly, continues as the leading brand in that area, with Dewar's (up 4%) a close second and the only major scotch with an increase.

■ The recently introduced Beam 8 Star appears to be on its way to great success. Jim Beam continues in fifth place (up 5%) in the industry and is the best-selling bourbon. The Beam division of American Brands can claim gains for nearly its entire portfolio.

Other winners are Walker's Kahlua (up 3.9%), which went from 25th to 18th in over-all industry position, and Heublein's Black Velvet (up 2%), which jumped from 26th to 19th. It also is interesting to note that Baileys Irish Cream liqueur appears to be taking share away from some of the imported specialties, such as Glenmore's Amaretto di Saronno. Baileys' 150% unit growth in 1981 to 625,000 cases is one of the fastest gains we have seen in the industry.

Brown-Forman is continuing to post gains. Its Jack Daniel's had the best unit growth of the major products (up 24%), moving it from 10th to sixth position. Its Canadian Mist was up close to 7%, and Martell's cognac jumped almost 29%, although from a low base.#

Delta makes your deliveries DASH.

Delta DASH® delivers the same day to over 80 cities across the U.S. and abroad, covering 10,000 communities. Why get that small package delivered tomorrow when you can DASH it today. DASH (Delta Air Lines Special Handling) delivers packages up to 70 lbs... probably to the destination you have in mind. So give us a ring at the Delta Marketing Office in the city nearest you. Or call DASH at (800) 638-7333 for pick up or delivery.

For top priority shipments over 70 lbs., use Delta Air Express. It guarantees your shipment gets on the flight specified. For full details, call your nearest Delta Marketing Office.

DELTA AIR CARGO. READY ALL-AROUND.

Film award deadline set

ELMHURST, ILL.—March 1 is the deadline for entries in the U.S. Industrial Film Festival's 15th awards competition.

Material to be entered in the contest is acceptable in forms including 16mm motion picture, 16mm and 35mm filmstrips, 35mm slides and ¾-in. videocassettes and videodiscs.

Information and entry forms can be obtained from 841 N. Addison Ave., 60126.

TV SWEEPS

ABC stations still on top . . . details inside

BY COLBY COATES

In the end there were few surprises in the November, 1981, sweeps.

As shown on the following pages, in tables that detail television shares in the top 150 markets, local network affiliates generally performed in sync with their network.

According to research prepared by a veteran broadcaster, ABC affiliates, as in the past, emerged as the top draw among the key 18 to 49-year-old viewer in major urban centers.

CBS affiliated stations generally duplicated their past track record and began to pick up strength in markets 25 through 50, gaining further momentum in markets 50 through 100.

More often than not, NBC affiliates trailed the competition in most of the key breakouts, although NBC stations were not without outright victories in some smaller markets. Additionally, NBC stations scored a number of strong second-place finishes in the medium to larger markets.

Using data from A.C. Nielsen Co., the tables contained in this section give station total shares for women and men, 18 to 49. The last three columns indicate DMA (designated market area) household shares for the full broadcast week, prime time and early fringe.

Colby Coates, senior editor of Advertising Age *in New York, coordinates coverage of the broadcasting industry.*

An analysis of the top 50 markets suggests an ever tightening race between ABC and CBS affiliated stations. In the second 50, the lead shifts in favor of CBS, with the remaining 50 more a result of other factors besides programing.

There was bad news for two NBC stations—KNBC in Los Angeles and KRON San Francisco. In the key 18 to 49 demographic, both trailed the network affiliates or network-owned-and-operated stations, as well as one independent station.

ABC stations were the demographic leaders in all of the top 10 markets, with CBS breaking ABC's stranglehold in markets 17 and 18, St. Louis and Tampa-St. Petersburg, Fla. After that, ABC maintained its demographic edge through most of the rest of the top 50.

In terms of the top 10 stations in the top 50 markets, WBRC, Birmingham, Ala., an ABC affiliate, was the biggest draw among women 18 to 49, notching an average 54 share.

Stations scoring the highest numbers with women viewers in markets 51 through 100 were more equally spread over the spectrum, with the majority of NBC's first and second place finishes coming in these markets.

CBS affiliates dominated the demographics in markets 100 through 150, though a station's performance in these smaller areas is sometimes less dependent on programs and more dependent on a station's signal. In Erie, Pa., for example, the dominant force is WICU, the NBC affiliate and lone vhf in the market.#

These tables show the commercial tv stations in each of the top 150 markets. The first two columns rank shares for women and men age 18 through 49, as reported in the Nielsen November, 1981, sweeps covering the full telecast day. The last three columns show household shares for the full telecast day, early fringe and prime time. They are based on homes in Nielsen's designated market area (DMA).

These figures were compiled for Advertising Age from the Nielsen books by a veteran tv researcher.

Initials in parentheses indicate network affiliation (ABC, CBS, NBC); stations without initials are independents. Prime time is 8 p.m. to 11 p.m. Eastern Standard Time Monday to Saturday combined with 7 p.m. to 11 p.m. EST Sunday.

These lists include local network affiliates and share runners-up in each market, whether local indies or distant stations, affiliated or independent. Not all stations are listed. Stations appear only if they drew a minimum of 3 household share sign-on to sign-off. A blank under any column indicates not reported. The DMA as defined by Nielsen does not include distant satellite or microwave coverage.

TO BE WATCHED, YOU'VE GOT TO MAKE YOURSELF HEARD.

A broadcasting company can't expect people to tune in to its television station automatically. After all, there are too many other stations to turn to.

To grab viewers, a television station has got to grab people's attention. At Gaylord Broadcasting, we know that means more than making a lot of noise. We've got to be innovative. And we've got to introduce programming that suits every market we serve.

In sports conscious cities like Cleveland, Milwaukee and Seattle, that means broadcasting major league baseball games. And in Tampa/St. Petersburg, where weather plays a vital role in the economy, it means having our very own satellite terminal . . . so we can have direct, 24-hour access to satellite weather pictures.

These are just two of the many ways we're making a name for ourselves at Gaylord. Because we know if we make ourselves heard, more and more people are going to be watching.

GB

Gaylord Broadcasting
We're making ourselves heard.

And that's just the

Only UTV has the VITAL™ link for advertisers–the computerized system that lets you customize your message to your market. Market by market. Automatically and simultaneously. Imagine the possibilities: You can give local ID's. Run special promotions. Insert prices. Build in-store traffic. Etc., etc., etc. But that's not all that's unique about UTV.

We're also the only cable network with a built-in device for getting and documenting response. The attraction: our exciting Involvision™ programming–half of it live and all of it designed for active viewer participation. Viewers will play along, phone in opinions, learn "how to" and buy what they see. Programs deliver a wide range of special interests for targeted audiences–everything from family matters, women's issues, sports and games to diet, investment and pet care advice. The common denominator: viewer interaction with the programming.

But we not only give viewers a reason to respond. We give them a way to respond, too. With a highly sophisticated computerized telephone network that can

Your TV Market turns us on

Whether you're an advertiser or agency, BAR's Spot TV Local Market Reports will turn *you* on too.

Spot by spot, you analyze how the stations aired your campaigns. You learn how your competitors are using TV. With this information, you can plan ahead to make the most your TV expenditures.

Each of these major markets is monitored every month. Over 150 agencies of all sizes subscribe to BAR services. For more information, call George Seekamp on (212) 221-2630.

BAR BROADCAST ADVERTISERS REPORTS, INC.
500 FIFTH AVENUE NEW YORK N Y 10036

Sheer numbers bear little weight

BY BOB YOVOVICH

To some media buyers, the way sweeps ratings are used to estimate local tv audiences is similar to the way hogs were once weighed in Texas.

According to Texas lore, rather than simply take the "unscientific" approach of guessing the weight of the pig, Texans would tie down the animal and look around for a rock thought to weigh the same as the hog. Then, with great fanfare, a crowd of cowpokes stood around the stone and tried to guess its weight.

Just as oldtime hog buyers were skeptical of figures coming from such indirect "weighings," today's media buyers often express reservations about the projectability of sweeps-month ratings to the rest of the year. In particular, as spot tv ad rates rise and as local stations get more sophisticated in their efforts to boost ratings during sweeps periods, the ad community's concerns increase.

"It is universal that tv stations put on special programing during the sweeps [months]," says Jacqueline Da Costa of Ted Bates & Co., New York, and chairperson of the Advertising Research Foundation's (ARF) Television Audience Measurement Council. "Even local news programs put on big investigative reports during the sweeps. Public tv and pay cable even do it.

"Daytime programs do it. 'General Hospital' put Elizabeth Taylor on during the recent sweeps."

■ The distortions caused by such special sweeps efforts provoke fear that "the data presented in the reports may be atypical and therefore not projectable to the nonmeasured weeks," according to a recently released study conducted by the ARF. In fact, a majority of the ad agencies responding to the ARF survey indicated they "want more frequent measurement in all markets and continuous measurement in the top 50 markets."

"I don't say we should have 52 reports a year," Ms. Da Costa said. "The agencies don't want a report every week. We still can have four reports but simply spread the measurements over a longer period of time, say, over 13 weeks instead of four for each report."

Based on survey results, the ARF study recommends the ratings services:

- Develop procedures to provide audience measurements for a greater proportion of the year.
- Evaluate the implications of alternate procedures for sample size projectability.
- Investigate the cost implications of these procedures.

Media buyers also point to other shortcomings of the current system for rating local television.

For example, many media buyers complain that the broad demographic categories used by rating services are no longer appropriate for today's marketing effort.

"In the mid-'50s and early '60s, the tv story focused on how many people were buying tvs. Advertisers were interested in the tonnage and not in refined audience information," recalls one media veteran. "It was great for products like toothpaste, which appealed to wide audiences, but not other types of products [that require more targeted marketing] that were beginning to use television."

Today the ratings services' sample sizes are geared to give household rating points (gross number of households viewing a particular program), but most agencies now are interested in demographic rating points (number of viewers in a demographic group), adds Karen Guzy, who buys spot tv ads for D'Arcy-MacManus & Masius, Atlanta. "Every time the [target] audience gets smaller, the error in ratings gets bigger," she says. "The more finely tuned the [marketing] effort, the less useful the ratings."

■ At the same time that media buyers are asking for new types of audience data or for extension of the sweeps periods, others claim that even simple reorganization of the data already collected by A.C. Nielsen Co. and Arbitron would make it easier for agencies to make spot tv buying decisions.

"It would be great to be able to get a breakout of 30-to 40-year-old viewers," says Kathy Ward, media director at Cap Hedges & Associates in Portland, Ore. "The books give us 35-to 49-year-olds now but the 30 to 40 age group is the baby boom generation, which is a little different from other groups in its buying characteristics."

Another data reorganization mentioned by media buyers would provide not only in-show ratings, but separate audience figures for commercial breaks between programs as well.

Says Lisa Esrum, media buyer/planner at Fahlgren & Ferriss, Cincinnati: "They [the ratings services] could still give us the inshow rating for network buys but it would be nice to have separate ratings for the between-show breaks as well."

And then there are some situations in which, no matter what the ratings services do, the media buyers will find the numbers of little use.

"Many of our clients are concerned that it is hard to tell the real from the fake commercials on 'Saturday Night Live,' " confides a media buyer at a large Midwest agency, "so they tell us not to place ads on that show. One of our clients is an oil company with a long list of shows that are prohibited, including some programs like '60 Minutes' and '20/20' that have done reports on the oil industry."

B.G. Yovovich, a business writer in Chicago, contributes frequently to Section 2.

Newspapers up 15.7% through 3 quarters of '81

NEW YORK—Advertising for financial institutions and for housing and decoration led all newspaper retail categories in gains for the first three quarters of 1981 compared to the same period in 1980, according to the Newspaper Advertising Bureau. Total retail advertising volume for the period was $6.828 billion, up 15.7% over 1980.

Financial advertising, having led all groups in growth during the past three years, increased 26% to $345,800,000. The housing and decoration category, which the bureau has predicted will grow rapidly in the 1980s, was up 19.8% to $1.336 billion.

Entertainment and hobbies gained 16.3% to $1.179 billion, with the 8.3% increase shown by theaters contributing $376,400,000 to that total. General merchandise, the largest retail category, increased 11.4% to $2.526 billion, with department stores up 14.1% to $1.444 billion.

Food and drugstore advertising was up 15.3% to $788,800,000, with food stores increasing 15.3% to $634,300,000 and drugstores up 14.9% to $154,500,000.

In special category figures for November, 1981, compiled for ADVERTISING AGE, sporting and leisure time equipment showed the biggest gains, increasing 170% to $1,360,000, with advertising for soaps, cleaners and polishers, on a smaller base, following with a 119% increase to $142,000.

Three categories showed declines: Cigarets down 32% to $5,684,000; soft drink beverages down 5.5% to $288,000; alcoholic beverages down 5.3% to $2,868,000.#

New honor for jingle writers

NEW YORK—The National Academy of Music's Songwriters Hall of Fame has decided to add a jingle songwriter category to its tunesmith awards for the first time.

Serving on the panel of judges to decide the nominees for the jingle honor are: Arnold Eidus, senior vp-music director, Ted Bates & Co.; Hal Grant, senior vp-music director, Ogilvy & Mather; Elliot Lawrence, music consultant, N W Ayer; Spencer Michlin, founder/chairman, Michlin & Co., and James P. Forkan, senior editor, ADVERTISING AGE.

Rance Crain, Chicago-based AA editor-in-chief and Crain Communications president, will present the award to the winner.

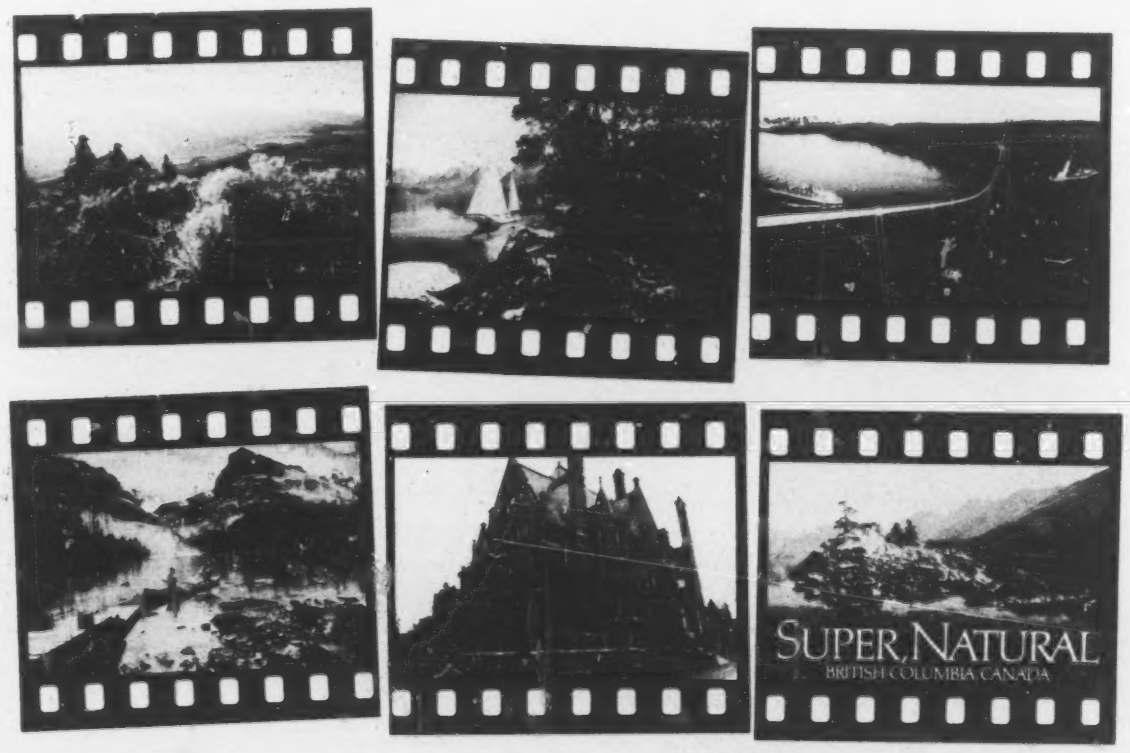
Sammy Cahn, the famous composer who also is president, Songwriters Hall of Fame, said the awards ceremonies will be at a March 15 dinner here. The group hopes to line up tv coverage.#

NAB names Stockmeyer

WASHINGTON—The National Assn. of Broadcasters named Steven F. Stockmeyer, former executive director of the National Republican Congressional Committee, its new lobbyist.

He is replacing Kenneth Schanzer, who is now at NBC Sports, as NAB senior vp-government relations.

OUR BACKLOT.



Quite a view. And it's all right up here. Really. Along with a track record of major studio successes. Production companies like Paramount, Disney, Filmways and Mercury Pictures. Films like The Grey Fox, Harry Tracy — Desperado, Reckless and Babysitter. And a dollar exchange rate that'll make any producer smile.

COMBINED BILLINGS NEAR $2 BILLION

Bates swings largest deal ever with Esty

By CHRISTY MARSHALL

NEW YORK—In the largest merger in ad agency history, Ted Bates & Co. last week bought the William Esty Co.

Although no figures are being disclosed, industry experts estimate Bates plunked down about $50,000,000 for the Esty shop. With the addition of Esty, Bates expects to bill $2.4 billion in 1982. Bates, the nation's fifth-largest ad agency, is expected to reported gross income of more than $225,000,000 for 1981 on billings in the $1.4 billion to $1.5 billion range. Esty's gross income is expected to top $60,000,000 for 1981 on billings estimated at between $430,000,000 and $450,000,000, which would put the combined agency near the $2 billion billings mark.

In 1980, only two U.S. agencies topped $2 billion in world billings—Young & Rubicam at $2.27 billion and J. Walter Thompson Co. at $2.14 billion.

Sources said that as part of the deal, all the top Esty executives were required by Bates to sign five-year contracts, insuring they would stick around. But Donald Zuckert, exec vp and president of the U.S. affiliate group at Bates, denied that such was the case. Gordon Bushell, vice-chairman at Esty, declined to comment but did add that the top Esty executives could be around for a long time.

■ Esty employes are particularly pleased with the match. Those staffers holding stock reportedly did extremely well in the deal. Executives at both Bates and Esty declined to discuss the details of the transaction. Mr. Bushell conceded talks had been going on for some time—some sources said for at least six months. One of Bates' messengers has been dropping off correspondence at Esty every day for the last two months.

However, sources say Esty execs held off consummating the merger with Bates until 1982, so only those within the Esty ranks would profit from their gangbuster year. In 1981, Esty picked up Minolta ($15,000,000), Ekco Housewares ($2,000,000) and Listermint ($7,000,000) among other

Outlook mixed for media

By COLBY COATES and STUART EMMRICH

NEW YORK—Print media companies expect the 1982 second quarter to be an uncertain period for advertising, with some schedules slightly up over last year, some slightly down and the greater middle ground flat, according to a sampling conducted last week by ADVERTISING AGE.

But from the network tv side of the business, the second-quarter sales outlook is generally favorable. Network sources said that most advertisers picked up their second-quarter options, spending the same if not a shade more than last year at this time. News, late night and prime time sales were characterized as "strong," with the daytime marketplace expected to kick off this week or next. From what they've seen so far, network execs believe daytime will fill up fairly quickly.

CBS and ABC both enjoyed strong first-quarter sales, aided to a certain extent by NBC's decision to withdraw from the first-quarter marketplace and use inventory as makegoods. But even NBC is expected to register a strong second quarter as it re-enters the market. Automotive advertisers, with their push for rebates, have been spending vigorously.

In the print media, many magazines and most newspaper supplements are still feeling the crunch of cutbacks from R.J. Reynolds and other tobacco marketers and reduced commitments from the auto industry, which is touting rebates in r.o.p. newpaper ads as well as tv. This has sent the magazine sales forces out scrambling to pick up the slack from other advertisers.

"The second quarter looks very soft compared to last year, a contrast to this year's first quarter,

last minute news

Geers Gross reported buying Kurtz & Tarlow

NEW YORK—Geers Gross reportedly is about to acquire Kurtz & Tarlow. Donald Kurtz, president of Kurtz & Tarlow, declined to comment on the report, but added he would comment on it Feb. 16. Robert Gross and Peter Barnes, Geers Gross chairman and president, respectively, were unavailable for comment. Combined billings of the two shops in excess of $100,000,000. GG's previous acquisitions were Richard K. Manoff Inc. and Martin Landey, Arlow Advertising.

Pentax to Campbell-Mithun for total account

DENVER—Pentax Corp. has moved its $13,000,000 account to Minneapolis-based Campbell-Mithun, which will open a Denver service office. Cameras, the biggest portion of the account, had been at Ally & Gargano, New York. Cunningham & Walsh, San Francisco, loses other photographic and optical equipment.

CBS-USA link hikes event bidding wars

By JAMES P. FORKAN

NEW YORK—ABC and ESPN may have scored the first points in joint cable/commercial tv sports coverage last fall, but the game is not over yet, as indicated by the CBS Sports and USA Cable Network agreement signed last week.

CBS Sports was known to be interested in a cable connection ever since its execs talked to ESPN last year. When ESPN and parent Getty Oil went with ABC, that left USA as the other leading national cable sports net—its 10,000,000 subscriber homes just 4,000,000 behind

(Continued on Page 86)

First CAB meet mulls options

Measurement still major cable woe

By SUSAN SPILLMAN

NEW YORK—The opportunity for narrowcasting, flexible commercial lengths and sponsor participation in programing will make cable advertising a multi-billion-dollar industry by 1990. However, a lack of audience measurement and low penetration remain the stumbling blocks that currently make cable advertising a modest business of approximately $230,000,000.

Such were the conclusions drawn at the first annual Cable-television Advertising Bureau conference attended by over 1,200 advertising and cable execs here last week.

The emergence of cable as a major ad medium "is not going to be easy or automatic," warned Bob Alter, president of the year-old CAB. "The cable and advertising industries will have to work hard to learn to understand one another in order to develop a mutually profitable relationship," he continued, "but it will happen because there is too much at stake on both sides for it not to. Most important, we must build realistic expectations into our planning."

According to industry analyst Paul Kagan, expectations are that by 1990 local cable advertising could total $1 billion and national advertising over $2 billion.

Speaking at a mid-morning session, Mr. Kagan predicted that in 1982 local cable ad revenues will

(Continued on Page 86)

Fights and more fights: Just another week for tv

By COLBY COATES

NEW YORK—CBS gears up for its defense of network tv sales while all network affiliates fight tooth and nail against real or imagined encroachment by the networks into their sales time.

Just another normal week in the new electronic media, where linkage threatens to become the buzzword of broadcasting.

For example, the networks tell affiliates they need an additional 30 minutes for network news expansion. But the stations, rallied by the major group owners, rebel. Affiliates link the networks' request to the artistic if not financial success of cable news operations and seek to throttle the issue on the grounds that network encroachment means local revenue losses. Of course one network's parent then gets into the cable news business while another talks about it, all with the realization that ratings gains in that sector would come at the expense of network and station ratings.

Or, ABC unveils a plan to replace network on-air promotion time with commercial availabilities, in part citing the rising costs of maintaining a high caliber of programs to compete with pay cable and other viewing alternatives. Foul, the affiliates cry. They then link prime time sales with news expansion, promoting the charge that the two moves together constitute a potential loss of $1 billion in annual spot revenue. And forgive some of those tactless ABC affiliates that question the competitive angle since ABC is heavily involved in competitive ventures like ESPN, ARTS and Daytime.

And who can forget Ted Bates & Co.'s pro-superstation study of a few months back (AA, Sept. 28 *et seq.*), the one that suggested the network's ratings imbalances in pay cable homes might be compensated for if an advertiser lopped from 3% to 7% from network prime time budgets and instead put those dollars on superstation WTBS. Though often referred to as a cable

world news roundup

LONDON—J. Walter Thompson Co. is merging two of its U.K. agency subsidiaries to form a $42,000,000 agency called Abraham Coveney Grimward & Rosenbaum. The new shop, combining the London office of Euro Advertising and local subsidiary Lansdowne Marketing, will slot in around 25th in U.K. ranking and will be a member of Euro's international network. JWT's other U.K. subsidiary is JWT Manchester, which bills $30,000,000.

STOCKHOLM—Tennis star Bjorn Borg last week signed a five-year exclusive sponsorship contract with Swedish mineral water producer Ramlosa, Scandinavia's leading brand, for an undisclosed sum and "all the mineral water he can drink." In return, the 24-year-old athlete, who reputedly never drinks anything stronger than water, will not take on any other beverage endorsements for the life of the contract.

BREMEN—HAG/General Foods, GF's German arm and the originator of decaffeinated coffee before World War I, is launching a new highly aromatic variety, making the company the first to offer two decaffeinated labels. The national launch will be handled by Young & Rubicam, which also handles the existing mild Kaffee HAG.

SAO PAULO—MPM Casabranca, Brazil's largest agency, will open its first international shop next month in Santiago, with the $1,000,000 Fiat account. MPM has Fiat's $4,500,000 account for Brazil.

Press Club's first First Man

President Ronald Reagan shakes hands with ADVERTISING AGE senior reporter Richard Gordon at a reception at the National Press Club in Washington honoring Mrs. Gordon, Vivian Vahlberg. Ms. Vahlberg, assistant bureau chief of the *Daily Oklahoman*, was sworn in by President Reagan as NPC president, the first woman to attain that post.

TWO BREWS JOIN A-B'S NEW ENTRY

Schlitz, Pabst set lights

By ROBERT REED

Attempting to infuse some life into its comatose premium light beer, Jos. Schlitz Brewing Co. will break out a reformulated Schlitz Light in March, which initially will be marketed in the Sunbelt.

Also on the light beer flank, Anheuser-Busch has set a start date of March 15 for the rollout of its newest brew, Budweiser Light. It will at that time be made available in the Rocky Mountain area, all of Texas and Louisiana.

Additionally, Pabst Brewing Co. will test a new premium light beer this spring. The 96-calorie brew is Jacob Best Premium Light, which is named in honor of the brewery's 19th Century founder. This brew marks Pabst's first move into the premium light segment.

Sources report the reformulated Schlitz Light is being hailed by marketing chief Anthony Amendola as the brewer's best weapon yet in combating Miller Brewing Co.'s Lite, kingpin of the low-cal segment. Mr. Amendola has been meeting with Schlitz distributors around the country and has repeatedly alluded to the rehoned brew as an important component in the company's comeback efforts.

Schlitz officials refused to comment on plans for the beer.

As part of its arsenal, Schlitz Light has scrapped its old gold and blue label and is replacing it with a "clone" of the flagship Schlitz brand. The design features a silver can, with the traditional Schlitz emblem, and blue lettered "Light" running across the top of the can.

Advertising tactics are still being formulated, but industry sources anticipate extensive co-op support as well as some regional tv buys. J. Walter Thomspon U.S.A., Chicago, handles the brand.

While Sunbelt wholesalers are applauding the addition of a revamped premium-price light beer, they insist it will need continuous ad support if it is to escape the fate of the old Schlitz Light.

Since its birth in the mid-'70's, marketing support behind Schlitz Light has dwindled considerably. Wholesalers lament that the lack of marketing initiatives has allowed the brand to die on the vine.

A-B wholesalers have been clamoring for Bud Light, which tested well in 10 southwestern markets and is ready for rollout via Needham, Harper & Steers (AA,

Magazine Marketing to Hispanics, America's fastest-growing minority, is the Section 2 theme in today's issue of the new ADVERTISING AGE Magazine. Now more than 15,000,000 strong, the nation's Hispanics pose great challenges—and offer great potential—to the world of advertising and marketing. Hispanic media, entertainment, retailing strategies, the booming San Diego-Tijuana "corridor," the large Miami Cuban market and the need for a greater understanding of Hispanic culture are among the areas covered.

The Magazine also includes a profile of WCVB-TV, Boston, a station with a stormy past and an uncertain future. Recently sold for a record $220,000,000, it has long been considered one of the finest commercial stations in the U.S. However, its sale has caused heated controversy in Boston.

James Brady's column, which moved last week from the news pages of ADVERTISING AGE, heads the list of weekly features.

Employes aid 'News' rescue bid

By STUART EMMRICH

NEW YORK—Efforts to save the *New York Daily News* are being intensified by the paper's employes as they search for advertiser support and potential buyers.

Spurred in part by a sense of bitterness among some of the paper's 3,800 employes that the parent Tribune Co. is not making a great enough effort to save the paper, union activists are taking their own steps to keep the paper in business.

They are raising money to take out an ad extolling the paper's long-standing links to the city; they are urging advertisers to publicly voice their commitment to the paper, and they are vowing to go along with staff and contract changes that would certainly be demanded by a new owner.

Substantial cuts in the number of contract employes is one factor that most *News* insiders agree is crucial to finding a buyer for the paper.

"We must be prepared to make sacrifices," *News* reporter Don Singleton said at a recent union gathering. "Any sick person faced with surgery or certain death is going to choose surgery."

Can Levi's get back into jeans saddle?

By JENNIFER PENDLETON

Levi Strauss & Co. used to boast it could put the Levi's trademark on *anything* and the merchandise would sell.

Today, company execs don't make such claims.

The San Francisco-based clothing marketer is still widely regarded as the world's strongest apparel brand. But there are signs its merchandising luster may be fading like a well-worn pair of its famous jeans. The company's previously consistent growth pattern has slowed; its once overwhelming share of the jeans business has eroded. It is for the first time facing resistance from retailers who only a few years ago clamored for Levi's products.

The question of Levi's clout in the retail marketplace is especially relevant in light of Levi's decision to start distribution of its diversified apparel line via Sears, Roebuck & Co. and J.C. Penney Co. outlets nationally (AA, Dec. 21).

At the same time, industry sources say Levi's is making plans to introduce several new upscale women's and men's product lines in the 1980s. This is seen as a move to fill the gap if stores at the upper end of the apparel market cut back on Levi's jeans as Sears and Penney's take them on.

■ However, Levi's declined to be specific about new product introductions. "Levi's has no plans at present to expand beyond the moderate and upper areas of the apparel market in which we are currently competing," a Levi's spokesperson said.

In fiscal 1981 (ended Nov. 29), Levi's had net income of $172,300,00 on sales of $2.85 billion, compared to last year's net income of $223,700,000 on sales of $2.84 billion—a 23% decline in income and earnings, with a slight increase in sales. The company cites unusual foreign currency shifts and high interest rates for the earnings decline.

While Levi's current slowdown also is seen as related to the generally poor condition of the economy, apparel industry sources also point to the volatile nature of the U.S. jeans market during the past 10 years.

It was during the 1960s and 1970s that jeans—the traditional core of Levi's business—came into their own as the uniform of the young and the chic. While that was good news for Levi's, it opened the door to competition. Levi's nearly exclusive hold on the jeans market was no more.

New jeans brands proliferated. Advertising and marketing expenditures escalated. Department stores started promoting trendy designer and fashion jeans more heavily than more traditional jeans.

Levi's 50%-plus share of the U.S. jeans market in 1970 had eroded to an estimated 30% share level. While Levi's lost share over this period, it should be noted that the entire jeans market grew dramatically. Industry sources estimate that in 1970 the U.S. jeans market had $950,000,000 in sales at wholesale, with 280,000,000 units. In 1980, the jeans market was estimated at $4.2 billion in sales at wholesale, with 560,000,000 units.

"It used to be the name Levi's was 'it' when it came to jeans. That's not the case anymore," said one competitor.

As Levi's hold on the jeans market started to slip, the company began diversifying rapidly into new nondenim product areas. The new product lines included ski wear, blazers, hats and even luggage—categories that were far afield from what had traditionally been associated with the Levi's trademark.

Some of the new products were unsuccessful. Retail industry analysts said the company was diversifying too quickly. Some claimed Levi's was losing its credibility by attaching its name to products that did not jibe with its high-quality, rugged, western image.

For the first time, retailers started to take a second look before signing orders for Levi's merchandise.

■ "Ten years ago retailers were begging for Levi's products," said a source who worked on the Levi's account for several years at Foote, Cone & Belding/Honig, San Francisco. "Now the situation is reversed. Retailers are not making huge orders anymore. The company is feeling terribly pinched."

"Levi's orders are not automatic anymore," added a menswear buyer at a major Los Angeles-based department store chain. "Levi's products are being scrutinized like all other labels. Now we are asking, 'Aside from their volume, are Levi's a good return on investment?' "

Levi's execs stress the decision to market Levi's products in mass-merchandise outlets was made after careful study over many years, and has no relationship with the company's current financial situation.

Levi Strauss America exec vp Alfred Sanguinetti said the decision's timing followed completion of an extensive research project on the subject. "Our studies took years to complete," he said, "and we did not have enough information to make a decision until now."

■ Mr. Sanguinetti is satisfied it's a course the company will profit by.

"The chain's images and quality are compatible with ours," he stated. "If there is any question that should be raised about the timing of the decision, it might be 'should we have made the decision earlier?' "

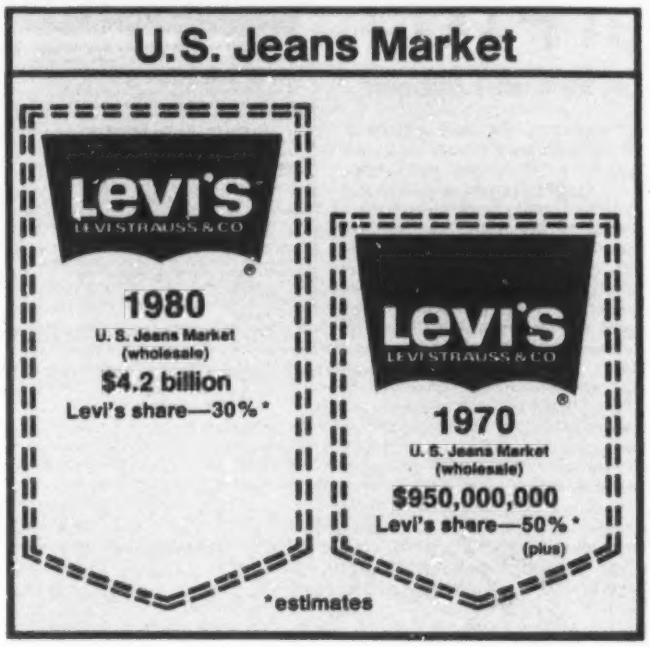
Industry watchers believe Levi's may have hesitated for fear of alienating its traditional customers —department stores and specialized jeans retailers. But most agree the company will probably be the better for it.

"It will be a plus for Levi's, but unfortunately how much of a plus is hard to say," said David Jackson, an analyst for Bateman Eichler Hill Richards, Los Angeles. "It means Levi's may run the risk of losing some of its traditional department store customers who may decide they don't want to compete against Sears and Penney's."

R. Jerry Falkner, an analyst at Underwood, Neuhaus in Houston, believes the decision to enter Sears and Penney's was inevitable, given the way Levi's jeans and other jeans labels have been discounted on a mass scale.

"When discounting became a fact of life in the market, it hurt Levi's sales in traditional department stores. The company must have concluded that if Levi's jeans are going to be discounted anyway, why not sell them at mass merchandisers," said Mr. Falkner.

While Levi's is introducing its products at the middle or lower end of the clothing market, it has not given up on the upper end. Industry analysts said the company plans to introduce several new women's and men's apparel lines in the 1980s to compete against brands like Evan-Picone and Botany 500. Sources said Levi's intends to establish these lines through internal development and through acquisition. A Levi's acquisition committee is said to be looking at several fashion-oriented companies as possible acquisition targets.



The company has already made upscale moves on its own. Around two years ago it introduced the Levi's Young Misses line, a pricey misses apparel line comparable to labels like Evan-Picone and Liz Claiborne. Last year, Levi's renamed its 4-year-old David Hunter men's apparel label Levi's Tailored Classics. A Levi's spokesman said trade response to both lines continues to be strong.

Levi's drive to build credibility in the nondenim market should get a big boost in 1984. Levi's is the official outfitter of the 1984 Olympics in Los Angeles—a task that will include supplying uniforms for 14,500 officials, judges, workers and contestants. It will be a major sponsor of the ABC-TV event.

Company chairman Robert T. Grohman has been quoted as saying the company's Olympics participation will inciude a $40,000,000 advertising and promotional program. Mr. Sanguinetti said Levi's will start testing Levi's Olympics tie-in ads this year. The ads are expected to start airing in 1983.

Marketing vp Hal Spielberg believes the Olympics tie-in with Levi's is natural. "We think the Olympics is something of tremendous value to the country. It stands for being the best you can be," he said.

Another source described Levi's Olympics participation in more practical terms. "It will be an opportunity to further extend brand awareness outside the traditional Levi's denim confines," he said.

While Levi's builds its nondenim business, it is still taking steps to add to jeans sales. On Dec. 1, Levi's Womenswear division introduced 501 junior denim jeans—the original Levi's button-fly blue jeans for the first time made to fit women.

Company execs said the 501s—currently available in northern California, New York, parts of the Pacific Northwest and Ohio—have so far exceeded expectations. Plans call for expanding distribution nationally by the end of the second quarter this year. At present there are no plans to start distribution of 501 junior jeans in Sears and Penney's.

■ Tv commercials airing in San Francisco and New York take an artsy approach. In one spot, a 501-clad young woman is depicted leaving a Victorian farm house on a desolate prairie a la "Giant." Voiceover describes the shrink-to-fit 501s as "cut especially for women." At the conclusion, the woman delivers her lone line in the spot: "Travis, you're a year too late!"

Maybe so, but 501s themselves weren't, in the view of industry observers. They feel Levi Strauss will be needing more 501-style innovation if it is to recover its previously invincible image.#

3M gets serious in personal care bid

By JENNIFER ALTER

ST. PAUL—In the parlance of the 3M Co., an idea for a new business starts as a program and graduates to a project. When the project is elevated to a department, it means corporate executives are serious about the idea and willing to commit resources to its execution.

So when 3M became convinced of the potential for three of its skincare-related projects, it blended them into a personal care products department (AA, Nov. 23) and dubbed as manager Nathan A. Wolfstein, formerly vp-general manager of its Armorlite subsidiary.

Though the technology-rich company has shown interest in the personal care side of the mass market for a number of years, it is the departmental status that will make the venture viable, according to Mr. Wolfstein.

Included in the new department is the Mmm! What A Tan! line of suntan lotions and oils, previously a "suncare" project; a group of skincare and over-the-counter products including the Buf-Puf line, previously marketed by 3M's Riker Labs subsidiary, and a number of home healthcare products spawned by the Medical Products division.

First on the agenda for the new department is the development of its own personal care sales force, which will sell the products as a group to drug and mass-merchandise outlets. The unit also has access to the Riker sales force and is using food brokers to reach the

(Continued on Page 72)

Giant step in Levi's junior jeans

Levi Strauss' new 501 junior jeans help young woman in this 30-second commercial assert her independence (the setting, a Victorian ranch house a la the mid-1950s film "Giant"). Voiceover describes the shrink-to-fit 501s as "cut especially for women." Foote, Cone & Belding/Honig is the agency.

3M personal care

(Continued from Page 4)

grocery trade.

Many of the products now in the department traditionally were promoted ethically, and Mr. Wolfstein believes their distribution needs strengthening. The department already is advertising the products to the trade under the umbrella theme, "Now from 3M. . .a diverse line of personal care products."

While Riker Labs has done some advertising on the Buf-Puf line, it is going on network tv for the first time this month and moving from small to large print ads with the theme, "Buf-Puf. Do It Every Day" (AA, Feb. 1). The line, which now includes the Buf-Puf Bodymate scrubber, an acne cleansing pad, a body scrub, an acne kit and Buf-Oxal benzoyl peroxide gel, eventually could expand into cleansers and moisturizers, according to Mr. Wolfstein. For now, the Riker name will be de-emphasized and the 3M personal care products connection pointed out more prominently.

As for the two-year-old Mmm! What a Tan! Mr. Wolfstein believes it has achieved a "roughly tenable position," but that it has more potential. He notes that since the product was conceived, interest in sun protection has grown significantly and that the brand might be more productively positioned with that attribute in mind. Industry sources said Mmm! What a Tan! has a "miniscule" share in the $225,000,000 category (*see related story on Page 45*). The department is in the process of repackaging and repositioning the line for '83.

Other more long-range offshoots in the suncare area include a tan monitor that can register the amount of light that reaches the skin surface and eyewear for the sun. "3M is in the lens business," says Mr. Wolfstein. "I can see getting into scratch-resistant sunwear for the eyes." The "tan-timer," he says, is ready to go in terms of development and marketing strategy and could be launched next (1983) season.

The home health aids, which now include a line of 25 tapes, compresses, bandages and masks, eventually will be repackaged to carry consistent identification. Mr. Wolfstein's first priority is to strengthen their distribution.

Two over-the-counter products that always have been distributed through professional channels—Titralac (antacid) and Dorbane (laxative) now will be sold by the new unit's sales organization.

Mr. Wolfstein noted that while each product currently holds a small (3%) share of its respective category, "We expect to raise those substantially."

As evidence of its commitment to the department, 3M will quadruple the ad budget on the three lines, spending upwards of $10,000,000 via Dancer Fitzgerald Sample, Torrance, Cal.

Ford joins in requests for 2% givebacks

DETROIT—Ford has followed General Motors in asking for a 2% giveback from suppliers, including ad agencies and media. The request is tied to current rebate and incentive programs.

The 2% will come from agency revenues. Ford has not said how it will ask the media to participate in the voluntary price reduction program. Ford wants it to apply to billings from Feb. 1 to July 31.

Agencies for Ford have not been as quick to comply with the request as Campbell-Ewald was with GM (AA, Feb. 8). J. Walter Thompson Co. refused to comment on its "contractual agreements" with clients. A spokesman at Young & Rubicam's Detroit office said the agency would have to study the request before it made any decision. Kenneth N. Campbell, vp and general manager of Wells, Rich, Greene in Detroit, said before Ford announced its request, "I would think if Ford were to pursue that course, they would closely watch what is

WON'T DROP SYNDICATION

Sales faked, JWT says of unit shortfall

By CHRISTY MARSHALL

NEW YORK—In order to stay afloat in its time-bank sea, JWT Group's tv syndication unit fed its computer a diet of fictitious entries totaling $24,500,000, the agency disclosed last week.

The faked sales were apparently aimed at making the unit appear to be a profit center, where sales of banked time were brisk. JWT clients lost nothing through these machinations, according to the agency.

Yet despite this agency scandal, which earlier led to the suspension of senior vp Marie Luisi, who headed JWT Syndication & TV Spot Sales, Don Johnston, chairman of JWT Group, said that he continues to believe in the concept and practice of syndication.

"We don't believe there's anything inherently wrong with syndication when you have people of integrity running the business," Mr. Johnston said. "I would do it again. It provides a service to advertisers who want to reach special markets and to independent tv stations by providing them with programing they otherwise wouldn't have."

It is also a field known to be ripe for exploitation.

After an internal audit turned up the evidence of this computerized balance sheet manipulations, JWT announced plans to take a pretax writeoff of $18,000,000. In a six-page statement captioned, "Explanations

CBS, Fox giving birth to video venture

By MAURINE CHRISTOPHER

NEW YORK—CBS/Fox Inc., a $100,000,000 co-venture into cable and home video programing, is expected to be run by a six-person board with three representatives from both equal partners.

The impending birth of the new technologies' spinoff by Bill Paley's CBS Inc. and Marvin Davis' 20th Century-Fox Film Corp. was announced last week after months of prenatal care. Speculation now is rife as to whom will become chief executive of CBS/Fox.

Sources at CBS here talk of a multi-unit management structure. Shifting from parent CBS Inc., if a "definite agreement" seals this contract in 30 days or so, will be CBS Cable, CBS Video Enterprises and CBS Studio Center staffers and executives, about 250 people in all.

CBS/Fox units will include the the 6-month-old CBS Cable cultural network, a critically lauded miniservice still gushing red ink despite a respectable list of sponsors now reaching in aggregate 3,000,000 catv homes. News that the mounting startup expenses soon will be going elsewhere evoked some jubilation in the CBS/Broadcast Group, under which CBS Cable has been operating.

CBS-TV insiders describe Mr. Paley as well pleased with CBS Cable's product but horrified by the modest sales potential for such limited audiences.

While the skeletal press release made no mention of the phrase, pay tv looms as a major motivation in this deal. Sources at both companies expect movies, sports and other attractions for traditional pay and/or pay-per-view services to be given high priority on CBS/Fox's must do list. On both coasts, there have been repeated reports that CBS Cable may turn to pay-per-view offerings to soak up some of its deficit.

Twentieth Century-Fox has been looking for entry into pay cable networking ever since the courts nixed the Premiere co-venture involving four major movie producers and Getty Oil. In recent weeks the veteran movie-tv pro-

N.J. 'RECORD' PLANS A.M. DAILY

If 'News' folds, rivals ready

By STUART EMMRICH

NEW YORK—Papers competing with the *New York Daily News* aren't waiting to see if that paper is either sold or folded before going through with their own plans to carve up the *News'* circulation.

Area dailies have already begun plans to expand coverage into areas served by the *News*, and at least one—*The Record*, of Hackensack, N.J.—is ready to go with a separate morning paper if the *News* folds. Staffers at the *Record* have been told that the new paper would be on the newsstands the morning after the *News* ceases publication.

Tentatively called *A.M.*, the new paper would not be a morning edition of the *Record*, but a separate newspaper described as a "clone of the *Daily News*." The prototype shows a front page that carries one large picture and a couple of headlines. Front-of-the-book pages would be devoted to international, national and local news, followed by features. Sports would be located in the back of the paper, with its own back cover.

Initial distribution calls for a pressrun of 30,000, according to estimates by insiders, with papers sold at bus terminals and train stations serving commuters on their way to New York. The first issue is pegged at 96 pages.

Record execs are hoping the paper will attract a significant number of the estimated 50,000 readers who buy a *Daily News* each day in Bergen County. The *News'* daily New Jersey circulation,

Kal Kan eyes $20 million-plus support for Crave

VERNON, CAL.—Kal Kan Foods has started national sell-in of Crave dry cat food, now primarily in western regions. Advertising and promotional support at a national rate of $20,000,000-plus is promised in new markets. Animated spots breaking in May from D'Arcy, St. Louis, tout "real protein rich food cats crave." Couponing and trial packs are included.

Pillsbury tests toaster strudel as Pop-Tarts rival

MINNEAPOLIS—Pillsbury is introducing frozen toaster strudel into test in Phoenix and possibly other markets. The breakfast pastries are designed to compete with Kellogg's Pop-Tarts and Sara Lee's cinnamon danish, sales materials say. The product is in the frozen breakfast section of stores and comes in four flavors: Strawberry, blueberry, raspberry and cinnamon. Advertising and promotion, at a $15,000,000 national level, starts in March in prime time, daytime and late-night periods. Sunday insert coupons and direct mail coupons also support. Agency not known.

DIVISIONS KEY FACTOR

P&G optimistic on continuing 7.5% growth

By JENNIFER ALTER

CINCINNATI—Procter & Gamble president and chief executive John G. Smale believes the giant package goods company will continue to meet its renowned annual real growth rate of 7.5%.

A favorite topic among P&G watchers is if and how the company can accomplish this task. Though he stopped short of an outright promise, Mr. Smale, at his debut performance before the investment community here last week, was clearly optimistic on the subject. Speaking to 200 analysts and investors at the Cincinnati Society of Financial Analysts, Mr. Smale said. "That's [7.5%] what we're going to be trying to do. I think we probably will be successful. The 7.5% is a product of history. It's a little over-simplified," he continued, "but historically, we've roughly doubled our business every ten years."

As to the how of this question, Mr. Smale said that fundamental to the company's growth is its organization on a divisional basis by product category. "We believe a key element to our future growth will be continuing to manage the business with the structure of operations divisions or units that are large enough to be efficient but small enough to allow for easy communication and thorough knowledgeability about the business area involved." He pointed to

Be there

"You've Got to Be There" is the theme of the Knoxville 1982 World's Fair tv campaign, featuring such scenes as the dismantling of a bit of the Great Wall of China (shipped over for the exhibit by the People's Republic) and a small boy peering into the window of a French pastry shop. Campaign hits major markets in March, via Ogilvy & Mather, New York.

Networks spring-cleaning series lineups

By JAMES P. FORKAN

NEW YORK—Even as the tv networks pore over the February sweeps results so far, the programmers are sweeping out a lot of prime time deadwood.

Most of the spring-cleaning changes being made for March-April prime time starts amount to spring-summer tryouts for fall or midseason, 1983, berths. The networks' brooms so far have swept more series into hiatus than the scrap pile, apparently in hopes that some may yet prove salvageable.

Interestingly, the top two nets, CBS and ABC, have been the most active in shuffling shows, especially since January. The sweeps data from Feb. 3 through 16 show CBS keeping its lead with an 18.5 Nielsen rating and 29 share, vs. ABC's 18.5 and 30; NBC scored a 15 homes rating and 24 audience share.

CBS started the latest round of schedule changes early last week, followed late in the week by ABC.

Tony Thomopoulos, ABC Entertainment president who has yet to decide just how long its spring tests will air, starts the "Joanie Loves Chachi" spinoff from "Happy Days" on March 23, with the parent show acting as lead-in, while the "9 to 5" sitcom inspired by the hit movie will begin April 1 at 9 p.m. (ET). Thus, "Laverne & Shirley" and "Barney Miller" will be preempted.

"Sgt. Hooker" with William Shatner will take over the "King's Crossing" spot as of March 27, with some ABC officials indicating that "Crossing," if extended, probably will not return to that time period. Looking to shore up another weak link, ABC will insert "Inside America" as a Dick Clark-hosted magazine series at 7 p.m. Sundays, preempting "Code Red" as of April 4. All these moves complement earlier ones that will bring "Police Squad" and "Bosom Buddies" to Thursdays and "Open All Night," "Best of the West" and "Making a Living" to Fridays (AA, Jan. 25 *et seq.*).

And ABC's fixes are not over yet, with its programers already mulling March-April starts for "No Soap, Radio" and "Phoenix." Coming in "late spring," ABC execs added, is an eighth tryout series, "Counterattack: Crime in America," a George Kennedy-hosted, reality-based series on crime prevention and detection.

CBS Entertainment president Bud Grant and vp-programs Harvey Shephard also have made March-April changes in stages. Having earlier this month reworked Tuesdays and Wednesdays, the network now is renovating Mondays and Thursdays. "Cagney & Lacey" will go series at 9 p.m. March 25, hammocked between "Magnum, P.I." and "Knots Landing." Using "M*A*S*H" as its Monday anchor, CBS will test "Private Benjamin" and "Report to Murphy" as the lead-off block as of

Magazine Question: What do Milton Berle, Dick Tracy, the Mills Brothers, Candice Bergen, John Houseman, a San Francisco cable car, a nun, a piano-playing cat, Ray Bolger and Wolfgang A. Mozart have in common? Answer: All of them are utilized in tv commercials that made ADVERTISING AGE's annual "100 Best Commercials" listing, compiled by Harry Wayne McMahan and Corwin Mack Kile. The list, which is featured in today's issue of the new ADVERTISING AGE Magazine, actually contains more than 100 commercials, but as the authors point out, it was a very good year for tv spots.

Test marketing is the subject of the Section 2 special report. Articles deal with such topics as the risks and costs of test marketing, in-house pretesting of tv shows, test marketing of new magazines and a listing of 36 recommended test markets.

Among the Magazine's features is James Brady's weekly column, which has moved from the news pages of ADVERTISING AGE.

7UP now touts no caffeine

By ROBERT REED

The Seven-Up Co. has altered marketing strategies for the mainstay 7UP brand and is highlighting, for the first time, the soft drink's absence of caffeine.

Also, some industry sources anticipate further fine-tuning of the current "Feelin' 7UP" campaign and expect those changes to be forthcoming by April. N W Ayer, New York, handles.

A flight of two new commercials featuring the no-caffeine theme is airing in major markets. While the approach is a slight departure from the action-oriented "Feelin' 7UP" tack, the new spots retain sport figures as spokesmen, but in more sedate settings.

In the new commercials, veteran spokesman-athlete Tug McGraw and Randy White, a Dallas Cowboy and the newest 7UP endorser, perform a variation of the "old shell game." Each athlete shifts three concealed soft drink cans from side-to-side before unveiling a 7UP, prompting him to say "Pick a 7UP—the one with no caffeine. Never had it, never will, just clear, crisp and clean without caffeine."

Test Marketing

Tomorrow, and tomorrow . . . whither the method?

By Cecelia Lentini

The dazzling array of goods filling supermarket shelves will continue to keep them coming back for more, of that there's no doubt. And sprinkled among the old favorites will be the new products, promising everything from crustier pizzas to shinier floors (without waxing!) to pourable quiche. If the consumer doesn't think she needs it now, just wait—she will.

This abiding hope among marketers keeps the dollars pouring in for developing, testing and launching new products. They are a measure of a company's growth and competitiveness in the marketplace.

But although companies are increasingly interested in new product development—a recently released Booz, Allen & Hamilton survey of more than 700 companies says management expects new products to contribute 40% more to profits in five years than they do now—the cost of developing those products is higher than it has ever been.

The cost of capital, in fact, coupled with the higher risks associated with failure both in the marketplace and in test marketing, is making companies take a long, hard look at how they spend test market dollars.

Though the increased pressure this puts on companies to eliminate potentially unsuccesful products in prescreening stages would seem to bode well for more test

(Continued on Page M-39)

Whither test marketing?

(Continued from Page M-9)

marketing suppliers, their future actually looks much less sure.

For one thing, the increased emphasis on very early prescreening, according to the Booz, Allen survey, actually means that fewer new product ideas are getting past the planning stages into any sort of development or testing. For every 58 new product ideas that made it into development and testing in 1968, only seven made it in 1981.

Other statistics seem to bear this out. "New Product News", the Dancer Fitzgerald Sample monthly, reports a 3.9% growth in the number of new products introduced in 1981, down from a 10% growth in 1980. And though final 1981 figures from A.C. Nielsen Co.'s Early Intelligence System on bimonthly product introduction aren't yet in, they show that between Feb. 1 and Oct. 1, 1981, the average increased by only 2% over the same period the year before. This compares to an annual growth rate of 4% in 1979 and 12% in 1980.

More important, the number and type of test marketing services—ranging from scanners to lab simulation models to the classic instore controlled test—catering to this reduced line of new products has exploded in the past few years.

Yet, according to the Booz Allen survey, the percentage of the total development budget companies are allocating to pay for these services hasn't changed appreciably since 1968.

The survey showed that while in 1968 the average company allocated an average of 14% of its total budget to testing, in 1981 it allocated only a slightly higher 17% of that same budget to testing.

Tom Kuczmanski, a Booz Allen senior associate and program manager for the study, cautions that these figures can't be placed in a similar dollar perspective, since respondants weren't asked the size of their budgets. He says, however, it's easy to see that a vastly larger group of suppliers are scrambling for the same percentage of dollars.

"The industry has become highly sophisticated," he says. "At the same time, end users are a lot more selective in the use of that industry."

Most suppliers have already experienced the effect of this firsthand, if only through increased concern from clients about maximizing research results. And they agree that change is in the picture for the future.

"A lot of research companies are going to disappear and others are going to have to change the way they do business," says Arthur Oken, chairman of ParaTest Marketing in Eastchester, N.Y., which is now looking at adding computer capabilities and scanner services to its service line. "A lot of corporations are going to expect more of their research supplier and there is going to be more of a trend toward [the use of] computers."

Companies will be putting even more emphasis on profitability—and where a new product contributes to this. Donald Ritter, vp-manager of grocery services for Nielsen's Marketing Research Group, USA, said that "companies are definitely moving into more financial management and strategic planning."

Marketing risks are greater and a company's marketing plan will have to be put to the test. "Strategic planning," says Mr. Ritter "[will make] marketing of a product as productive as possible." He sees a lot of testing going on with already existing brands: They too will have to try harder in the future.

Both Mr. Ritter and Harlan R. Janes, vp-manager of health and beauty aids/drug industry services at Nielsen, were enthusiastic about the area of promotional testing.

According to Mr. Janes, "Trade promotion dollars are needed to keep interest in a product. Scanning technology can measure the effectiveness of a promotion week by week. It's a new strength the industry has."

Mr. Ritter adds, "You can isolate your individual promotions; You can tell whether you've built your business or if you've just gone back to the same repeat buyers."

In fact, the companies that appear to be most bullish on the future supply scanner data.

For instance, Gian Fulgoni, president of Information Services Inc., in Chicago, which markets BehaviorScan, says his company's business doubled last

Whither?

(Continued from Page M-39)
year and he expects it to do the same in 1982.

Suppliers of other services generally report that 1981 was a good year, though those who provide the increasingly expensive controlled instore testing services were more subdued in their estimates for 1982.

"We see more measured dollars," says Lou Babic, president of Erhart and Babic, Englewood Cliffs, N.J. The company is looking at the possibility of providing scanner services. "We see it getting more competitive for test marketing dollars."

Adds Jack Abrams, president of Market Facts in Chicago, "Our volume is up marginally from a year ago and we see no reason to expect a substantial change. We're only one of a number of companies offering this service." Burgoyne Inc. and Burke Marketing Services, both Cincinnati-based companies offering controlled instore testing services, reported slower growth.

Regardless of the kind of year they had or are expecting, test marketers are seeing other trends that promise to have a significant effect on their future. One most often noted is the tendency among clients to look for immediate profits.

"Corporations are not allowing themselves sufficient time to develop new products," says ParaTest's Mr. Oken. "Their interest is in short-term profits."

Adds Nielsen's Harlan R. Janes, "There's an urgency today to make everything happen very quickly, both because of the costs involved, but also because the competition is quicker on its feet." What this attitude translates into, say suppliers, is a change in the form new products will take. "We see a trend to more line extensions and me-too type products that overall involve less risk and a trend away from the innovative products that involve more risk," says Andrew Tarshis, president, package goods division of NPD Research, New York.

This view is substantiated by the Booz Allen survey, which shows that over the past five years, more than 50% of all new product introductions were actually additions or revisions to existing product lines, while only 10% were "new to the world products" and 20% were new product lines.

This trend, coupled with concern over costs and speed, is having another effect on testing practices. Though not as pronounced as the tendency to market line extensions over entirely new products, suppliers of simulated test markets, such as ASSESSOR, COMP and ESP, say they see a few companies jumping right into regional, or even national introduction without going through the traditional controlled test market phase.

Though some, like ParaTest's Mr. Oken, think this step is nothing short of suicidal, market research directors who are doing it say they are pleased with the process. General Mills is happy about the results it has had.

"As far as we're concerned, there is no recession," says Boyd Snedden, General Mills research director for cereal and grain products. "And, yes, we use test marketing where it will make sense. But rather than a formal test market, we will roll out regionally."

Mr. Snedden cautions that the company doesn't take this tack unless pretesting, through simulation models or other services, has shown the company that the risks are manageable.

Mr. Snedden's counterpart in General Mill's new business division, Robert Bondurant, stresses that although the company's test marketing decisions don't hinge on day to day fluctuations in the economy, they are affected by the increasing cost of capital. That, coupled with better marketing research technology, often leads him down the same road as Mr. Snedden.

Market research directors at other companies who don't own up to having instituted the practice still couch their discussions in terms that suggest that if the situation were right, they too would be off and running on a regional rollout.

At Quaker Oats, for instance, John Blair, director of marketing research for human foods, says his testing decisions are based on a determination of how much risk is involved. And though hard times dictate more rather than less caution, the amount of risk he's willing to take varies from product to product, from situation to situation.

"The cost of doing marketing research continues to go up," he says. "I want to be careful that I spend money wisely and on the right things."

Adds Larry Stanek, market research director at Kraft Co., "We've used all types of testing services. The proper one to use depends on the situation."

Although executives on both sides of the aisle—suppliers and users alike—say they aren't sure where the new technologies and economic climate are taking them, most, like Nielsen's Mr. Janes, are convinced that for better or worse the field is changing permanently.

"I was serving clients in the recession of '73 to '74," he reflects, "and they reacted then in a knee-jerk sort of way. Everybody withdrew, trying to figure out what was going to happen. Eventually things got back to normal, but then we had the recession of 1977, followed by a prime rate of 18% to 20%. At this point, companies don't have a knee-jerk reaction anymore. Now, they accept the high cost of capital as a way of life and unhappily, they know they have to learn to live with inflation."

Indications are that the coming year will challenge both suppliers and users of test marketing. One executive compared the scene to a chess game: Strategy will make the difference. AA

THE BASES SYSTEM

REDUCES THE RISK...

OF NEW PRODUCT DEVELOPMENT

New product development is a very risky business. And the odds in favor of new product success are low.

Traditional product screening techniques provide companies with an abundance of data in the form of attitudinal measures. Unfortunately, these results often fail to answer the fundamental question of whether or not a new product has the volume potential to meet a company's minimum business requirements. That's why leading consumer products companies are using BASES to reduce the risk and lower the cost of new product development.

The BASES system is specifically designed to accurately estimate sales volume potential. BASES takes into account variables that affect sales and provides valuable diagnostic insights obtained from the more traditional concept and concept/product tests. And BASES is a comprehensive system composed of separate, distinct phases: BASES I is a concept test to estimate Year 1 trial rate potential; BASES II is a concept/product test to evaluate sales volume potential; BASES III is an in-store test utilizing packaging and advertising; and BASES IV is a test market monitor that also allows estimations of revised marketing plans. BASES can, in fact, simulate the effects of alternate marketing plans at any stage of your new product development.

So don't gamble away a good bet!

Reduce the risk, lower the cost, and shorten the time of new product development with BASES. Call for literature and more details today.

COMMENTARY CORNER

By Gerald Schoenfeld

A lost art

By Gerald Schoenfeld

Yes, we still place our test products in Fort Wayne and Syracuse. And we still call it "test marketing," but what are we really testing for?

Spending levels, promotion plans, pricing—you hear a lot about ironing out the kinks in the plan. What you seldom hear in market tests today is the answer to what used to be the $64,000 question: "Can we make money on this or not?"

Why is success or failure seldom the issue anymore in test marketing?

"Laboratory sales tests," say some marketers, "are often the answer."

Some claim that an ASSESSOR or a Yankelovich LTM (simulated test marketing models) can accurately duplicate test market conditions and predict a new product's performance in the "real world" at a fraction of the cost without tipping off the competition.

But can they really duplicate the marketplace?

"They can help you get it all together," says Leon Joffe, product manager for new products at Alberto-Culver. "They can act as a disaster check. They can keep the competition from stealing your idea while you test. But, if you've got a unique product the competition can't easily steal, you can't match the actual marketplace. It costs a lot more, but it's worth every penny to test for success or failure in the real world."

Yet, rare indeed is the test market manager willing to wrap up his $375,000 venture and call it a failure.

Instead, there are many companies willing to commit vast sums of money to questionable new products on the basis of considerations having little to do with preliminary screening:

- We need the volume. Short-term considerations, quarterly earnings statements and other management considerations play an increasingly important role in the go or no-go decision.
- Somebody upstairs loves it. When it is known that a test product is a pet idea of an important member of management, no one wants to be identified with putting the concept to rest. Instead, it is pushed along until it falls of its own weight. Even then, the executive is likely to claim that the pet project "never had a chance."
- Who's to blame? Every product that fails to survive the test market is "somebody's fault." By declaring the test market "successful," the placing of blame is avoided. Later, when the product rolls up big losses in national introduction, the finger can be pointed to a whole new set of characters:
- "They didn't follow the test market plan."
- "The sales department fell down on the job."
- "Management cut back on spending," etc.

Test marketing is so expensive today, many executives have fallen back to the old term "vitality test" which has a nice ring to it, sounding worthwhile and robust.

"We know we're not going to spend $34,000,000 nationally," they say. "We just want to see how high is up—what's the optimum in sales. Move enough product to get a better fix on promotion, pricing etc."

A brand group is created and fully staffed so that now a relatively large number of people have a stake in the continuation of the project, which seems to have a life of its own. Instead of projectable spending, distribution and promotion activity, test markets are handled as showcases to convince management that the decision to roll out is a wise one.

Instead of adhering to an advertising and promotion budget that is affordable on an expanded nationwide basis, double and triple budgets are common today in "test" markets. The theory is to spend so much in the test market that you get ample opportunity to iron out all the kinks in everything from product to ad campaign. A giant company can afford to use the inflated test market budget as a means to force the competition to tip its hand, but not all have the resources, the patience, the technical capability to play this vitality test market game.

To get their test products into distribution fast, companies may offer incentives to the trade and to their own sales force, which cannot be duplicated on

an expanded, national basis. Special sales meetings are held, pep rallies, contests—all to sell a product in an area representing perhaps 2% of the national sales area. Or, to assure distribution, controlled distribution services are used that guarantee distribution in test market. What happens nationally is another matter.

To get movement, companies will often depress the retail price of test items below the profit level. Such "introductory" offers are designed to convince mangement that the *a priori* decision to roll out the test product was a wise one. Sometimes these introductory offers are justified on the basis of combating intensified competitive efforts in the test area. Devices to disrupt test market results, are intended to make you employ expensive countermeasures.

Unfortunately, the end result is to vitiate the usefulness of the test market.

A predicament with "catch-22" overtones has entered into test marketing. The test market has too often been turned into an arena for solving trade problems, manufacturing capacity and determining competitive spending levels. National expansion is considered inevitable and when it occurs, if failure follows, it is frequently viewed as a budgeting miscalculation. Companies that are determined to go national no matter what have, in effect, written off the consumer as the arbiter of success or failure. Now it is the bookkeeper who is to blame. Not the people who conceived the product, nor the people who failed to promote it successfully.

Yet the cost of such failure should give all companies pause. If test marketing has become too expensive to enter into with any product that is not already slated for bigger things, then national expansion has become far too expensive for such untested entries. Products are being introduced nationally that have never sold at a profit in an open test market. With consumer acceptance taken for granted, these products are put into test market only to answer questions of trade relations or budgeting.

All of this is consistent with the widespread cynical view of consumers so prevelant today. They are not considered creative; they are not to be listened to seriously, but rather to be analyzed, segmented, measured, manipulated. Typically, consumers are not trusted with whole products, but are presented with selected characteristics, given "blind" products to use. Finally, the last opportunity to check the consumer at the point of sale has become a numbers game.

As things get tougher, smart marketers will get more patient and put the conceptual work with the consumer into the foreground where it belongs.

Instead of rushing undeveloped ideas into quantitative tests, more careful work up front is needed.

In my own work, this checklist has been helpful:

- Start with a wider range of ideas.
- Don't expect to get it right the first time. Don't make your consumer probes "one-shots." Instead of asking what was the winner, ask "What did we learn?" Then go back again.
- Beware the breakthrough syndrome. The greater the change in habit or idea, the more reluctant consumers are to make it. The more information you ask people to absorb, the longer it takes them to absorb it.
- Don't save the chocolate and the strawberry. If the people who invented ice cream had introduced only vanilla, they would have been vulnerable to the first guy to introduce chocolate. Try to develop your full line at the beginning. AA

You Just Can't Find A More Representative TEST MARKET Than NASHVILLE!

Nationwide surveys rank Nashville as one of the most representative test markets of all major American cities. Nashville's demography is almost identical to the national averages in age, education, income and other categories, prompting national advertisers such as Coca-Cola, Frito-Lay, McDonald's, Pillsbury, Kroger and Genesco to choose Nashville as a test market center for their research.

Besides offering a diversified sampling of national tastes, lifestyles and buying habits, the Nashville market has a wide area of countryside and small towns protected from outside media influences. And Nashville does all this with a healthy, stable economy.

Conduct your research in Nashville. You'll never have a more controlled environment for your products and campaign testing.

Tropicana plants full-line strategy

By NANCY GIGES

ST. PETERSBURG BEACH, FLA.—Richard Walrack's intent to make Tropicana Products a more competitive marketer is quite obvious even though he's headed the Beatrice Foods subsidiary a mere few months.

To that end, he's not opposed even to knocking products marketed by a sister company. Commercials for Tropicana Chuggers, a new line of shelf stable, single-serving juices, include the phrase, "Chuck the soda," a direct attack on product sold by a relatively new Beatrice unit, Coca-Cola Bottling Co. of Los Angeles.

Those commercials use the Beach Boys singing group encouraging viewers to "Chug a Chugger." But they may never find their way to the nation's airwaves, since the tv networks have already expressed doubts about the acceptability of the "Chuck the soda" phrase.

But whatever commercial eventually surfaces—for that new item or any other Tropicana product—it will be more aggressive and given more weight under the new chief's direction. Spending this

AD BUDGETS JUMP DESPITE ECONOMY

Big push on in foods

By JANET NEIMAN and NANCY GIGES

ST. PETERSBURG BEACH, FLA.—Commitment to increasing advertising and marketing expenditures, even in today's sluggish economy, was a message that came through loud and clear from food and beverage marketers at the Consumer Analysts Group of New York conference here.

The heightened marketing and new product efforts shone through the outlook for continued economic gloom that was predicted. Top officers of the consumer products companies generally forecast 5% to 7% inflation through calendar 1982, and a prolonged period of 15% to 16% interest rates that they said could last another 18 months.

Most companies pointed out that their marketing emphasis also includes stepped-up efforts to add new products to their lines, with several major new items expected to go into test or wider distribution this year. Highlights from the meeting include:

- Consolidated Foods' Shasta soft drink subsidiary is set for an 86% hike for its next fiscal year beginning June, 1982. It is near an acquisition of C&C Cola from ITT.
- Kraft Inc. will increase advertising for its real mayonnaise and is testing new salad dressing products.
- Heublein's domestic Kentucky Fried Chicken unit will get a 33% boost in national advertising this year as store contributions rise from 1.5% to 2% of sales, though the redistribution of local funds will probably result in a decline in local advertising. *(See story, Page 6.)*
- PepsiCo last year hiked ad spending in its foodservice division 71%, and is making some marketing strategy changes in its Pizza Hut unit.
- CPC's Best Foods division is looking to repositioning of its product mainstays as a growth strategy.
- General Mills is concentrating most of its capital expenditures in the consumer foods and restaurant divisions.
- Pillsbury officials said the company is working on acquisition possibilities in all areas of its busi-

Industry off target on 'fairness'—FTC

By RICHARD L. GORDON

WASHINGTON—Key members of the American Advertising Federation lobbied hard for their top congressional objective this year—elimination of "unfairness" authority from the Federal Trade Commission Act—but found FTC consumer protection chief Tim Muris a hard sell.

Mr Muris, whose views are known to be highly regarded by FTC chairman James Miller III, a Reagan appointee, implied that AAF's emphasis on getting "unfair" out of the law is off target.

He suggested the industry's real problem stems from FTC's broad power to define deception. Several bills that Congress will consider this month have provisions narrowing FTC's jurisdiction over both unfairness and deception, and his comments to AAF may be a tip-off that they will get some form of support from the Reagan people at FTC.

The adpeople, still furious over the bitter children's tv advertising fight, argued that the industry will live in jeopardy as long as FTC has the power to use the undefined "fairness" standard to judge advertising and marketing practices. But Mr. Muris countered that eliminating FTC's unfairness power from the law may not be the panacea advertisers have hoped for, and said that unfairness, properly limited, has "some usefulness" for FTC.

AAF's meeting with Mr. Muris reflects only part of stepped-up activity by ad associations, the Chamber of Commerce, the National Assn. of Manufacturers and others hoping to convince Congress to continue the shrinking of FTC's powers that began in 1980.

Senate hearings opening March 16 will consider the commission's current authority and debate renewal of its operating charter, which expires Sept. 30. Parallel House hearings are expected to be scheduled shortly.

Some of FTC's critics in the Senate and House have already introduced bills; the Chamber, NAM and ad associations are putting final touches on proposals they will offer.

■ The new, conservative management team at FTC has yet to reveal its legislative strategy, but chairman Miller delivered his first challenge to Congress in a speech last week declaring he's ready to fight political pressure to exempt doctors, lawyers, other professionals and their trade associations from FTC jurisdiction. Appearing before the D.C. Bar Assn. antitrust committee, the chairman said he will "strenuously" oppose such a "special dispensation for this or any other group." But he said his willingness to fight is linked to an assumption that Congress "will redefine—and narrow" FTC's authority.

The last time Congress battled over authorizing FTC, it compro-

Chiat in U.K. link

By BRIAN OLIVER and JOHN REVETT

LONDON—Chiat/Day of Los Angeles and Collett Dickenson Pearce here—two ad agencies known for their creativity—last week decided to pool their resources through a new, jointly owned company which is likely to go after multinational accounts.

The company has not been given a name yet, but it probably will be called Chiat/Day-CDP or CDP-Chiat/Day and be based in New York, either separate from or as part of Chiat/Day's existing office.

The joint operation will be used by both agencies as a global "swap shop" and will control the ex-

Skin tome

Yardley of London's new aloe vera line will be supported by a print campaign from Bozell & Jacobs (AA, Feb. 22) taking an educational approach.

How to make your skin the best it can be.

Aloe. It's been used for centuries to help beautify, protect and heal the skin. And now, Yardley has created three special Aloe formulas to help make your skin more beautiful, no matter what condition it's in.

For damaged skin. Aloe 70.
An intensified cream, with 70% pure Aloe Vera gel. Use it whenever you have a special skin problem. Or to help skin damaged by overexposure to the sun, wind or cold.

For rough, dry skin. Aloe 50.
A nourishing lotion, with 50% pure Aloe Vera gel, plus special emollients, to help restore smoothness. A natural moisture to any skin area that is rough or dry.

How to keep it that way.

For healthy skin. Aloe 30.
An all-over body lotion, with 30% pure Aloe Vera gel blended with natural moisturizers. Use it everyday to help keep your skin as healthy and beautiful as it can be.

For healthier, more beautiful skin, Yardley has your number.

TAKE-OUT BOOM FORECAST

Fast-fooders don't like it, but discounts work

By RICHARD KREISMAN

MIAMI BEACH—The escalating discounting of product prices in the fast-food industry through couponing, games and other methods, an anathema to many industry leaders, apparently is working.

In a survey presented to foodservice executives meeting here, it was demonstrated that chains engaged in this type of dealing have outpaced their competitors in sales and traffic. These chains showed real growth in the past two years, when the industry was flat or slightly down.

The study, however, did not address how the dealing affects company profits.

■ The number of major chains which show 20% or more of their transactions involving a promotion has doubled, up from 12 to 24 in the 1976 to 1981 period, according to a survey by GDR/CREST Enterprises. The Rosemont, Ill., industry tracing service revealed its findings at the International Foodservice Mfgs. Assn.'s (IFMA) Chain Operators Exchange. Like their counterparts in the grocery industry, fast-food marketers increasingly are shifting advertising media funds to promotion spending.

Promotional sales now account for almost 10% of total industry sales, the survey showed.

The dealing activity is resulting from continuing sluggishness in the industry and a stepped-up market share battle for the declining customer base.

Industry executives here were not optimistic about prospects for the coming year, citing consumer pessimism over the economy and decreasing disposable income. Most observers predicted another flat year for fast-food. But some others suggested some real growth is possible.

"Consumer attitudes are in a state of limbo," said George Rice, GDR/CREST president. The keys to the upturn are short-term variables: Disposable income, cost of goods and travel barometers.

The long-term outlook is brighter, contended Lawrence Chimerine, chairman of the board, Chase Econometrics. He told the fast-food operators that unlike earlier downturns in the mid and late 1970s, consumers are not hampered by rising gas prices and uncontrolled inflation. "If the budget deficits are revised and interest rates stabilized—and these are two big ifs—the opportunities will be better now than in many years," Mr. Chimerine said.

The biggest factors in the "extremely favorable outlook" will be a "very sharp rise" in purchasing power and disposable income, lower unemployment and a "dramatic slowdown" in food and labor costs. An oil glut, continuing increase in two-income families and an aging consumer base accustomed to eating out, also will contribute to an industry surge by the mid-1980s, he contended.

For now, however, chains and independent restaurant operators

Says JWT syndie sales near $11 million

Luisi lawyer responds

By CHRISTY MARSHALL

NEW YORK—Marie Luisi, J. Walter Thompson Co.'s recently deposed senior vp-head of JWT Syndication & TV Spot Sales, can account for $10,750,000 in legitimate syndication sales for 1980, according to her attorney.

The company contends that during the past four years, $24,500,000 worth of fictitious sales were entered into the syndication unit's computer (AA, Feb. 22).

"We don't know about any $24,500,000," said attorney Ivan Fisher. "We know about $10,750,000 for 1980. We were able to look at some numbers and figure that out." The numbers were from Donovan Data Service material, according to Mr. Fisher.

However, Dave Solomon, exec vp, Donovan Data Systems, denied that either Mr. Fisher or Ms. Luisi obtained such records from his company. He refused to say whether JWT had sought his company's assistance in the matter; an agency spokesman said he didn't know if JWT consulted Donovan.

Donovan's system, used by many agencies, is linked to spot buying and syndication unit computers. Agencies, JWT among them, feed information of their various buys into the computer and get daily printouts for their records. Mr. Solomon said the computer has no way of knowing the validity of those entries.

The company and Ms. Luisi have still not met since JWT disclosed the extent of its "irregularities." Ms. Luisi's attorney is keeping her under tight wraps and JWT's counsel is still requesting that Ms. Luisi return some record books that she took home with her. Mr. Fisher has said that she will not comply with that request.

While various legal recourses are being discussed, no legal actions have been taken, according to Mr. Fisher and Don Deaton, J. Walter Thompson's senior vp-communications. The JWT Group board meets March 2, and may consider legal action then. There have been no stockholder actions taken against the directors, Mr. Deaton added.

Now that JWT Group has disclosed the findings of its audit and appears satisfied that the "cancer has been cut out," as Mr. Deaton put it, the advertising industry is waiting for the next shoe to drop, possibly by angry clients.

Of JWT's list of blue-chip clients, however, Ford, Kodak and Warner-Lambert all expressed anew their confidence in their agency last week and said they had no plans to go over the JWT books to study the buys, the shows or the syndicated unit. Other companies, like Burger King Corp. and Lever Bros., declined to comment. Several company spokesmen said it was an internal matter at Thomp-

Magazine

Ten years ago, at a time when fledgling black-owned advertising agencies found themselves the recipients of so-called "conscience money" from clients, Chicago's Tom Burrell said "no, thanks," to handouts, preferring to build a reputation based on quality and performance. Now, a decade later, Burrell Advertising is enjoying the fruits of its success, numbering among its accounts McDonald's and Coca-Cola. Today's issue of the new ADVERTISING AGE Magazine profiles this black-owned agency and traces its steady growth.

The Magazine also presents excerpts from the best selling "The Trouble with Advertising," by John O'Toole, chairman of Foote, Cone & Belding Communications, plus columnist James Brady.

The Section 2 Special Report focuses on toiletries and beauty aids, with emphasis on skincare products, the industry's one area that has shown recent growth.

Fox fare pay off in collateral

By MAURINE CHRISTOPHER

From the world of Nielsen triumphs to the world of high finance.

That's the path 20th Century-Fox's "M*A*S*H" and its spinoff, "Trapper John, M.D.," traveled recently as collateral for a fresh $500,000,000 capital package. Fox is borrowing the money from a group of banks headed by Chicago's Continental in the first major refinancing for the Beverly Hills movie company since oilman Marvin Davis bought it last year for about $700,000,000. In short order he transformed Fox into a private company called TCF Holdings, with himself as chief shareholder.

The use as collateral of present and future episodes of tv properties is common in television, but the amount of money involved in this deal does appear to be impressively large, industry sources point out.

"M*A*S*H's" record as a standout performer in theaters and tv is striking enough to impress any banker. The 10-year-old weekly CBS-TV series currently is tied for eighth place in the season-to-date Nielsens with a 22.6 rating and a 32

(Continued on Page 76)

COMMENTARY CORNER

By Franchellie Cadwell

Tarzan pleads for help

When Jane and Tarzan were dating, Jane used Bonne Bell, Cover Girl, Yardley, Herbal Essence, Blue Grass and Charlie. After Jane and Tarzan married and had "Boy," they left Manhattan for a two bedroom tree house in Bronxville.

Jane, older now, uses Clinique treatment products, and recently bought Aapri and Silkience. Her makeup is mostly Lancome, although she has a yen for Aziza mascara and Max Factor's foundation. She has a half-dozen nail polishes, mostly Revlon. She cares for her hair with Sassoon, Clairol and Flex, and her body with Jean Nate, a Loofa sponge, something for cellulite, and Pretty Feet & Hands. Her fragrances range from Jontue to Opium and she plans very soon to buy or be given Anais-Anais and Missoni.

Thanks to you, of the cosmetics and fragrance industry, Jane is anything but plain. You have sold her to a fare-thee-well. She spends a beautiful $5 billion a year on cosmetics and fragrances because you've analyzed her psyche, you have your finger on her pulse, you know what makes her tick and what ticks her off. Above all, you know why she buys cosmetics.

So why haven't you done it for Tarzan?

All the average Tarzan does is scrape his whiskers away with a sharp instrument, then puts on some aftershave that dries his skin even more. The fact that aftershave burns makes it okay for it to have a little fragrance.

So why, when Jane is anything but plain, is Tarzan still primitive?

Why has the men's fragrance and cosmetics business never taken off?

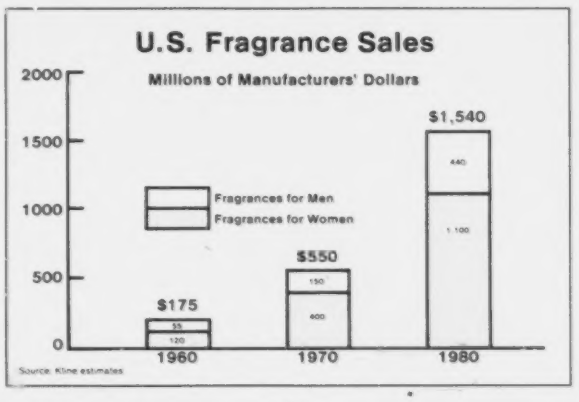
Why is Tarzan so uninterested that if somebody didn't buy fragrance and aftershave for him he'd probably just as soon go without.

The men's fragrance and cosmetics revolution was supposed to happen in the '70s. It didn't, so the experts postponed it to '80s. Now they're saying mid '80s. Will they still be predicting it in the '90s?

Will men's fragrance and cosmetics be the revolution that never comes? Is it that man's desire to look and smell beautiful can't be awakened, or is it that the industry doesn't know how to awaken it? I think that you get deep inside a woman's head and push buttons but that you speak superficially to men. Instead of looking at the male consumer, I think you look at each other. Does *every* man want to smell like a cowboy? I suspect the industry has never really studied men. The American man is treated like one huge homogeneous mass.

But society has changed men. Traditionally, man was the strong one, and woman was weak. Now she may be able to do more pushups than he. She may spend her days behind a bigger executive desk than he does. Sexually, he was the aggressor. Now she may be.

Whatever, Tarzan has changed, and today he is a whole bundle of different things. Yet, the industry is sending him fragrance and cosmetics messages from 20 years back.



Men are living longer, working longer, reentering the marriage market more often. Society has told men they should look *young* and *fit*. Yet an obvious category, hair coloring, hasn't even been made acceptable to men. Only about one-third of men think hair coloring is okay, and then, for somebody else. Only 6% of men color their hair. The men's hair coloring category is a mere $17,000,000 compared to women's at $300,000,000.

Despite intense pressures for a man to look young when he's staying on the job longer, and more youthful subordinates may be bucking for his job, 94% of men *don't* color their hair.

The men's hair coloring category is at least 25 years behind women, when Clairol first said, "Does she or doesn't she."

Women's attitudes don't help. Although they accept hair coloring for themselves, they do not for their men.

And of men who color their hair, at least a third use women's products.

If there ever was an opportunity, it's for the adroit marketer of a better formulated, better positioned, better advertised hair coloring product for men.

What about fragrances? Here a man has choices, but does he take advantage of them? He can smell like English leather, like Joe Namath, like a designer, like a cowboy, or a polo player. How does the fragrance business motivate men? Here are some typical advertising lines:

"The ultimate in men's fragrance."

"Inspired by his image. Created for yours."

"The first really new men's fragrance since Brut."

Compare these with the advertising for women's fragrance entries in the last seven or eight years:

"Charlie"—just the name conjures it all up.

"Jontue"—Sensual but not too far from innocence.

"Enjoli"—The eight hour perfume for the 24 hour woman.

Women's fragrances have become so motivating, a woman no longer waits for a man to buy it for her. Nearly half the time she buys it herself. Not men. They can wait. And so does the men's fragrance business. Seventy per cent of the time a woman makes the first time fragrance purchase for a man.

The American male is not a stereotype, and he's not a throw-back. With a little help from the cosmetics business, men's skincare and, yes, even cosmetics can become a habit.

We're not saying repackage women's products and adapt their positionings. We do say tap the needs men have as you have tapped those of women. Be original in selling men, but be as good as you are at selling women. Don't say, as one cosmetics tycoon remarking on creativity recently did, "We must be more original. We must find more small companies to copy."

Men have been reared and trained to hide their true feelings. Maybe that's why we traditionally have had such a hard time getting beneath their surface, getting at their real needs.

Remember, it's the male lion who has the mane, the male peacock with the plumage. George Washington wore a wig. Louis XIV used eyeliner. Ronald Reagan looks great on tv. Why not Tarzan? AA

Fragrances sniff (blossoming?) areas

But planning's a must

By Letitia Mulcay Makai

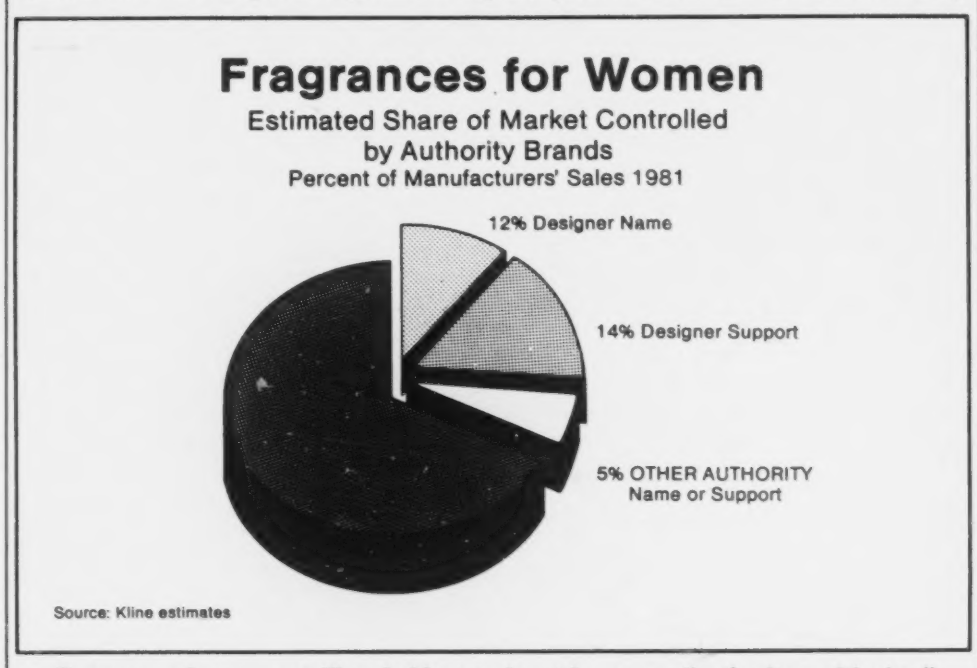
The U.S. fragrance industry, similar to many consumer goods businesses, is slowing down, and only modest gains are expected for several reasons: Slower population growth; increased pressures on dwindling disposable incomes; and basically, fragrances are already being used, in their traditional form, by a majority of men and women.

During the '60s, real growth averaged about 8% annually, double the estimated 4% per year growth during the '70s. Real growth will continue to slow in the 1980s and will likely average about 3% or less annually, excluding price increases. It is tough on any industry to adjust from rising sales to sluggish growth).

In any rapidly growing area, even mediocre marketing may be rewarded with a measure of success. By contrast, during difficult times, an almost flawless execution of product planning and introduction is necessary for only modest sales success.

Thus, unit sales for fragrances are likely to be disappointing during the 1980s unless fragrance marketers buckle down and evaluate their, and their competitors', plan, and analyze some of the changes that have taken place over the past few years that do have potential for increasing sales. Although not new, the proliferation of changes in the market is perhaps evidence of the more competitive nature of the fight for market share. Some of the strategies include: Increased sampling, extending fragrance lines to include more ancillary items, and using designer and celebrity names for new fragrances to provide "authority."

Increased sampling. Free sampling has always been important for fragrance products. In recent years, however, the abundance of new brands vying for attention has increased the need to sample. More fragrances are now available for trial in counter testers as well as in small fragrance-filled vials or scented packets that the consumer can take home and try before purchasing.



Fragrances for Women
Estimated Share of Market Controlled by Authority Brands
Percent of Manufacturers' Sales 1981
12% Designer Name
14% Designer Support
5% OTHER AUTHORITY Name or Support
Source: Kline estimates

Fragrances for women will probably get a boost from more "authority positioning."

Emphasis on ancillary items. Because several other toiletry categories are growing more rapidly than fragrances, marketers have introduced line extensions in these areas. For example, to participate in the rapidly growing treatment market, many fragrance lines have introduced scented skincare products.

Another rapidly growing market over the past two years has been liquid soap. Such fragrance lines as Cachet, English Leather and Jean Nate now include their own versions of liquid soap.

New introductions using authority support. A major trend over the past five years is the use of an outside authority, a designer or celebrity, to sponsor a fragrance. While such authorities as fashion designers have long influenced fragrance trends, more and more designers and celebrities are associated with today's new fragrances. A large part of both the women's and men's fragrance market is controlled by brands that have gone to an outside authority to develop an image. This "authority category" can be further divided into subcategories:

Designer names include fragrances named after designers, including Halston, Oscar de la Renta and Sophia.

Designer support includes fragrances that go by their own name but are given support and are marketed under a designer's name.

These include Yves Saint Laurent's Opium, Diane Von Furstenburg's Tatiana and Jean Cacharel's Anais Anais.

Technology makes scents

By Theodore J. Gage

Technology has given fragrance marketers a break. Scents that previously entailed crushing upwards of 1,000 rose petals for one ounce of very, very expensive essence can now be faithfully reproduced in a laboratory for a fraction of the cost.

And those same scents that previously nestled behind ears now can be economically produced for use in everything from after-bath colognes to room fresheners.

At the same time, marketers are embarking on new advertising waters, designing campaigns to educate American consumers to the full range of uses of scented products, thereby stimulating consumer interest in and demand for scented products.

The fragrance industry hopes the hand-in-hand effort with marketers will help pull the business out of its sales lull. If the industry has anything to say about it, scents like rose, amber and gardenia will no longer be limited to perfumes and colognes.

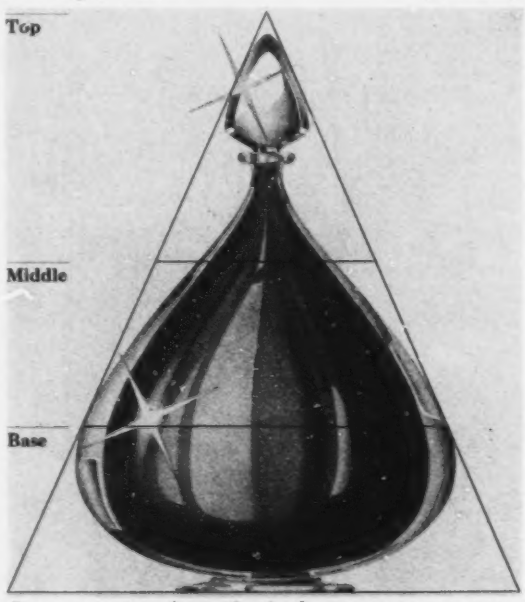
"We haven't scratched the surface in the area of using fragrance in our daily lives at home and at work," said Tom Cannariation, vp, Naarden International USA, New York. "We are encouraging marketers to do more testing of the impact of fragrance on people's emotions and attitudes. They are finding it has a much greater effect than they expected."

Officials at another fragrance producer, Ramsey, N.J.-based Proprietary Perfumes Ltd. (PPL), convinced a shampoo marketer to conduct a test using the same shampoo with different fragrances. The shampoo manufacturer discovered that consumers reacted positvely to one of the shampoos, saying it made their hair both cleaner and fresher.

But was there any other difference among the various shampoos, aside from the fragrance? Only the smell, said PPL officials. Otherwise, the product was constant.

How does a fragrance company work with a client?

PPL, for example, encourages its clients to draw up a position paper on a new product, stating desired goals—that i should have a good smell: Fresh, clean, refreshing, and so on. Then the fragrance manufacturer can recommend a few of the thousands of available scents, emphasizing those that work on an almost subconscious level to stimulate in consumers the desired sensations.



Lower costs of synthetic fragrances are enabling perfumes once confined to bottles to permeate rooms, cabinets—even furniture polish.

Expanded use of fragrance in a variety of products is beginning to take hold in a number of areas, says Jan Fox, vp-marketing for PPL. "We're seeing a greatly expanded use of fragrance for items like fragrance candles, scented drawer liners, potpourris and room fresheners.

In many cases, room fresheners are being positioned or repositioned not as coverups for odors, but as atmosphere enhancers. Consumers are being told they don't have to use a room freshener or scent just to rid a room of unwanted odor.

Scents and room fresheners can also be used to create moods—as incense has been used for centuries. But only recently, say Mr. Cannariation and Ms. Fox, have marketers in the U.S. caught on to that concept—long established in Europe—ever since rose petals, leaves and pine needles were strewn on the floors of medieval castles.

Also, the fact that fragrance essences no longer cost a fortune has encouraged their use in traditionally unlikely products, such as furniture polish.

In fact, there is a growing number of product lines—like Faberge's Brut or the Aramis line—that offer a wide range of products with complementary or similar fragrances.

Estee Lauder, for example, has introduced a line of fragrance candles and room sprays with scents, such as Youth Dew and Aliage, not traditionally used in room freshening products. Lauder also has available what may be the ultimate in a luxury cold water wash for lingerie, White Linen.

Also, because the perfume and cologne business has been flat, the ensuing intense competition has helped forge new, sometimes startling, marketing approaches, including novel fragrances with names like Opium and STASH.

The initial reaction to Yves Saint Laurent's Opium in the U.S. was negative. Now, however, it is selling well.

A more recent entry into the perfume fray is STASH, a men's cologne that purportedly smells like the blossoms of marijuana flowers and drives, says its creators, women "bananas."

Although Ms. Fox says that most fragrances and most product categories that use scents

The other authority category includes such brands as Sophia and Barbara Cartland, both which carry a celebrity's name, as well as fragrances promoted by celebrities, for example, Shulton's Cie, supported in advertising by Candice Bergen and Max Factor's Epris, promoted by Jaclyn Smith.

Providing new introductions with authority names and images is one method of reducing the risks associated with the launch of an unknown product. The necessary process of educating the consumer regarding the fragrance image is then complete even before the fragrance is on the market. By contrast, with an ordinary name, the marketer must educate the consumer with the concept and positioning of the product before the consumer can be sold.

Of the top seven suppliers of women's fragrances, four—Revlon, Squibb Corp., American Cyanamid Co., and Pfizer—have authority fragrances. Of the three remaining companies—Avon, Chesebrough-Pond's and Estee Lauder—at least two, Avon and Chesebrough-Pond's, have considered such products and are likely to introduce authority or designer-backed brands in the future.

Designer name brands controlled roughly 12% of sales of women's fragrances in 1981. Leading brands are the well-established Chanel No. 5, Oscar de la Renta for women and Halston for men. In addition, there are many smaller designer name brands including Calvin Klein, Oleg Cassini and Bill Blass.

An even larger segment of the women's market uses brands with *designer support.* Such products are sold under their own name, for example Opium, but carry the designer's signature in packaging, advertising and promotion. This allows one designer to promote several fragrances in self-competition. Designer supported brands represented roughly 14% of total sales of women's fragrances in 1981. An additional 5% of sales are from brands that are *other authority* names or support.

In total, authority brands controlled 31% of sales of women's fragrances in 1981. The balance, 69%, consisted of fragrances named after flowers, herbs and other vegetation (Blue Grass, Ginsing), places, imaginary people, emotions (Hope and Love), precious materials, loving expressions (Here's My Heart) and combinations of the above.

Over the next 10 years, more fragrance brands in the women's and men's markets will be backed by sports, music, fashion and other figures.

By 1990, possibly more than 50% of total fragrance sales will be from products with some type of authority support to help insure success. Marketers will also be evaluating various strategies to increase sampling, expand fragrance lines into new areas of growth and maintain excitement in fragrance sales.

Although the fragrance industry thrives on changing fashions and seasonal promotions that typically require a short-range outlook, future growth will require more long-range planning in order to thrive during the slow times ahead. AA

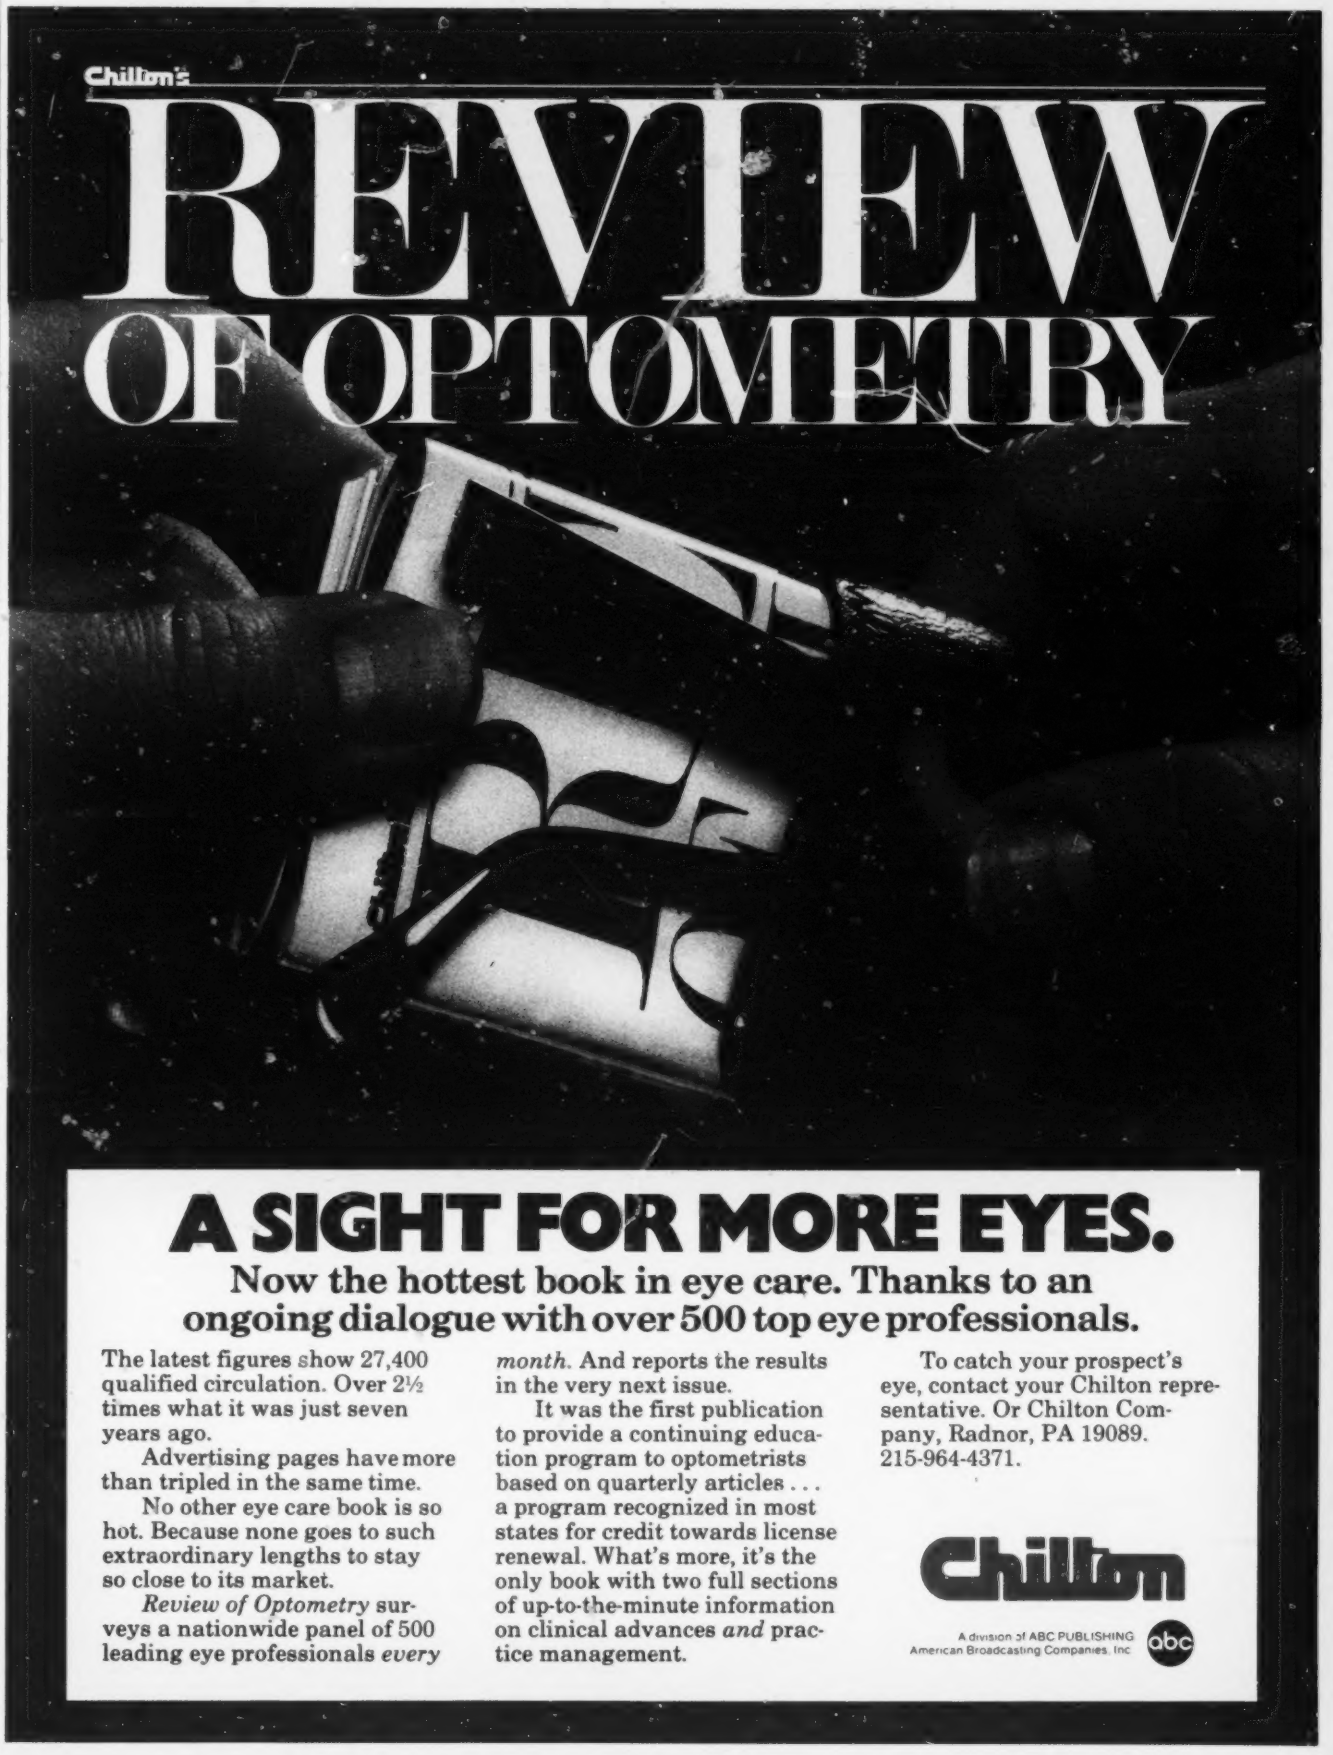
have already been exploited, the key, she says, to getting more people to try perfumes and colognes is to educate consumers about their benefits.

Mr. Cannariation agrees, saying that only a small segment of U.S. consumers "even understands the difference between eau de cologne, eau de toilette, perfume and cologne. And very few understand the various uses of such products. "Those are the consumers who will make the market grow," he says.

Both fragrance experts say a preponderance of scented products could create a dilemma for consumers, an odoriferous confusion. Picture a consumer on his way to work in the morning. His hair has a lingering scent of roses; his deodorant is sandlewood; and his perfume musk. But marketers and consumers, the fragrance experts say, will become sophisticated about when and where to use fragrance —and how much.

Synthetic scents are capable of lasting hours longer than the traditional natural varieties.And the quality of the synthetics has vastly improved in recent years.

Yet neither Ms. Fox nor Mr. Cannariation see deodorant or shampoo putting such classics as Chanel No. 5 out of business. Instead, they say, innovation will increase the use of scents. So for makers of the stuff, this could mean a profitable and fragrant future. AA



A SIGHT FOR MORE EYES.

Now the hottest book in eye care. Thanks to an ongoing dialogue with over 500 top eye professionals.

The latest figures show 27,400 qualified circulation. Over 2½ times what it was just seven years ago.

Advertising pages have more than tripled in the same time.

No other eye care book is so hot. Because none goes to such extraordinary lengths to stay so close to its market.

Review of Optometry surveys a nationwide panel of 500 leading eye professionals *every month.* And reports the results in the very next issue.

It was the first publication to provide a continuing education program to optometrists based on quarterly articles . . . a program recognized in most states for credit towards license renewal. What's more, it's the only book with two full sections of up-to-the-minute information on clinical advances *and* practice management.

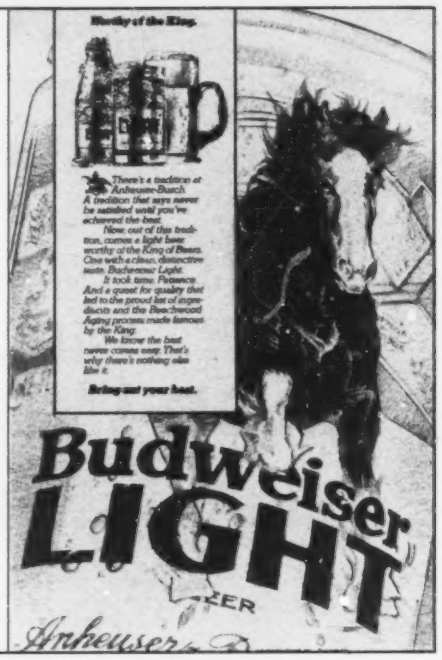
Breaking out

A lone young Clydesdale breaks through a Budweiser Light logo in print ad for national launch of the new Anheuser-Busch product (AA, Feb 15). First stage of the $35,000,000 broadcast and print push is a blending of two test campaigns, with the theme, "Bring out your best." Needham, Harper & Steers, Chicago, handles.



NAB STANDARDS FACE TRIAL

Judge tosses piggyback rule

WASHINGTON—Tv "piggyback" spots are possible again, courtesy of a federal judge who stunned the National Assn. of Broadcasters last week with an injunction voiding an 18-year-old NAB tv code standard. He also ordered a trial on other ad standards in the code.

The decision, if it's not reversed on appeal, means the networks and individual tv stations will be free to accept or reject piggybacked spots based on their own individual policies. But early reaction indicated little interest by advertisers in packing a 30-second spot with two or more separate, short-duration commercials.

Assn. of National Advertisers president Peter Allport said the piggyback rule hasn't been a significant issue for advertisers for several years. ANA members were unhappy with the rule when it was first imposed, but he said he is "more concerned with the impression that self-regulation within the industry is basically being questioned. I hope we can separate the specifics of this particular case from the over-all cause of self-regulation."

American Advertising Federation president Howard Bell, a former NAB code authority director, said he believed last week's ruling won't jeopardize self-regulation of advertising content and claims by the Council of Better Business Bureau National Advertising Division, the National Advertising Re-

Advertisers want 'major change' in tv

By JANET NEIMAN

An overwhelming majority of leading national advertisers are concerned about the amount of sex, violence and profanity on tv, and nearly half say there need to be "major changes" in tv programing, a survey conducted by ADVERTISING AGE shows.

The advertisers indicated, however, that they believe an attempt to change programing by boycotting sponsors of so-called "offensive" programing would be ineffective.

The survey, sent to chief executive officers of the 100 leading advertisers as compiled by AA last year, was conducted during February, in anticipation of last week's announcement of a boycott by the Coalition for Better Television (*see story below*). The survey drew a 28% response—considered good for such surveys—though some respondents did not answer every question. AA agreed to keep the replies anonymous.

Nearly 86% of the respondents, or 24 advertisers, said they are concerned about the amount of sex, violence and profanity on tv. And 44.4% of the respondents responded "yes" to a question asking if they thought major changes in tv programing were necessary. Of the 55.5% who said they didn't see a need for major changes, a number indicated that they thought some changes are in order.

Seven of 12 respondents who said their companies believe there is a need for major changes

(Continued on Page 67)

How major advertisers view programing, boycott

	Yes	No
Is your company concerned about the amount of sex, violence and profanity in tv programing?	85.7%	14.2%
Does your company believe there is a need for major changes in tv programing?	44.4%	55.5%
Do you believe the American public generally seeks a change in the type of tv programing offered?	29.6%	59.2%*
Do you believe enough consumers will join the boycott to make it effective?	3.7%	92.6%*

*Write-in responses of "don't know" made up 11.1% of all answers for the third question and 3.7% for the fourth question.

Network has consumer goods/services parent

Wildmon's target is NBC

By RICHARD L. GORDON

WASHINGTON—"There's not a whole lot of difference" among the three national tv networks, Coalition for Better Television chief Donald Wildmon said last week as he fingered National Broadcasting Co. and its parent RCA Corp. as the targets for his long-threatened consumer boycott campaign.

Of the three major tv nets, NBC, through its RCA connection (Hertz rental cars, Gibson Greeting Cards, Coronet carpets, C.I.T. Financial and RCA consumer electronics products), has the biggest exposure in the consumer marketplace, and the Mississippi clergyman thought this selection "might just be a little more effective."

Choosing a network also permitted the Rev. Wildmon to shoot for networkwide changes in tv programing and advertising policies, more than he could hope to achieve from putting the boycott pressure on any individual tv advertiser.

And he warned he's prepared to name other boycott targets, potentially including the other networks, if he opts to expand the boycott "within a few months."

Rev. Wildmon, in his announcement, never specifically told his followers to tune out NBC altogether. What he did specify was for boycott supporters, if asked, to participate in tv viewing surveys "but [to] refuse to watch or list any NBC pro-

JWT will quit time banking

By CHRISTY MARSHALL

NEW YORK—Badly burned by its syndication unit scandal, J. Walter Thompson U.S.A. said it will terminate the controversial practice of general "ume banking," or bartering tv programs for time that is accumulated to be used later for client commercials.

Fictitious entries in the time bank over the last four years inflated the revenues of JWT's syndication unit by $24,500,000, the company disclosed last month (AA, Feb. 8) Following discovery of the bogus accounting, Marie Luisi, senior vp-director of the syndication and spot buying units, was suspended without pay.

From now on, JWT said, it will exchange programs for time only when a specific program is requested by a specific advertising client. Otherwise, all programs in which the company has syndication rights will be sold to stations for cash only. JWT is believed to have used time banking in its program syndication for at least 10 years.

See related stories on Page 22.

JWT has defended its syndication practices recently. Its decision

ABC/Group W's SNC hits street offering 2 million

By MAURINE CHRISTOPHER

NEW YORK—Group W Satellite Communications' sales execs hit the streets this week looking for $1,000,000 charter commitments for Satellite News Channel I and promising sponsors a larger premiere circulation than Cable News Network had when it started in June, 1980.

While ABC News/Group W's entry has not yet identified its initial catv affiliates, SNC pitches to sponsors and agencies reportedly will guarantee 2,000,000 subscribers, starting June 21 on Westar IV. Group W's Teleprompter and Warner Amex will provide a sizable number of the homes.

Lloyd Werner, senior vp-sales and affiliate relations, Group W Sat, and Jack Allen, vp-ad sales, will come on strong, touting a mix of international, national, regional and local news on the only "live, 24-hour-a-day" cable news service. Mr. Allen will sell to advertisers; Mr. Werner lines up systems.

Round-the-clock news from Westinghouse, ABC News, AP, UPI, regional tv station associates and local catv systems, should they choose to produce local news, will mainly be tape and film, of course.

However, in detailing his plans, Mr. Werner stressed live anchoring, frequent updating, rewriting of stories on an hourly basis and the limited use of repeat material. As described, SNC should be less repetitious than Group W's all-news radio station, WINS, in New

Chrysler rebate offers keep on truckin'

By RALPH GRAY

BIRMINGHAM, MICH.—Detroit is casting a hopeful eye on a slim upturn in light-duty truck sales.

A revival of truck sales often precedes one in cars. Whether February sales figures are an aberration or a trend was undetermined. Chrysler Corp. truck sales rose 23% in February from a depressed year-ago level. Chevrolet truck sales were up 34%, including mediums. Ford division sales slumped 2% in anticipation of the new Ranger truck.

"I certainly hope this is a precursor to a general turn in the auto industry but we want to make sure initial indicators are the real thing," said Joseph A. Campana, general manager of Chrysler truck operations.

Both cars and trucks are being rebated by everyone now. Chrysler went a whole day between rebates before expanding and extending its offer last week.

"The dynamics of rebates seem to work very strongly, at least for Chrysler," said Jack Givens, vp of marketing. "Every time we've run them, there has been a bump in sales. I can't think gimmick programs like sweepstakes [General Motors] are the answer. You have to help people to buy a car today," he said.

Chrysler also threw in free maintenance for two years, a program Ford has been running on selected models and one that Chrysler started a couple of years ago in its "New Chrysler Guarantees."

Chrysler also is touting its rebates of $750 to $2,000 with "If you can find a better rebate, take it." It stresses in newspaper ads "Chrysler rebates are all 100% factory paid. All GM and most Ford rebates require dealer money that could be added to the price you pay." Tv echoed this in a corporate spot and in product tags.

Last week, Kenyon & Eckhardt, Chrysler's agency, created "an agency within an agency" to handle trucks. "If it were true the major reason for the fall in market penetration in trucks had been lack of concentration [at Chrysler]

(Continued on Page 66)

Chrylser media billings bypass K&E

DETROIT—After upping the rebate outflow last week, Chrysler Corp. decided to do something about the inflow and so eliminated its agency, Kenyon & Eckhardt, as the middleman in media billings.

Chrysler wants direct payment of media invoices on buys that will be made by the agency. The move was made for "better efficiency" said Doyle Lott, Chrysler director of advertising and merchandising. There won't be any delay in paying bills, he said.

But observers noted that the "float"—the money K&E kept between the time it received payment and the time it reimbursed Chrysler—would go to the client.#

Arco tips gas price warfare

By JENNIFER PENDLETON and RICHARD KREISMAN

Atlantic Richfield Co.'s plan to discontinue company credit cards is the first full-scale sign of renewed marketing life on the part of the major oil companies as they prepare for the first extended period of price competition since the oil embargos of the 1970s.

While few companies predicted a return to the glass giveaways and sweepstakes heydays of the past, Los Angeles-based Arco's announcement last week that it would stop accepting its 3,000,000 company-issued credit cards on April 15 was a signal to competitors that the nation's seventh-largest gas retailer intends to bring price back to the forefront. Arco will cut its wholesale price to distributors by nearly 3¢ and is hoping its dealers will pass along the savings.

Amoco, Exxon, Shell, Mobil, Union Oil and Standard Oil of California all said they had no plans to stop credit card programs. In fact, some are stepping up solicitations and advertising following the Arco announcement. Union, a major Arco competitor in western mar-

Advertisers air tv concerns

(Continued from Page 1)

in tv programing also said that they, personally or through their companies, have expressed to one or more networks their concerns about the types of programs on tv. Additionally, seven companies that said they do not feel the need for major changes (and were therefore not asked to respond to the question) nonetheless said they also have expressed their concerns to the networks.

The advertisers indicated they believe a boycott of sponsors of "offensive" tv shows would fail to garner enough consumer support to be effective. Twenty-five of 27 companies—or 92.5%—responding to the question believe such a boycott would be ineffective.

Only about 30% of the respondents believe the American public generally seeks a change in tv programing; more than 59% say the public seeks no change, and about 11% say they are uncertain.

Roughly 93% of the 28 companies responding to questions on buying policies indicated they have a policy regarding program content for buying tv time and program sponsorship. More than 82% said they have reviewed the existing policy or the need for a policy within the past year.

Among the 23 companies that have reviewed policy, 12 said their reviews had been spurred in whole or in part by the activities of the Coalition for Better Television and/or the National Coalition on Television Violence

None of the 28 said their policies have changed in the past year, in spite of any reviews, though three advertisers—all of which had reviewed at least in part because of the coalitions—said they now are enforcing the policy more carefully.

Asked to characterize their companies' practice for buying tv time, 11 of 25 respondents said they buy time on all types of programs but screen and review scripts of any potentially "offensive" program on which their commercials might appear. Four said they buy time on all types of programs based on cost and target audience, and three said they buy time only on programs whose content could not be questioned. All but one of the remaining respondents indicated they buy time on various types of programs but prescreen individual episodes. The responses showed that movies airing on tv are of particular concern to the advertisers and are generally prescreened.

Of the advertisers who responded to the questionnaire, 10 characterized their companies' attitude toward sex, violence and profanity in the programs they sponsor as "fairly stringent," eleven said it is "very stringent" and four considered it "lenient."

Two of those respondents who called their companies' attitude "lenient" were among those whose companies do not have policies and have not reviewed the need for policies. Two others have policies and have reviewed them during the past year. Only one of the 28 respondents believes a boycott against sponsors of "offensive" programs is constructive.

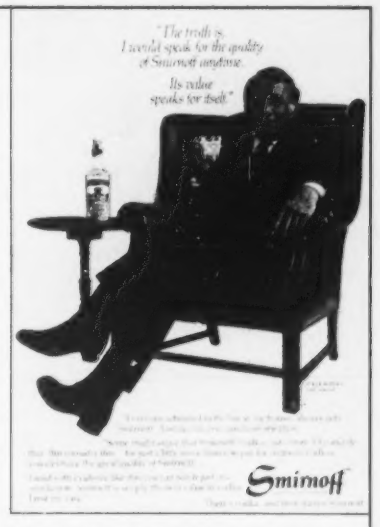
Although the survey drew a 28% response, some questions were less applicable to certain advertisers, such as beer companies, which tend to focus on sports programing.

Three advertisers said they had been notified they were targets for the boycott originally scheduled to begin March 2. None of the three had met or planned to meet with leaders of the boycott, or wanted the opportunity to do so. Only one company said it had been asked to meet with CBTV leaders. That same company, along with seven others, said it had been named a potential target for last summer's canceled boycott, and only three of the eight said they had met last year with boycott leaders to defend their policies. Commented the one advertiser who claimed to have been notified this year as well, "Several years ago [we] entered written dialog and realized [it] was useless and, in fact, damaging activity."

Two of the three companies that had been notified they might be targeted this year said there is a need for major changes in tv programing. One noted that change, but not major change, is necessary. Asked if they believe the American public generally wants changes in tv programing, one said yes, one said no and the third was not sure. Two of the three believe their attitude toward sex, violence and profanity in the shows they sponsor is fairly stringent. The third did not answer.#

Bailey to stay

Having overcome the initial shock of news accounts concerning the arrest of F. Lee Bailey for investigation of drunken driving, Heublein spirits group said it had no plans to drop this campaign in which the noted defense lawyer touts the quality and value of Smirnoff vodka. The ads have been running in magazines since Jan. 25, via Marschalk Co. Heublein said it would have no further comment until "the situation sorts itself out." Mr. Bailey was arrested in San Francisco Feb. 28 after he allegedly failed to observe a stop sign. Police later said he refused to take a sobriety test.



Judge hits NAB code

(Continued from Page 1)

view Board, and the NAB.

NBC said it is "disappointed" with the ruling. CBS and ABC declined immediate comment. Privately, network execs suggested the judge's actions "showed a gross misunderstanding of the scientific business of broadcast advertising."

That charge was restated by several agency time buyers. "You run the risk of diluting the message for your products" said one buyer assessing the prospect of multi-brand messages. And one network exec pointed out that 10-second units have been for sale for quite some time and, "nobody is standing in line to buy them."

Compton Advertising exec vp-creative director Kurt Willinger sees the ruling as "a good thing" for advertising. While he doesn't anticipate application of the ruling for such Compton clients as Procter & Gamble and Johnson & Johnson, he does envision advertising unrelated products for advertisers who have "a family of brands."

■ "There will be a feeling-out process to do it right," Mr. Willinger said. "Some slob of a client will jumble it all together. But done properly, it could work."

The code has permitted multiple-product spots, but only if the advertiser buys time in 60-second units. For shorter periods, the piggyback rule allowed more than one product to be advertised only if the sales pitches are "integrated" to appear to the viewer as a single commercial.

Equally alarming for NAB is the possibility that U.S. district court Judge Harold Greene may also strike down tv code "time standards" that set a ceiling on the minutes per hour available for commercials and station promos, and its program interruptions standard that specifies how many commercial breaks per hour are permissible and how many spots can be contained in each break. Judge Greene said these rules, while not clearly anticompetitive, are so suspect on antitrust grounds that a full trial is necessary.

The judge's rulings were a major victory for the Justice Department antitrusters, who filed charges against the code in 1979, and a chilling setback for NAB lawyers, who had argued unsuccessfully that the package of three anticlutter ad standards were not the product of any "conspiracy" among competitors, that there was no anticompetitive "intent," that there is a public interest in preventing "overcommercialization" of tv and that the FCC and other government bodies have endorsed its rules (AA, Sept. 17, '79).

Judge Greene agreed with NAB that advertising "clutter" may well be undesirable, but he said "it is most effectively dealt with not by an agreement among the broadcasters which maximizes their financial gain, but by market forces which, by penalizing those whose commercial announcements offend the public, impartially reduce all clutter on an equal basis."

He said NAB's defense of the piggyback rule as an anticlutter measure is "undermined" because "no more clutter is produced by a 30-second commercial that promotes two products than by a 60-second commercial which advertises four products. Yet under the [piggyback rule] the later is permitted but the former is forbidden."

Court appeals by NAB are likely. NAB president Vincent Wasilewski attacked the lawsuit as "an academic exercise which ignores reality and leaves the general public as the loser. The judge's decision makes absolutely no sense unless we are to assume that the public is eager to view more commercials."

■ Compliance with tv code standards is voluntary, but the networks and most major U.S. tv stations are code subscribers. NAB can bar noncomplying stations from using its code seal.

Judge Greene, in striking down the piggyback rule, or "multiple-product standard" as it's more formally known, said its effect is plainly anticompetitive. He noted that NAB's proposal to ban piggybacks in 1964 drew angry protests from Helene Curtis Industries and Alberto-Culver, among other advertisers, who contended it would harm smaller tv advertisers.

Alberto-Culver last week called the ruling "an interesting development" but said it has no integrated commercials now and would have to study the development before making any revisions.#

Wildmon's boycott target is NBC

(Continued from Page 1)

grams during the week you keep the diary." They should refuse to purchase the products or do business with RCA or any of its units, he decreed. Rev. Wildmon said results might be visible only after "six, seven, eight months."

His demands on NBC run the gamut from requiring the network to follow his ideas on the proper use of the word "God" on tv ("only in reference to the Diety") to a demand that NBC eliminate tv advertising for feminine hygiene products. In his only other attack on NBC ad policy, he said the network should halt the airing of commercials "which pander to sex as a base to sell products."

When asked what happens if the boycott flops, he replied: "If it doesn't work, we're out of business. That's it." Rev. Wildmon, citing his objections to NBC's programing, zeroed in on the treatment of drugs, alcohol, violence, sex, profanity and stereotyping of minorities, the elderly, business people, and Christians as areas where change would be needed before the boycott could be halted.

Initial reaction from NBC was confined to a terse statement that the coalition effort was an "obvious attempt at intimidation. We fully intend to resist it. We'll let the American people judge the fairness of this tactic."

By midday last Friday, NBC said, 10 phone calls and one Mailgram had been received, and all were supportive of NBC. Within NBC the view was that to get into a prolonged discussion of the issue would only play into the CBTV head's hands. As to exactly how NBC planned to "resist" the boycott, one insider said the best way is to conduct business as usual.

On ABC's "Nightline," Federal Communications Commission chairman Mark Fowler said his agency takes no position on whether tv has taste problems, but that he believes "the Reagan-oriented FCC" considers boycotts "consistent with the democratic process" and supports the concept of viewer boycotts. He contended that efforts to deal with taste through FCC action would raise the possibility of "dangerous" government censorship.

Ad industry spokesmen were predictably critical of the boycott. American Advertising Federation president Howard Bell said the AAF board had wired Rev. Wildmon its willingness to engage in "constructive dialog," but strongly opposes "the attempt of any group to impose its subjective judgments of taste and morality on the American public through boycotts of advertisers."

Assn. of National Advertisers president Peter Allport said, "The concept of holding a variety of advertisers responsible for the programing of a network simply because they have some corporate relationship makes no sense whatsoever." He said the ad and broadcasting industries already treat advertising of feminine hygiene products "with discretion," and that responsible advertisers "do not wish to exploit sex."

The American Assn. of Advertising Agencies said it "does not believe in advertiser boycotts regardless of the target."

Rev. Wildmon said he is counting on the coalition's network of 1,800 organizations, his own 150,000-circulation publication, and word of mouth to build boycott momentum once the initial wave of news coverage dies down. He said the coalition is prepared to use advertising, but would need to raise a media budget.

He called commercial tv "a national disgrace and an insult to America's intelligence and integrity," and said that RCA/NBC had been warned last year that they were a potential target if "basic" programing changes weren't made.

He said NBC refused a coalition demand that it apologize for promoting the appearance of Playboy Playmates on the "George Burns Early, Early, Early Christmas Program" last fall. Rev. Wildmon said he was protesting the "using the birthday of Jesus to promote the hedonistic philosophy of *Playboy*."

He said RCA refused to apologize for advertising in the December issue of *Playboy*, which carried an eight-page "Prayboy" parody that "mocked and ridiculed Christ and Christians." And he singled out a Feb. 6 segment on NBC's "Saturday Night Live" called "Jesus in Blue Jeans" that he said was "insulting" to Christians.#

Hallmark keeping it sweet

(Continued from Page 3)

you care enough to send the very best," a line deemed too valuable to scrap at this time.

This spot shows how a Hallmark card can take away the pain of a forced separation on one's anniversary: As the husband dejectedly packs for an untimely business trip, his wife slips into his suitcase a Hallmark, which, upon discovery in a distant city, brightens his day.

Y&R and Mr. Curran also showed off their coming spring campaign here last week, parts of which were used in Y&R's pitch for the account. To send the message that giving cards can help to maintain human rapport and contact, b&w flashbacks are used to convey the length and durability of the relationships that are shown.

What Y&R hopes such commercials will do is stimulate people to send cards on no special occasion. Christmas, Valentine's Day, Easter, Mother's and Father's Days account for half of the nation's card-sending business.

Manny Perez, Y&R senior vp-director of commercial production, who directed the commercials himself, several years ago worked on RCA's SelectaVision account, then handled by Y&R; coincidentally, Mr. Curran was with RCA at the time.

Bottom line, Hallmark hopes the sentimental touch will stimulate not just brand but also category growth.

Industrywide sales of cards, wrapping paper, ribbons, etc., reportedly near $2 billion. Hallmark's annual sales hover at about $1 billion, with the 10,000,000 greeting cards it peddles daily comprising a large part of that.#

Videotex'82 bites the big apple

New York Hilton June 28-30 1982

This event follows on from Videotex '81 with its 1500 delegates in Toronto last May, and the highly acclaimed Viewdata '80 and '81 in London with their many thousands of exhibition visitors.

The exhibition will be representative of developments around the world and the three parallel track conference will cover every aspect of this new technology, including advertising.

What advertisements work on this new medium? The results to date are encouraging although they highlight the need for a very disciplined approach to the ad-formation mix. Videotex '82 brings together leading agencies who are probing this largely uncharted territory. Their experiences and plans for the future will provide vital information for commercial operators about building revenue bases.

For conference details clip your business card to this advertisement. For exhibition information telephone immediately – a space can be reserved awaiting your written confirmation.

Appointed North American agent for Videotex '82: Meeting Systems Inc. 286 Fifth Avenue, New York, NY 10001. Phone: 212-563 1000.

Stations, nets holding line as code dropped

WASHINGTON—Tv network copy acceptance staffs and other industry self-regulation systems moved quickly last week to fill the void created by the abrupt shutdown of the television and radio code operations of the National Assn. of Broadcasters.

Initially, there appeared to be universal confidence that the lines will hold. All three tv networks stressed that their individual ad acceptance standards, which are often more comprehensive than the NAB code, remain in force. A liquor industry spokesman expressed confidence there will be no deviations from the existing industry practice of staying off tv.

NAB attributed its code shutdown to uncertainties created earlier this month when a federal district court judge ruled the code's piggyback standards illegally restrain trade, and that the time standards may also be an unreasonable barrier to competition. The shutdown goes beyond the issues raised by the court, and suspends the clearance of commercials for taste, as well as the code's provisions restricting the amount of commercial time.

Leonard S. Matthews, president of the American Assn. of Advertising Agencies, predicted that advertisers will exercise self-restraint. While some agencies may take advantage of the situation, he said, more sensible agencies will prevail, recognizing that as things are now there is already some question about what viewers remember.

The code shutdown could last a year or more as NAB appeals a federal judge's ruling (AA, March 8) that one section of its tv ad standard violates antitrust law and that the association faces trial on two others. The decision to abandon the remaining parts of the tv

Retail gains but still gloomy

By PAT SLOAN

NEW YORK—Despite a 1.6% gain nationally in retail sales during February, retailers are far from optimistic about business in the second quarter. And economists, meanwhile, are forecasting no real advance in sales until the last half of 1982.

The retail sales gain, reported by the Commerce Department, represented the biggest advance since last June, when retailers chalked up a 2.2% gain. But February's optimism appears to be fading.

"Business is tough, and though it's still too early to tell for spring, I think we're in for it," said George Hanley, vp-sales promotion director, B. Altman & Co. The consumer, the exec noted, has been difficult to read.

Observing that by the end of this month stores will have a better idea of where they stand. Mr. Hanley pinpointed tonnage categories, such as sportswear, as a potential problem area due to slow retail traffic. Another difficulty with spring business, he added, "is that we're all up against very good figures from spring, 1981, which was the best spring in six years."

Four A's sees lower profits. . .Page 82.

In this sales environment, he added, it will be interesting to watch markdowns. "If one store cracks a line or category, everybody will have to go off," Mr. Hanley said. The crucial questions, he said, are when will the break come and how much

Gordon Cooke, senior vp-sales promotion, Bloomingdale's, agreed, noting that "so far, business has not been so good. It has been a difficult season across all merchandise categories due to a slowdown in cus-

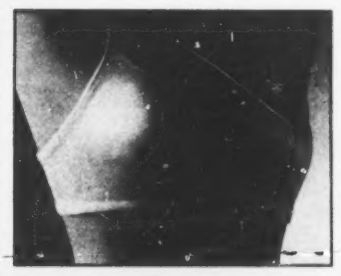
Not just for dancing

In spots for International Playtex's new Danskin bras and panties, to be introduced in August (AA, March 1), a couple plays touch football, with the woman reflecting: "When I was little I wore Danskin leotards. Now that I'm grownup I wear new Danskin bras and panties." The Ogilvy & Mather-created commercial concludes, "They're not just for dancing."



last minute news

P&G to test Head & Shoulders conditioner

CINCINNATI—P&G will test Head & Shoulders conditioner, which "instantly conditions hair and helps control dandruff, itch and flakes," in the Northwest. Priced and packaged similarly to H&S shampoo, it will be available in regular and extra-conditioning formulas. TLK handles.

Chiat/Day reportedly getting new Carnation line

LOS ANGELES—Sources say Carnation has named Chiat/Day to handle its new line of health/diet/nutrition products planned for summer introduction (AA, March 1). SSC&B continues as Carnation's main agency.

Lever repositions All liquid, drops tv support

NEW YORK—Lever Bros. is repositioning All heavy-duty liquid detergent as a value brand by dropping tv advertising and reducing the price of a case by 20%. Trade support and consumer couponing will continue. New packaging notes, "New low price!" SSC&B is the agency.

Ayer gets $6 million Chicago drive

CHICAGO—Chicago Promotion Council named N W Ayer for its new "My kind of town" ad campaign, estimated at about $6,000,000. The national drive, expected to break some time this spring (AA, Feb. 1), will include heavy tv and is expected to feature Frank Sinatra. Other finalist for the account was Lee King.

Mickelberry buys C&W

By CHRISTY MARSHALL

NEW YORK—Cunningham & Walsh, the nation's 25th-largest agency, is to be acquired on March 22 by Newcourt Corp., the communications subsidiary of Mickelberry Corp., a publicly held company previously engaged in the marketing of specialty meat products but now more active in acquiring ad agencies.

The contracts have been signed; the seal of approval is awaiting a C&W stockholders' meeting.

C&W execs have bragged over the years that, in the wake of merger mania, their agency would be one of the few independents remaining. The proposed Newcourt/Mickelberry deal will leave them an independent agency, they say. According to an internal memo: "Our shareholders will realize a generous premium on their stock, and there will be significant ongoing incentives and benefits for all our people. But of equal importance is Newcourt's firm commitment to a hands-off management policy that allows us to maintain our autonomy as a successful independent agency. They are investors, not advertising people."

Mickelberry previously acquired Nadler & Larimer and Laurence, Charles & Free, the latter agency resulting from the merger of Daniel & Charles Associates and F. William Free & Co.

The statement went on to assure C&W employes that there would be no changes in the agency's structure, management, board, nor the way the agency is run. C&W chairman Carl Nichols and president Anthony Chevins will now sit

OFF-NETS FAST SELLERS AT NATPE

Syndies try summer tests

By BOB MARICH

LAS VEGAS—As two new off-network programs appear to be the fastest selling of new barter series at the National Assn. of Television Program Executives convention here, summer air tests of pilots for other proposed fall first-run syndicated tv series shaped up as a trend.

The stampede to try out series pilots with on-air tests—usually in summer—allows tv stations to evaluate audience response before committing to a fall pickup. For their part, program distributors can amortize pilot production costs through summer telecasts, although the tryout strategy has a spotty track record in the past.

The pilot tryout ploy is another indication of how skittish the marketplace for advertiser-supported first-run syndicated series (but not cash offnetwork series) has become.

Going into NATPE, first-run series pilot activity was down, with court shows and soap opera for-

Watch out, Luvs (also P&G)

P&G's Pampers tries elastic legs at a lower price

By JENNIFER ALTER

Apparently dissatisfied with its 70% share of the $1 billion-plus disposable diaper market, Procter & Gamble Co. will test a new version of Pampers with "stay dry gathers."

Said to offer "improved containment" and "all 'round wetness protection," the Pampers with elasticized legs are going into Fort Wayne, Ind., Lima, O., and surrounding areas. Pricing, except for the convenience packages, is at parity with regular Pampers.

The Cincinnati company said it will continue to market regular Pampers because, "We anticipate that there may be some that prefer the nonelastic version of Pampers even after we introduce the new version."

Advertising support on the new Pampers is scheduled to begin April 9, via Benton & Bowles, New York. The "stay dry gathers" are expected to be highlighted.

The move is confusing to some industry observers who wonder if P&G is not cutting off its nose to spite its face by competing directly with its own, premium-price Luvs diapers with elasticized legs.

Though the company is known to treat its own brands as competition, a spokesman said Luvs are marketed for those desiring "premium fit and containment," while the elasticized Pampers are aimed at consumers desiring "improved containment at a lower cost."

Although babies probably won't

(Continued on Page 80)

More dancing

Youngsters drink A&W root beer in a new song-and-dance commercial that touts the "frosty mug sensation," which represents a return to the frosty-mug symbol. The new effort breaks March 22, via Humphrey Browning MacDougall, Boston. (See story, Page 79.)

CNN raps net news in national ad drive

By SUSAN SPILLMAN

Cable News Network this week will launch what it believes to be the first national consumer ad campaign for an advertiser-supported cable service. In the style typical of CNN boss Ted Turner, the nearly $4,000,000 campaign created by McDonald & Little, Atlanta, touts CNN's news reporting capabilities while taking potshots at the commercial networks and newspapers. Mr. Turner has predicted the downfall of both.

Aiming to substantially increase awareness before June when CNN will begin A.C. Nielsen Co. metering and rival Satellite News Channels debuts, the 24-hour news service will spend $1,000,000 for ads in *Newsweek*, *Time*, *TV Guide* and *U.S. News & World Report*. Another $700,000 will go into airport posters and tv spots on the Entertainment Sports & Programming Network. CNN will also take advantage of avails on Mr. Turner's superstation WTBS. An additional $2,000,000 has been slotted for a second print campaign.

After being refused time by all three networks, CNN turned to the three major newsweeklies, placing five different page ads in the March 22 edition of each.

While CBS has run national spots on CNN, all three networks rejected the cable network's inquiry for time, according to Paul Bissonette, vp-advertising and promotion for Turner Broadcasting. Sources report that ABC's Roone Arledge had queried CNN about buying time for "World News Tonight," but when CNN requested reciprocity the idea was dropped.

Four of CNN's five print ads tie into specific magazine departments —world, nation, people, the economy and business—plus the inside back cover. The ad facing the news magazines' national sections promotes CNN's coverage of the Air Florida crash in Washington, D.C. "CNN covered the story continuously from first report right through the night," it reads. "Unlike the other networks that just interrupted regularly scheduled programs with short reports. No wonder so many of the nation's wire services and newspapers stay tuned to CNN 24 hours a day."

CNN's exclusive footage of American advisers carrying M-16 rifles in El Salvador is boasted in the ad opposite the magazines' world sections.

And in a final stab, the back page ad reads, "No wonder recent research shows that more than 2,000,000 people now watch CNN most often for the world and national news, and rate CNN higher than ABC, NBC and CBS in its ability to provide in-depth coverage, report fast-breaking stories and present the news in an accurate manner."#

Is Lipton Equal to the test?

By JENNIFER ALTER

SKOKIE, ILL.—G.D. Searle & Co. has reached an agreement with Thomas J. Lipton Inc. whereby the food company's sales force will distribute Searle's low-calorie sweetener Equal.

The appointment comes following talks with a number of food companies, according to Marcel Durot, general manager of the consumer products unit (AA, Feb. 15). "It was a close call. We had a lot of people interested," he said.

He explained that Searle wants to get Equal into 50,000 food outlets nationally and that its field sales force of 34 probably wouldn't do the trick.

Given this situation Searle basically had three alternatives, he said. It could go with food brokers, beef up its sales force or team up with someone else. It went for the latter option.

Mr. Durot noted that while his sales force can handle distribution of Metamucil laxative because it already is an established brand, selling in a product as novel as Equal would be an entirely different proposition.

"You really need an army," he

Death. . .and life. . .in Beverly Hills publishing

By JENNIFER PENDLETON

LOS ANGELES—For a publication that made a point of avoiding bad news in its editorial pages, *Beverly Hills People* was not able to avoid controversy on the ho e front.

CALL & LISTEN TO DOUG JEFFERS' TELEPHONE VOICE-OVER TAPE. DIAL (212) L-U-C-K777

Represented by J. Michael Bloom, Ltd. (212)832-6900

After months of bitter fighting resulting in a still unresolved lawsuit between ousted *BHP* founder David Gordon and the English partners with whom he cast his lot (AA, May 25), the weekly tabloid newspaper folded.

But never fear. Southern California's most visible affluent community will not go without a "good news" newspaper for long. In fact, Beverly Hills may soon have to put up with a glut of good news: In the next few months it will have two publications in the *BHP* mode. They're called *Beverly Hills* and *Beverly Hills World*.

What *Beverly Hills* and *Beverly Hills World* intend to offer is very similar four-color digests of Beverly Hills' personalities, fashion, entertainment and social events in an upbeat format reminiscent of *BHP*. Both will be distributed free of charge to residents.

If this all sounds a little too similar, there's a reason. *BH* is the brainchild of Maxwell Aitken, one of the British businessmen who joined forces with *BHP's* Mr. Gordon last spring to form London and California Publishing.

This time, Mr. Aitken has linked with Alan Shephard, owner of ASA World Enterprises, a Hong Kong-based financial/investment company. Mr. Shephard will be *BH* publisher, while Mr. Aitken will be ceo. Its target start date is April 15.

BH will be staffed by several other ex-*BHP* editorial staffers, including editor Pat Hilton. Most of the former *BHP* sales staff will be moving to *BH* too.

While *BH* will be similar to *BHP*, Ms. Hilton said it will stress fashion and entertainment more heavily than *BHP* did. And while it won't go out of its way to print bad news, it will not refuse to run bad news as a policy as *BHP* did, she said.

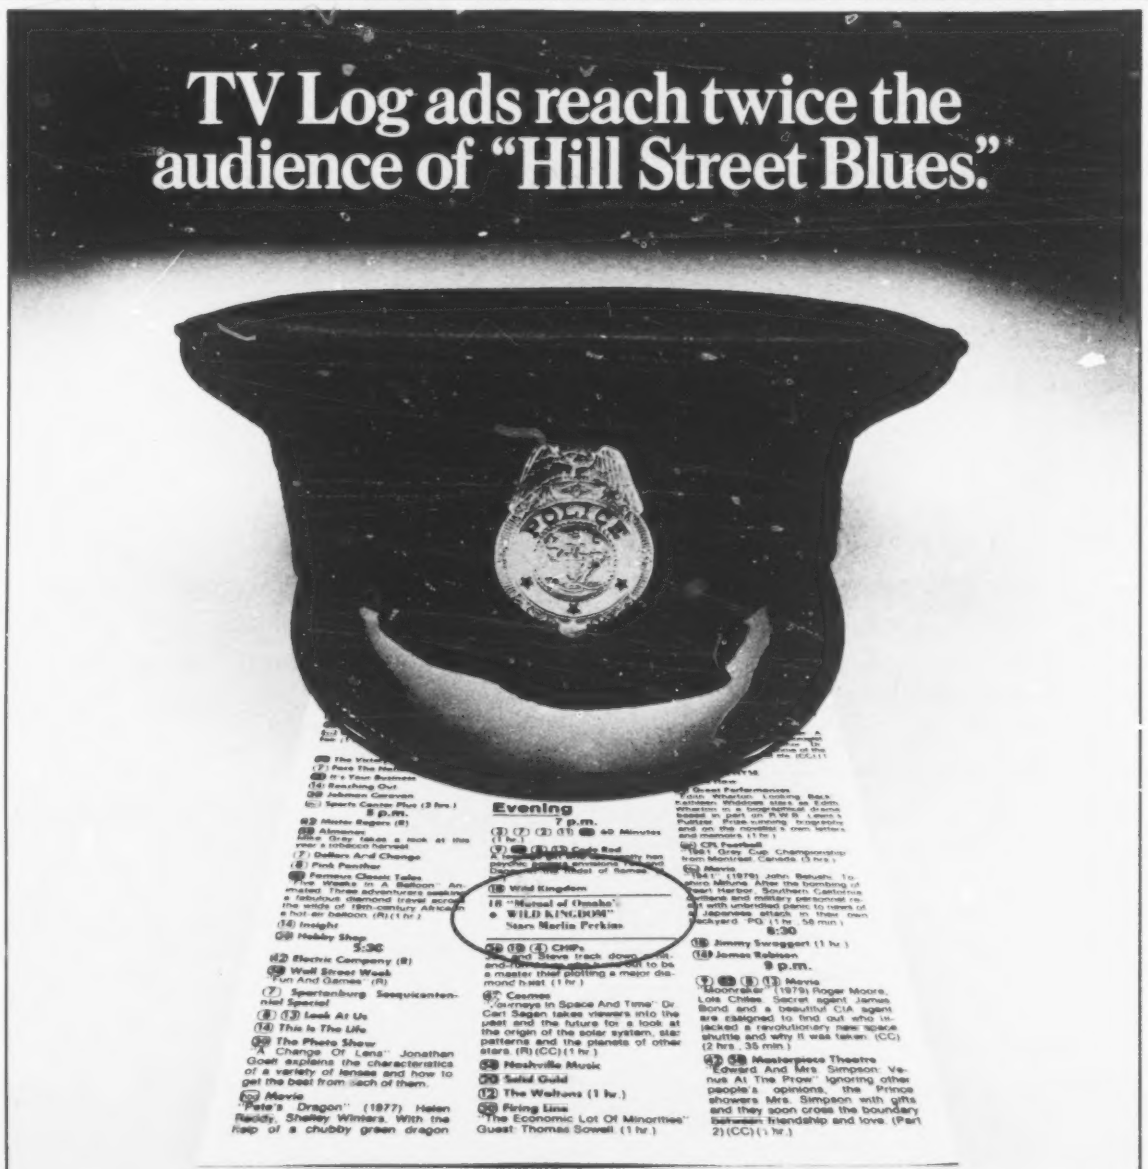
Meanwhile, *BHP* founder and former publisher Mr. Gordon is moving forward with his plans to start the rival monthly glossy magazine, *Bevery Hills World*. A mock-up for advertisers will be ready next month. Mr. Gordon hopes to have the first regular issue distributed in September.

BHW is the first venture of Gordon Communications, a new company Mr. Gordon formed in partnership with ELMS Capital Management, New York.

Along with *BHW*, Mr. Gordon intends to launch a new cable tv program in September—an electronic version of *BHW*.

Joining Mr. Gordon at *BHW* is editor Anne Gilbar, who most recently worked as a free lance writer. From *BHP's* ad staff is Suzanne Miller, who has become vp-retail advertising at *BHW*.#

TV Log ads reach twice the audience of "Hill Street Blues."



Hill Street Blues is enjoying a growing audience and increased ratings. But no TV audience can match the reach of TV Log's 61.7 million circulation. There is no more successful way to support TV advertising buys and gain product and corporate exposure with viewers and non-viewers alike, than with TV Log boldface listings.

TV Log ads appear right within the TV listings of 524 newspaper publications. That's where your ad is seen an average of 2.5 times per day.** Plus TV Log ads are available in one, all or any combination of 90 top TV markets.

So if you're involved in TV, whether it's programming or as an advertiser, let TV Log guarantee your position in the TV listings and in the marketplace.

*Based on tl a Nielsen average audience estimates for the 2 week period ending January 10, 1982.

Building TV audiences for over 25 years.

Abbondanza! Italian wines big gainers

By JOHN J. O'CONNOR

NEW YORK—While the liquor industry with few exceptions was in the doldrums last year, the top 20 imported wines, led by Riunite, racked up an impressive 16% sales gain to 29,572,000 cases in the U.S.

The good news for wine marketers and the depressing news for spirits marketers is contained in *Impact*, the alcoholic beverage newsletter. Marvin Shanken, editor-publisher, noted that while wine contributed to spirits' no-growth showing last year, the nation's economic woes and price hikes for many brands also played a hand.

But, *Impact* noted, the "generally slow economy seems to have played right into the hands of the inexpensive and popular tasting wines being imported into the U.S. from Italy." Terming the progress of the Italian wines "an awesome phenomenon," the newsletter noted that 11 of the 20 best sellers are from that country. Another point *Impact* made: The imported table wine market in this country is now more brand-dominated than at any other time in its history. In 1981, the top 10 imports accounted for 58% of the market segment's total, and the top 20 claimed a shade under 70%.

Villa Banfi U.S.A.'s vino with velocity, Riunite, again was chalking up eye-popping numbers as its 1981 case depletions soared 23% to 11,200,000 cases. It was followed in the top five by four other Italian labels: Cella (Garneau Co., importer), up 15% to 2,750,000 cases; Bolla (Garneau), up 3% to 1,750,000 cases; Folonari ("21" Brands), up 5% to 1,550,000 cases, and Zonin (F. Bonanno), up 25% to 1,500,000 cases.

Further down the list, however, are a "second tier" of Italian wines that *Impact* maintains will "insure the dominance of Italian wines in America for many years to come."

These relative top 20 newcomers include Canei, (Star Industries), which grew 38% to 900,000 cases last year; Barbella (Wellington Importers), up 52% to 500,000 cases; Bellagio (Villa Banfi), up 38% to 400,000 cases, and Principato (Palm Bay Imports), up 133% to 350,000 cases.

Impact also made note of Browne Vintners' Partager, an inexpensive French wine introduced in 1980. In its first full year of national distribution, it rolled up sales of 300,000 cases.

"Clearly," *Impact* noted, "only two countries, Italy and France, outperformed the total imported wine market in America last year. France may at long last be on the road to recovery in the U.S. On the strength of its new, broad and vig-

(Continued on Page 68)

Camera Company Clicks

"We always knew a strong print campaign was vital, along with TV," reports Meg Meyer, Olympus Camera Corporation Advertising Manager. "But it takes a strong publication to really make it click. Visually and verbally, we've found PLAYBOY a terrific tool for serious marketing. One that sharpens our focus on the upscale male we're shooting for–as perhaps no other magazine can."

Rich Griff, Vice-President and Account Supervisor at SSC&B, Olympus' ad agency, exposes the strategic thinking behind the camera company's decision to be in PLAYBOY.

ZOOMS AHEAD

"We're not just witnessing a revolution in 35mm camera sales," Griff says, "we're literally helping achieve it. Olympus is one of the leading manufacturers of automatic single-lens-reflex cameras, most of which are purchased by and for men. By running Olympus in PLAYBOY, using beautiful Cheryl Tiegs as our spokesperson, we're in an environment where both great photography and sophisticated thinking are present. It's a climate that helped catapult Olympus to the elite handful of 35mm volume sales leaders."

DOUBLE EXPOSURE

"There's another bright spot in the PLAYBOY picture," adds Olympus Management Supervisor and SSC&B Senior V.P. Bob Lehman. "PLAYBOY plays a powerful role in the idea marketplace–remember the Carter interview? In the fashion marketplace–where high style and high income go hand in hand. And in the consumer marketplace–where PLAYBOY provides expert advice on everything from cameras to cars to computers. I'm convinced, from my own experience, that PLAYBOY's impressions per issue are the highest anywhere. PLAYBOY gets more readers per issue, and every issue gets read–again and again."

A FINAL SHOT

"In the Eighties, you have to make every dollar work overtime," Griff observes. "The simple fact is, that's what PLAYBOY does for us. And can probably do for anybody with a distinctive product targeted against men, and who can back it up with distinctive ads.

"No, PLAYBOY hasn't replaced TV. But TV hasn't replaced PLAYBOY, either. Nothing has."

And that's the story of Olympus, focusing on the PLAYBOY reader–and developing an even brighter sales picture.

Liquor study

(Continued from Page 20)

orous brand development programs (*e.g.*, Partager) the category is likely to get a strong shot in the arm in 1982, 1983 and 1984. French table wines were up 32% in 1981, "one of their best years ever."

As for liquors, the newsletter pointed to the slowdown in the growth of market leader Bacardi rum (Bacardi Imports) as indicative of the industry in general. Bacardi's sales, following three years of strong growth, were up only 1% to 8,655,000 cases. Reasons given for Bacardi's slowdown were the economy, accelerated consumer switching to white wine and stepped-up competition from lower-priced rums.

Once again, the bright spot in the liquor segment was the performance of Brown-Forman's Jack Daniel's bourbon, whose sales climbed 19% to 3,770,000 cases last year.#

We are what we eat

By Channing Stowell

The Campbell Soup Co.'s "Soup is good food" campaign shows how American food consumption patterns have changed over the last decade and a half. The smart marketer these days is recognizing how important nutritional content and value have become to consumers.

And that's not even to mention the stress placed on quality and convenience.

It is this kind of change in food consumption patterns that Market Research Corp. of America's National Household Menu Census tracks and of which food industry marketers can take full advantage of.

What the most recent data show are the continuation of trends recorded earlier and the development of new patterns with which marketers have to contend.(**Editor's note:** See AA, April 29, 1979, for a report on Menu Census for the 1977-78 period.)

All of it reflects how the American consumer has changed since the post-World War II baby boom has come to make up a significant portion of the nation's household managers.

This generation—or at least large numbers of its members—brought with it not just new values and behavior regarding such issues as the role of women, family size, "self" and the importance of education. They also voiced loudly their concerns regarding food, diet and body. Supported and encouraged by an activist Washington bureaucracy, this generation helped make the public aware of—perhaps the first time—questions regarding the nutritive contents and possible harmful effects of various foods. Not only were calories' nutritional contents examined, but so was the use of chemical additives and preservatives in various foods.

During the early 1970s the U.S. food industry found itself too often the effect—not the cause—of the profound changes in attitudes and behavior involving food preparation and consumption.

Once the 1974-75 recession ended, the industry gradually began to awaken to the significant opportunities presented by these new preferences, attitudes and emerging behavior patterns concerning food. Large portions of the industry—as is true in other sectors of our economy—remain mired in the traditional, short-term thinking necessary for the brand management system to survive.

However, ever increasing numbers of marketing organizations (trade associations and cooperatives, as well as corporations) are successfully offering dynamic programs of food product communication and services to address the many segments of this marketplace.

The concern for nutritional content and value is one thing that more marketers are addressing. The Campbell campaign, for instance, surpasses in breadth "nutritional" efforts by such marketers as RJR Foods' Chun King and several yogurt makers. Their messages had heavy, cosmetic overrides—"For a beautiful body."

To see that we have all "Come a long way, baby," examine a potato chip label. The words, "contains *no* preservatives," are virtually a standard necessity, and no longer a point of competitive difference. Note the nutritionally based campaigns in the cereal market—fiber, vitamins, whole grains—culminating with Kellogg Co.'s major introduction of an entire line of completely sugarfree cereals.

At the same time, to underscore how the industry has finally seen the importance consumers now place on quality and convenience, note the successful proliferation in the freezer chest of high quality, higher priced (expensive!) entree items. Significant segments of consumers

This generation brought with it not just new values and behavior regarding such issues as the role of women, their family size, "self" and the importance of education. They also voiced loudly their concerns regarding food, diet and body.

are willing to pay for these benefits—when the product delivers. The continued expansion of away from home consumption is, of course, the strong expression of the need for convenience.

With that backdrop, let's examine the recent changes in America's food behavior from the first year of MRCA's Continuous Menu Census Service. I shall compare behavior occurring in the year ended June, 1981, with that ending June, 1978. However, given increasing prices present during the recent year, 1975 behavior, a year when our economy was in similar straits will also be used.

Where we eat

Away-from-home eating, as predicted from 1978 Menu Census information, continued dramatic growth through 1981. In the face of inflation and high unemployment, it increased by more than 10% per capita to more than 15% of all main meal consumption (up from less than 14% in 1977-78).

This growth was at the same rate across all three meals. Lunch, however, because of the increasing number of women in the labor force, had the single largest share gain—more than two points. Almost a fourth of lunches are now consumed away from home.

The rate of increase was similar in all age groups under 65; the rate for those over 65 increased only a third as quickly as the other groups.

This growth pattern did not include a defensive fast-food industry, which was engaged in a major share battle.

Portions of the food service business accounting for the growth included grocery and convenience stores and in-plant or office building establishments.

Facing competiton from meal skipping (almost 10% of meals are skipped), as well as from away-from-home consumption, the inhome meal continued to wane.

Currently, only about 70% of meals are eaten at home, down from 75% in 1973, 74% in 1975 and 72% in 1978.

Declines were measured across all meals. Less than 50% of lunches are eaten at home. Breakfast remains the meal most frequently consumed at home (over 84%), while 78% of evening meals are eaten there.

The declines also were measured across all age groups except those over 65, which stayed about the same in inhome meal consumption.

The stability of "brown bag" or carried meals—which amount to just more than 4% of total main meals—is attributable to the continued influx on women into the work force, a declining child population and unemployed (primarily) blue collar workers. Carried snacks—in addition to lunches—are becoming an ever more important factor.

How we eat

Increased inhome snacking (reversing a long term decline), coupled with a greater level (10%) skipping of main meals, indicates that we are becoming a nation of "grazers."

The declining pattern of inhome snacking over the last five years was reversed. Significant snacking gains now are occurring throughout all age groups except the 6 to 12-year-olds (already a major group of carried and away-from-home snackers).

Gains were posted across all snack occasions, morning, afternoon, evening and bedtime.

The trend toward fewer dishes served per meal continued. This is another result of the increased desire for convenience, a trend that has prevailed for more than 15 years.

Of significant interest has been the continued proliferation of microwave ovens; their market penetration is now above 20%. The growth has occurred throughout most segments of our household population. The onetime strong skews toward upper income, large family and working woman households have diminished significantly.

Dieting

For the first time in the 25-year history of the Menu Census, the proportion of the adult population on a weight loss diet declined. Less than 15% of adult males and 31% of women were on a diet to lose weight—down from 18% and 36% in 1977-78.

In the 1977-78 study, it was noted that behaviors of these dieters were beginning to match their attitudes. The decline in number perhaps is an indication that some were actually successful!

Elsewhere, publicity over the side effects of "too much" salt was showing its effects. There was a 50% increase in the percentage of population on a low sodium diet.

What we eat

The basic tastes of the American population continued to change, affected sometimes significantly by supply side factors. This flux presents real opportunities for a number of marketers—opportunities seized by only a few groups so far. Many major marketers remain defensive, reacting *to* as opposed to at least interacting *with* or even influencing their markets.

Beverages

The major story here was the continued decline in coffee consumption. The issue was not one of price; it was the failure to renew a franchise among the younger segments of the U.S. population. While decaffeinated forms continued to make major gains, total coffee consumption was off—away from home as well as inhome. The younger an adult was, the less likely he or she was to be a coffee drinker.

On the rise were both carbonated and noncarbonated beverages and juices. Tea remained unchanged. Milk consumption as a beverage continued to decline, with substantial share losses both inhome and away from home. The mammoth conversion from whole to skim/low fat forms continued despite counterproductive government price supports, paid on the basis of butter fat content.

With juice varieties other than orange on the rise, this category continued to gain share. And such varieties—far more than orange—were becoming a kind of snack food. Orange juice, despite a long advertising campaign, remained primarily "just for breakfast."

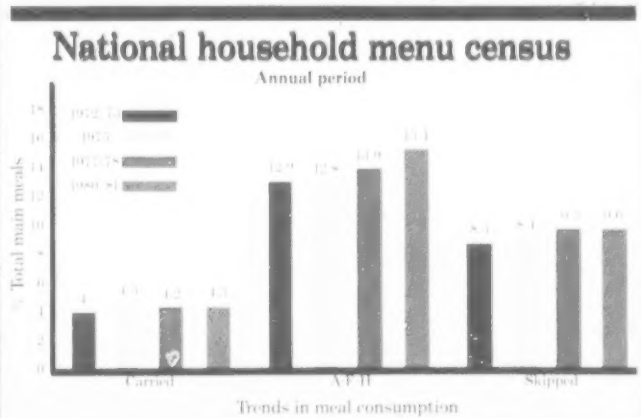
Alcoholic beverages continued a rise in away-from-home consumption. Inhome consumption was back up across virtually all product segments, reversing years of decline.

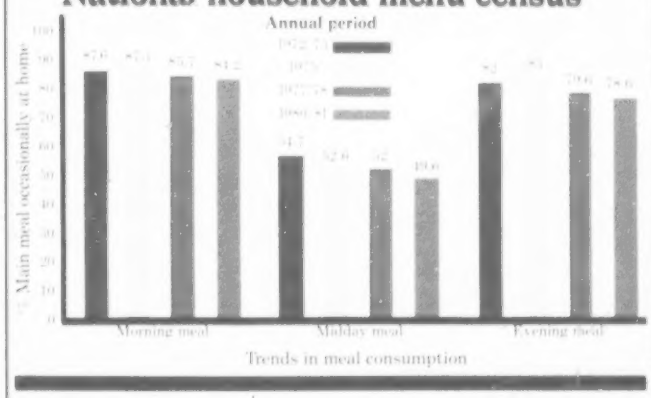
For a number of years, only wines and the cordials/liqueurs showed growth inhome. Latest findings showed both beer and liquor-based drinks are enjoying inhome increases as well.

Meat, fish, poultry

The myopia of major segments of the food industry is nowhere better exemplified than the failure of most marketers to conceive and implement coherent marketing plans to take advantage of the decline in beef consumption, a market trend forecasted long ago.

The steer's direct competitors—pork, chicken, turkey and sea food—all failed to change market share from anything other than price. Moreover, marketers of major side dishes—potatoes, pasta, vegetables—failed to anticipate how mix of foods consumed would change when beef





Channing Stowell is a vp with Market Research Corp. of America, Northbrook, Ill. His report on the 1977-78 National Household Menu Census appeared in the April 30, 1979, issue of Section 2/Grocery Marketing.

steaks and roasts were absent from the table. Many of these side dish marketers did little to even mitigate the effects, much less seize the opportunities.

The beef industry itself failed to recognize the resistance of the consumer to higher prices and was forced to "grind up" more of the steer than ever—thereby neglecting some of the positive margin effects expected from reduced herds.

Beef steaks and roasts consumed in the home fell almost 20%, ground beef usage only 4%. Rates of beef decline away from home, however, were half those of in the home. It would be easier to understand these changes once it is recognized that these declines mean a drop of more than 5 billion consumption occasions.

Pork, chicken and turkey consumption all increased substantially. Unfortunately, for both the pork and poultry industries, this expansion was to a large extent below cost. The poultry industry is an especially outstanding example of a major sector of the food business functioning—unprofitably—in almost *total* ignorance of marketing. Viewing their markets almost completely from the production vantage, they compete totally on the basis of price. Significantly, the greatest increase in chicken consumption was *carried* inhome.

Over-all, the 1980-1981 data showed the continued decline of meat, fish or poultry as end dishes and the continued growth of their use as sandwiches and ingredients to other dishes. What this shows is the continuing desire to stretch the use of flesh products economically, nutritionally and in terms of calories.

Entrees

Given the "stretching" of our use of meats, fish and poultry—a behavior long prevalent among our European, Latin and Oriental neighbors—it is not surprising that the ethnic food category remained the major area of main dish growth.

Growth pervaded all sectors of this market: Away-from-home and inhome, frozen, carry-in, canned and made-at-home. Oriental, Mexican and Italian foods were increasing, and the now "All American" pizza pie continued similar expansion across the board—all segments increasing significantly.

Traditional "hard times" dishes such as chili and baked beans enjoyed growth, as did all but the "kit" segment of pasta and rice dishes.

Sandwiches

The total sandwich market enjoyed major growth. Hamburgers reflect America's continuing desire to diminish its sweet tooth. Sandwiches with fruit spreads fell almost 10%. At the same time, the rate of decline for sandwiches with butter or margarine was twice as fast.

All the other major segments, except salami and bologna, remained strong. Bologna and salami's declines were probably influenced significantly by the high unemployment levels in mid-America, as well as the continued drop in number of children ages 6 to 12.

Sandwich consumption away from home also grew. But hamburger and cheeseburgers declined for the first time. Poultry-based sandwiches led increases, as the fast-food industry began the natural expansion of its new product line.

Sauces/condiments

The changing entree and meat consumption patterns present substantial opportunities for marketers of condiments and sauces. Catsup, mustard and barbecue sauces showed substantial gains. The ready-to-eat spaghetti sauce category's expansion has come at the expense of the homemade category—stopping the growth of the last "great bastion" of homemade sauces. Homemade gravies were declining substantially.

Side dishes

Potato consumption continued to fall, while commercial stuffing consumption took its place. Vegetables—especially canned varieties—continued to decline, but fresh produce continued to make gains.

Of note was the stabilization of the use of breads and rolls as side dishes. This was the first evidence that this industry finally discovered marketing—successfully communicating some positive values of its products. The natural, whole wheat and grain products continued their boom.

The groundswell for nutrition has begun. Markets have reached sufficient size for even the "mass marketers" to attempt to enter them .... With critical mass present, more and more products will be based on "good for you" themes.

The home-prepared products in this market (rolls, biscuits, as well as bread) also enjoyed growth, at the expense of frozen or refrigerated products. This is typical of "recession" behavior. But highlighting the additional value of convenience was that the growth in 1980-81 was from all-purpose mixes, not from flour as in 1975.

Snacks

Total "salty snacks" consumption, reflecting the inhome turnaround in snacking, was up more than 10%, reversing the long-term decline resulting from the short-lived success of processed potato chips.

Corn-based chips and popcorn each increased by about one-fourth. Pretzels, nuts and seeds also grew. Potato chips gained only slightly.

Other snack-type products continued to benefit, as well, from America's swing away from hot beverages. Snack crackers especially were major winners, gaining by more than 25%. Snack consumption of a number of other types of products not traditionally viewed as snacks—vegetables, sandwiches, salads—also increased.

Corn chip consumption away from home increased by 50% and extruded snacks by even more. Other categories were soft, with potato chips in a major decline.

Sweets

The only sweet products besides fruits that managed to register long-term slides in inhome consumption were those that feature portability and individual portions—candy, cookies, frozen novelties and brownies. The other major cold and baked sweet good markets continued to erode. Cold sweet goods declined 7%; baked, only 2%.

Scratch baking of cakes continued to remain strong, much to the chagrin of mix and ready-to-eat marketers. And the revitalized marketing of commercial pie crusts (up 16%) benefited the pie market at the expense of frozen products (22%).

Inhome sugar consumption increased, owing to a resurgence in "scratch" baking of sweet goods. Baking candies were also up more than 10%. Sugar substitutes were declining.

Away-from-home consumption increased in several baked/fried sweet goods categories—donuts, cakes and cookies—offsetting the decline in pies and resulting in a net increase in the total market. However, the rate of increase is far below that for other foods consumed away from home. Further evidence of our declining sweet tooth was the decline in consumption of cold sweet goods away from home.

Fresh and dried fruits benefited significantly from the decline of other sweet goods. Canned products, however, were off more than 10%. Grapes were up by more than 50%; raisins by more than 20%, and apples, bananas and pineapples by more than 10%. The use of fruit as an ingredient of baked goods, as well as on cereals and for "as is" consumption, continued to grow.

Fastest Growing Categories, 1980-81

Dry Grocery: Food

Category	52-Week Tonnage
Diet canned vegetables	+65.9%
Miscellaneous snacks & dips	62.5
Warehoused corn snacks	53.3
Bottled water	29.7

Summary

Placing all of these changes in longer term perspective, it is obvious that major changes in the food industry will continue. Among the most certain are:

- The groundswell for nutrition has begun. Markets have reached sufficient size for even the "mass marketers" to attempt to enter them. With critical mass marketers present, more and more products will be based on "good for you" themes. Such themes will spread rapidly into the fast-food industry. Those marketers who have in the past attempted to be "all things to all people" will find heavy resistance in regaining their credibility and also in dealing with these new segments.
- With respect to consumer tastes, red meats will continue to decline. The beef industry will not replace the volume lost. Poultry will gain, but not at a profit until that industry discovers marketing. The opportunity for seafood is immense and the focus turns more to the supply side than ever before.
- The inhome food market will continue to decline until either Alvin Toffler's "Third Wave" or the home entertainment center becomes a reality. The continued increase in the number of working women and the shift in our basic life styles underlie this trend.
- The fast-food industry will remain in a major internal "share" battle. Product lines will expand to handle the increasingly segmented tastes of the population.
- Under severe cost and margin pressure, the food industry initially will continue to be rampant with mergers and acquisitions.

Quite probably, this will lead to legislation—already mentioned in the latest session of Congress—placing much stronger limits on this activity.

- Eventually, both inhome and away-from-home food marketers will abandon their volume growth objectives and increasingly focus on the bottom line and return on investment, which is already happening to a limited degree in many industries. This will involve abandonment of unprofitable lines and even business areas.
- Now that marketers are beginning to respond to consumers and offering nutritious products that also have taste, the transformation of the U.S. food industry will need new "partnering" to clean up the morass of counterproductive regulations, price supports, grading, marketing orders and the like. Consumers, corporations, producers and bureaucrats and possibly even elected officials will begin to untangle the web that exists.

Such issues as grading of beef based on fat content, paying the dairy industry on the basis of butter fat and requiring package labeling that mainly confuses the consumer must be addressed with efforts beyond the lip service of today. So too will the much larger concerns of artificially limiting available market supplies to keep prices high.

ABC leads in reaching key male segment

By JAMES P. FORKAN

NEW YORK—In the latest available Nielsen demographic numbers, ABC and CBS were even in reaching women 18 to 49, but ABC pulled ahead among their male counterparts. Still, both those important advertiser target segments are down from last season.

According to Joel Segal, senior vp, Ted Bates & Co., all three nets showed slight slippage (3% to 4%) in luring those women, while both CBS and NBC suffered drops among the men in that age group. CBS is off about 4% among those males and NBC has plummeted 18%, with only ABC gaining, by 6%, Mr. Segal noted.

As he saw it, sports and movies are the primary "prime time grabbers" for these young men, and since the nets reduced movie nights last fall they "looked elsewhere for their movies," e.g., pay and basic cable channels. The greater availability of cable sports also is having some impact, he felt.

Based on the averages for all 90 shows broadcast during the 18 weeks ended Feb. 7, ABC and CBS tied at a 13.9 rating among women 18 to 49, while CBS led with femmes 25 to 54, its 15 rating topping ABC's 14.2. Among men 18 to 49, ABC's 13.6 easily beat CBS' 11, with ABC also topping CBS in viewing by men 25 to 54, 14.1 to 12.4. Although NBC also lost among households with $20,000-plus in income (AA, March 8), its 15.5 average was better than in the other breakouts, behind ABC's 18 rating and CBS' 16. ABC led among teens, while CBS held the over-all edge among children two to 11.

Many of these demographic top tenners were separated by only a fraction of a ratings point. "Hart to Hart" and "Hill Street Blues," for instance, were just 0.1 points apart among females 18 to 49, and the gap between "60 Minutes" and "Happy Days" was not much more than that. Similarly slight margins separated the tv news magazine from "M*A*S*H," and "Too Close for Comfort" from two other favorites among women 25 to 54.

Among males 18 to 49, "Hill Street" and two others were within 0.2 points of each other. "Hart's" lead over "M*A*S*H," and that Korean war sitcom's edge over "Three's Company," also worked out to just 0.2. Viewing by males 25 to 54 gave "Dallas" a lead over ABC's Monday films that was the same— 0.2 points— as that separating "Fall Guy" from CBS' Saturday flicks and the latter package from "M*A*S*H." Families in the $20,000-plus income chart liked the urbane Harts more than the middle-class Fonzie & Co. by that same fine margin, 0.2 points.

ABC's demographic numbers for its Sunday movies were bolstered by such titles as "Superman," "Close Encounters of the Third Kind," "Grease," "Moonraker," "Meteor," "Slap Shot," "Onion Field" and two James Bond reruns, "Diamonds Are Forever" and "Thunderball." Its Monday film packet, beginning after its Monday NFL season closed, included the made-for-tv "Fantasies" and "Victims."

NBC's Sunday flicks and CBS' Saturday features both scored well among men 25 to 54. NBC's titles included "World War III," "Will," "Young Frankenstein," "North Dallas Forty" and "Death of a Centerfold," while CBS' ranged from "Help Wanted: Male" and "Murder Is Easy" to "Revenge of the Pink Panther" and reruns of "Foul Play" and "Silver Streak."

A dozen prime timers that failed to crack into the other Nielsen demographic top 10 lists did rank highly with teens aged 12 to 17 and children in the two to 11 bracket. Three of these, CBS' "Incredible Hulk" and NBC's "Here's Boomer" and "The Flintstones," were stopgap series earlier this season, filling in due to the actors' strike. The only series to lead with both teens and children also were the longest running favorites—the 6-year-old "Laverne," five-year "Dukes," five-year "CHiPs," and the two-season "Hero."#

STC releases dish data

WASHINGTON—Satellite Television Corp., Comsat's satellite pay tv subsidiary, has released technical specifications for the 30-in. dish antenna and other home equipment that consumers will need to pick up programing it hopes to beam down from a direct broadcast satellite. The company wants to spur equipment makers to have gear ready for the marketplace if and when its programing service becomes available in the mid-1980s. Comsat's application for satellite-to-home tv service is currently pending at the Federal Communications Commission.

Polident

(Continued from Page 55)

and familiar one, there simply was not enough hammering home of the brand name," Mr. Dupont explained.

He said the creative team developed a new commercial that adheres to nine rules Mr. Dupont set forth for communicating effectively to senior citizens and, he noted, the new spot tested "better than any other Polident commercial in recent history. Since that commercial and its successors went on the air in the latter part of 1980, Polident sales have increased more dramatically than they ever have in the past."

The nine guidelines he set forth for more effective advertising to the elderly: "1. Keep the language simple. 2. Present a clear, bright, sharp picture. 3. Use action. 4. Keep word-count low and speak clearly. 5. Be single minded. 6. Avoid extraneous stimuli. 7. Relate new information to something familiar. 8. Present elderly as useful, competent, coping. 9. Use active, attractive actors, but don't go overboard."#

Principals in $1.3 billion agency

Maurice Saatchi (l.), director of Saatchi & Saatchi Co., London, and Milton Gossett, chairman-chief executive officer of Compton Advertising, New York, finalized the deal last week that created Saatchi & Saatchi Compton Worldwide, an international agency with billings of $1.3 billion.

Miller's FTC plan draws fire

WASHINGTON—Advertising associations are telling Congress they'll have to consult their members before taking a stand on Federal Trade Commission chairman James C. Miller III's plan to narrow commission powers over deceptive advertising. The chairman last week warned that "virtually any ad can be found deceptive" unless Congress intervenes.

William C. Rogal, general counsel for the American Advertising Federation, a lead spokesman for the ad groups, is telling senators the associations still prefer to focus on ending FTC's power to prosecute "unfair" advertising. "When the chairman of the Federal Trade Commission makes a proposal, however, we've got to take it seriously. We will be asking our members what they think the impact of his proposals would be."

The chairman made his pitch for narrowed authority over deceptive ads as Congress last week opened hearings on legislation to extend FTC operating authority beyond Sept. 30, when its current operating charter expires. Chairman Miller's top consumer protection specialist, Tim Muris, had previously hinted at the chairman's thinking at a recent session with AAF leaders (AA, March 1).

Chairman Miller explains bid for narrowing powers—Page 3.

FTC commissioner Michael Pertschuk, the commission's lone Democrat, immediately challenged chairman Miller's request that Congress insert language in the law to define deceptive advertising, a question the law makers have until now left to the commission and the courts.

In a bristling letter to the Senate commerce committee, commissioner Pertschuk noted that no other FTC member supports the chairman's deceptive advertising plan and that, "to the best of my

AGENCY MERGER RUSH

Future shaky for many big independents

NEW YORK—The creation of Saatchi & Saatchi Compton Worldwide, coming on the heels of the Ted Bates-William Esty deal in February, and last week's buy-out of Cunningham & Walsh by Newcourt Corp., a publicly held investment organization, is taken by industry people as new evidence that time is running out for a number of well-known agencies.

They see the merger process, already in high gear, gaining additional speed now because the remaining "eligibles"—independent agencies that have reached their maturity headed by principals who are approaching retirement age—will be tempted to "cash in their chips." For these executives to do so, they must go to the marketplace and find out what they and their agencies can fetch. And they now must make that move while there are still "eligible" agencies available. One view is that by the late '80s five to ten huge companies will dominate the business.

With this in mind, rumors continue to circulate about pending deals. One report last week—that Foote, Cone & Belding and Needham, Harper & Steers would get together in some way—was roundly denied by execs at the two agencies. Keith Reinhard, president of Needham, Harper & Steers, Chicago, in denying the merger report, said the two agencies had held meetings, but that the talks ended. Another Needham executive called the merger talks "a dead issue." One report is that NH&S chairman Paul Harper favors a sale but his younger execs oppose it. And so the report persists as the impasse is confronted.

Other rumors floating around New York recently include the oft-mentioned Wells, Rich, Greene looking for a buyer. Sources say that agency a few weeks ago approached J. Walter Thompson Co., which turned down the overture.

Sources also insist that, despite denials, McCaffrey & McCall is looking

last minute news

Jury rules P&G 'negligent' in Rely case

DENVER—A federal jury ruled that Procter & Gamble was "negligent" in its production and sale of the Rely tampon, which it called a "defective product." However, the jury awarded neither damages nor medical expenses to the 18-year-old plaintiff, Deletha Dawn Lampshire, who claimed she contracted toxic shock syndrome while using Rely. P&G was "gratified" that no damages were awarded. It declined further comment.

Decaffeinated RC spots breaking this week

ROLLING MEADOWS, ILL.—Royal Crown Cola is breaking spots in 200 markets this week for its new Decaffeinated RC cola (AA, March 8). Tv spots, including 60s, feature color and b&w images taken from a mixed bag of old stock footage, new film and still photos. Theme: "Hooray for me, I'm caffeine-free. Hooray, hooray for caffeine-free RC." O&M handles.

Sophia's $4.5 million account to Hicks & Greist

NEW YORK—Coty has named Hicks & Greist agency for its Sophia fragrance. Previous agency was Geers Gross. Spending estimated at $4,500,000. H&G will also handle Coty's new Shape 'n Shadow eye kit. Another new Coty entry is Sweet Earth facial cleanser and Sweet Earth peelaway. No agency has been named.

Pharmaceutical entree with product compatibility

P&G-Norwich: Perfect fit

By JENNIFER ALTER

While Procter & Gamble Co.'s proposed acquisition of Morton-Norwich's $216,000,000 pharmaceutical business will give the massive consumer goods marketer its coveted entree into the healthcare field, it also provides a snug fit between current brands marketed by both companies and ties in closely with other P&G product plans.

The move, says veteran P&G watcher Hercules Segalas, senior vp and analyst at Drexel Burnham Lambert, is "a match made in heaven. It's a definite plus. . .in the long term it might end up having even more significance" than the 1957 Charmin acquisition, he said, adding that it puts P&G in a whole new category whose growth is greater than most of the markets it now is in.

The acquisition of the Norwich-Eaton Pharmaceuticals division will not be finalized for at least a month. The cost to P&G is $371,000,000 in cash.

P&G's interest in the $247 billion healthcare industry has been no secret. The company has been dabbling in it openly since 1973, when it introduced Osteoscan, a drug to diagnose bone disease. In 1978 it brought out two more: Didronel, for Paget's disease of the bone, and Topicycline, a topical treatment for acne. It also markets Boundary, a line of surgical drapes and gowns, through its Buckeye Cellulose division. The three prescription products are marketed by the company's Special Products Group, which also handles professional programs for such consumer products as Crest.

The company's interest in entering the industry via acquisition has been known for several years, but became visible last year when it reportedly looked at Merrell National Laboratories, which Richardson-Merrell (now Richardson-Vicks) ultimately sold to Dow Chemical.

In addition to providing P&G with a means to follow its tradi-

WILL NESTLE FACE NEW P&G ENTRY?

Taster's Choice wakens

By GAY JERVEY

WHITE PLAINS, N.Y.—In a move to invigorate its U.S. coffee operations, Nestle is giving its flagship Taster's Choice freeze-dried coffee darker color, richer flavor, new labeling and a new advertising thrust.

According to Nestle, the new "fresh brewed" Taster's Choice comes by way of a "major breakthrough" in the freeze-dried process. The company says the process now extracts and locks in more coffee flavor and aroma from a new high-quality blend of beans, allowing for "first cup fresh taste."

A Nestle spokeswoman says the reformulation has been in the works for several years. The improvement also extends to TC decaffeinated. The reformulated products currently are being sold in to the trade, and will be on retail shelves next month.

Sources suggest that this launch is coming just in time to steal some thunder from Procter & Gamble, which is fully expected to go national with a High Point vacuum grind product sometime soon. High Point instant already is national. In addition, P&G is said to be working on a new, highly aromatic coffee product that reportedly is being handled by Tatham-Laird & Kudner, Chicago. P&G had no comment.

"We are putting a major effort behind what we consider to be the No. 1 product relaunch of the year," said William I. Savel, group vp, Nestle's coffee/tea division. Beyond that, Nestle is only saying that the ad campaign principally involves tv commercials that are a dramatic departure from traditional coffee advertising. The agency is Leo Burnett USA, Chicago, which held on to the brand when it lost Nescafe during a major shakeup of the Nestle agency roster late last spring. At that time, Nestle wanted to do away with any two possibly competing brands being handled by the same agency.

■ The Taster's Choice relaunch comes at a time when the company is clearly rethinking, if not reshaping, its U.S. operations. In an earlier interview, Nestle S.A. chairman Pierre Liotard-Vogt conceded they could perform better (AA, June 30, '80). Apparently to that end, Nestle just over a year ago installed Jean Caste as president. His marching orders were clear: Streamline the company; reinstitute premium profitability by

Detroit media giveback try fades

By RALPH GRAY and JAY McCORMICK

DETROIT—Auto marketers are winning some and losing some in their attempts to enlist agencies and media in efforts to pare ad costs.

General Motors' ad agencies were straggling into line on its request last month that its suppliers give back 2% of the money it spends with them (AA, Feb. 8). But GM's efforts to have the media kick in the 2% discount seem to be fading away. Ford Motor Co.'s agencies also are delivering in one way or another on the 2% giveback it subsequently requested.

However, Chrysler Corp. is running into some problems with its request to the media to be billed directly for advertising, rather than sending the money to its agency, Kenyon & Eckhardt (AA, March 8). Chrysler said eight or ten media companies had asked for clarification of the request, but were now "reasonably happy" with the arrangement. The company said it planned to meet today with executives of the *Wall Street Journal* to discuss the Dow Jones & Co. unit's objections.

Chrysler's letter to publishers outlining its plan said Chrysler was taking the step to "increase operating efficiency." It said K&E will continue to verify invoices but checks should be directed to Chrysler c/o K&E.

That would give Chrysler immediate access to the "float"—the amount of cash K&E keeps between getting it from Chrysler and paying it out. That float can work the other way, with the agency paying the bills and waiting for its money from the client.

Observers also noted that the direct payment would make Chrysler solely responsible for payment, shifting that obligation from K&E. Given the shaky financial situation of the auto industry, this could be an added worry to some media execs.

The *Wall Street Journal's* objection apparently is that the arrangement breaks down normal agency payment channels. Although *WSJ* execs weren't immediately available for comment, it was learned that Dow Jones wouldn't pay Chrysler the 15% agency commission that ordinarily would go to K&E. K&E's arrangement with Chrysler is on a fee basis with a "floor" for a minimum payment.

The American Assn. of Advertising Agencies said it has no opinion on the matter. "It's something the individual medium, agency and client have to decide for themselves," said Harry Paster, exec vp. The Four A's is under a 1956 Justice Department consent order which forbids the group from getting into pricing.

Whatever Chrysler's problems, the matter of givebacks has not had much of an impact on media. GM included agencies and media in its request. Chevrolet division agency Campbell-Ewald immediately dashed off a check to GM, and other agencies, some muttering

DeLorean debt told

By GAY JERVEY

NEW YORK—In addition to its other troubles, DeLorean Motor Co. owes $500,000 to an outside media buying service engaged by DeLorean's agency, Avrett, Free & Fischer, according to agency president Keith Fischer.

This fact surfaced last week amid rumors that the beleaguered car company had been paying off its agency with cars, which Mr. Fischer flatly denied.

Mr. Fischer explained that the media buying service, which he did not identify, has been making timely payments to the publications in which it bought space, and the checks have cleared. It was later learned that the service involved is Timebuying Services Inc.

However, he said, "Our agency feels morally bound to see that this third party gets paid, and as a result are in nearly daily negotiations with DeLorean to try to work out some kind of solution. At various times they have floated the idea of payment either through stock options or cars, but we're not interested.

"Anyway, the Bank of America has a temporary restraining order freezing the cars, so it would be very difficult for John DeLorean to pay people with them."

Industry revenues outpace GNP in '81

By ROBERT J. COEN
Senior vp, McCann-Erickson

The U.S. advertising industry performed well in 1981, with revenues rising by 12.6% in a year when gross national product rose by 11.3%. The economy and the ad industry posted real gains over the 1980 recession year performance despite the reappearance of an economic downturn in the closing months of the year. The glow of the recent good performance can confuse the true outlook for 1982 if the trends in 1981 are not fully understood.

A year ago the economic consensus was for a flat, sluggish pace during the first half of 1981 with a gradual upturn during the summer and a strongly developing recovery moving into 1982. The experts were looking for about 1% growth in real GNP and about a 9% rate for inflation, but the good news at that time was the rather unanimous expectation that interest rates would continue to move up at the end of the year. Against this scenario we expected sluggish advertising activity in the first half of the year, but growing bullishness toward the end of the year and into 1982.

Despite the universal failure to accurately read the economic trends, advertising in 1981 turned out to be close to the year-ago expectations. Probably because so much of the advertising outlays come from marketers of nondurables and services that are not highly influenced by interest rates in the short term, and because anticipation of future business conditions often has more of an impact on short-term ad demand than the actual conditions.

National advertising, the activity of the large companies that do business across the country, turned out to be much stronger than we had projected a year ago. Intense competition for market share fueled large ad increases in a number of categories, offsetting some of the economy-related cuts. However, not all media enjoyed the same pluses and minuses last year.

In 1981, the economy grew by more than 11%, inflation was above 9% and most major media enjoyed advertising revenue gains in the neighborhood of 12% to 14%, but network tv spending increased by only 8.7%. During the first nine months, 1981 network tv revenues rose only 5.3% during months when even a moderating consumer price index was up more than 10% over comparable months in 1980. The post-election year buyer resistance, and the previous fall's strike-related problems, made the '80-'81 tv season one of the worst since 1971 when tobacco advertising was discontinued. However, the new 1981-82 season began in October with heavy buying demand at significantly higher prices. In the fourth-calendar quarter of 1981, the networks posted an exceptional gain of more than 16% over the year-ago quarter. Nevertheless, the full-year revenue gain of 8.7% in 1981 was the weakest of all for a major medium. However, the pickup in the last calendar quarter of 1981 should continue throughout most of this year with the outlook for 1982 now appearing very good for the networks.

A year ago I was even less optimistic about the national advertiser's demand for spot tv and spot radio than I had been for the network tv sector. The traditional

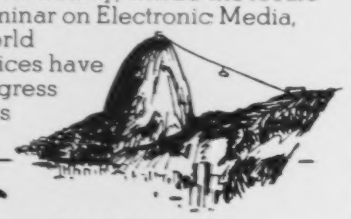
May 24 to 28

The world of advertising has an appointment in Brazil.

Come and join us at the 28th IAA World Advertising Congress. For the first time in history some of the world's most important advertising and business executives from different countries and representing leading multinational companies will assemble to debate on the contribution of advertising to the progress of human beings, through discussions on the theme:
Advertising – What it can do for you...
Agencies will illustrate HOW, advertisers WHY, the media WHERE and finally, from the government's viewpoint, as a strong supporter of commercial communications, WHERE advertising best fulfills its role of orientating consumers in their right of choice.

The Congress site will be São Paulo, a modern metropolis with more than 12 million inhabitants and a cosmopolitan flavor, ready to welcome you.
Rio de Janeiro, the second city in size, but foremost in its breathtaking natural beauty, will be the locale of the International Seminar on Electronic Media, which precedes the world conference. Special prices have been guaranted to congress participants at first class hotels in both cities.



For Media

The following guest speakers have confirmed their participation:

Olivier Chevrillon, president of the famous French weekly magazine Le Point (France)

Gustavo Cisneros, president of Diego Cisneros, Venezuela's largest media organization

Julio de Mesquita Neto, director-president of influent Brazilian newspaper "O Estado de S. Paulo" (Brazil)

For Agencies
Jacques Douce, president of EUROCOM, Europe's largest advertising chain (France)
Eulalio Ferrer, president of Publicidad Ferrer, Mexican leading advertising agency (Mexico)
Edward Ney, president of Young & Rubicam, the largest American advertising agency (USA)
Hideharu Tamaru, president of Dentsu Inc., world's largest advertising complex (Japan)

For Advertisers
Seisi Kato, chairman of Toyota Motor Sales Co. (Japan)
Camillo Pagano, director-general of Nestlé Company world wide. (Switzerland)
James F. Waters Jr., group vice-president of General Motors Corporation. (USA)

For Government
Antonio Delfim Netto, Brazil's minister of Planning.

Bring your personal contribution to the final conclusions of the biggest and most important world conference in the history of advertising.
Come to Brazil and attend the 28th IAA World Advertising Congress.

Registration fees:
US$ 500.00 - IAA members
US$ 550.00 - non-members
US$ 150.00 - companion

'Times' gets a reprieve

LONDON—All the rumors about *The Times*, which have been flying around London like confetti these last weeks, have been put to rest—at least for the time being.

Editor Harold Evans' resignation last week (AA, March 15) may be followed by other editorial staff resignations, but the future of the paper now has been declared safe by owner Rupert Murdoch as a result of his winning 430 job cuts from unions. Stories that managing director Gerald Long was also to leave have been firmly denied.

But after several weeks of fierce bargaining with unions and the editorial side, where does the paper stand now?

The positioning of *The Times* in the marketplace has always been a problem. The *Daily Telegraph* appeals to the conservative country and suburban dweller, *The Guardian* to the trendy, more left-wing and intellectual audience. The *Daily Express* and *Daily Mail* appeal to the more right-wing, tabloid reader. *The Times* has traditionally been the establishment paper, but successive owners have found it hard to make any money out of the establishment.

So far, the goal of increasing circulation without diluting the newspaper's profile just has not happened. Figures within the industry show that *The Times* is suffering particularly from a falloff in classified ads, down 14% for the last six months of 1981. Ads in special supplements were down even more—32%. The only good news is that display advertising is up nearly 19%, partly due to Mr. Murdoch's new policy of selling *The Times* and *Sunday Times* jointly.

■ Since the takeover by Mr. Murdoch, advertising sales staff levels have been cut by combining display advertising sales on both the daily and more successful Sunday papers. But that strategy may be backfiring as well. "At *The Times*, we operated a hard rate-card policy," said one ex-salesman on the paper. "We only offered discounts for high-volume spenders. But the initial thing that the current sales director did was to sell the two papers together and discounts on *The Times* as a loss leader for the *Sunday Times*. Credibility then went down the tube."

Ad agency confidence in the paper may also have been affected by Mr. Murdoch's ending promotional advertising for copy and ad sales and other forms of marketing the papers. The consensus is that Mr. Murdoch's policy of holding down the cover price has been as responsible for the circulation increases as any editorial changes. Circulation has grown from 279,059 during the last six months of 1980 to 297,787 in the same 1981 period. But it is still a long way from competitors like *The Guardian*, with 400,000 circulation.

Industry gains in '81

(Continued from Page 10)

post-election year slump in broadcast activity has usually been greater in the spot sector. But the opposite occurred in 1981 when spot tv and radio gains were outpacing those of the television networks. The greater flexibility of spot, plus last season's network uncertainties, was one of the reasons for the surprisingly good 1981 results. The spot sector also enjoyed the benefits of tactical rebate promotions and a surge in selected market advertising for deregulated airline rates and schedules. The reports continue to be quite glowing for the opening months of this year, but darkness could set in as the year unfolds. It will become continuously more difficult for stations to post impressive monthly spot gains in comparison with the strong year-ago performance.

National advertisers increased their budgets for newspapers more than for any other medium. However, these record gains appear to be heavily influenced by exceptionally large rate increases in many markets. Total national newspaper ad linage rose significantly in most markets, and in nearly every instance the gains were mainly due to much heavier cigaret and airline activity. But the majority of the revenue gains was still due to much higher rates. The effects of higher rates imposed in the middle of 1981 and at the beginning of this year should contribute to revenue gains in 1982, but it is unlikely that national linage will rise again over last year's record level.

Magazine advertising volume had been moving upward each year since 1976, but in 1980 ad page growth plateaued. In the first half of 1981 pages declined for a number of major publications but then turned upward again in the second half of the year. For the year as a whole, modest page growth plus higher rates combined for a fairly respectable 12.2% gain in revenue. The recently improving trend is expected to continue past the first quarter of the year and then flatten out or even dip before moving back upward again, but higher rates should result in at least moderate revenue gains in 1982.

In 1981 we continued to see an expansion in the number of pieces of advertising material distributed through the mails despite the fact that it was a post-election year. Postal rates rose in the fourth quarter to compound the expenditure growth. In 1982 the postal rates will be at a significantly higher level, but the mail advertisers are not expected to cut back on volume. Despite the present economic uncertainties, the mail advertising trend is likely to continue to move upward and revenue growth should register another substantial gain in 1982.

Trend information for the outdoor medium, farm publications and business publications is still incomplete. However, the available data suggest that many national advertisers cut their outdoor schedules in 1980 and then restored most of the cuts in 1981; and although the rate of gain is relatively large it is mainly so because of the poor 1980 performance. The farm publication data suggest a somewhat similar performance—fairly good revenue gains in 1981 after a weak year in 1980. On the other hand, page volume for most business publications has been sluggish for several years, and most of the revenue growth in the last few years has been due to higher advertising rates.

Most U.S. media enjoyed excellent revenue gains from national advertisers in 1981. Except for network television, most media budgets were up in the neighborhood of 12% to 14% last year. In 1982 network television gains will certainly be better than they were in 1981, but most other media will undoubtedly experience a lower rate of ad growth than they enjoyed last year.

Local advertisers, who are mainly retailers, were much more changeable in their advertising practices than the large national advertisers. Local advertising responded quickly to the expansions and contractions in the economy and the surprising volatility in interest rates during 1981.

Newspaper advertising linage was off in most months for the largest newspaper classifications. In the first quarter of the year the comparison with year-ago levels was down significantly for both retail display and classified linage. In the spring and early summer, linage gains were enjoyed in many markets as a result of the improved first-quarter business condition, but for most months in most markets retail and classified linage was off. The 1981 gains in local newspaper advertising revenue came nearly entirely from higher ad rates. In 1982 there may be some linage pickup late in the year but higher rates will be the source of most of the increases in 1982 local newspaper budgets. If local advertising linage holds up fairly well, it will still be a pretty good year, but if the economy continues to slump and if consumers do not respond to the tax cut until late in the year, the revenue gains my be quite modest.

Local radio and television advertising budgets are relatively much smaller than the newspaper budgets but they are also subject to changing local business conditions. In 1981 local broadcast budgets held up quite well on average, but in some markets ad demand was soft throughout the year and there were indications of additional weakness in the closing months of 1981. Nevertheless, first-quarter reports have not been bad and it now appears possible that local broadcast ad spending could turn out to be quite good this year if the retail sales outlook starts improving by midyear.

Total local advertising expenditures rose by 11.8% in 1981 for a relatively good year after a mediocre performance in 1980. National budgets, in total, continued to outpace the economy in 1981 by about the same margin as registered in 1980. In summary, 1981 turned out to be a good year for the U.S. advertising industry. Total U.S. expenditures rose by 12.6% to a record level of $61,320,000,000 in 1981.

The glowing results from 1981 and the good reports for the opening months of this year suggest that national ad gains could well outpace the economy again if the anticipation of a midyear business turnaround doesn't disappear. On the other hand, local ad spending will continue to drift downward in line with the economy until consumer expenditures actually turn upward again.

■ The effects of a harsh winter, a high rate of unemployment and falling profits have suddenly made the business outlook much darker than it was a few months ago. We can still see the glow from the rear of the tunnel but the outlook is gradually getting darker. Therefore, we can be sure that an upturn is in the making. The only problem is the uncertainty about how soon the upturn will get firmly under way and when the light at the end of the tunnel will be clearly in evidence.

I expect advertising to continue to match or outpace the economic trends and I foresee the possibility of renewed expansion in advertising activity later this year. The timing of the business turnaround is critical. If the recovery arrives soon, we could have a relatively good year for the advertising industry, with ad expenditures rising 10% or better. If sluggishness continues and the recovery is delayed, the revenue gains might fall a percentage point or two below 10%. We expect advertising expenditures to rise by $5 billion to $7 billion this year. At best, 1982 could be a very good year, and at the least, it will probably be a year of fair revenue gains for most media. Some of the glow from the rear of the tunnel will last until the delayed business recovery finally arrives.#

The McCann-Erickson National advertising indexes are key barometers of the month-to-month changes in national advertising spending. These indexes are seasonally adjusted measures of the monthly advertising revenues for the major national media. The general index is a composite of net tv, spot tv, magazines and newspaper expenditures by national advertisers and they are all based on the year 1967, which is equal to 100.

In 1980 there was a severe recession in the first quarter of the year, and by midyear the major media indexes were falling. During 1981 the indexes for all four of these media moved well above their 1980 troughs. However, the pattern of upturn differed for each medium.

Network tv's fourth-quarter 1981 revenues were far above year-ago levels when the actors' strike caused its index to plummet. However, after seasonal adjustment for the usual fall upturn, the index is now just starting to develop a noticeable upward turn.

The spot tv and magazine media showed comparatively steady upturn paths throughout the whole year with few, if any, significant "breaks" in their trend lines. On the other hand, the trend line for expenditures in newspapers spurted strongly upward during the first five months of 1981. Then the index path commenced a continuous downward slide for the remainder of the year, yet still remaining significantly above year-ago levels.

Cigaret ad spending dips in '80

By ROBERT RAISSMAN

NEW YORK—Advertising expenditures by the nation's six leading cigaret marketers in 1980 was nearly on the same level as 1979 spending. Total 1980 ad spending was $546,503,300, down $7,852,300 from the '79 investment of $554,355,600.

The top 20 brands accounted for 565.91 billion of the 711.79 total units sold in 1980, according to sales data compiled by John C. Maxwell Jr. of Lehman Bros. Kuhn Loeb research.

Growth in the 100mm and female segments of the market was reflected in the jump in sales of Philip Morris' Virginia Slims, which moved from the 17th spot in 1979 to the 12th position in 1980. PM spent $21,038,600 in advertising the smoke compared with 1979 expenditures of $13,100,600.

Last year, R.J. Reynolds responded to the Virginia Slims surge when it went to market with More Lights 100s, a low-tar, beige-colored cigaret targeted exclusively at women.

Philip Morris' Merit and RJR's Vantage brands continued their dominance in the low-tar segment. Merit kept a lead of 2 billion units over Vantage on spending of $55,600,200. RJR poured $59,622,200 in advertising for Vantage in a bid to close the gap.

■ Vantage spending was second only to RJR's Salem ($68,977,900), which overtook Kool in 1980. Salem moved up a notch—from fourth to third—with sales of 53.9 billion units. At an advertising cost per carton of 50.5¢, Vantage was the least efficient brand, while Parliament was the most efficient with an ad cost per carton of 5.2¢.

However, this figure is not always an accurate indicator of brand performance. Despite the high cost in advertising per carton, Vantage's sales grew by 2.85 billion units. A stronger case for efficiency can be made for No. 1-ranked Marlboro and its 8.9¢-per carton average on a sales base of 109.6 billion units in 1980.

Lorillard's Newport gained share by moving up five positions to 13 on the top 20 with sales of 11.6 billion units on spending of $9,204,600 in 1980, replacing American Tobacco's Tareyton, which dropped three notches on sales of 10.8 billion units.#

Costs of cigaret advertising: 1980-1978

Per carton and per million cigarets sold

Copyright 1982 by Crain Communications Inc.

The top 20 cigaret brands based on 1980 sales, related to the amount invested for each brand in general magazines, newspapers (including Sunday sections), network tv, spot tv, network radio, spot radio and outdoor. These figures are not offered as complete records of expenditures; tobacco companies spend large sums for point-of-purchase materials and in other non-measured media. Sales figures for this study were taken from the 1980 Maxwell Report. Advertising expenditures were compiled from figures supplied by the following industry sources: Broadcast Advertisers Reports; Institute of Outdoor Advertising; Leading National Advertisers; Radio Advertising Bureau, and Television Bureau of Advertising. Data on newspaper advertising expenditures were supplied by sources in the tobacco industry.

Rank	1980	1979	1978

Mrs. Paul's ads positive in time of trouble

By GAY JERVEY

In the midst of declining frozen seafood consumption, widespread rebellion among its Arthur Treacher's fast-food franchisees and speculation that it might soon be bought, Mrs. Paul's Kitchens increased its media budget by over 40% and is mounting its most aggressive campaign in recent years.

Increased competition in a category Mrs. Paul's at one time dominated apparently called for a refurbished brand name. On a 52-week basis, Mrs. Paul's still leads the frozen fish business with a 27% dollar volume share (food store withdrawal figures), but General Mills' Gorton's of Gloucester follows with some 20%. And, as admitted by Philip Cohen, vp-management supervisor on Mrs. Paul's at Scali, McCabe, Sloves, Gorton's of Gloucester's "fisherman" campaign has been making a fair share of noise. "Individual local brands and private labels figure heavily in this market and account for about one-third of volume," Mr. Cohen said. General Host's Van de Kamp has about 7%.

In its new campaign, which he describes as broad enough to encompass all the company's products, Mrs. Paul's Kitchens for the first time emphasizes the word "kitchen," with all its mom, home and hearth implications. In another first, the ads also show the company's namesake, Mrs. Paul, lending hands-on, tender, loving care to her prepared dishes. Tag lined "It doesn't leave my kitchen unless it tastes good," the campaign attempts to personify Mrs. Paul, her kitchen and her company as the very essence of quality.

The privately held Philadelphia producer of frozen grocery products broke a pool of three tv commercials, five radio spots and six separate newspaper coupon drops (offering up to 25¢-off) last month. Commercials aimed at females 25 to 54 on daytime and prime time network programs, in addition to spot tv, should achieve an average of 150 gross rating points over a two months, he estimated.

Later this spring, print ads dishing up a casserole recipe will run in *Better Homes and Gardens, Family Circle, Good Housekeeping, McCall's, Parents, Southern Living* and *TV Guide*. Estimates are the campaign will exceed $10,000,000.

Very few franchisees at Arthur Treacher's, the troubled fast-food fish chain that Mrs. Paul's bought two years ago from Orange-co, seem to think the name Mrs. Paul's stands for quality.

Indeed, Mrs. Paul's new campaign comes at a time when many of these franchisees are declaring a civil war of sorts on their owner. Some 90% of the company's 400 franchisees reportedly are refusing to pay what amounts to $14,000,000 in royalties because, they say, Mrs. Paul's is skimping on the quality of fish it provides.

■ Some have even gone so far as to refuse to use the Arthur Treacher's name on their doors; others have reverted to peddling the likes of tacos, hamburgers and chicken.

In turn, Arthur Treacher's has sued about 30 of its franchisees. The company's suit demands royalty payments for illegal use of the Treacher's trademark.

For their part, the franchisees are suing the parent company for breach of contract, in that Treacher's stymied their fish supply and did not live up to other sides of the bargain.

For his part, Scali's Mr. Cohen says he doubts that Mrs. Paul's Arthur Treacher's troubles have impacted on the company's grocery store sales. "I don't think most consumers are aware of the problem or for that matter much care. And it has absolutely nothing to do with this new ad campaign."

There is speculation that the Pillsbury Co., Minneapolis, might like to buy Mrs. Paul's (AA, March 1). "I certainly don't know anything for sure," says Bill Knobler, an analyst with Sanford Bernstein, New York, "but it would not be an illogical buy. Pillsbury has shown interest in the frozen food business, but Pillsbury is always on the lookout," he added.#

Newspaper ads set record in '81

New York—Expenditures for newspaper advertising in 1981 hit a record total of $17.4 billion, a 12.3% increase over 1980, according to preliminary figures from the Newspaper Advertising Bureau.

National advertising continued to be the fastest-growing category, increasing 17% to $2.75 billion. Retail advertising grew 12.4% to $9.63 billion, while classified increased 9.5% to $5.062 billion.

For December, total newspaper advertising increased 12.3% to $1.58 billion, with retailing showing a 14.6% gain to $989,200,000, national increasing 13% to $198,600,000 and classified rising 6.6% to $392,500,000.

* * *

In December, the cosmetics, makeup and manicure products category showed the biggest gain, increasing 590% to $202,600, followed by sporting and leisure time equipment, which gained 233% to $1,318,000.

Among those categories showing decreases were cold, cough and sinus remedies, which dropped 57% to $13,000, as well as soft drinks, which dropped 22% to $313,700. Over-all, 10 categories showed increases, five categories showed decreases and one category remained unchanged.

Advertising got you down? You'd make a great retailer

New York—Advertising, sales promotion and marketing execs may be better suited for similar jobs in retailing than those candidates with retail experience, according to a study conducted by the F.L. Taylor & Co.

According to Fran Taylor, president of the executive search and management consultant company, the behavioral profile of ad agency execs meshes neatly with the behavioral organization of stores, particularly if execs work or have ever worked in small ad agencies but have no retail experience per se.

"Retail environments are entrepreneurial, high pressured but not too glamorous and highly reactive," Ms. Taylor said. "A retail person needs to be flexible and have high energy since retailing demands six to seven-day weeks," she added.

Agency people have the operating style and behavior that fits that type of organization, she concluded, and direct mail agency people may be the best suited for retail direct marketing efforts which have yet to become highly competitive.

And at a time when the retail industry as a whole is facing a need to eliminate waste from within while battling problems of inflation, recession and competition from without, the benefits of re-examining hiring attitudes can result in cost-effectiveness throughout the entire internal structure of a retailing enterprise, Mr. Taylor said.#

By JOHN J. O'CONNOR

NEW YORK—Despite unfavorable exchange rates affecting overseas operations, the U.S. advertising industry had another record year as 1981 gross income rose to just over $5 billion on worldwide billings of $35.2 billion, according to the 38th compilation of agency data by ADVERTISING AGE.

The 1981 gross income tally represented a 7.3% advance over the $4.67 billion reported by 791 agencies taking part in the survey a year ago. In achieving the income record, the 822 reporting agencies saw combined billings climb 10.1% over the previous year's mark of $31.8 billion.

For the second straight year, privately held Young & Rubicam remained the gross income king. The giant agency, whose extensive list of subsidiaries includes Marsteller Inc., posted gross income of $353,000,000 in 1981 on billings of $2.35 billion. A year earlier, the Y&R family of agencies had gross income of $340,800,000 on billings of $2.27 billion.

J. Walter Thompson Co., a unit of JWT Group, a holding company formed in June, 1980, easily took the second spot with gross income last year of $331,700,000 on billings of $2.21 billion. Included in JWT's figures are the billings and gross income of two subsidiaries—World Wide Agency and Brouillard Communications. They do not include the results of five other units operating under the parent holding company. Those units are Hill & Knowlton; the Euro-Advertising network; Lord, Geller, Federico, Einstein; Survival Anglia, and Simmons Marketing Reseach Bureau. JWT Group's total gross income last year was $403,900,000 on revenues of $2,694,000,000.

Several years ago following formation of the Interpublic Group which, like JWT, is publicly held, ADVERTISING AGE decided that inasmuch as a holding company is not an agency, it should be excluded as such in any ranking of agencies.

The formation of the JWT Group holding company led to JWT's yielding its longtime posi-

From loser to a big winner

Ally & Gargano wins lots of accounts and Agency of Year Award

By CHRISTY MARSHALL

Within a matter of months in 1978, Ally & Gargano lost 56% of its billings. A midsize agency that could ill afford major account losses, Ally & Gargano was stripped of Fiat (a $10,000,000 account) and Pan American World Airways ($13,000,000) and resigned the IBM Corp. office products account ($5,000,000), "one, two, three, bingo," recalls Carl Ally, the agency's chairman.

The fact that the agency would win six Clios in mid-1978, including two for its widely acclaimed work for the abruptly departed Pan Am, was marginal consolation. Ally & Gargano was still struggling to recover from a 27% decline in billings in 1976 followed by a flat 1977. With the 1978 losses, recovery was no longer the issue: Survival was.

The stubbornly independent Mr. Ally even began thinking the unthinkable; his agency would have to be acquired by somebody else in order to stay alive. Ally & Gargano began merger talks with Doyle Dane Bernbach. "It was an epic bad time," Mr. Ally recalls.

The story has a happy ending. Ally & Gargano persisted in creating some of the freshest, most arresting—and effective—advertising the industry has seen, enabling it to draw new clients as well as substantial increases in ad budgets from existing clients. Last year, the agency broke free of its decade-long $40,000,000-to-$50,000,000 billings rut with a 61% surge in billings to $82,884,000. This year, the agency will celebrate its 20th birthday wearing ADVERTISING AGE's banner as 1981 Agency of the Year.

Remember that speed talker in the Federal Express commercial—"I-know-it's-perfect-Peter-that's-why-I-picked-Pittsburgh-Pittsburgh's-perfect-Peter-may-I-call-you-Pete?" He's an Ally & Gargano creation. So are those massive and imposing Japanese sumo wrestlers who smile like kids for a Pentax picture.

So is the dumpy Dunkin' Donuts baker awakened by his alarm while it's still dark outside: "Gotta make the donuts. Gotta make the donuts... I bet the guys who make supermarket donuts are still in bed." There is also the Timberland boot that, unlike several other water-filled boots shown before it, contains nary a drop after standing in a stream of water.

And Ally & Gargano created that split-screen spot of the long-distance caller showing side-by-side tallies on a rapidly clicking Bell meter and one for client MCI Communications registering half as much.

In these and other tv commercials, clearly the agency's forte, Ally & Gargano demonstrates a remarkable knack for grabbing the viewer's attention with compelling, often humorous, visuals and copy while delivering a clear, powerful selling point.

Federal Express packages get there when they "absolutely, positively" have to. Dunkin' Donuts donuts are always fresher than the supermarket variety. Timberland boots *are* waterproof. In camera-crazy Japan, Pentax is the best seller. MCI phone calls will save you considerable money.

All this results from what sounds like a simple philosophy. Amil Gargano, one of the founders and now the agency's chief executive officer, explains it this way:

"Say something that matters to people and do it in an intelligent fashion, with a high degree of taste and style." Mr. Ally, now 59, explains it even more concisely. "Tell the truth and make it interesting," he says.

In the last 12 months, Ally & Gargano has added as clients Canadair, Scandanavian Airlines, Time Inc., Bank of New York, financial-services franchiser Comprehensive Accounting and designer Calvin Klein, who chose Ally & Gargano after poring over advertising awards books.

The agency expects its billings to top $100,000,000 by a comfortable margin this year, which would represent a doubling of billings in two years and a tripling since 1979. Tv commercials account for about 60% of total billings. Ally & Gargano's gross income of $11,750,000 last year ranked it 50th among the 820 agencies reporting to AD AGE. In 1980, it ranked No. 68.

What is today a 155-person agency based in Manhattan's garment district began as Carl Ally Inc. in 1962. It was formed by Messrs. Ally and Gargano and James Durfee, who had worked together at Campbell-Ewald in Detroit and then as that agency's new-business team in New York, before a 1959 falling out with Campbell-Ewald caused the trio to split up. Mr. Ally spent time on the beach before going to the fledgling, pioneering creative shop of Papert, Koenig, Lois in 1960 as a vp-management supervisor. Mr. Gargano became an art director at Benton &

Federal Express winged to sales of $415,000,000 on the strength of Ally & Gargano-created ads.

Ally wins

(Continued from Page 1)

Bowles, and Mr. Durfee joined J. Walter Thompson Co. as group head on the Pan Am account.

After Mr. Ally was approached about handling advertising for Volvo a few years later, the trio regrouped, pooling their combined $8,000 in savings to form a new agency, with only the $300,000 Volvo account as a sure client. "We had nothing to lose and everything to gain," Mr. Gargano, now 50, recalls. "I don't think there was an ounce of fear in us."

Money was short and the hours

Side-by-side comparison was Ally's solution for MCI.

long in the early days. When the work had to go on into the night, Messrs. Ally and Durfee wouldn't go home to Connecticut but would stay at Mr. Gargano's bachelor apartment. Vladimir Horowitz, the pianist, was a neighbor; the struggling advertising entrepreneurs worked on their craft to the strains of Mr. Horowitz practicing his.

The agency's first campaign for Volvo was a precursor of things to come. It was the famous "the 11-year-car" campaign, which pitted Volvo against Detroit's compacts rather than other imports, stressing that Volvos would outlast the owner's loan-payment book. The work attracted attention and new business, some of it sent by other agencies. Bill Bernbach referred Horn & Hardart to Carl Ally. Howard Gossage, founder of San Francisco's legendary Freeman, Mander & Gossage, sent along Old Bushmills Irish Whisky and Salada Tea. After four years in business, the agency's billings topped $15,000,000.

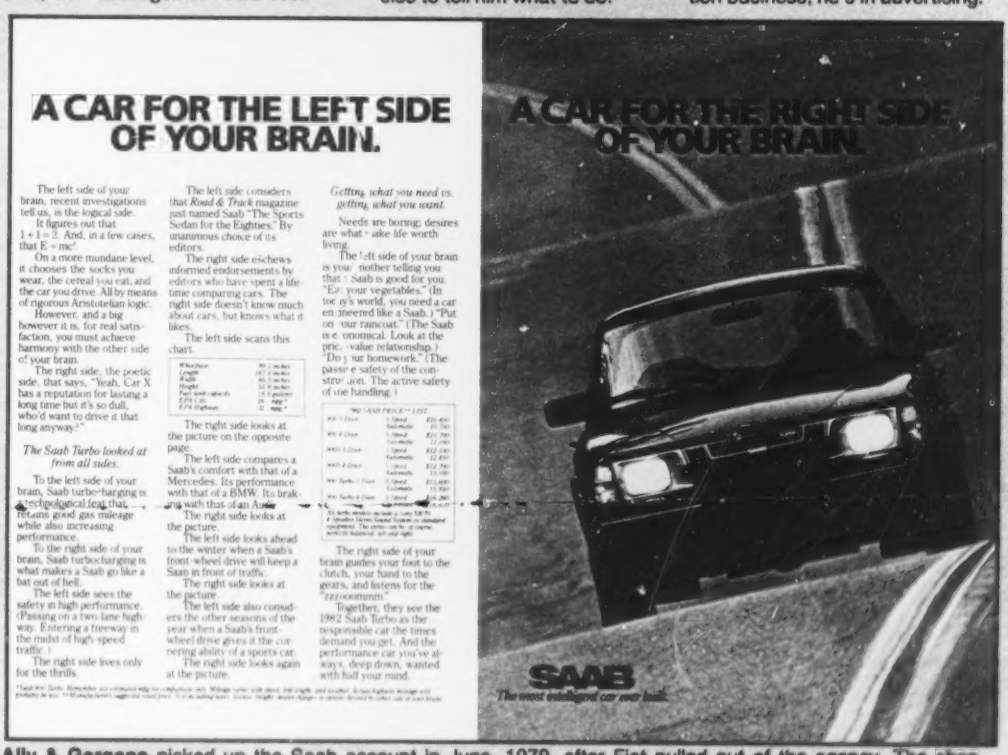
The agency was thriving despite its founders' admitted minimal interest in the money side of advertising. "We didn't like the advertising business, but we did like advertising," Mr. Ally says. To this day, Mr. Ally doesn't hesitate to lash out against such things as the excessive wooing of clients. "Amil [Gargano] and me, we're working

admen, not accountants or personality boys," he said a few years ago. "I still won't play the contact game, entertain some double-breasted polyester fellow at a sleek bar or act the court fool or some client's clown. I think good work ought to be able to win business."

But the new agency began learning that "good work" may not be enough to succeed financially in advertising. In 1967, Volvo left. Hertz walked out in 1973. Then, in 1978, a new ceo took over at Fiat Motors of North America and moved the Fiat account from Ally & Gargano, the new name adopted by the agency at the beginning of that year. Also in 1978, Mr. Durfee, one of the three founders, left to pursue his art interests. (He returned to advertising a few months ago.) Then came the real stunner: Pan Am, for whom Ally & Gargano had created the classic "Discover your Heritage" theme, bolted, ending its eight-year relationship with Mr. Ally on less than 48 hours notice. As was the case at Fiat, new management had been

Carl Ally doesn't need anyone else to tell him what to do.

Amil Gargano's not in the acquisition business, he's in advertising.



Ally & Gargano picked up the Saab account in June, 1979, after Fiat pulled out of the agency. The shop remains fiercely independent and produces some of the freshest and most effective advertising in the industry.

installed at Pan Am; while other agencies expressed outrage at the company's "new broom" treatment of Ally & Gargano, the agency grimly went about firing 20% of its staff, and Mr. Ally, who had rejected dozens of overtures in the past, opened merger talks with DDB.

That was his only wavering from his long-standing beliefs, however. He continued to insist that the agency not accept "schlock" accounts, even in desperation, and that the agency not around." Thus in late 1978, still mired in its billings woes, Ally & Gargano resigned the IBM account, after handling it for nearly 12 years, when it found it couldn't please a new IBM marketing director.

And with the merger with DDB all but approved, Mr. Ally once again baffled the industry by taking on the Pentax account, thereby killing the proposed merger because of the potential conflict with DDB's Polaroid account. Today, however, Mr. Ally marks the Pen-

only major loss in the last three-and-a-half years—just a few weeks ago, and for a familiar reason: The client installed a new marketing vp. "We have never been fired by the person who hired us," Mr. Ally says.

Out of the agency's dark and introspective days of 1978 came some painful changes for the better. One was a reorganization at the top, with Mr. Ally turning over the ceo gavel to his longtime friend and partner, Mr. Gargano. "I had been chief executive officer for 16 tax account as the starting point of Ally & Gargano's revival. "We started picking up business and we got arrogant enough to continue," he says.

Ironically, the agency lost the $13,000,000 Pentax account—its years," Mr. Ally says. "I was getting frazzled and worn out on the job . . . . I don't think I was reacting as well as I should." The agency also called in Edward G. Gallagher, former Norman, Craig & Kummel executive who was then heading his own business, to add strength to the account side; Mr. Gallagher is now the agency's chief operating officer.

"We matured," Mr. Gargano says. Throughout its difficulties, the agency continued to produce stellar award-winning work for its clients, such as Federal Express, which signed on with Ally & Gargano in 1974. The company had at that time 19 Falcon jets, 45 vans and an idea hatched for an economics paper by Yale student Fred Smith, now Federal Express chairman. The idea was to provide dependable overnight delivery of small packages.

Ally & Gargano and Federal Express developed a three-stage advertising strategy. They first announced the new service, then ran hard-hitting comparative spots showing Federal's superiority vs 30-year-old industry leader Emery Express. Finally, once having supplanted Emery as the leader, ads attempted to expand the market to new users. The last stage featured the recent commercials introducing such memorable characters as Spleen, the hyper fast-talking executive, Spritzer (who cowers under his desk when the package that he failed to send by Federal doesn't arrive on time) and Bingham, who did *not* send "the blueprints to Birmingham for the big meeting tomorrow."

The advertising has scored extraordinarily high on standard measurement tests and unquestionably has contributed substantially to the results at Federal: The company that delivered 18 packages its first night of business now delivers an average of 120,000 a night, had revenues of $413,000,000 by 1980 and was cited by *Fortune* as one of the top 10 business successes of the 1970s.

At Dunkin' Donuts, sales have increased 15% annually, setting records each year, since Ally & Gargano began handling the account. MCI, which began offering

tion as the nation's largest advertising agency in the 1980 survey. However, in view of larger agencies' aggressive policies of growth through acquisition (*e.g.*, Ted Bates & Co.'s purchase of William Esty Co. this year), AA will review its policy toward holding companies. If holding companies receive recognition, next year's ranking—barring a blockbuster acquisition by Y&R—would put Interpublic and JWT Nos. 1 and 2 in gross income, respectively.

Interpublic, whose units include Campbell-Ewald Worldwide, McCann-Erickson Worldwide and SSC&B, reported 1981 gross income of $493,642,000 on billings of $3.29 billion. Its 1980 gross income was $475,627,000 on billings of $3.11 billion. Interpublic's gross income for last year included only 49% of the gross income and billings of SSC&B:Lintas; the remaining 51% is held by Unilever.

Y&R and JWT were followed in top 10 worldwide gross income by Ogilvy & Mather ($286,500,000); McCann-Erickson ($277,254,000); Ted Bates & Co. ($236,700,000); BBDO Int'l ($205,200,000); Leo Burnett Co. ($198,600,000); SSC&B ($176,400,000); Foote, Cone & Belding ($170,300,000), and Doyle Dane Bernbach ($165,000,000).

In terms of U.S. income, Y&R continued as the leader, with domestic gross income of $222,800,000. Its major domestic rivals were O&M, gross income of $157,500,000; Thompson ($153,700,000); Bates (129,100,000); BBDO ($127,900,000); Burnett ($124,000,000); Foote, Cone & Belding ($116,500,000); DDB ($115,000,000); Grey ($94,400,000), and Benton & Bowles ($81,400,000).

The top 10 agencies in gross income outside the U.S. last year: McCann-Erickson ($201,497,000); JWT ($178,000,000); SSC&B ($134,700,000); Y&R ($130,200,000); O&M ($129,000,000); Bates ($107,600,000); D'Arcy-MacManus Masius ($90,100,000); BBDO ($77,300,000); Burnett ($74,600,000), and Compton ($59,100,000).

In compiling the figures, AA estimated a number of agencies' gross income and billings because they failed to comply with an equity formula covering foreign billings that was included in the 1981 questionnaire. The formula calls for gross income and billings claimed for foreign affiliates to be based on the parent company's percentage of ownership. For example, if a 25% interest were held in an overseas agency, only 25% could be claimed; if 75% were owned, only 75% could be claimed.

This is the sixth year AA has ranked agencies by gross income rather than billings. The change was made because most agencies recognize gross income as a more meaningful measure of size and performance.

While the 822 agencies in this year's survey are ranked by gross income, their billings appear in their respective profiles.

A total of 47 agencies that returned questionnaires were excluded in this report for a variety of reasons, including incomplete information, obviously erroneous income figures and late response. The U.S. Postal Service also returned more than 100 unopened questionnaires that were stamped "addressee unknown."#

Profiles of U.S. agencies: Their income, billings, new accounts, total employes

A comprehensive view of the agency business is presented in the following section, in which Advertising Age presents profiles of U.S. agencies, including their gross income in 1981 and 1980, billings, accounts won and lost, media mix, top personnel and total number of employes. The agency profiles are arranged alphabetically by income groups. The first group, beginning on this page, is composed of 44 agencies with gross income of more than $15,000,000.

N W Ayer Inc.

Gross Income	1981	1980
U.S.	$68,400,000	$68,050,000
International	9,180,000	7,970,000
Total	$77,580,000	$76,020,000

N W Ayer Inc., New York, reported gross income of $77,580,000 in 1981 on billings of $532,255,000. Its gross income in 1980 was $76,020,000 on billings of $497,150,000.

The agency's 1981 U.S. volume of $470,635,000 included $368,935,000 in media, $59,300,000 in materials and services and $42,400,000 in capitalized fees. Its 1980 U.S. volume of $443,745,000 included $346,745,000 in media, $58,200,000 in materials and services and $38,800,000 in capitalized fees.

The agency's overseas volume was $61,620,000 in 1981 and $53,405,000 in 1980. It did not break down those figures.

In 1981, the agency gained the following accounts: Chemical Bank, billing $3,000,000; Harlequin Enterprises Ltd.; Howard Johnson Co.; Lehn & Fink; National Council on Alcoholism; Intl. John Deere (for Europe, Africa, Middle East); Sears, Roebuck & Co.; Kawasaki Trading Co.; Orthopaedic Hospital; The Plant Network; TEMCOR, and Yamaha Electronics Corp. USA.

It lost Pan American World Airways, billing $35,000,000, to Doyle Dane Bernbach (which this year lost it to Wells, Rich, Greene); Formfit Rogers, billing $11,000,000 to Marschalk; Nestle, billing over $5,000,000; First Interstate Bank of Oregon, and Jet Propulsion Laboratory.

Overseas, it gained over 60 accounts, while losing 20.

Billings breakdown: Newspapers 9.6%, magazines 24.9%, supplements 0.7%, radio 9%, network tv 38.4%, spot tv 8%, cable tv 0.1%, outdoor 0.7%, business papers 7.1%, Yellow Pages 1.5%.

The agency has 1,213 employes in five U.S. offices; a year ago it had 1,346 employes in five U.S. offices.

Top execs: Louis T. Hagopian, chairman-ceo; Jerry J. Siano, vice-chairman; exec vps—Robert L. Catlin, Patrick S. Cunningham, George H. Eversman, Jerry N. Jordan, Thomas F. Maxey, David H. Means, Stuart Minton Jr., Theodore M. Regan Jr., Dominick F. Rossi, Bartine A. Stoner Jr., V. Hugh Wells, Robert P. Zabel and J.R. Rathbone, deputy chairman, Charles Barker Group Ltd.

Phone: (212) 708-5000.

BBDO International

Gross Income	1981	1980
U.S.	$127,850,000*	$105,300,000*
International	77,300,000*	69,500,000*
Total	$205,150,000*	$175,000,000*

*AA Estimate

BBDO International, New York, is estimated by Advertising Age to have had gross income of $205,150,000 in 1981 on billings of $1,400,000,000. Its gross income in 1980 was estimated at $175,600,000 on billings of $1,305,000,000.

The agency's 1981 U.S. volume of $858,800,000 included $588,200,000 in media, $155,100,000 in materials and services and $115,500,000 in capitalized fees. Its 1980 U.S. volume of $806,400,000 included $564,400,000 in media, $140,000,000 in materials and services and $102,000,000 in capitalized fees.

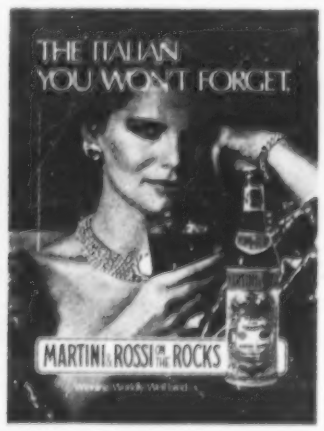
BBDO is estimated to have had overseas volume of $541,000,000 in 1981 and $498,600,000 in 1980. Included in BBDO's figures are the billings and gross income of Blair Advertising; GM DuBois Corp.; BDA/BBDO; Caravetta Allen Kimbrough/BBDO; Frank J. Corbett Inc.; Doremus & Co.; Franklin Spier Inc.; Lavey/Wolff/Swift; Quinn & Johnson, and RC Studios Inc. Not included in the agency's results are the billings and gross income of Tracy-Locke, Dallas, an agency BBDO acquired last month.

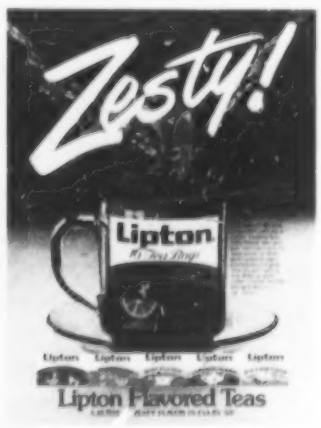
In 1981, the agency gained the following accounts: Gillette Co.'s Atra shaving system, billing $10,000,000, from McCann-Erickson; General Electric's air conditioners, and Pillsbury Co. (frostings and pie crusts).

It lost Hunt-Wesson, billing $8,500,000; Gillette's Daisy razor, billing $2,000,000; Vicks health-care division, billing $14,000,000, to Young & Rubicam; Campbell Soup, billing $12,000,000, to Backer & Spielvogel; Timex Corp., billing $5,000,000; Lever Bros. (Mr. Marinade); 3M Co. (corporate, electrical markets). It did not report overseas account gains and losses.

SSC&B

SSC&B believes that to be effective, advertising has three fundamental jobs to do: (1) To be seen; (2) to be separate, and (3) to build a winning brand personality. The agency has developed a working discipline that applies those principles to all the brands it advertises.





Billings breakdown: Newspapers 18%, magazines 17%, radio 7%, tv 50%, outdoor 2%, business papers 4%, other 2%. The agency has 2,996 employes in 91 offices, including 1,997 in 25 U.S. offices. A year ago it had 3,098 employes in 89 offices, including 2,049 in 24 U.S. offices.

Top execs: Bruce Crawford, parent company president-ceo and chairman, BBDO; Allen Rosenshine, parent company exec vp and president-ceo, BBDO; Steve Kahler and Willi Schalk, exec vps; Raymond McGovern, secretary-general counsel; James A. Cannon and Tom Watson, senior vps; William Wilson, exec vp, BBDO international group.

Phone: (212) 355-5800.

Backer & Spielvogel

Gross Income	1981	1980
U.S.	$27,000,000*	$19,500,000*
Total	$27,000,000*	$19,500,000*

*AA Estimate

Backer & Spielvogel, New York, is estimated to have had gross income of $27,000,000 in 1981 on billings of $180,000,000. Its gross income in 1980 was estimated at $19,500,000 on billings of $130,000,000.

The agency's 1981 volume is estimated to have included $172,000,000 in media and $8,000,000 in capitalized fees. Its 1980 U.S. volume is estimated to have included $124,000,000 in media and $6,000,000 in capitalized fees.

In 1981, the agency gained the following accounts: Miller Brewing Co. (Magnum malt liquor); Campbell Soup Co. (condensed soups, V-8 juice, tomato juice, new products), billing over $12,000,000, from BBDO; Bon Jour Intl., billing $7,000,000, from D'Arcy-MacManus & Masius, and Noxell Corp. (Lestoil cleaner, new products), billing $3,000,000, from Foote, Cone & Belding. It lost no accounts.

Estimated billings breakdown: Newspapers 7%, magazines 20%, network tv 60%, spot tv 13%.

The agency has 324 employes in one office; a year ago it had 226 employes in one office.

Top execs: Carl Spielvogel, chairman-ceo; William M. Backer, president; G. Robert Holmen, exec vp-coo; Robert H. Lenz, exec vp-creative director; Stephen M. Leff, exec vp-director of media services, and Robert R. Meury, exec vp-copy chief. Phone: (212) 556-5200.

About our ad portfolios

We asked a randomly selected group of agencies to submit a statement of philosophy that guides them in creating advertising for their clients and to include a few ads that support their philosophy. Throughout this issue we will present these examples of advertisements and commercials.

Ally wins

(Continued from Page 2)

microwave telephone service in 1969, chose Ally & Gargano as its first ad agency in November, 1979, and now is its largest client in billings. Ally & Gargano claims that its advertising for MCI has been so effective in some cases that it had to be cut back to avoid overloading the microwave system.

Some of advertising's hottest names have worked at Ally & Gargano. Among its alumni are Edward McCabe, president of Scali, McCabe, Sloves; Ralph Ammirati and Martin Puris, chairman and president, respectively, of Ammirati & Puris; David Altschiller, chairman of Altschiller Reitzfeld Solin/NCK, and Dick Raboy, executive vp-creative director, Epstein, Raboy Advertising.

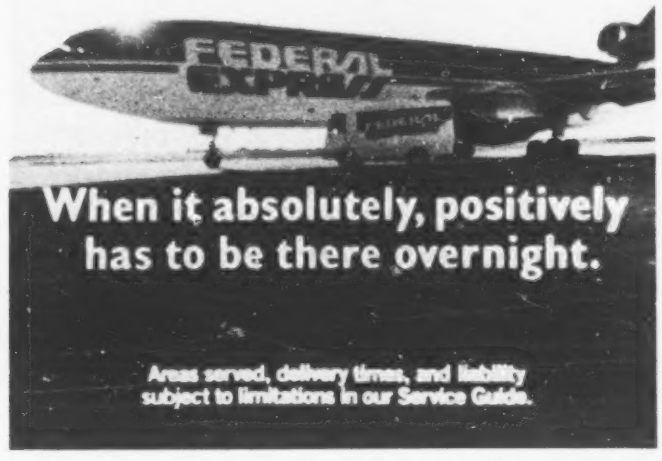
At the same time, however, the agency's present staff includes many who have stayed from the early days: Harold Weston, executive vp-chief financial officer; Chuck Cozzolino, production manager, and Therese Player, vp-account supervisor. Indeed, longevity is the norm rather than the exception, and the shop has acquired an enviable reputation as a place where top-flight talent can be found at every level. Ad people say Ally & Gargano must pay its people well to fight off headhunters.

Despite its impressive recent growth, Ally & Gargano has no intention of becoming a megabusiness *a la* Young & Rubicam or J. Walter Thompson U.S.A., according to Mr. Ally. "I don't have any grand designs," he says. "We can do the work the other agencies do. Size is not where it's at."

A few years ago, the ever-outspoken Mr. Ally said he would go to his grave denying that advertisers get better deals at the big agencies. "Our procedures give better yield," he said. "We initiate research, and as for creative, we wipe out the big shops at the shows."

Nor is Ally & Gargano planning to become a victim of advertising's acquisition fever. "We have very strong feelings about what we do and the way we do it," Mr. Ally says. "We don't need anyone else to tell us what to do." That attitude presumably extends to having public shareholders; the agency drew up and then shelved plans to go public in 1972.

"We are not managers of a big agency making sure that we are now going to acquire another agency next month and the month after that we are going to acquire a direct response agency," adds Mr. Gargano. "We are not in the acquisition business. We are in the advertising business. We are advertising people. We love advertising."#



When it absolutely, positively has to be there overnight.
Areas served, delivery times, and liability subject to limitations in our Service Guide.

Ally's fast-paced, fast-talking commercial for Federal Express reflects the quality of work the agency does for other clients, including Dunkin' Donuts, Pentax and MCI.

How Agency of Year is picked; 6 were finalists

The business of sorting through the serious contenders for Agency of the Year began in earnest in January, when nominations were submitted to the editors by staff members from all Advertising Age bureaus around the country.

During the year, of course, the staff was constantly tossing material into the hopper for use when the deliberations began. Compelling commercials that appeared on tv screens during 1981 were noted; news stories and features that appeared in AA were squirreled away for later consideration.

Our columnists who write about print and broadcast creativity would also cite such efforts during the course of the year. In addition, some hope-filled agencies wrote to us, and the editors took time to review these submissions to make sure no serious contenders were overlooked in the screening.

The single common denominator in all of these deliberations—and a fact often misunderstood by agency executives—is that the editors are looking for pure creative spark.

How well the agency did in garnering new business, in growing through acquisition or in developing a futuristic computerized media buying department, are not important to the search for Agency of the Year. (In most cases, those elements will follow if the agency exhibits the main criterion—creativity. One assumes the agency is relatively well managed and will be around at least until the public announcement is made in mid-March.)

In short, the creative approaches—energy, freshness, sharpness of the product or service's sales message, quality of production values, casting, direction—are the elements that must carry the day. Underlying all of that, of course, is the success of that creative work for the final judge, the client.

In all, the editorial screening committee evaluated approximately 25 agencies that were nominated this year. Six serious contenders reached the "semi-final" stage for the honor.

Those, in alphabetical order, were: Ally & Gargano; Backer & Spielvogel; Bloom Cos.; Geer, DuBois; Ogilvy & Mather, and Young & Rubicam.

The qualities that brought Ally & Gargano the honor were described later by executive editor Fred Danzig as "a consistently high entertainment level that imparts humanity, warmth, understanding, as well as a steel-edged commitment to the business at hand: The sales message."

He added, "Whether in clear, forceful demonstrations or in narrative form, the agency's commercials always project a clear sense of purpose. To be able to achieve so much and still produce a commercial that is fun to watch, that entertains the viewer even as it makes its sales point, is to capture the best qualities of advertising."

The criteria for selecting Agency of Year

In selecting an Ad Agency of the Year, Advertising Age editors concentrated on the creative product, including copy, creative strategies, merchandising, media planning and research. Because agencies vary in size, scope, management orientation and organizational achievement, AA believes any evaluation of this sort should focus entirely on ads, their relationship to today's market dynamics and their effect on sales. Advertising campaigns—the agency's end product—thus represent a universal denominator that provides broad eligibility for selection as Agency of the Year. Last year's agency of the Year was Chiat/Day.

Production credits

In addition to members of the Advertising Age staff listed on the masthead who worked on this year's Agency Income issue, this special report was produced by the following members of the Advertising Age Magazine staff: Marion Elmquist, editor; Mark Watanabe, managing editor; Geoffrey Shives, art director, and Pat Thomas, production editor, as well as free lance writer and editor Craig Endicott.

Gross income over $15,000,00

Ted Bates & Co.

Gross Income	1981	1980
U.S.	$129,660,000	$108,047,000
International	107,055,000	102,532,000
Total	$236,715,000	$210,579,000

Ted Bates & Co., New York, reported gross income of $236.715,000 on billings of $1,578,101,000. Its gross income in 1980 was $210,579,000 on billings of $1,404,100,000.

The agency's 1981 U.S. volume of $860,400,000 included $687,265,000 in media, $83,692,000 in materials and services and $89,443,000 in capitalized fees. Its 1980 U.S. volume of $720,313,000 included $573,791,000 in media, $74,620,000 in materials and services and $71,902,000 in capitalized fees.

The agency's 1981 overseas volume of $717,701,000 included $479,533,000 in media, $59,860,000 in materials and services and $178,308,000 in capitalized fees. Its 1980 foreign volume of $683,787,000 included $464,160,000 in media, $65,028,000 in materials and services and $154,599,000 in capitalized fees.

Included in the agency's figures are the billings and gross income of the following subsidiaries: AC&R Advertising; Campbell-Mithun; Diener/Hauser/Bates; McDonald & Little; Sawdon & Bess, and Stern Walters/Earle Ludgin. Last month, Bates was the architect of the largest agency merger in history when it acquired William Esty Co., whose gross income in 1981 was $66,750,000. Esty's results will be reflected in Bates' report next year.

In 1981, the agency gained Brown-Forman, billing $4,000,000 and resigned by Calet, Hirsch, Kurnit & Spector. It reported no losses.

Its overseas gains included: Sauter Laboratories, Pechiney Ugine Kulhmann's steel division (France); Effem's Trim (Germany); Data General (Spain); Phillips Petroleum, British American Tobacco (Norway); Nikon (Netherlands); DHL worldwide account, Mars' Relay (U.K.); BASF, Mars Inc. (Argentina); Richardson-Vicks (Australia); Effem's Chappi, Agfa-Gevaert (Belgium); Estee Lauder (Italy and Greece). Losses included: Lancia (Germany); Cerdiam (Belgium), BP Australia (Australia); Olympia Business (U.K.); Peugeot (France).

Billings breakdown: Newspapers 11%, magazines 12%, radio 7%, network tv 36%, spot tv 32%, outdoor 2%. The agency has 4,247 employes in 73 offices, including 2,054 in 13 U.S. offices. A year ago it had 3,896 employes in 61 offices, including 1,844 in 13 U.S. offices.

Top execs: Robert E. Jacoby, chairman, president-ceo; Robert A. Bruns, Stephen Rose, Donald M. Zuckert, exec vps, and A. Michael Frothingham and Robert J. Preis, senior vps.

Benton & Bowles

Gross Income	1981	1980
U.S.	$81,400,000	$73,800,000
International	46,100,000	44,700,000
Total	$127,500,000	$118,500,000

Benton & Bowles, New York, reported gross income of $127,500,000 in 1981 on billings of $870,000,000. Its gross income in 1980 was $118,500,000 on billings of $806,000,000.

The agency's U.S. volume of $541,000,000 consisted of $438,000,000 in media and $103,000,000 in capitalized fees. Its 1980 volume of $492,000,000 included $401,000,000 in media and $91,000,000 in capitalized fees.

The agency's overseas volume was $329,000,000 in 1981 and $314,000,000 in 1980.

Accompanying its income report, Benton & Bowles noted that if 1980 results were restated at the same foreign exchange rates used in converting 1981, B&B International's income would have increased 21.3% or $8,100,000. As a result, worldwide income would have registered a 14.2% increase or $15,900,000 more than recorded in 1980.

Included in the agency's figures are the billings and income of the following U.S. subsidiaries: B&B Direct; Manning, Selvage & Lee, a pr shop; Medicus Intercon International; Ted Colangelo Associates, and Telecom Entertainment Inc.

In 1981, the agency gained the following accounts: Blistex; Emery Worldwide, billing $10,000,000 from Della Femina, Travisano & Partners; Estech Inc.; FirstBank Evanston; Jos. Garneau Co. (Ambassador scotch, Cella wines and Martell cognac); Magic Pan Restaurants, Pinkerton Tobacco, billing $4,000,000; RCA Music Service, billing $6,000,000 from Rapp & Collins; Richardson-Vicks (Synex), billing $3,000,000; Showtime, billing $2,000,000, and Texas Commerce Bancshares.

It lost AMF-Leisure Products (certain divisions) billing $6,500,000; Continental Airlines, billing $18,000,000 to Wells, Rich, Greene; Fiat autos; Holland America, billing $10,000,000; Jacobsen, and Kitchens of Sara Lee.

Overseas, it gained over 50 accounts, including Yamaha (Belgium), Procter & Gamble (Germany), Richardson-Vicks (Spain) and Wrangler jeans (France). It lost 14 accounts overseas.

Billings breakdown: Newspapers 7%, magazines 15%, radio 4%, network tv 42%, spot tv 23%, outdoor 1%, business papers 3%, transit 1%, p.o.p. 1%, direct mail 3%.

The agency has 2,890 employes in 59 offices, including 1,464 in 18 U.S. offices. A year ago it had 2,911 employes in 50 offices, including 1,447 in 14 U.S. offices.

Top execs: John Bowen, president-ceo; Victor Bloede, chairman; Charles Blakemore and Roy Bostock, exec vps; Theodore Burnett, Theodore Dunn, John Ferries, Joseph Hannan, Bernard Kanner, Robert Lyman, Michael Moore, George Simko, James E. Pinkin, senior vps; Frederick Sulcer, president, Medicus Intercon Intl., and Robert N. Schwartz, president, Manning, Selvage & Lee.

Bozell & Jacobs

Gross Income	1981	1980
U.S.	$61,700,000	$57,500,000
International	900,000	750,000
Total	$62,600,000	$58,250,000

Bozell & Jacobs, New York, reported gross income of $62,600,000 in 1981 on billings of $425,700,900. Its gross income in 1980 was $58,250,000 on billings of $388,500,000.

The agency's 1981 U.S. volume of $420,000,000 included $279,700,000 in media, $72,300,000 in materials and services and $68,000,000 in capitalized fees. Its 1980 U.S. volume of $383,600,000 included $250,200,000 in media, $68,200,000 in materials and services and $65,200,000 in capitalized fees.

The agency's overseas volume was $5,700,000 in 1981 and $4,900,000 in 1980. In 1981, the agency gained the following accounts: American Airlines, billing $45,000,000 and resigned by Doyle Dane Bernbach; Armstrong Tire, billing $2,000,000; Johnson Matthey Jewelry; Norwegian

How Barclay lit up the numbers with the right toll-free service.

When Brown & Williamson introduced Barclay, they bucked tough odds.

New cigarette brands tend to burn out fast.

But B & W chose a bold strategy. Print ads offered readers a *free carton* of Barclay *instantly* just for phoning an (800) Toll-Free service.

The results? An impressive share of the market in what was called "one of the most successful cigarette introductions of the last 10 years."*

While our policy of confidentiality doesn't allow us to go into specifics, we can detail concrete methods for maximizing results on *your* next new project. If you're a new product decision maker, don't approve a layout or a media buy until you've talked to WATS Marketing about the power of Toll-Free.

Call James Lynch, Director of Marketing at (800) 228-2228.

It's the key number in the bottom lines of some of America's most successful campaigns.

WATS MARKETING OF AMERICA

An affiliate of American Express

*ADWEEK, July 20, 1981

Gross income over $15,000,00

America Cruises, billing $3,000,000 from Homer & Durham; Days Inns of America, billing $2,000,000; Godfather's Pizza; Speedy Muffler King, billing $3,000,000, from Doyle Dane Bernbach; Onan Corp.; Litton Microwave Cooking; Armour Products Inc.; L.S. Heath & Sons; Republic Bank of Houston; Union Carbide and *Seventeen* magazine.

It lost Minolta cameras, billing $15,000,000, to William Esty Co.; Pearle Vision, billing $15,000,000, to Foote, Cone & Belding; Quaker Oats, and Renfield Importers, billing $3,500,000.

The agency's foreign gains: Stetson Rodeo, Canadian National Express, Westinghouse, Allan Candy and American Airlines. Its overseas losses: Intl. Paints, Sifto salt, ACL Containers and Nordair.

Billings breakdown: Newspapers 18%, magazines 30%, radio 9%, network tv 4%, spot tv 36%, outdoor 1%, Yellow Pages 2%.

The agency has 1,393 employes in 18 offices, including 1,300 in 13 U.S. offices. A year ago it had 1,304 employes in 17 offices, including 1,269 in 13 U.S. offices.

Compton Advertising

Gross Income	1981	1980
U.S.	$59,823,000	$51,151,000
International	59,055,000	43,350,000
Total	$118,878,000	$94,501,000

Compton Advertising, New York, reported gross income of $118,878,000 in 1981 on billings of $812,580,000. Its gross income in 1980 was $94,501,000 on billings of $639,911,000.

The agency's 1981 U.S. volume of $420,370,000 included $299,372,000 in media, $45,264,000 in materials and services and $75,734,000 in capitalized fees. Its 1980 U.S. volume of $350,911,000 included $256,137,000 in media, $43,274,000 in materials and services and $51,500,000 in capitalized fees.

The agency's figures include the billings of its U.S. subsidiaries, Rumrill-Hoyt; Ross Roy New York/Compton; Cadwell Davis Savage; Klemtner Advertising, and Hoffman York & Compton. The agency's overseas volume was $392,210,000 in 1981 and $289,000,000 in 1980. The agency attributed its international growth to the acquisition last year of KMP Partnership Ltd., a London-based agency with billings of $45,000,000 and substantial growth of the Saatchi, Saatchi, Compton organization, in which Compton holds a minority interest.

In 1981, the agency gained the following accounts: American Motors intl. operations, billing $12,500,000, from Grey Advertising; Buitoni Foods, billing $1,000,000, and the *National Enquirer*.

It lost Duffy-Mott, billing $2,000,000; Allan Beverages; First Federal of Broward; Italian Ceramic Tile, and Viacom Inc.

Billings breakdown: Newspapers 4.8%, magazines 28.6%, radio 2.2%, network tv 63.2%, outdoor 0.6%, point of sale 0.3%, Yellow Pages

How to find an agency that's right for you without having to talk to 50 that aren't.

Review hassle? AAR offers help

By CHRISTY MARSHALL

NEW YORK—When Coty International recently decided it was time for an agency review, it did not go to the *Red Book* for guidance, nor to the stars. Instead it went to the Advertising Agency Register.

The AAR was founded eight years ago in London by Lyndy Payne. It was conceived when a friend of hers, famous for his punctuality, was 20 minutes late because he was in the midst of shopping for a new agency—a process he found long and torturous.

"He said, 'There must be some way to shortcut this.'" Ms. Payne recalled. She agreed. She went on to found the shortcut.

Ad agencies join the AAR by paying a $4,000 annual fee and putting their work on file at the office, either in London or here in New York. The work includes a 10-minute videotape presentation about the agency and its work, a background document on the agency and a folder of current print/promotional work.

▪ When an advertiser decides it is time to review its agency setup, it can call Ms. Payne in London or Leslie Winthrop in the office here to preview the work of the 217 agencies registered—145 in London and 72 in New York.

After the client calls, AAR sends it a long list of possible shops for the account. The list includes briefs about the agencies and mini-case histories. After the client decides which agencies he wants to see, he goes to the AAR office to view videotapes. The agencies on the presentation list are alerted to be available for questions, but they are not told who will be asking. Confidentiality is the key.

After that list has been whittled down to a few finalists, the AAR staff makes appointments for the agencies and advertisers to meet. Then the AAR's job is done. It steps out and lets the client choose the winner. The advertiser pays AAR a fee of $1,500 for the service.

Recently the AAR ran a special deal, offering the service free to first-time users. Tom Eppes, director of creative services at Days Inns of America, Atlanta, took AAR up on its offer and conducted the company's review through the service. He had had a brush with agency review mania a year earlier when the press learned that Days Inns was looking for a new shop. He received hundreds of calls, and it was, in his view, "a nightmare."

This time around, Days Inns executives flew here to view the tapes on Aug. 14, and by Sept. 11 the finalists had made formal presentations. By the end of the company's fiscal year, Sept. 30, Bozell & Jacobs had been appointed the new agency. And if Mr. Eppes found himself in another review, he said he would use AAR again.

▪ The clients who have tapped AAR have budgets ranging from $500,000 to $25,000,000 in billings. The agency members run the gamut from small to very large. The group here currently includes agencies such as Ally & Gargano; N W Ayer; BBDO; Benton & Bowles; Bozell & Jacobs; Cadwell Davis Savage; Compton Advertising; Cunningham & Walsh; Dancer Fitzgerald Sample; Foote, Cone & Belding; F. William Free & Co.; Geer, DuBois; Geers Gross; Grey Advertising, Conahay, Lerner & King; Jim Johnston Inc.; Jordan, Case & McGrath; Kornhauser & Calene; Al Paul Lefton Co.; Marsteller Inc.; Mathieu, Gerfen & Bresner; McCann-Erickson; Nadler & Larimer; Ogilvy & Mather; Posey, Parry & Quest; Shaller Rubin Associates; Sherwood & Schneider; SSC&B; TBWA Advertising; J. Walter Thompson U.S.A., and Warwick, Welsh & Miller.

▪ Overseas, AAR has expanded to Paris and now Munich. Ms. Payne had planned to open additional offices in the U.S. (AA, Feb. 18, '80), but according to Ms. Winthrop, the agency has not found any need to afte. all.

"We have been able to service the whole U.S. with one office," Ms. Winthrop said. "Right now, we haven't had a client who would not come to New York or who we wouldn't go to. I haven't seen any reason to open another U.S. office."

Advertisers also have used the service for training. One company sent its product managers to AAR for a run-through of a trial agency review. Another company has an annual review of the videotapes just to be au courant on the latest creative.

"Advertisers' attitudes toward agencies are usually two years out of date," Ms. Payne said. #

AAR has since expanded its services by increasing its network of member agencies coast to coast.

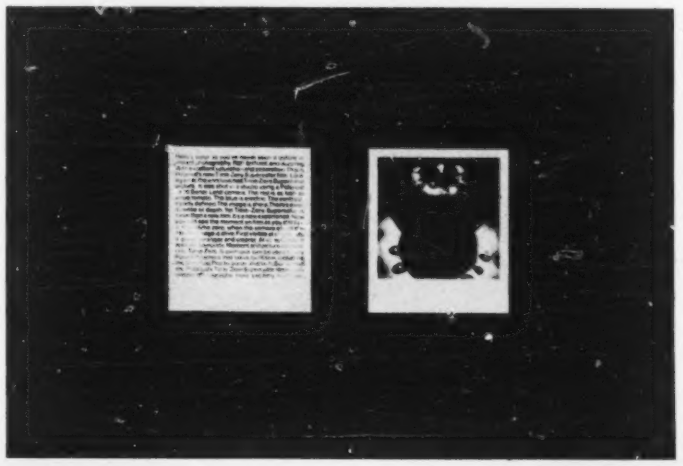
Doyle Dane Bernbach

We were conceived in the belief that you can do everything right in the marketing process and still fail if your advertising message, however right it may be, isn't phrased and pictured by a great talent that pierces a customer's wall of resistance. Our goal is to gain all the marketing knowledge we can about a problem. But we know that knowledge is just a beginning, not an end. It's how creatively you use that knowledge that makes the sale. Properly practiced, creativity must result in greater sales more economically achieved. Properly practiced, creativity can lift claims out of the swamp of sameness and make them accepted, believed, persuasive, urgent. It's the most practical thing a business can employ.



Gross income over $15,000,00

Pelligrino (Italy); Philips Radio, Wasa (Denmark); Pernod, Heinz (Belgium); Combe (France, Austria); Laker Airways, Weetabix (Britain).

Looking back at Agency Income

Advertising Age began reporting annual agency income in 1945 with two separate listings, one in January with the billings of 22 large agencies for the previous year, the second in February with billings of 29 medium-sized agencies.

For those who thrive on statistics, the No. 1 agency was J. Walter Thompson, who reported 1944 billings of $72,000,000 (at least $12,000,000 of which was foreign billings). Young & Rubicam was a distant second at $51,000,000, with N. W. Ayer & Son in third place at $33,000,000.

Rounding out the top 10 were McCann-Erickson; Foote, Cone & Belding; Batten, Barton, Durstine & Osborne; Ruthrauff & Ryan; Dancer-Fitzgerald-Sample; Compton Advertising and Newell-Emmett Co.

The billings of the 22 large companies in that survey were $515,000,000. And in this year's issue, the largest agency alone, Young & Rubicam, billed $2.35 billion—more than four times that combined amount.

Among the client switches that took place during 1944: Old Gold cigarets, from Thompson to Lennen & Mitchell; National Cash Register, from Ayer to McCann-Erickson; Bon-Ami, from McCann to BBDO; Northwest Airlines, from BBDO to Newell-Emmett, and Yuban coffee, from Charles W. Hoyt to Benton & Bowles.

Eisaman, Johns & Laws

Gross Income	1981	1980
U.S.	$16,450,000	$11,125,000
Total	$16,450,000	$11,125,000

Eisaman, Johns & Laws, Los Angeles, reported gross income of $16,450,000 on billings of $114,656,450. Its gross income in 1980 was $11,125,000 on billings of $74,175,000.

Volume in 1981 consisted of $103,655,000 in media, $8,100,000 in materials and services and $2,901,450 in capitalized fees. In 1980, volume consisted of $63,900,000 in media, $7,625,000 in materials and services and $2,650,000 in capitalized fees.

In 1981, the agency gained the following accounts: Acme Markets Inc., billing $8,000,000, from inhouse; Atlas Processing Co.; Blue Cross of Southern California; Carole Little for Saint Tropez West; Fujitsu Ten Corp. of America; Neutrogena Corp., billing $3,000,000, from Hall & Levine; Petersen Publishing; Skaggs/Alpha Beta supermarkets; Texsun Corp.; U.S. Home Corp.; Wendy's Intl. (Phoenix, Pacific Southwest), billing $1,000,000, and Chevrolet Dealers Advertising Assns. in Central Florida, Jacksonville, Salt Lake City/Valley and Western Washington.

It lost GTE (commercial classified directories), Purex (Ayds) and Cerveceria Cuauhtemoc (Carta Blanca and Bohemia beers).

Billings breakdown: Newspapers 8%, magazines 28%, radio 15%, network tv 17%, spot tv 29%, outdoor 3%.

The agency has 209 employes in four offices; a year ago it had 185 in four offices. Top execs: Jess M. Johns, chairman-ceo; J.R. Eisaman III, president; Robert F. Laws, exec vp; Adrienne Hall, vice-chairman, and Jack Leener, Don Pingaro and Hoyt Adams, exec vps. Phone: (213) 469-1234.

How rise in dollar affects income

For the first time in several years, agencies with overseas business have been "penalized" on their balance sheets by a dramatic rise in the value of the U.S. dollar.

A "corrective" procedure to demonstrate an agency's growth in the international arena would have been to restate the 1980 results of an agency by applying the same exchange rates determining 1981 figures.

However, such a restatement of 1980 figures that ran in the Advertising Age Agency Income issue last year would be counter to standard accounting practices and would distort the continuity of carrying forward the same figures from year to year as practiced in this income and billings issue.

Under accepted account principles, agencies are required to translate monetary items like gross income at exchange rates current to the reporting period. This principle has nothing to do with agency growth from year to year since it distorts growth regardless of whether the dollar is up or down.

A dramatic example of how this principle distorts growth is illustrated by McCann-Erickson International, which generally accounts for 75% of total gross income of McCann-Erickson Worldwide. This international arm had gross income of $268,686,000 in 1980. That figure was based on current exchange rates in which foreign currencies in general were appreciating against the dollar. However, with the dollar on the rebound the past year, that figure would be knocked down to $239,954,000 at today's exchange rates, reflecting a depreciation of foreign currencies against the dollar in 1981. If restated to the lower figure, M-E Worldwide would show an over-all annual growth of 20.4% based on 1981 total gross income of $288,954,000, compared with growth of only 7.5% if the 1980 figures were not restated.

Agencies accept the principle of using current exchange rates as one of the vagaries of doing business abroad. If the agency is public, it often publishes a chart showing the growth of its various agencies in their local currencies, or it may take an exchange rate comparable to both years to demonstrate growth by way of explaining how swings in foreign exchange rates over the entire year distorted its growth.

To comply with standard reporting practices, Advertising Age is not restating figures reported for the previous year, but has given agencies with sizable international holdings the option to comment on its year-earlier figures appearing in the profiles.

William Esty Co.

Gross Income	1981	1980
U.S.	$66,750,000	$58,500,000
Total	$66,750,000	$58,500,000

William Esty Co., New York, reported gross income of $66,750,000 in 1981 on billings of $445,000,000. Its gross income in 1980 was $58,500,000 on billings of $390,000,000. Last month, Esty and Ted Bates & Co. engaged in the biggest merger in industry history, with Esty becoming an autonomous operating unit of Bates.

Volume in 1981 consisted of $407,000,000 in media and $38,000,000 in materials and services. In 1980, volume consisted of $353,000,000 in media and $37,000,000 in materials and services.

In 1981, the agency gained the following accounts: Marriott Corp.'s Great America theme park division; Minolta Corp.'s photographic division, billing $16,000,000, from Bozell & Jacobs; Ekco Housewares Co., billing $2,000,000; Chesebrough-Pond's Vaseline Dermatology Formula lotion and cream; Ayerst Labs; Interbank Card Assn. (Gold Mastercard and Mastercard travelers cheques); Nabisco Inc.'s Waverly crackers and Mister Salty pretzels, and Warner-Lambert's Listermint mouthwash, billing $7,000,000, from J. Walter Thompson Co.

It lost American Can Co.'s Gala towels and Northern tissues, billing $3,000,000.

Billings breakdown: Newspapers 13%, magazines 12%, supplements 4%, radio 5%, network tv 36%, spot tv 17%, cable tv 1%, outdoor 9%, business papers 0.5%, farm publications 0.5%, transit 0.5%, p.o.p. 0.5%, other 1%.

The agency has 622 employes in two offices; a year ago it had 616 employes in two U.S. offices. Top execs: Robert B. Betts, chairman-ceo; John H. Peace, chairman, executive committee; Gordon Bushell, vice-chairman, and Paul R. Dooling, president. Phone: (212) 697-1600.

Foote, Cone & Belding

Gross Income	1981	1980
U.S.	$116,521,000	$109,187,000
International	53,745,000	55,297,000
Total	$170,266,000	$164,504,000

Foote, Cone & Belding Communications, Chicago, reported gross income of $170,266,000 in 1981 on billings of $1,153,344,000. Its gross income in 1980 was $164,504,000 on billings of $1,118,818,000.

The agency's U.S. volume was $794,863,000 in 1981 and $749,318,000. Those figures were not broken down.

The agency's overseas volume was $358,481,000 in 1981 and $369,500,000 in 1980.

FCB's figures include the billings and gross income of Foote, Cone & Belding/Honig; Wahlstrom & Co.; Aitkin-Kynett; Albert- Frank/FCB; Deutsch, Shea & Evans, and Carl Byoir Associates, a pr shop.

In 1981, it gained the following accounts: Kitchens of Sara Lee; Pearle Vision Centers, billing $15,000,000, from Bozell & Jacobs; Volume Shoe Corp.; Corning Glass; Woodside Travel; Knapp Communications; Lipton; California Milk Advisory Board; First Interstate Bank of Oregon; INA Ross Loos Healthplan Inc.; Dreyer's Grand ice cream, and Alaska Tourism.

It lost Hiram Walker; Noxell Corp. (Lestoil, new products) billing $3,000,000; Tahiti Tourist Board; Velvet Turtle Restaurants, and Hunt-Wesson Refrigerated Foods.

The agency's overseas account gains included Spies Rejser (Denmark); Banque Bruxelles Lambert (Belgium); Toshiba (England); Wrigley (England); Sony (France); British Leyland (England, Europe); International Harvester (Europe, Africa, Middle East); Elf Gasoline (Italy); Black & Decker (Spain); Clorox (Puerto Rico); Cinzano (various countries); General Mills Toys (Europe), and Duracell batteries (South Africa).

Its overseas losses: Douwe Egberts (France); Pfanni (Germany); GFT men's suits (Italy); Gillette (Spain & Australia); Jack in the-Box (Brazil), and IBM Computers (Hong Kong).

Billings breakdown: Newspapers 6.5%, magazines 21.8%, supplements 5%, radio 6.7%, network tv 44.4%, spot tv 15%, outdoor 0.6%.

The agency has 3,790 employes in 35 offices, including 2,250 in eight U.S. offices. A year ago it had 3,750 employes in 33 offices, including 2,330 in eight U.S. offices.

Top execs: Arthur W. Schultz, chairman, executive committee; John E. O'Toole, chairman-chief creative officer; Norman W. Brown, president-ceo; Robert M. Trump, chairman, finance committee; Willard R. Wirth Jr., exec vp-administration; Allan Wilson Jr., senior vp-finance; Abbott C. Jones, president, FCB Advertising; David Ofner, president, Foote, Cone & Belding Advertising; Louis E. Scott, vice-chairman, FCB/Honig; Thomas F. Randolph, president, FCB/Honig, and Eduard Grosse, chairman, FCB International. Phone: (312) 467-9200.

Grey Advertising

Gross Income	1981	1980
U.S.	$94,400,000	$78,700,000
International	39,000,000*	40,721,000*
Total	$133,400,000*	$119,421,000*

*AA Estimate

Grey Advertising, New York, is estimated by Advertising Age to have had gross income of $133,400,000 in 1981 on billings of $889,800,000. In 1980 it was estimated to have had gross income of $119,421,000 on billings of $795,509,000.

AA estimated Grey's 1981 performance because the agency uses a formula that includes the total income and billings of overseas agencies, some of which it does not own 100%.

The agency's 1981 U.S. volume of $629,800,000 included $595,100,000 in media and $34,700,000 in capitalized fees. Its 1980 U.S. volume of $524,900,000 included $495,900,000 in media, and $29,000,000 in capitalized fees.

The agency's overseas volume is estimated at $260,000,000. Its 1980 foreign volume was estimated at $270,609,000.

Included in the agency's U.S. figures are the gross income of Grey, Lyon & King; Grey Direct; Grey Medical; Lexington Broadcast Services; Entertainment/Leisure division; Beaumont-Bennett, and Grey & Davis, a pr operation.

In 1981, the agency gained the following accounts: Northwest Orient Airlines, billing $10,000,000, from Campbell-Mithun; Panasonic, billing $9,000,000; Renault; Brown & Williamson's Viceroy cigarets; STP Corp., billing $17,000,000, from Henderson Advertising; Remington, billing $7,000,000; AMAX Inc.; Boehringer Ingelheim; Revlon's Scoundrel; Mennen's Balm Barr; Timex gift advertising; Kenner's Spirograph; Intl. Harvester; White Stores; Aldens; State National Bank of Evanston; Continuous Curve contact lenses; Barnes-Hind Pharmaceuticals; Horizon Industries; Pickwick Discount Book, and J.B. 2 Corp.

It lost Elaine Powers and Kendall oil.

Its overseas account gains included American Home Products (Peru); Bank of America (travelers

Marsteller Inc.

Gross Income	1981	1980
U.S.	$50,157,000	$44,675,000
International	21,553,000	21,268,000
Total	$71,690,000	$65,943,000

Marsteller Inc., Chicago, a sub-

In Houston, there are still some decision makers who don't read The Chronicle.

Houston's two newspapers cost about the same.

Yet among newspaper readers in professional, managerial and technical occupations, roughly two-thirds choose The Chronicle. That's 307,000 daily, 350,000 on Sunday.

In fact, The Chronicle leads the entire Southwest in total readership, as well as circulation and ad linage.

So if you're trying to reach Houston's decision makers, the decision should be easy.

For more information, call our national representative, Sawyer Ferguson Walker.

U.S.	$153,700,000	$135,300,000*
International	178,000,000	184,700,000
Total	$331,700,000	$320,000,000*

*Revised by AA

J. Walter Thompson Co., New York, reported gross income of $331,700,000 in 1981 on billings of $2,212,700,000. Its gross income in 1980 is estimated by Advertising Age to have been $320,000,000 on billings of $2,120,700,000. The revision by AA consisted of a reduction of $2,500,000 in the agency's gross income and $17,000,000 from its U.S. billings for 1981 in connection with JWT's pre-tax writeoff of $18,000,000 stemming from fictitious transactions uncovered within its JWT Syndication & Spot TV Sales unit for the years 1978-81.

JWT, the largest subsidiary of J. Walter Thompson Group, a holding company formed in June, 1980, had U.S. volume of $1,025,400,000 in 1981 and estimated volume of $901,900,000 in 1980. Those figures were not broken down.

Included in the agency's figures are the billings and gross income of World Wide Agency, specializing in recruitment advertising, and Brouillard Communications. These units, coupled with other subsidiaries operating within JWT Group, gave the parent company gross income of $403,900,000 in 1981 on revenues of $2,694,300,000. In 1980, JWT Group's reported gross income of $359,500,000 on billings of $2,384,200,000. Other units within JWT Group include Hill & Knowlton, the world's largest pr agency; Euro-Advertising; Lord, Geller, Federico, Einstein; Survival Anglia, and Simmons Market Research Bureau. Among the subsidiaries, only Lord Geller, Federico, Einstein is included among profiles in this issue.

The agency's overseas volume was $1,187,300,000 in 1931 and $1,218,800,000 in 1980. In 1981, the agency gained the following accounts: Genesco Inc., billing $6,500,000; Hewlett Packard; Home Federal S&L; Lowes Inc. (kitty litter); Munsingwear Inc., billing $3,000,000; Nestle Co.; Northern Telecom; OTC NET Inc.; Six Flags Over Georgia; Southern Pacific Communications; Terson Co. (snack candies); Castle & Cooke Foods, billing $4,000,000, and Sears, Roebuck & Co. (Los Angeles and Southwest Group).

The entertainment division gained New York City Opera; Lansdowne added Christian Dior; Duro-Test Corp., and Knomark (Ty-D-Bol), and Brouillard gained Bendix Corp.; Harris Corp.; Penn Central Corp. and Southern Natural Resources.

JWT's losses included a portion of the $25,000,000 Southland Corp. (7-Eleven Stores) account, to Young & Rubicam; Bausch & Lomb, billing $1,000,000; Blue Cross of Southern California; California Milk Advisory Board; Mentholatum, billing $2,000,000; Salada Foods, and Teledyne Water Pik, billing $5,000,000.

Among JWT's overseas gains: Campari (Belgium); CMA and Herte (Germany); Pepsi-Cola (Britain, Philippines); Kodak (Greece); Calve (Holland); Gureola-Scott (Spain); Orlando wines (Australia); Christian Dior (Japan); Kodak (Philippines); Kellogg (New Zealand); Dole bananas (Argentina); Zanussi and Goodyear (Venezuela); R.J. Reynolds (Brazil), and Olivetti (Peru).

Among its overseas losses: Guinness and Beecham Foods (England), Bacardi (Italy); Singer (Spain); Johnson & Johnson's Tylenol (Hong Kong), and Kodak Ektra (Brazil).

Billings breakdown: Newspapers 12.6%, magazines 12.7%, radio 6.4%, network tv 29.6%, spot tv 21.4%, outdoor 1.5%, farm publications 2.4%, direct mail 0.5%, other 12.9%.

The agency has 7,419 employes in 104 offices, including 3,102 in 61 U.S. offices. A year ago it had 7,242 employes in 104 U.S. offices, including 2,868 in 61 offices.

SOONER OR LATER

Sooner or later, you're going to discover that their small parcel service isn't the fastest after all. American's Priority Parcel Service can often get your package there hours earlier. We deliver within hours, 24 hours a day to virtually anywhere we serve in the continental U.S., Hawaii, Canada. Mexico and the Caribbean. So your package gets there sooner, instead of later.

If you can't wait overnight, our in-hours alternative is as easy as dialing toll-free (800) 638-7320. In Maryland, call (301) 269-5503. Just ask for Priority Parcel Service and we'll provide door-to-door pickup and delivery anytime, day or night, seven days a week.

When a few hours can make all the difference, call us immediately. When we can get it there sooner, why wait till later.

AmericanAirlines Priority Parcel Service

Ted Bates & Co.

The Ted Bates philosophy of USP advertising (Unique selling proposition) provides powerful and distinctive advertising to a wide spectrum of our clients, including package goods, consumer durables, services, corporate communications and the U.S. Government. The USP "Get a piece of the Rock," has set Prudential apart from all other insurance companies. The advertising for Rolaids asks the question, how do you spell relief? And, the USP answers it, "Rolaids spells 100% relief." Maybelline's Great Lash is set apart from all other mascaras with the USP "Conditions as it thickens." The excitement and entertainment value of Home Box Office is communicated in the USP, "HBO people don't miss out."

Smith/Greenland

Do you have Media GAP-O-SIS?*

***Holes in your national coverage**

Many media plans concentrate on major metro markets for good reasons.

BUT — there are thousands of good, growing businesses and hundreds-of-thousands of high income consumers out there in those B, C, and D counties, too.

How to skim that cream efficiently at moderate cost? Take a look.

Your ad in THE ROTARIAN sells 478,000 ABC-audited influential and affluent business and professional men and consumer families who believe in Rotary and our book. 91% readership at home. Dual audience. Consider —

COMMUNITY / OPINION LEADERS

* Members of more than 6,000 Rotary Clubs in the U.S.A.
* 93% own homes (median value $70,000).
* 63% belong to local Chamber of Commerce.
* 87% live in B, C, or D counties (where other books reaching an upscale audience are relatively weak).

LOCAL BUSINESS LEADERS

* 81% have company purchase authority.
* 52% TOP management; 15% middle management.
* 21% professional men (you don't reach many in the "standard business books").
* 87% attended college — 66% grads.
* $45,000+ incomes (average).
* Median age primary audience, 53 (42 for total audience: MRI).

THE ROTARIAN can go a long way toward curing your GAP-O-SIS by extending your coverage to a select audience in the un-giant markets. For less than $8 cpm, it may be just what you need in your media mix. Get our complete Harvey Research Study and details. Contact our rep or —

Weightman Inc.

Weightman Inc.'s goal is to have the consumer say, "Wow! What a great product," not "Wow! What a great commercial." The paradox in getting this message across is the use of sophisticated research as a guide in what essentially is an art—persuasive communications. In the final analysis, we measure our success or failure the same way clients do—sales. Our philosophy of advertising is illustrated by the Alpo dog food campaign. In the fiercely competitive dog food industry, Alpo continues to be the No. 1 canned dog food, a position it has held the past 10 years.

Kamstra Communications, St. Paul, Minn., had estimated gross income of $1,410,000 in 1981 on billings of $9,400,000. In 1980, it had estimated gross income of $900,000 on billings of $6,000,000. Cole & Weber

We go with power and size over frequency almost any day. That's one agency "by-law" adhered to in C&W's introduction last year of the Boeing 767. Such a major event required power advertising, including spreads to reflect the significance of the new product and the considerable research effort that went into the production of the 767. Another tenet, solving the problem of a client in a concise and direct manner in a way no one else has thought of, is something all ad agencies strive for, and C&W believes it has achieved with Westin Hotels in pitching the hotels not only to the businessman but the businesswoman who has discriminating tastes.
